Such a bill actually passed the House of Representatives by a lopsided margin in 1969—only to be filibustered to death by Senators who felt that it would diminish their states' power. But the Electoral College system makes possible the election of a President who receives fewer popular votes than his opponent. This has occurred three times (John Quincy Adams, Rutherford B. Hayes and Benjamin Harrison), and almost happened again in 1968 and in 1976.

Reform 6. Perhaps the most controversial innovation Americans advocate is the right to be consulted on important legislation. By a majority of 57 to 21 percent (with 22 percent undecided), in a recent Gallup poll, they supported a proposal introduced by Senators James Abourezk (D., S.D.) and Mark Hatfield (R., Ore.) that would allow Americans to initiate federal legislation when a group of voters equal to three percent of the number who voted in the last Presidential election sign a petition requesting such a vote. Although the procedure would be new to the federal government, it is a familiar practice in almost half the states.

The initiative—or the threat of invoking one—should expedite passage of legislation bottled up in Congress for years. Were the measure in effect now, our Gallup surveys indicate that:

Mandatory busing to achieve racial balance in schools would be abolished by 65 percent of the voters.

The Equal Rights Amendment for women (ERA) would be approved by a majority of 57 percent, including more men than women.

Tough gun-control laws requiring the licensing of all firearms carried outside the home would be enacted by 77 percent, including a large majority of gun owners.

Achieving the reforms referred to in this article would necessitate amending the Constitution in some cases. The customary procedure requires passage of each amendment by two thirds of each House of Congress, then three fourths of the state must approve. It is unlikely, however, that many Congressmen or Senators would approve legislation diminishing their powers and curtailing their continuance in office.

A surer way to get the proposals considered by the nation, as President Eisenhower pointed out, is through the alternate method of amendment prescribed by the Constitution—a constitutional convention, which can be assembled at the request of two thirds of the states. (The amendments would also have to be ratified by the legislatures of three fourths of the states. However, they require only a simple majority vote to be passed at the constitutional convention itself.)

Amending the Constitution that has served the nation so well is not a step to be undertaken lightly, and some suggest that a constitutional convention might itself carry risks. But the measures described here, in my opinion, would help restore the kind of government that the framers of that document actually had in mind—a government that owes nothing to political bosses, pressure groups or campaign contributors, guided only by the will of the people.●

SENATOR JAVITS ON ALCOHOL FUEL

● Mr. PERCY. Mr. President, the development of alcohol fuels is a promising alternative to foreign petroleum imports. My distinguished colleague, Senator JACOB K. JAVITS, has played a significant role in helping to promote alcohol fuel development as a way to alleviate our balance of payments, efficiently use our urban and agricultural wastes, increase employment and bolster our national security.

I would like to submit an article for the RECORD by Senator JAVITS which appeared in First Monday in July of 1978 entitled "Alcohol Fuel: Alternative to Imported Crude" which gives a concise description concerning this new fuel.

The article follows:

ALCOHOL FUEL: ALTERNATIVE TO IMPORTED CRUDE

(By JACOB K. JAVITS)

The long lines at gasoline stations during the 1973 Arab oil embargo made us all aware of the seriousness of the energy crunch as a long term crisis. Since that time, I have become increasingly concerned about the need to develop a secure and reliable domestic alternative to oil imports—close to one half of which are now supplied by the OPEC countries.

One of the most promising additives—ultimately perhaps alternatives—to oil is alcohol-based fuel. Alcohol can be produced easily with current technology from a wide variety of domestic sources that are renewable and plentiful, including urban waste, surplus and contaminated grain, timber, coal and even algae. Importantly, the alcohol created from these sources already can replace oil in a number of end-uses; for example, it can be used in a blend of up to 10 percent with gasoline without the need to modify existing automobile engines; or, used to drive utility and industrial turbines; or, as a new industrial chemical base for plastics and synthetic fabrics.

The use of alcohol fuels is not a new idea. In the 1930's, the Philippines used alcohol produced domestically from sugar cane in order to avoid the expense of importing petroleum. During World War II, Germany used alcohol produced from coal as a military fuel because it was unable to obtain petroleum supplies.

Today, interest centers on the use of alcohol as a gasoline supplement. Brazil requires that all gasoline sold in that country contain 7-10 percent alcohol. Volkswagen has completed a two year study with 45 cars powered by alcohol-gasoline blends, and by straight alcohol, and concluded that there were no major technological problems in automobile driveability or pollution control. And in this country, several midwestern states have begun to sell "gasahol" (10 percent ethanol blended with 90 percent unleaded gasoline). This country currently uses 90 billion gallons of gasoline a year to run its cars—obviously, if even 10 percent of that gasoline could be replaced by alcohol,

the savings on our oil imports would be significant.

It is time for action in the energy arena. This country cannot sustain for the longer term the enormous financial drain caused by oil imports. And even if we could, the world's supply of petroleum may well be so depleted in the not too distant future as to cause grave shutdown problems. Although alcohol fuel will not in itself solve the energy crisis it can make a significant contribution by decreasing the need for petroleum imports, and by putting to work domestic resources that would otherwise be wasted. If we are to meet the challenge of the energy crisis, we must begin to develop some of the imaginative and innovative technologies we have overlooked in the past.

In Washington we are beginning to see a forward movement in alcohol development. After 28 of my Senate colleagues and I urged the Departments of Energy and Agriculture to seriously consider alcohol fuels as an energy option, the Department of Energy commissioned a special Task Force on Alcohol Fuels. Its report supported our contention that there was a need for greater research and development in this area. At present, the Department of Energy is considering an immediate action program in alcohol fuel commercialization while the Department of Agriculture is soliciting bids for four alcohol fermentation plants soon to be built in this country using agricultural waste and sewage as the basic source materials.

The time has come for alcohol fuels to offset foreign petroleum, provide jobs in our rural and urban areas, use previously wasted domestic resources and offer the necessary security this country ought to have in its fuel supply. We have no short term liquid fuel alternatives before the year 2000, and alcohol may well be our only answer.●

WHITE HOUSE TAKING POSITIVE ACTION ON RURAL AND SPECIAL TRANSPORTATION NEEDS

● Mr. CHURCH. Mr. President, America's rural areas are poorly served by public transportation systems, and their elderly residents are among the most adversely affected by this situation. The First National Conference on Rural America reported that, between 1960 and 1975, over one-quarter of rural bus systems were discontinued, primarily in towns with populations of 25,000 or less.

Income, health, and other factors have hit the elderly especially hard when it comes to transportation; 40 percent of persons 65 and older do not own an automobile. Even among older persons who do own autos, driving tends to decline for similar reasons. In rural areas, where distances are great and alternative transit is limited or nonexistent, the result can be a devastating social isolation cutting off access to available medical, recreational, educational, commercial, and social services.

Area agencies on aging, churches, civic groups, and service agencies have attempted to provide special transportation services, most of which are funded through an assortment of Federal programs combined with community contributions. But these laudable efforts have encountered severe problems, including rising costs for fuel and maintenance and a disinclination among many insurers to provide liability protection at reasonable rates.

The Special Committee on Aging, which I chair, held hearings on "Transportation and the Elderly: Problems and Progress—The Insurance Issue" in July 1977. At that hearing, I noted:

Our subject today—high insurance rates and even unavailability of insurance coverage for vehicles transporting the elderly and handicapped—is of intense urgency.

We are told, in fact, that the future of such transportation programs, together with related social service programs, could be endangered by what appears to be a growing insurance crisis ... I was startled when I heard that insurance premiums for coverage have gone up in some cases by hundreds of dollars—in one case more than $1,000—per vehicle. In some cases, insurance companies are denying coverage because drivers are 65 years or older, even though their safety records are better than those of younger drivers.

The committee's inquiry showed that many social service transit programs were experiencing these problems, often despite exemplary safety records.

Mr. President, this problem is not one which lends itself to a Federal solution, inasmuch as individual States have the responsibility for regulating the conduct of insurers. However, committee staff are working on a cooperative basis with the Department of Transportation, the Department of Health, Education, and Welfare, academic experts and representatives of the insurance industry in behalf of providing relief.

I have just learned that the White House is now working to address this problem as part of an effort to deal with the afflictions of rural America. Jack Watson, Assistant to the President for Intergovernmental Affairs, has been placed in charge of an action-oriented task force. I welcome the White House's initiative in attempting to resolve the insurance crisis facing many rural and social service transportation systems. It is my understanding that the President's leadership will be used to bring together representatives of the Nation's Governors, public utility and insurance commissioners, transportation providers, insurers, and other concerned parties. A number of task forces will be assembled to formulate recommendations, which can then be the focus for discussion at a White House seminar. Cabinet agencies need to establish uniform standards for the operation of rural and special transit programs; the insurance industry must recognize that rating policies are threatening the survival of many vital services and require reform; and the States need to forge a common policy for addressing this problem. White House leadership can establish the atmosphere in which these goals can be attained. I pledge my full cooperation, and whatever assistance can be provided by the staff of the Special Committee on Aging, to resolve the rural and special transit insurance crisis in the speediest possible manner.●

FUNDING FOR TWO MICHIGAN HARBORS

● Mr. GRIFFIN. Mr. President, yesterday the Senate passed the public works appropriations bill. I want to take this opportunity to thank the Appropriations Committee—and particularly the Public Works Subcommittee—for responding positively to two specific requests I made concerning important projects in Michigan.

Last May, I directed a letter to the chairman of the Public Works Subcommittee, Senator BENNETT JOHNSTON, urging that $70,000 be made available to begin work on an important harbor of refuge at Cross Village, Mich. This harbor of refuge had been authorized since 1966, but unfortunately, it has not been possible to begin work because the funds were not available.

I am very grateful that the committee—and now the Senate—has recognized the need for this harbor and appropriated the necessary funds to allow this vital project to be started. I shall submit for the RECORD my letter to Senator JOHNSTON concerning Cross Village.

In addition, the committee recommended and the Senate approved a $50,000 appropriation to continue a feasibility study for small boat recreational harbor facilities at Little Girls Point Harbor in Michigan's Gogebic County. I am pleased that this is the third year funding has been made available for this valuable project.

Since the version of the public works appropriations bill passed by the House of Representatives contains identical levels of funding for both of these harbor projects, it is a virtual certainty that this money will be forthcoming.

On behalf of the people of Michigan who will be served by these two harbors, I again thank the members of the Appropriations Committee for their action.

The letter follows:

U.S. SENATE,
Washington, D.C., May 30, 1978.

Hon. J. BENNETT JOHNSTON,
Chairman, Public Works Subcommittee, Senate Appropriations Committee, Washington, D.C.

DEAR BENNETT: In 1966, Congress authorized a harbor of refuge to be built at Cross Village, Michigan. Since then, despite persistent efforts by myself, other members of the Michigan delegation, and officials of the State of Michigan, funds have not yet been appropriated for the project.

The need for a harbor of refuge at Cross Village is greater now than in previous years. In the early 1960's—after a lengthy study—the State of Michigan and the Army Corps of Engineers agreed that boating safety considerations required that harbors of refuge be located at 15 mile intervals along certain areas of the Great Lakes shoreline. Currently, there is a 46-mile gap between the harbor at the Straits of Mackinaw and the harbor at Charlevoix. This, despite the fact that boating traffic in the area has increased tremendously in the past decade.

Because a harbor at Cross Village would fill that gap and add significantly to boating safety on the Great Lakes, I urge your Subcommittee and the full Appropriations Committee to approve an appropriation this year of $70,000 for a "capability study" by the Army Corps of Engineers so that work on this important and necessary project can go forward without further delay.

With best wishes, I am
Sincerely,

ROBERT P. GRIFFIN,
U.S. Senator.●

POPE PAUL VI WAS AN INSPIRATIONAL, SAINTLY LEADER

● Mr. RIBICOFF. Mr. President, the death of Pope Paul leaves a great void in the world. Mrs. Ribicoff and I had the privilege of having an audience with His Holiness at the Vatican in 1972. He made

a deep impression on me with his perception, compassion, and understanding.

Pope Paul was devoutly religious and was able to influence not only the people of the Roman Catholic faith but all mankind with his spirituality.

He led his church during a period of great change. I studied his actions and leadership over the years and developed an admiration for Pope Paul VI for his determination and ability to respond to this change, adapt to it and at the same time hold firm to the beliefs and values of his faith which he felt should not be altered. His indeed was a challenge of historic proportions. No matter which way he turned there were powerful forces pushing in another direction. Yet Paul did lead effectively. He was an inspiring and saintly leader at a time when the world was in great need of inspiration and saints.

Pope Paul had great meaning not only to the people of his faith but to the entire human race. I join people of all faiths throughout the entire world as we mourn his death.

Joseph Owens, editor of the editorial page of the Bridgeport, Conn. Post, wrote an editorial reflecting upon Pope Paul's papacy, his achievements and his place in church and world history. Mr. President, I ask that the editorial from the August 7, 1978, Bridgeport Post be printed in the RECORD.

The editorial follows:

POPE PAUL DIES

Not unexpectedly the world was told yesterday that Pope Paul VI had died. The cause was heart failure. The end for the pontiff came in his fifteenth year as head of the Roman Catholic Church.

No papal leader in modern history suffered the agony and anguish which marked the reign of Giovanni Battista Montini. Fate decreed that this quiet man preside over the largest congregation in the world during a time of upheaval and change.

His immediate predecessor, Pope John XXIII, had called upon the church to open the window and allow the light to shine in. Soon after he convened the Ecumenical Council, Vatican II, Pope John died, leaving to his successor the task of modernizing the Roman Catholic Church, while at the same time keeping intact traditions centuries old.

Under Pope Paul the liturgy of the church was altered. It became permissible to eat meat on Fridays, Mass was celebrated in the vernacular and priests and nuns became social activists.

The resignations of priests and nuns and the sharp drop in religious vocations personally hurt Pope Paul VI, but he always remained confident that out of this plan for the church would come new vigor and vitality. He traveled more than any pope in history, visiting several parts of the world including the United States. He sought to bring into full view the problems confronting the church in the emerging nations of the world and the pitiful conditions under which millions of people live.

A strong-willed man, Pope Paul VI refused to approve artificial means of birth control. His attitude on this question and his denial of priestly ordination for women who sought that privilege brought him criticism from females.

Yet, despite the controversy which swirled about him, Pope Paul VI managed to prevent heresy and schism within the church which traces its origins back to St. Peter.

Bishop Walter W. Curtis not only spoke for Catholics in the Diocese of Bridgeport, but his words also reflected the feelings of millions of people when he said, "Renewal in Christ and for Christ was the goal he promoted as pilot of the church."

Pope Paul VI was a modern day apostle unafraid to meet with government leaders—even communists—in his efforts to bring peace to a troubled world. In a sense he was asked to wear a crown of thorns, but not once did he portray himself as a martyr or seek pity. He was a unique man whose diplomacy had a stabilizing effect on the entire world, when lesser men failed in their efforts.●

DR. R. G. LEE

● Mr. SASSER. Mr. President, recently Dr. R. G. Lee, a leader for many years in the Southern Baptist Convention and president of the convention for three terms, passed away at his home in Memphis, Tenn. He was 91 years old.

Perhaps Dr. Adrian P. Rogers, Dr. Lee's successor at Bellevue Baptist Church, described Dr. Lee most eloquently in these words:

He was an unusually gifted man among preachers and ministers. He would have been successful in any field he entered. He was a great friend of mine . . . He was known as a man without peers and was truly a remarkable man.

Dr. Billy Graham called Dr. Lee "one of the towering spiritual giants in this century."

Dr. Lee served for 33 years as pastor at Bellevue and was pastor emeritus at the time of his passing. He was known as "Mr. Southern Baptist" because of the great leadership he provided the members of that denomination.

Dr. Lee was highly respected and regarded through Tennessee, the South, and the Nation and he will be greatly missed. Dr. Rogers commented:

We believe in the scripture that says, "Precious in the sight of the Lord is the death of His saint."

Dr. Robert G. Lee has gone home.

To his family I want to extend this expression of my deepest and most heartfelt sympathy in their loss and bereavement.●

VIOLENCE IN THE MIDDLE EAST

● Mr. ABOUREZK. Mr. President, I would like to share with my colleagues a copy of a letter to President Carter written by an American resident of Beirut, Lebanon. It is articulate and emotional in tone because after many years of witnessing and sharing in the tragedy of the Middle East, its author, Ellen Yff, must express her anguish and anger at the cycle of violence which continues in Lebanon today. I ask that Ellen Yff's letter be printed in the RECORD.

The letter follows:

AMERICAN UNIVERSITY OF BEIRUT,
Beirut, Lebanon, July 18, 1978.

President JIMMY CARTER,
The White House,
Washington, D.C., U.S.A.

DEAR PRESIDENT CARTER: Nearly every day I read in the newspapers or hear on the radio your fine words about human rights. But since I live in a part of the world where every day human rights are violated as a result of one-sided American policies, I cannot but wonder if your concept of human rights is at all related to real human beings.

Today I read a newspaper account of a woman in South Lebanon. An Israeli major (in spite of the fact that Israel has declared its total withdrawal from Lebanese soil) accompanied by his rightist militia protegés began to set fire to her house. When she protested in the face of the Israeli officer, he struck her so severely that she required hospitalization.

If this were an isolated incident, maybe you could overlook it. But similar or worse incidents have occurred day after day, year after year, in all the twenty seven years I have lived in this area. Indeed, Lebanon is bathed in a blood bath, and the basic cause is first, last, and always, Israeli violation of human rights and human respect, under the protection of Western guilt concerning World War II crimes.

I myself have wept and mourned at Auschwitz for the multitudes of Jews, Poles, Gypsies, Russians, and others who fell in that terrible holocaust. But that was a disease of our own Western civilization. Why, then, must Palestinians and Lebanese, and indeed, all Arabs, be forced to pay the unlimited price, and continue to pay it till the end of time?

For years, many Americans here have tried—rationally, restrainedly, and unemotionally—to inform our government of the errors of its blind support of Israel. We have appealed to our country's basic principles of liberty, justice, and dignity. We have even pointed out the danger to U.S. national material interests in the Arab world.

To what effect? Only more destruction and death! Palestinians and Lebanese have been destroyed hundreds if not thousands of times more than any action the Israelis have suffered from the Arabs as a whole and the Palestine Liberation Organization in particular.

If I am angry, it is with a righteous indignation. I am not a Lebanese or a Palestinian, nor a "communist", nor a crank. I am a human being, concerned about other human beings. Are my Arab friends who are victims too numerous to be considered human beings, but only statistics? They are individuals—each with a name, family, friends, who mourn them when they are terrorized, and injured, and tortured, and killed. Human rights are about human beings, and the ultimate human right is the right to live—to live with dignity and respect.

Are our Declaration of Independence and Bill of Rights only lofty literature to be learned in elementary school and then forgotten in the "realpolitik" of the big bad world? Is our Statue of Liberty only the figment of an idealist's imagination? Or are they only for our own country? I will not accept this! The human race is indivisible, and I declare that the Arab people are part of us, and crimes against them are crimes against ourselves and the whole world.

I am not optimistic that this letter from a voice crying in the wilderness will affect U.S. policy. Perhaps you will not even bother to read it. But it is my duty as a citizen and as a member of the human race to protest against my own country's shortsighted, mistaken, and wrong policies in the Middle East.

I understand that the U.S. government counsels patience in this complicated situation. Patience for how long? Until the peace of the grave? What then for the human rights of the corpses?

Or perhaps, President Carter, your fine words on human rights are only for propaganda purposes.

Very truly yours,

ELLEN P. YFF.●

CIVIL SERVICE REORGANIZATION PLAN

● Mr. SASSER. Mr. President, the civil service reform proposed in the President's Reorganization Plan No. 2 for this year is the cornerstone of this Government's reorganization efforts. Reorganization has been, and will continue to be, a joint effort by President Carter and Congress. As chairman of the Senate Civil Service and General Services Subcommittee, I am deeply concerned about the way the executive branch formulates its personnel policies, in general, and about the oftentimes conflicting roles which the Civil Service Commission must play under its current structure, in particular.

This reorganization plan creates the framework necessary for the reform which is further developed in the legislation thoroughly considered by the Governmental Affairs Committee. Under the terms of the President's proposal, the Civil Service Commission would be divided into two new entities—the Office of Personnel Management, to be the personnel management arm of the Administration, and the Merit Systems Protection Board, to adjudicate Federal employee complaints—and the Federal labor management relations program established by Executive order would be placed under the supervision of a new Federal labor relations authority.

As one of his administration's priorities, President Carter began his effort to reorganize the civil service system in early 1977 by commissioning the Federal personnel management project. The project involved 110 staff members, the great majority of whom were career employees from the Civil Service Commission, the Office of Management and Budget, and other executive branch agencies. Alan H. Campbell, Chairman of the Civil Service Commission and formerly dean of the Lyndon B. Johnson School of Public Affairs at the University of Texas, served as chairman of the project, and Wayne G. Granquist, Associate Director of OMB, as vice chairman.

After numerous public hearings all over the country and consultation with literally thousands of individuals and interested organizations, option papers were developed for comment, and the task forces made recommendations. The President considered these suggestions and formally submitted this plan in late May. Since then, one change has been made by the administration, in response to a question in the House, whereby the OPM Director shall provide to the public, where appropriate, a reasonable opportunity to comment on the implementation of OPM rules.

Since the Civil Service Commission was created by the Pendleton Act in 1883, as the enforcer of the merit system in Federal employment and the protector of employee rights, the system has grown with the needs of the executive branch and the directions of Congress. Recently, legitimate concern has been expressed that the current structure of the civil service is overly protective, that it is impossible for Government managers to manage, and that it is difficult to weed out incompetent bureaucrats. Such problems undermine the morale of the work force and create a negative impression of public workers among the electorate despite the fact that most Federal employees are dedicated, hard-working public servants. These problems represent failures in the present structure of the merit system.

I have had an opportunity to play a role in addressing these issues, beginning with the confirmation hearings, which I chaired, of the three new Civil Service Commissioners. At those hearings, and at the later ones on civil service reform, many of which I chaired, I raised questions concerning Federal personnel policy and what role the Commission should have in insuring that the public gets its money's worth out of the Federal work force and that the Federal employees are treated in return with respect and fairness.

Under the terms of the plan, the Office of Personnel Management will be the central personnel agency of the Federal Government. It will aid the President in preparing rules for the administration of Federal employment and administer civil service laws, rules, and regulations. The Office will be headed by a singe Director, appointed by the President and confirmed by the Senate. It has been the view of public administrators for decades that there should be a single-headed entity for personnel management at the Federal level. This concept has been extensively adopted, with great success at the State and local government levels.

The Merit Board will be headed by a bipartisan panel of three members appointed by the President and confirmed by the Senate. They will serve 6-year staggered terms. The Board will exercise all of the adjudicatory functions now vested in the Civil Service Commission, and it will serve as the major protector of the merit system and employee rights.

The plan creates, as an adjunct to the Board, an independent Office of Special Counsel to investigate and prosecute political abuses and merit system violations.

Finally, the plan establishes a Federal labor relations authority as a new agency responsible for administering the Federal labor relations program. The authority will assume functions now held by the Federal Labor Relations Council and certain duties performed by the Assistant Secretary of Labor for Labor-Management relations. The Federal Service Impasses Panel will continue to operate as a distinct entity within the authority.

The Governmental Affairs Committee has been advised by the Congressional Budget Office that the costs of implementing this plan would be approximately $3 million in its first year in effect, fiscal 1979, and somewhat less thereafter, except for the potential effects of inflation. This figure includes the cost of the additional personnel in the new offices as well as projected costs for research in personnel management.

The stated purpose of the reorganization plan is to "create new institutions to increase the effectiveness of management and strengthen the protection of employee rights."

Mr. President, I believe that this plan goes a long way to achieving that important goal. With this new structure, the inherent role conflicts at the Civil Service Commission that gave rise to the Malek manual and the accompanying Watergate abuses will be corrected and the merit principles upon which our way of Government has depended will be strengthened and protected.●

AIRLINE NO-SHOWS RESULT IN HIGHER FARES FOR EVERYONE

● Mr. PERCY. Mr. President, Richard J. Ferris, president and chief executive officer of United Airlines, has written an enlightening article in his firm's Mainliner magazine on the significant number of air travelers who fail to cancel reservations for flights they are unable to board. These individuals are called "no-shows."

In 1977, United had 4 million of them and they reserved an average of 10 to 15 percent of all United seats in that year. Although probably every airline overbooks as a way of making sure those seats are filled, the basic problem remains: too many seats go empty on airplanes that should be full because some passengers do not take the time or show the courtesy to make a 15- or 20-cent phone call to cancel a reservation.

This particular problem is most acute around Christmas and other holiday periods when some passengers deliberately block out space on several airlines going to one destination, despite numerous safeguards employed by the airlines to prevent this practice. As a result, passengers that have every intention of honoring their reservations are forced to fly at odd hours over circuitous routings because all the seats are reserved on the direct flight during the day. Invariably, however, prime time flights leave with a large number of empty seats reserved by thoughtless "no-shows." Unfortunately, the airlines are forced to recover revenues lost by those empty seats by raising fares for all of us.

I recommend the careful reading of this incisive article by President Ferris, and ask that it be printed in the RECORD. The article follows:

[From Mainliner Magazine, June 1978]

CUSTOMER COMMENT: "I'VE BEEN BUMPED!"

(By Richard J. Ferris)

"In over thirty years of flying, this was the first time I have been 'bumped.' And, despite the denied boarding compensation, I did not appreciate it . . ."—R. S., San Francisco, Ca.

"Our tickets were purchased over a month before the flight, so there was no question as to space availability. Yet, there were no seats for us. How can you allow this to occur . . .?"—M. L., Newport News, Va.

"My recommendation is that people who reserve flights should be fined if they do not show up. This might, then, allow the airlines to stop overbooking . . ."—A. L., New York, N.Y.

"I had a confirmed reservation, a ticket and, therefore, a contract with you. My understanding of this . . . is that you depart except in cases of mechanical failure or acts of God."—D.M., Chicago, Ill.

Comments such as these are not taken lightly at United Airlines. They are valid points that deserve discussion and underscore a complex issue that concerns us as much as it does you.

That subject is denied boarding as a result of our overbooking. In other words, we accept more reservations than there are seats on an aircraft. This sometimes results in an oversale. It doesn't happen often, but when it does it's important to you as a customer, and to us, because we want to keep your business.

In September 1976 I devoted this column to overbooking because I wanted to be honest and open with you about United's policies. As one customer wrote back: "I may not agree with you completely, but I understand it better."

We remain committed to that same candor. And because of some new developments in this area, we thought the timing was right to bring you up to date. But first some background:

United Airlines uses historical data from our reservations system to project with a high degree of accuracy the probable number of "no-shows" for a particular flight.

What is a no-show? In airline parlance, a no-show is a passenger who fails to show up for a flight on which he or she is holding a confirmed reservation.

Our no-show factor normally runs 10–15 percent on a daily basis and can reach 30 percent in some markets on some days. United Airlines will experience about 4 million no-shows this year.

Our overbooking procedures are designed to make up for the no-shows. We think this is the most efficient way to assure that the greatest possible number of passengers get on the flights they want. In 1977 United carried over 35 million passengers. Without overbooking, about 1.1 million of those passengers would not have gotten on the flights they wanted. How many of them do you suppose actually got bumped? In 1977, 19,200 passengers, or less than one tenth of one percent were "denied boarding" or were unable to be accommodated on flights for which they were holding a confirmed ticket. Of these, nearly 7,700 reached their destinations within two hours of scheduled arrival times.

We realize when a passenger is denied boarding, it's little consolation to learn that our record is good. It's irritating—and we know it. That's why we've been working hard to improve procedures and come up with better methods.

But if we didn't overbook, more than a million seats would go out empty, resulting in lost revenue of at least $70 million with no cost saving. This means that ticket prices would have to be increased. You, our passenger, would pay the bill in higher prices.

Many passengers ask us this question: Why not impose penalties for no-shows? Well, we realize passengers have legitimate reasons for failing to make flights, such as family or personal illness, death in the family, traffic jams, accidents, household emergencies and so on.

In addition, collection problems developed when we previously tried such a penalty system. And we remain concerned that such procedures would reduce travel flexibility, which is one of the greatest assets of the air transportation industry today.

So, there are many positive features to overbooking. Last year it allowed us to offer you, the traveling public, over a million more seats. The alternatives would have been no reservation or a less desirable flight time for you and an empty seat for us.

We feel the proposed changes are a step in the right direction. But we will not stop there. We will continue to strive for improved procedures and methods which will result in the high standard of service you expect and deserve from United Airlines.

You have my personal promise on it.●

NOTICE CONCERNING NOMINATION BEFORE THE COMMITTEE ON THE JUDICIARY

● Mr. ROBERT C. BYRD. Mr. President, the following nomination has been referred to and is now pending before the Committee on the Judiciary:

William E. Pitt, of Utah, to be U.S. marshal for the district of Utah for the term of 4 years vice Royal K. Buttars, term expired.

Mr. President, for Mr. EASTLAND, on behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee, in writing, on or before Friday, August 18, 1978, any representations or objections they may wish to present concerning the above nomination with a further statement whether it is their intention to appear at any hearing which may be scheduled.●

HERBERT PELL AND THE ORIGINS OF THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, I have spoken out for many years now in favor of ratification of the Genocide Convention. I have done so for 11 years, to be exact. But I have not been alone in this endeavor.

Many voices have called for Senate approval of this treaty over the past three decades. One person, however, can truly be said to have been the inspiration for those voices. Who was this individual?

I am, of course, referring to Herbert Pell, the father of my good friend and distinguished colleague from Rhode Island.

Herbert Pell worked for our Government in many important capacities. He served with distinction as a Congressman from New York, as minister to Portugal and Hungary, and as U.S. representative to the United Nations War Crimes Commission during World War II.

Soon after joining the War Crimes Commission in 1943, Pell became aware of the full horror of Nazi atrocities against the Jews. Before the war, Hitler had remarked, "Who talks nowadays about the extermination of the Armenians?" As a member of the War Crimes Commission, Herbert Pell was determined not to allow the suffering of the Jews to be similarly ignored or forgotten. What did he do?

As a first step, Pell tried to persuade our Government to openly condemn the holocaust and catalog its atrocities. He undertook such efforts in the belief that they would give hope to the victims while deterring the victimizers.

But although he succeeded in convincing the representatives of other nations that the barbaric acts against Jews constituted an international crime, Pell's argument fell on deaf ears at our own State Department. Why?

Officials at the State Department refused to consider Pell's proposals. They contended that there was no precedent either for intercession on behalf of the Jews or for punishment of the Nazi crimes. They also maintained that denunciation of the Nazi reign of terror might provoke further excesses against Jews.

To Herbert Pell, the American stand was thoroughly indefensible. What could be worse, he asked, than the ongoing slaughter in concentration camps? There was indeed no precedent for the kind of intercession Pell sought, precisely because no one had ever witnessed genocide on the scale practiced by the Nazis.

Pell, in fact, had a different perspective. He viewed the holocaust as a completely new kind of war crime. It was not an isolated act "committed by soldiers acting as individuals." Rather, it was the will of the leaders, carried out "in the name of national policy, approved and supported by the central government." What could be done about this horrible new phenomenon?

Above all, Pell believed that international law had to be changed to meet the 20th century horror of genocide. If the citizens of America and the world did not act, they would all but become coconspirators in mass murder. They would, in Pell's words,

> Give a green light to anyone who wants to do a little persecution . . . or to any government official who feels like ordering a massacre.

Despite his eloquent rebuttal of their arguments, State Department officials succeeded in dismissing Pell shortly before the end of the war. He had become, for President Roosevelt and others, a nuisance and a political liability.

Still, Pell did not give up. He continued his fight in churches, synagogues, and lecture halls. To some extent, he was vindicated by the punishment of certain Nazis at Nuremberg under the novel charge of "crimes against humanity."

But that was all. The Nuremberg tribunal never accepted Pell's argument that the murder of a group, in time of peace or war, anywhere in the world, constituted an international crime.

It remained for the United Nations to draw up a special code—the Genocide Convention—which embodies Pell's beliefs.

What has happend to this treaty? Unfortunately, Mr. President, it has lain before the Senate for nearly 30 years, years which have witnessed the tragic and needless deaths of millions.

What can we do? What must we do?

Today, more than a quarter of a century after Herbert Pell's courageous efforts, we can show a little courage of our own by ratifying the Genocide Convention.

I cannot think of a more fitting tribute to this man. We owe it to his memory—to our own moral stature in the world—to endorse the simple idea that Herbert Pell held so dear—that life is sacred, and that the world must safeguard life everywhere.

WHERE TO CUT THE BUDGET

Mr. PROXMIRE. Mr. President, I believe that a sizable cut in Federal Government spending is the single most important thing we could do to reverse

the present inflationary spiral. Above all it would send a message to the country that Congress and the President mean business on the anti-inflation front.

However, when one proposes a general cut, a 5-percent or even 1-percent cut across the board, we are accused of using the meat axe and cutting indiscriminately. Then when we propose specific cuts in particular programs even stronger objections are raised by those who have a special interest in the funds or largess from the Federal Government.

It is because of this that I want to give special credit to Alan Reynolds, vice president and economist at the First National Bank of Chicago, for an article in the August 28 issue of Fortune entitled "Curbing the Federal Spending Spree."

In it he details specific areas where cuts can be made. That, in itself, takes courage, especially since no one including myself will agree with every cut he proposes. And there are also some omissions, primarily in the Defense Department, where anyone who has studied that area knows that we could get more defense for less money if we only transferred some of the logistic tail into teeth.

But having said that, Mr. Reynolds' article should be studied by every serious student of economy in government. He is especially right, in my view, about cutting programs which started out with worthy purposes and to answer needed problems but whose purposes have since been corrupted or where the problem has gone away.

We all know, for example, that the Postal Service has suffered from massive inefficiencies, that the Foundations for the Arts and Humanities have had funds thrust at them so fast they cannot use them effectively, that there are great flaws in both the CETA and the local public works programs, and that there has been massive waste and inefficiency and overcharging in the medicaid area.

We can save money if we will. Even those who disagree with Mr. Reynolds' specifics should read his article. Perhaps they can substitute their own and amass a majority for cutting rather than for spending billions more.

In any case I commend his article to the Senate and the public and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CURBING THE FEDERAL SPENDING SPREE

(By Alan Reynolds)

There is a good deal of justified alarm about the size of the federal deficit, which now looms at $61.4 billion for fiscal 1979, counting off-budget items. Financing it by borrowing from the private sector will drain funds from housing and business investment; printing money will fuel inflation. At the same time, the nationwide clamor for tax relief must be heeded, since the effects of inflation in raising effective tax rates are depriving the private economy of the resources and incentives needed to sustain expansion. The harsh arithmetic suggests that the only effective way to cut both taxes and the deficit is to greatly and promptly reduce federal spending, which is otherwise due to climb by 23 percent in just two years.

Few federal spending programs, to be sure, are entirely without merit. But, in reducing planned expenditures, the question is not whether that spending does somebody some good, but whether it justifies the higher taxes or added borrowing needed to pay for it. Every program should be examined to see whether or not there are more effective ways of accomplishing its intended results, and whether or not those results might not be better accomplished by returning the responsibilities to lower levels of government, or to the voluntary private sector.

If five basic rules of budgetary restraint were applied to the Carter Administration's proposed budget for fiscal 1979, it would be possible to save far more money than most Washington politicians realize or care to admit. The charts on pages 80 and 81 list some $51.4 billion of spending programs that could be sharply curtailed or eliminated with little harm to basic services—and this by no means exhausts the budget-cutting possibilities. The five rules are:

1. Eliminate or reduce subsidies. There is no obvious reason for having taxpayers throughout the nation subsidize services that may not even be available in their own localities. For example, taxpayers in areas not even served by rail finance certain uneconomic passenger and freight services of Amtrak and Conrail through the huge subsidies those corporations receive. And there is ample evidence that using federal money to build hospitals has resulted in excess capacity that has raised hospital costs and fostered uneconomic practices. If a government subsidy is the only way to keep certain cultural activities from shutting down, it should come from state or local governments whose taxpayers actually benefit from them. Consumers pay for farm subsidies in both higher taxes and higher prices, and the higher prices hurt farm exports. There is considerable evidence (including a 1971 Brookings Institution study by Charles Schultze, now chairman of the Council of Economic Advisers) that the benefits accrue to the largest farms and tend to drive up the price of farmland.

2. Eliminate "temporary" programs that no longer serve their purpose. Programs instituted to deal with recession, or other temporary problems, should be terminated within a reasonable period of time. This rule would apply to such items as Emergency School Aid, which became available in 1972 to help finance school integration. There seems to be little justification at this late date for sending money to school districts that are still not in compliance with the Civil Rights Act of 1964. The 725,000 "public service jobs" financed under the Comprehensive Employment and Training Act (CETA) are another example of a permanent emergency measure that favors only a tiny portion of the unemployed. Originally due to expire this year, CETA will apparently be greatly enlarged instead. The temporary jobs are sometimes frivolous, sometimes a source of political patronage, and frequently offered to the least needy of the unemployed. Financing CETA jobs—through taxes, or printing money—tends to displace other public and private employment.

3. Eliminate unnecessary aid to state and local governments. On the general principle that the federal government should not be sending borrowed or printed money to state houses and city halls, the largest single area for potential budget trimming is the $85 billion Washington proposes to distribute in the 1979 budget. General revenue sharing, a major item totaling $6.9 billion, is now a misnomer because Uncle Sam obviously has no surplus revenue to share. Reducing this and other aid would permit a reduction in federal taxing and borrowing, thus making it easier for states and localities to do their own taxing and borrowing.

Among the questionable specific grants to state and local governments is the $4.7-billion aid package to help states and localities construct sewage-treatment facilities. Other grants for the same purpose are available from the departments of Commerce, Agriculture, and Housing and Urban Development. Why should local government compliance with federal water-pollution standards (unlike private compliance) be so generously funded at the federal level?

The matching-grant program for virtually anything that might be called "a social service" got completely out of hand until Congress put a $2.5-billion ceiling on such outlays. That limited abuses but presumably did not end them, nor did it give the program any clearer focus. Community service grants for "innovative" projects are equally vague.

The bills are still coming in for a few notoriously wasteful HUD programs that were wisely discontinued a few years ago. These include "Model Cities," and urban renewal. But the replacement for these programs—community planning and development grants to state and local governments—will devote $2.9 billion to equally nebulous purposes. Consolidating and renaming ineffective programs is not the way to save money.

Federal aid to urban mass transit has fostered some extremely costly and inefficient systems that typically benefit only a few relatively affluent suburbanites. The Bay Area Rapid Transit system in San Francisco and the Washington, D.C., Metro stand as monuments to the waste of such funds. Far more cost-effective solutions to transit problems include the use of exclusive bus lanes and the easing of local restrictions on taxis and jitneys.

4. Eliminate unnecessary educational programs. Many federal educational programs are just plain redundant or of questionable value. Social Security educational benefits are a good example. Widows receive cash payments to help support sons and daughters up to twenty-two years of age, provided they are enrolled in college; otherwise such payments cease when the children reach eighteen. This kind of educational support is no longer needed, since the government provides many other grants and loans to college students on a more evenhanded basis.

Aid to "impacted" areas, supposedly adversely affected by the presence of federal activities, is another superfluous program; it has long been misused to keep property taxes down in such affluent areas as the suburbs of Washington, D.C. The same is true of the portion of the school-lunch program that aids students who are not poor. We could also do without supplemental opportunity grants to college students, which duplicate basic opportunity grants with less control.

Many studies indicate that the Head Start program of pre-school education does not provide lasting improvement in reading achievement. And there are strong reasons for phasing out grants to medical and dental students. Physicians and dentists should finance their own valuable credentials, and loans are available.

5. Eliminate other programs that are dubious in their purposes or effects. Food for Peace has dumped our farm surpluses on developing nations, thus discouraging them from improving their own agricultural productivity. The special supplemental food program is an unnecessary duplication of food stamps; the aid is unevenly available, and over a fifth of the cost is absorbed by administrative expenses. Most Peace Corps and VISTA programs are of questionable value, despite their new name, which is ACTION. The Legal Services Corporation has mainly fostered fanciful class-action crusades.

The agricultural conservation program (REAP) provides small subsidies for loosely

defined purposes; the program has been abused (e.g., used to improve the gardens of rural estates) and duplicates others. The WIN program, which trains welfare mothers for jobs, has long been plagued with a very high dropout rate and few lasting placements. Programs such as those of the Economic Development Administration or New Communities Administration that aid development in certain areas must necessarily do so at the expense of other areas that bear the related tax burden. This is a divisive and improper abuse of the federal treasury that permeates many other varieties of federal "aid."

Suppose that only half of the spending in the five tables could be eliminated. The resulting $25.7-billion reduction in the deficit would still permit enough tax relief and easing of financial pressures to improve the economic outlook greatly. Still other savings are possible, however. Indeed, no federal program should be considered sacred or beyond examination.

One example of a program that seems, at first glance, beyond reproach by any humane American is federal spending on the disabled. The federal government alone plans to spend $35.6 billion on various disability benefits in fiscal 1979. Yet the soaring number of recipients of disability payments, and the shrinking percentage who ever recover, suggests that the definition of disability (including such conditions as chronic stiffness, back pain, and drug addiction) may have become too loose.

A promising area for budgetary pruning is the profusion of regulatory agencies and advisory commissions. The price-control activities alone of the $10.1-billion Federal Energy Department, for example, will cost at least $100 million to administer. Decontrolling domestic energy prices would make many other energy outlays unnecessary. The Occupational Safety and Health Administration costs $150 million, and there is no evidence that it has had any favorable effect on job safety or health. There are also numerous apparently superfluous commissions, including the National Center for Productivity and Quality of Working Life ($3 million), the National Institute of Education ($90 million), the Office of Technology Assessment ($10 million), the Advisory Council on Historical Preservation ($1 million), and the myriad regional-development commissions ($3 million).

Another way to save manpower and money is to eliminate duplication and overlap. Do we need an Environmental Protection Agency, a Council on Environmental Quality, and a Temporary Commission on Air Quality? Dumping the latter two could save $7 million. Do we need both a Voice of America and a Radio Liberty? Getting rid of the latter would save $79 million. Antitrust activities of the Federal Trade Commission duplicate those of the Justice Department. And the Council on Wage and Price Stability ($2 million) has apparently become just another agency to blame inflation on fate and private greed, and we already have the Council of Economic Advisers to do that.

The most remarkable thing about these lists of expendable spending is not their size, but the large areas of the budget left untouched. These include such favorite topics of popular ridicule as moviemaking, exotic social-science research projects, and the agencies' self-congratulatory magazines and other public-relations activities. Two enormous programs, making up 47 percent of the budget, emerge completely unscathed in this analysis. These are $119 billion in benefits for the aged and $118 billion for defense. Defense has been left out not because it is untouchable, but because it involves complex technical and strategic considerations that merit another whole article. The Carter defense budget already contains some sensible cuts that Congress has rejected in the past: for instance, reducing active military forces by 25,000, trimming the Naval Reserve, and contracting some housekeeping jobs out to private firms. Efforts to reduce the generosity of military pensions would also be in order, but, like equally necessary reforms of Social Security and civil-service pensions, would not save much money until the 1980's.

Any effort to slow down the increase in federal spending takes considerable political courage. Every dollar spent by the government is, after all, received by someone. Those who benefit from some spending program are easily organized into a political pressure group dedicated to continuing and expanding the program. On the other hand, those who pay the bills—the public at large—remain dispersed and relatively less informed about where their money is going and why.

Spending is out of control because politicians, mainly in Congress, no longer give equal weight to defending the public purse and to accommodating the pressure groups. The main hope of restoring balance—and in steeling the politicians' courage—rests in the tax revolt now spreading across the country. It also rests in more scrutiny of the budget by independent observers, as has been attempted here.

Mr. PROXMIRE. Mr. President, I thank the distinguished majority leader, and I yield the floor.

The PRESIDING OFFICER. Is there further morning business?

The Senator from West Virginia.

AUTHORITY FOR COMMITTEE ON FINANCE TO HAVE UNTIL MIDNIGHT TO FILE REPORTS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Finance may have until midnight tonight to file reports on various bills.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR CERTAIN ACTION WITH RESPECT TO H.R. 11579

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendments to H.R. 11579.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL ORDER FOR MONDAY

Mr. ROBERT C. BYRD. Mr. President, are there any orders for the recognition of Senators on Monday?

The PRESIDING OFFICER. The senior Senator from Virginia (Mr. HARRY F. BYRD, JR.) is to be recognized for 15 minutes.

Mr. ROBERT C. BYRD. I thank the Chair.

ORDER FOR CONSIDERATION OF TUITION TAX RELIEF ACT OF 1978 ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at the conclusion of the order for the recognition on Monday of Mr. HARRY F. BYRD, JR., the Senate resumed its consideration of the pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SCHEDULE

Mr. ROBERT C. BYRD. Mr. President, I end the day as I began it, urging that all Senators consider giving the utmost cooperation to the leadership in its efforts to complete the work that is before us and hopefully be able to adjourn sine die without having to return after the election. This is a pretty big order. There is some very heavy legislation still on the calendar and some yet to be coming to the calendar.

There is the energy legislation, and this could conceivably mean that several days will be consumed. There is the D.C. representation constitutional amendment, and there is a tax bill. Hopefully there will be something on hospital cost containment. There is Federal aid to highways legislation. The Department of Education bill has been reported to the calendar, Civil service reform is legislation that is a very high priority to the President and I think should be given consideration.

There are the following appropriations bills: District of Columbia, Department of Defense, Foreign Operations, and HEW. There are many conference reports, several measures which will attend to expiring authorizations which have to be done, only to mention a few, but very important measures, and most of these will be time-consuming.

Remaining after today if we were to hope to adjourn sine die on October 7, and this hope is becoming a very fleeting and fragile one for me, there will be 36 working days remaining, not counting Saturdays with the exception of the one Saturday of October 7. There is the Labor Day holiday which will extend from the close of business the 29th of August through the 5th of September.

Even if all Saturdays were included there will be after today instead of 36 working days 42 working days.

So, Mr. President, with the kind of workload we have I think every Senator will have to look the facts in the eye and come to the realization, as I am attempting to state it, that it is going to be extremely difficult to complete our work by October 7 at best.

So we cannot continue to have Saturdays off, go home at 6 o'clock on weekdays, and not waive 3-day rules, and decline to give time agreements, and hold up measures because this Senator or that Senator is out of town, cannot be present to offer his amendments.

I think all Senators who read the RECORD will, hopefully, rearrange their schedules so that they can be present, be prepared to call up amendments to measures, be prepared to manage bills when they are called up, be prepared to let that responsibility fall upon the shoulders of the back-up Senator in the event the manager or the ranking manager cannot be in town on a given day, because the Senate has to complete its work.

We spent 8 weeks, about 8 weeks this year, on the Panama Canal Treaties; we spent about 4 weeks on labor law reform. We have had our legislative holidays, and we have had Saturdays without having to come in.

I merely want to express my concern, as I did earlier today, that if we anticipate adjourning sine die on October 7 or even October 14, which would leave 3 weeks prior to the election, we do not have many days left. If we went to October 14, not counting Saturdays, except for one Saturday or counting the 14th to make it two Saturdays, we would only have 42 days left, 42 days by October 14. We could throw in the other 4 or 5 Saturdays, and we would have 46 or 47 days to October 14.

So it is not just a matter for me to be concerned about. It is a matter for every Senator to be concerned about.

If we work hard—I think the Senate has produced a good record this year, and certainly we did last year, but much, very, very, important work remains to be done.

Top priority, which we stated as of last year to be energy, is still out. The jury is still out on that legislation. Conferees are working hard; Senator JACKSON and the other conferees in the Senate have worked weeks and months. They have put in Saturdays, they have put in holidays, in an effort to compromise the differences with the other body and among themselves.

I think it would be bad if Congress were forced to adjourn this year without final action on that legislation. The problem is not going to go away. If we do not get final action on this legislation this year it may be necessary to lick the grindstone again the early part of next year.

So I just want to express the hope that Senators will read the RECORD, give serious consideration to giving their utmost support and cooperation to the joint leadership in its efforts to schedule the legislation and get it processed so that the Senate will have done its work and will have done it well and will be entitled to some rest.

I do not want to come back after the election, and I think that with proper cooperation and consideration on the part of all, consideration of the problems of the leadership by all Senators, and a willingness to enter into unanimous-consent agreements, a willingness to compromise their viewpoints and reach an accommodation, a willingness to be reasonable in the use of the rules so as to expedite the work of the Senate, I think we can still get our work done, Mr. President, by mid-October and not have to come back.

Mr. PERCY. Mr. President, will the majority leader yield for a question?

Mr. ROBERT C. BYRD. Yes.

CIVIL SERVICE REFORM

Mr. PERCY. The Governmental Affairs Committee, of which Senator RIBICOFF is chairman, has been working mightily to move forward on the civil service reform legislation, S. 2640. I think it is one of the most urgent, highest priority items we have. If the American people are to have faith in their government, if we are going to have a responsive Government, if we are to have a civil service that has merit hiring as well as merit firing, we must have civil service reform. I think the President has gone to great lengths to explain this issue to the people of this country.

I have held four hearings myself in the State of Illinois. We have had months of hearings and work on that bill there. We are nearing a point when we should be ready to bring it to the floor.

If we were able to, if we were ready, as a matter of fact, except for time limitations—and we have been working with Senator STEVENS and Senator MATHIAS who have well-understood concerns, they have negotiated with their staffs and directly on many of those concerns, and I think we have now reduced them to a point where we should be ready to move—at what point would the majority leader indicate we would be able to take it up on the floor, presuming we meet the standard that that legislation should have a reasonable chance of passage and would not be filibustered. I think there was one question raised by some of my colleagues as to whether the Hatch Act would be attached to it.

Senator RIBICOFF and I have both unmistakably said there will be no Hatch Act so far as the Senate is concerned. We will be adamant, firm, rigid and inflexible, if the House happens to bring it in to a conference. I do not think the House would want to do that, because we want enactment of the legislation.

Mr. ROBERT C. BYRD. I agree with the Senator. I have heard there is good movement on this legislation. I hope the Senator can continue, as he has done, to work to remove the problem areas, reach compromises and solutions and come up with a time agreement that will allow the Senate to take this measure up and pass it.

I had mentioned civil service reform in my brief but obviously not comprehensive list of legislative measures that still need to be taken up. But if we get a time agreement on that legislation, so much the better. I agree with him as to the Hatch Act. If that, if such an issue, were to be injected into this civil service reform——

Mr. PERCY. It would mean the death of civil service reform.

Mr. ROBERT C. BYRD. It would mean the death of civil service reform.

Mr. STEVENS. I hate to interrupt my two colleagues, but that is an amendment to S. 2640, which is the Hatch Act, which I very much support and have supported since I came to the Senate. I served almost 8 years under the Hatch Act, and I do not like it at all, and I have been trying very much to get some understanding that the revision of the civil service system will not be an emasculation so far as I am concerned, and I am still debating whether to introduce that amendment as an amendment to this bill.

I would suggest that there are some considerations that would lead us not to raise that issue now, but Senator MATHIAS and I believe the issue should be raised. We have waited for the outcome of the AFGE election, which I am pleased to see that my good friend Ken Blaylock has won, and he is dedicated to civil service reform with some changes, but has not been listened to.

The leadership of those organizations have not been listened to, and those of us who have worked with them to develop some changes have not been listened to.

So I would hope that the Senator from Illinois does not get too rigid and inflexible, as he indicates, with regard to the civil service reform bill, because that is liable to lead some of us to be rigid and inflexible with regard to Hatch Act reform this year.

Mr. PERCY. Mr. President, I simply indicated the fact that the floor manager, Senator RIBICOFF, and myself have notified all of our colleagues that we are opposed to any attempt to burden the civil service reform bill with reform of the Hatch Act.

There is no question that that is a perfectly appropriate measure to put up on its own at some appropriate time. We feel it would kill civil service reform, and we feel they should be separate and separated. We feel that within the framework of civil service reform itself, we can do everything necessary to depoliticize that process, and I commend our distinguished colleague from Alaska (Mr. STEVENS) for everything he has done to safeguard the interests of Federal employees in that regard.

There will obviously be amendments offered to provide further protection, possibly, on the floor. All we are saying is, let us have civil service reform; this is an idea whose time has come. It has been voted on overwhelmingly by the various committees; the House has acted, we can act, it is now entered as must legislation. Let us enter into a reasonable time limitation so that we can let the will of Congress work on something that I think the American people expect us to accomplish and do.

Mr. ROBERT C. BYRD. My concern is, I do not mean to say anything to the Senator from Alaska pro or con on the Hatch Act issue per se, but my real concern here is that we do not get civil service reform into a situation in which there is a filibuster, which would have the effect of killing the legislation.

Mr. PERCY. That is right.

Mr. ROBERT C. BYRD. Now, whatever the Senator from Alaska can work out with other Senators by way of accommondation of some of the issues involved does not cause me any problem. I simply would like to see the Senate act on civil service reform. It is a top priority of the President, and aside from that, I think reform is needed.

Mr. PERCY. Could I ask my distinguished colleague a question?

Mr. ROBERT C. BYRD. If I could just leave my part in the discussion where I stand at this point: We need to work with the party leadership in getting time agreements, relaxing the rules wherever we can in order to expedite the business of the Senate. We need to be prepared to come in early, stay in late,

come in Saturdays, and be prepared to stay in town and not be out of town. Then we can all complete our work, I believe, and go home and not have to come back after the election.

I thank the distinguished assistant Republican leader, because not only has he voiced his interest today, but in his absence he has constantly shown this kind of support and interaction.

Mr. PERCY. Mr. President, may I ask the majority leader a question?

Mr. ROBERT C. BYRD. Yes.

Mr. PERCY. Is it true that the calendar would permit us to take up civil service reform in the Senate on Wednesday or Thursday, or when is the earliest time it can be taken up if there is a reasonable time limitation entered into by the various parties?

Mr. ROBERT C. BYRD. Well, if there is a reasonable time limitation, that assures the measure it will get earlier consideration. If not, it will have to await its turn later. I cannot say.

Mr. PERCY. Well, the Senator from Illinois and the Senator from Connecticut stand ready to meet with Senator STEVENS on Monday.

The PRESIDING OFFICER (Mr. MATSUNAGA). The Chair would remind the Senator from West Virginia that the hour of 5:15 p.m. has arrived, and by unanimous consent——

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate recess after the Senator from Alaska and the Senator from Illinois yield the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I thank the Senator. I am about to conclude.

The PRESIDING OFFICER. Without objection, it is so ordered, and morning business is extended.

Mr. STEVENS. I thank the Senator from Illinois for his comments. I will just say I hope the minority leader will agree.

The House of Representatives has a Post Office and Civil Service Committee; the Senate has none. I am the sole surviving member of the Senate Post Office and Civil Service Committee now serving on the Governmental Affairs Committee by virtue of the rules that were changed.

The committee dealing with civil service reform in the Senate has dealt with the structure of the Government, and does not have the background and the sensitivity, in my opinion, to deal with civil service reform from the point of view of the balance required for protection of those people who have decided to make a career of civil service.

I personally would want to await the action of the House of Representatives on civil service reform before I agree to a time limit on that bill, unless there are other circumstances that arise.

I thank the Chair for his patience.

The PRESIDING OFFICER. The Chair thanks the Senator from Alaska.

RECESS UNTIL 9:30 A.M. ON MONDAY

The PRESIDING OFFICER. Under the previous order of the Senate, the Senate now stands in recess until the hour of 9:30 a.m. on Monday next.

Whereupon, at 5:16 p.m., the Senate recessed until Monday, August 14, 1978, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate August 11, 1978:

IN THE NAVY

Having been designated for commands and other duties determined to be within the contemplation of title 10, United States Code, section 5231, Vice Adm. Harry D. Train II, U.S. Navy, for appointment to the grade of admiral while so serving.

Adm. Isaac C. Kidd, Jr. U.S. Navy, (age 58) for appointment to the grade of admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

CONFIRMATIONS

Executive nominations confirmed by the Senate August 11, 1978;

DEPARTMENT OF STATE

George M. Lane, of Massachusetts, a Foreign Service officer of class 2, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Yemen Arab Republic.

Harold E. Horan, of Texas, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malawi.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Calvin H. Raullerson, of Texas, to be an Assistant Administrator of the Agency for International Development.

DEPARTMENT OF JUSTICE

Sidney I. Lezak, of Oregon, to be U.S. attorney for the district of Oregon for the term of 4 years.

Edward R. Korman, of New York, to be U.S. attorney for the eastern district of New York for a term of 4 years.

NATIONAL TRANSPORTATION SAFETY BOARD

Francis H. McAdams, of the District of Columbia, to be a member of the National Transportation Safety Board for the term expiring December 31, 1982.

FEDERAL MARITIME COMMISSION

Thomas F. Moakley, of Massachusetts, to be a Federal Maritime Commissioner for the term expiring June 30, 1983.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

James Dickson Phillips, Jr., of North Carolina, to be U.S. circuit judge for the fourth circuit.

Harry E. Claiborne, of Nevada, to be U.S. district judge for the district of Nevada.

Thomas A. Wiseman, Jr., of Tennessee, to be U.S. district judge for the middle district of Tennessee.

Norma Levy Shapiro, of Pennsylvania, to be U.S. district judge for the eastern district of Pennsylvania.

IN THE COAST GUARD

Coast Guard nominations beginning Robert C. Perry, to be chief warrant officer, W-2, and ending Lionel F. Crossman, to be chief warrant officer, W-4, which nominations were received by the Senate on June 30, 1978, and appeared in the CONGRESSIONAL RECORD on July 10, 1978.

HOUSE OF REPRESENTATIVES—*Friday, August 11, 1978*

The House met at 10 a.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Teach me to do thy will; for thou art my God; thy spirit is good; lead me into the land of uprightness.—Psalms 143: 10.

God of grace and God of glory, as we wait upon Thee in this moment of prayer do Thou lead us into the green pastures of Thy presence and beside the still waters of Thy peace that our strength may be renewed, our spirits restored, and we be led in the paths of righteousness this day and all our days.

Deliver us from giving too much attention to minor matters and make us Members who think more about the major concerns which trouble us and our country. To this end guide us in our thinking and in our doing that we may give our attention to matters that deeply concern our people.

Keep ever before us the vision of a better nation and a better world, and make us instruments of Thine to lead in that direction. May Thy love and Thy righteousness live in us and find expression through us to make our Nation strong and true and just now and forever more. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Is there objection to the approval of the Journal?

Mr. SYMMS. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

The question is on the approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SYMMS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 325, nays 13, answered "present" 4, not voting 90, as follows:

Mr. SKUBITZ changed his vote from "yea" to "present."

So the Journal was approved.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 11567. An act to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1979–1981, and for other purposes;

H.R. 12928. An act making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1979, and for other purposes; and

H.R. 13125. An act making appropriations for Agriculture, Rural Development and Related Agencies programs for the fiscal year ending September 30, 1979, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 12928) entitled "An act making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1979, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. JOHNSTON, Mr. STENNIS, Mr. MAGNUSON, Mr. ROBERT C. BYRD, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. BURDICK, Mr. SASSER, Mr. HATFIELD of Oregon, Mr. YOUNG, Mr. SCHWEIKER, and Mr. BELLMON to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 13125) entitled "An act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1979, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. EAGLETON, Mr. STENNIS, Mr. PROXMIRE, Mr. ROBERT C. BYRD, Mr. INOUYE, Mr. BAYH, Mr. CHILES, Mr. BURDICK, Mr. MAGNUSON, Mr. BELLMON, Mr. YOUNG, Mr. HATFIELD of Oregon, and Mr. STEVENS to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill and a resolution of the following titles, in which the concurrence of the House is requested:

S. 2466. An act to amend the Public Health Service Act to extend and revise the assistance programs for health services research and health statistics; to establish the Office of Health Technology, and for other purposes.

The message also announced that the Senate disapproves the proposed deferral of budget authority (deferral numbered D78–63) for the Garrison diversion unit, Pick-Sloan Missouri Basin program, Bureau of Reclamation, Department of the Interior, as set forth in the message of May 12, 1978, which was transmitted to the Congress by the President under section 1013 of the Impoundment Control Act of 1974.

APPOINTMENT OF CONFEREES ON H.R. 12928, PUBLIC WORKS APPROPRIATIONS

Mr. BEVILL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 12928) making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1979, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. (Mr. MURTHA). Is there objection to the request of the gentleman from Alabama? The Chair hears none and without objections, appoints the following conferees: Messrs. BEVILL, BOLAND, WHITTEN, SLACK, Mrs. BOGGS, Messrs. DICKS, SHIPLEY, CHAPPELL, MAHON, JOHN T. MYERS, BURGENER, Mrs. SMITH of Nebraska, and Mr. CEDERBERG.

There was no objection.

FUNDING FOR AD HOC COMMITTEE ON ENERGY

Mr. ANNUNZIO. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 1237 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1237

Resolved, That for the further expenses of investigations and studies to be conducted by the Ad Hoc Committee on Energy,

acting as a whole or by subcommittee, not to exceed $50,000, including expenditures for the employment of investigators, attorneys, and clerical, and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the Ad Hoc Committee on Energy shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by the resolution shall expire immediately prior to noon on January 3, 1979, or upon completion of the legislative process, including final disposition of any veto message, with respect to all legislation referred to the ad hoc committee.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. ANNUNZIO (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ANNUNZIO. Mr. Speaker, House Resolution 1237 is funding for the Ad Hoc Committee on Energy to complete their work in the amount of $50,000.

The resolution passed unanimously in the Committee on House Administration. It has the full support of the minority. I know of no opposition to the resolution.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. ANNUNZIO. Mr. Speaker, I yield for debate purposes only to the distinguished gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I just wanted to ask the gentleman from Illinois one question regarding this committee's continuance. As I recall, the Ad Hoc Energy Commission was created in this body to deal with the administration's multifarious energy programs that came to us months ago in a 2-inch thick bill.

We were told that this would be a temporary ad hoc committee. That was almost a year-and-a-half ago, and it is still going. As far as I can tell, it does not do much except wait expectantly.

Mr. Speaker, perhaps we ought to consider either abolishing it or making it a permanent or eternal committee of the House, looking toward the eventual time when action might come on the President's energy program.

Mr. ANNUNZIO. Mr. Speaker, as far as the gentleman from Illinois is concerned, as I stated on many occasions, when the committee was established, it was established by a vote of the full House, and the committee will go out of business on December 31, at the end of this Congress. It will have to be reconstituted in the next Congress.

But I want to assure the gentleman from Maryland (Mr. BAUMAN) that they are phasing out their work, in the remarks of the gentleman from Illinois (Mr. ANDERSON), we find he stated that the ad hoc committee, which previously had eight staff members—four professionals, three clericals, and one researcher—would be down to only three by June 30, that is, three staff members, the staff director, the office manager, and one clerical employee. If sufficient funds are available, they plan to have a professional staff member to assist the minority members.

So, Mr. Speaker, I think this is a reasonable request by the full committee in order to wind up their work. We are all hoping the ad hoc committee will complete its work so we will have an energy program for the country.

Mr. BAUMAN. Mr. Speaker, if the gentleman will yield further, I agree with the gentleman from Illinois (Mr. ANNUNZIO) that something ought to be done, but I have a certain sympathy for the ad hoc committee staff. It is a little like a case of unrequited love on their part. They sit and wait and nothing happens for a year-and-a-half.

Perhaps we ought to consider setting a termination at the end of the President's term, which is probably when they will finally solve the energy problem.

Mr. ANDERSON of Illinois. Mr. Speaker, will the gentleman yield?

Mr. ANNUNZIO. I yield to the gentleman from Illinois for debate only.

Mr. ANDERSON of Illinois. Mr. Speaker, as the gentleman knows, I did appear in support of this resolution. I testified before the Subcommittee of the Committee on House Administration, along with the distinguished chairman of the Ad Hoc Committee on Energy, the gentleman from Ohio (Mr. ASHLEY).

I think this is a reasonable request. As the gentleman said, the staff has been reduced. The charter of the committee expires with the 95th Congress, but I think it is prudent that we continue to staff the committee to see whether or not some final action can be achieved on those portions of the national energy program that are still pending before the conference committee.

Mr. Speaker, I thank the gentleman for yielding, and I thank him for his consideration of this resolution.

Mr. ANNUNZIO. Mr. Speaker, I thank the gentleman from Illinois (Mr. ANDERSON).

Mr. BADHAM. Mr. Speaker, will the gentleman yield?

Mr. ANNUNZIO. I yield for debate purposes only to the ranking minority member of the subcommittee, the gentleman from California (Mr. BADHAM).

Mr. BADHAM. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, speaking for the minority on the Committee on House Administration, this is a rather modest request for funds in comparison to other requests the committee receives.

So that an excess of energy will not be wasted in the work of this committee, $50,000 resolution has been voted, as the gentleman from Illinois said, unanimously by the committee so that the Ad Hoc Committee on Energy may expand some more energy to try to bring to this House an energy bill.

It is, I think, fitting to note that the Ad Hoc Committee on Energy was funded through the first half of this year and it was unable to come up with a bill, so this gives them additional funding.

So, Mr. Speaker, hopefully they may expend sufficient energy to complete their work by the end of the 95th Congress.

Mr. ANNUNZIO. Mr. Speaker, I thank the gentleman from California (Mr. BADHAM).

Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

INTRODUCTION OF LEGISLATION TO CORRECT HEW DEFICIENCIES

(Mr. MOTTL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOTTL. Mr. Speaker, we were all appalled to learn that the Department of Health, Education, and Welfare lost close to $7.4 billion in 1977 because of waste, fraud, abuse and mismanagement in the Department. Last June, in a poignant display of displeasure, we cut $1.397 billion from the recommended fiscal year 1979 appropriations for HEW. However, since that time, nothing constructive has been done to correct this problem situation.

What I wish to do today is call your attention to a legislative package I am introducing which gets down to the heart of the problem. With the help of the Inspector General's Office, I have put together five comprehensive bills which will correct the deficient management practices and systems permitting and actually encouraging the fraud, abuse and waste responsible for HEW losing so much of American taxpayers' hard-earned dollars. I surmise that at least $1.2 billion will be saved if my five bills are enacted into law.

In today's Extensions of Remarks, you will find a more comprehensive explanation of each bill. I urge each and every

one of you to review this material and join me as cosponsors in this endeavor.

Thank you.

THE LATE HONORABLE JOACHIN O. FERNANDEZ, SR.

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIVINGSTON. Mr. Speaker, I rise today to inform this House of the death of a former colleague, a man who held the congressional seat I now hold, the Honorable Joachin O. Fernandez, Sr., fondly known to his colleagues and constituents as Joe Fernandez.

Former Congressman Fernandez served in this body between 1930 and 1941. He later became U.S. collector of revenue for Louisiana and then served in State government until his retirement.

His long career of public service included terms in both the Louisiana House and Senate.

I am sure you will join with me in honoring his memory and in extending the sympathies of the Members of this House to his widow and children. He will be missed by the people of Louisiana whom he served so long and so faithfully.

U.S. FOREIGN POLICY

(Mr. BADHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BADHAM. Mr. Speaker, a short time ago, prior to the debate on the Turkish arms embargo lifting, the State Department asked several Members to bring a Greek-American to meet with the President. I honored that request and invited a good friend of mine of Greek descent to meet with the President. Subsequent to his trip here, he went to Europe and Africa with his family, and he sent me a letter recently telling me of the comments that he had received abroad relative to our Presidency, our Country, and the state of the foreign affairs of the United States.

Mr. Speaker, I thought it would be of interest to the Members of this body to read in the RECORD what an American abroad confronted.

Mr. Speaker, the letter from George L. Argyros is as follows:

SANTA ANA, CALIF.,
July 31, 1978.

Congressman BOB BADHAM,
Newport Beach, Calif.

DEAR BOB: Sorry for the delay in expressing my gratitude for the invitation to the White House briefing. My sincere thanks go to you and your staff who were most helpful and very kind.

As you may recall, Judi and I were leaving a few days following for a trip to Europe and a Safari (camera-type), with our three children.

It was interesting that while we were traveling from Geneva, Switzerland to Italy, people during conversation were expressing their great disappointment in our Country's foreign policy. Their perception of our President is approximately the same as yours and mine. It was more disappointing, however, when we were in Kenya, Africa and Andrew Young made one of his more infamous nonsensical remarks about political prisoners. The reaction from people in Africa and other parts of the free world was total disgust. I was embarrassed, as an American, that we have allowed this kind of reverse racism to be represented and expressed by an Ambassador representing the American people, who is supposedly a man of integrity. Even the Black Africans we met were shocked at Young's undisciplined and erroneous statements. However, there was one African leader who complimented him in the press there, and of course, it was the one and only Idi Amin. The one good thing that Young has greatly contributed to is a one-term President and a resurgence of Republican support.

We are looking forward to seeing you and Ann when you are home the latter part of this month. Thank you again for the opportunity of the Washington meeting with our President.

Yours very truly,

GEORGE L. ARGYROS.

PROVIDING FOR CONSIDERATION OF H.R. 11280, CIVIL SERVICE REFORM ACT OF 1978

Mr. MEEDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1307 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1307

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11280) to reform the civil service laws. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Post Office and Civil Service, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Post Office and Civil Service now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be read for amendment by titles instead of by sections, and all points of order against said substitute for failure to comply with the provisions of clause 7, rule XVI are hereby waived, except that it shall be in order when consideration of said substitute begins to make one point of order that titles IX and X would be in violation of clause 7, rule XVI if offered as a separate amendment to H.R. 11280 as introduced. If such point of order is sustained, it shall be in order to consider said substitute without titles IX and X included therein as an original bill for the purpose of amendment, said substitute shall be read for amendment by titles instead of by sections and all points of order against said substitute for failure to comply with the provisions of clause 7, rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendments in the nature of a substitute made in order by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Washington (Mr. MEEDS) is recognized for 1 hour.

Mr. MEEDS. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from Mississippi (Mr. LOTT), and pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1307 is the rule providing for the consideration of the bill H.R. 11280, the Civil Service Reform Act. This is a standard open rule, providing for 1 hour of general debate. It contains one waiver for section 402(a) of the Budget Act, the section that requires bills authorizing budget authority for a fiscal year to be reported prior to May 15 preceding that fiscal year. The Budget Committee has no objection to granting the waiver.

In addition, there is a waiver of clause 7, rule XVI, the germaneness rule, for titles I–VIII and title XI of this bill. The germaneness waiver is necessary to protect this committee amendment in the nature of a substitute from points of order that might otherwise lie against a few provisions in the substitute that were not in the original bill.

Finally, Mr. Speaker, I would like to note that in this resolution the Committee on Rules did not grant a waiver of the germaneness rule for titles IX and X. It was the feeling of the committee that such a waiver should not be granted for two reasons. The first is that these particular two titles are clearly beyond the scope of the original civil service reform bill, for which the bill we have before us is a substitute. The second is that the two titles interject completely new subject matter into the discussion of civil service reform. Mr. Speaker, I strongly support the action of the Rules Committee with regard to this resolution.

Furthermore, Mr. Speaker, I strongly support civil service reform. I think it is imperative that we get a good civil service reform bill through this Congress. For too long, we have labored with a civil service system that rewards inefficiency, stifles individuality and punishes those who seek to improve the system. This bill is not perfect, but it is a good bill that can be made better with a minimum of changes and we will then have a civil service system of which we can all be proud. It will be a system that will help make our Government function in a manner that is responsive to the needs and wishes of the people of this country. I urge the support of my colleagues, both for this resolution and for this vital piece of legislation.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. MEEDS. I yield briefly for the purpose of debate only.

Mr. HARRIS. Mr. Speaker, I appreciate my colleague yielding to me. I was trying to understand the rule. As I understand it, it is the gentleman's posi-

tion that some of the provisions in this bill may be subject to a point of order. Is that correct?

Mr. MEEDS. There are two titles which, under the provisions of this resolution, will be subject to points of order for germaneness. Of course, the only waivers in the entire bill are germaneness waivers of clause 7, rule XVI for titles I through VIII and title XI. All other points of order except the budget waiver which I mentioned earlier can be made against any section of the bill and the substitute.

Mr. HARRIS. If the gentleman would yield further, I do not quite understand. It is the position of the gentleman that only points of order with regard to two titles on germaneness will be in order, but anything that is contrary to the rules in the other titles would not be subject to a point of order; is that correct?

Mr. MEEDS. Just responding to the gentleman again and narrowing the scope just to germaneness points of order, which the gentleman did not do, I would respond to him by stating that both of these titles, as I pointed out in my original statement, were clearly beyond the scope of the original bill. And both introduce new subject matter into the substitute, which the Rules Committee felt was not proper.

Mr. HARRIS. If the gentleman will yield further, it is difficult for the gentleman from Virginia to understand why we would waive points of order with respect to certain titles and not waive points of order with respect to other titles. There are titles to the bill, and I refer the gentleman to title VIII, which is an addendum to the bill, which may be subject to the same points the gentleman made, and yet we waive points of order with respect to that title. Is this correct procedure, to waive points of order with regard to certain provisions which may be subject to germaneness points of order and not to others?

Mr. MEEDS. I tried to explain that to the gentleman, that there are two reasons why we had refused to waive points of order with regard to those two titles. Those two reasons do not apply to title VIII and any other inconsequential or minute matters which might conceivably be subject to a point of order.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. MEEDS. I yield very briefly to the gentleman from Texas.

Mr. KAZEN. I can understand the explanation that the gentleman from Washington has just made. My question is: What are the two titles to which germaneness is not waived?

Mr. MEEDS. The titles are title IX and title X. Title IX is the Hatch Act provisions which were put in by the committee on a committee vote, and the firefighters bill is under title X.

Mr. KAZEN. In other words, the vetterans' preference is not included in this?

Mr. MEEDS. No. Both of these injected entirely new subject matter into the question of civil service reform.

Mr. KAZEN. I thank the gentleman.

Mr. MEEDS. Mr. Chairman, I reserve the balance of my time.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Washington, I think, has adequately explained the rule.

I would like though to emphasize a few points. First it is a 1-hour basically open rule. It does waive section 402(a) of the Budget Act, as the gentleman from Washington noted, but there is no problem from the Budget Committee standpoint since this is a matter dealing with the May 15 deadline. The bill is to be read by titles instead of by sections.

I want to emphasize primarily the point the gentleman from Washington has been discussing with the gentleman from Virginia with respect to clause 7, rule XVI of the permaneness rule. It is waived against the entire committee substitute with one exception. In the beginning of the consideration of the substitute, it shall be in order to make one point of order that titles IX and X would not be germane to the bill if introduced or offered as a separate amendment. If the point of order should be sustained, this means the committee substitute minus titles IX and X will be up for consideration.

Title IX is the Hatch Act repeal and title X includes the work reduction for Federal firefighters.

I think in answer to the question of the gentleman from Virginia, actually in my opinion there was not a need to waive points of order against other parts of the bill. Probably we could have come to the floor with just a straight open rule. There was some possible question with regard to title VIII and possibly title VII because of some expansion of the subject matter, but probably points of order would not be sustained against either one of these, but there was a clear indication that a point of order could be made against the Hatch Act provisions and the firefighter provisions.

As the gentleman knows, I voted for the Federal firefighters reduction of work hours inclusion in this bill and there may be some meritorious argument on the part of the gentleman that a point of order would not be proper against this title.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I will be glad to yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, it seems to me to be a remarkable concept in the rules procedure of waiving points of order on those things you do not think are subject to points of order and not to waive points of order on those things you think are subject to a point of order. I was just wondering, and, of course, I am not a member of the Committee on Rules and am not privy to what goes on there, as far as that goes, as to the exact precepts that govern these matters covering those things that should or should not be included through the wisdom of the Committee on Rules, such as why you waive points on things you have concluded in your wisdom are not subject to points of order, and those things you think should not be included in the bill should not have points of order waived on them, and why, in your wisdom, no points of order should lie on those subjects you think should be included.

Mr. LOTT. Mr. Speaker, if I may reclaim my time, let me say that further points of order may still lie, it is just out of an abundance of precaution that we want to be sure that there will be no problem.

In answer to the second question raised by the gentleman from Virginia (Mr. HARRIS) let me say that the feeling was, by the Committee on Rules, that these two issues, one on the Hatch Act and the other on the Federal firefighters' reduced workweek, clearly are an appendage to the bill that was added by the Committee on Post Office and Civil Service and they could cause problems to the whole bill, and therefore that the issue should be dealt with on points of order.

Mr. HARRIS. Mr. Speaker, if the gentleman will yield further, the Committee on Rules determined that title VIII was not an appendage to the bill and was clearly related to the bill, is that the gentleman's position?

Mr. LOTT. I think that is a fair statement.

Mr. HARRIS. Mr. Speaker, I was wondering whether the gentleman recalls that it was in the committee that title VIII was added as an appendage to the bill, and at one point vigorously fought as an ornament on a Christmas tree because it did not clearly relate to the civil service reform. Does the gentleman recall that?

Mr. LOTT. Frankly, I do not.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman for yielding to me.

I just want to say to the gentleman from Virginia, in answer to his questions, just to comment—and perhaps I think the gentleman knows the answers before I give them to him—and that is it is well known that whatever the leadership wants killed on a point of order does not get a waiver and that whatever the leadership wants included in the bill that is subject to a point of order gets a waiver of that point of order.

Mr. LOTT. Mr. Speaker, I would like to disagree with the gentleman from Maryland (Mr. BAUMAN) on this issue. I realize that sometimes that happens, but there was a clear division among the ranks of the leadership as to whether it should be done or not. The leadership of the Committee on Post Office and Civil Service came in and specifically asked for a rule waiving all points of order.

Mr. HILLIS. Mr. Chairman, if the gentleman will yield, I would like to ask this one question, under the terms of this rule, will the amendment to be of-

fered by my friend and colleague, the gentleman from New York (Mr. HANLEY) on the veterans preference be permissible?

Mr. LOTT. Absolutely.

Mr. HILLIS. And we will have full opportunity of debating it?

Mr. LOTT. In title III that covers the proposed changes in the veterans preference section.

Mr. CHARLES H. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. Mr. Speaker, as the gentleman from Maryland (Mr. BAUMAN) brought out, there obviously are some games that are being played in connection with the rule and the whole legislation. Would you say that that is a true statement?

Mr. LOTT. I beg the gentleman's pardon, I did not understand his question.

Mr. CHARLES H. WILSON of California. I said, that as the gentleman from Maryland (Mr. BAUMAN) brought out, obviously there are some games being played around here with the rule and the legislation.

Mr. LOTT. We obviously did not want to change our usual way of proceeding around here.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield at that point?

Mr. LOTT. I will be glad to yield to the major spokesman for the Carter administration on this legislation.

Mr. DERWINSKI. Mr. Speaker, now, wait, there is a limit to this, fellows.

Mr. Speaker, I would like to correct the phraseology. I do not look upon this rule as being anything connected with games played by anyone, I think it is one of those fine acts of statesmanship that the Committee on Rules is capable of.

Mr. CLAY. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I will be glad to yield to the gentleman from Missouri (Mr. CLAY).

Mr. CLAY. I very seldom disagree with my distinguished colleague, the gentleman from Illinois (Mr. DERWINSKI); but I think there is a game being played here. Those Members who are familiar with the ghetto know exactly what kind of game it is. It is called "Three-Card Molly." Now you see it, now you don't.

That is apparently what is happening on this rule. The gentleman from Maryland (Mr. BAUMAN) is precisely right when he says that if the leadership wants something from the Committee on Rules, it gets it. If it does not want it, it does not get it.

In this instance, the leadership does not want it, and the White House does not want these two titles to be considered and voted on.

I would just like to state for the record that I am happy to see that the leadership of the House and the White House are on speaking terms again.

Mr. Speaker, let me ask the gentleman a question. He made the statement that titles IX and X would cause problems for this bill. Is that the rationale of the Committee on Rules in waiving the points of order against title IX and X?

Mr. LOTT. I cannot speak for the entire Committee on Rules, but I must confess that as for myself, the answer is "Yes."

Mr. CLAY. I do not know how the gentleman can conclude that they would cause problems when both titles IX and X passed this House by overwhelming majorities, in spite of the fact that the gentleman from Mississippi did not support either.

Mr. LOTT. They are two subjects which this House has already considered; but in this instance, we are trying to consider civil service reform. We are trying to do something that is very badly needed for this country. The administration is supporting it. I think that the majority of this House and the Congress as a whole would like to have civil service reform. Therefore, with me, it is a matter of keeping one's eye on the ball.

Mr. Speaker, I would like to take back my time, if I may, and proceed to talk a little bit about why the Committee on Rules took the action they did.

If any games were being played, in my opinion, they were played in the Committee on Post Office and Civil Service. This rule is an attempt to try to clean up the mess made in the Post Office and Civil Service Committee. All of the Members know, I am sure, by now that this is one of the administration's "must" bills. I think it is to the President's credit that he is trying to do something about civil service and the need for reform. I may not agree with all of his proposals. I did not. As a matter of fact, I eventually voted against reporting this bill out of the Committee on Post Office and Civil Service; but we all know that something needs to be done on civil service reform. This is the vehicle we can work on it with.

The meat of the idea is good. We have added, as I said before, a lot of appendages to what we started out with in the Committee on Post Office and Civil Service. We made substantial changes in the veterans' preference, which I think is a mistake. I think we have gone too far. I think it really is a situation where we are breaking a commitment which we made to the veterans of this country. Under the changes in the bill we are saying to the World War II veterans and to our Korean veterans and even to a few Vietnam veterans, "We are going to change the rules now. You are not going to be entitled to this veterans' preference."

Mr. Speaker, we went beyond that. We added the Hatch Act. Originally there was a vote, and we voted against includ the Hatch Act. Then the next day, in what I thought was a very unusual procedure, without a majority being present, the Hatch Act was added. We also added the Federal firefighter workweek reduction. We made substantial changes in title IV, the senior executive service provision. I know there will be a lot of discussion of and amendments to that when it comes to the floor.

However, basically there are some good ideas in this legislation. It would provide for the codification of the merit system principles for civil service employees; a more efficient method of evaluating job performance and of resolving personnel disputes; establishment, on an experimental basis, of the senior executive service.

This is something which has been around since the 1950s. Several Presidents have proposed this idea, going back, I think, to proposals made by the Hoover Commission. The senior executive service is something we should take a look at. Maybe it should be done on an experimental basis.

I think if we take out the Hatch Act addition on a point of order, and take out the Federal firefighters amendment on a point of order or by a vote subsequently on the floor, and if we can make changes in the veterans' preference, make a decision as to the senior executive service, and make changes in title VII, we will have a bill with which we could go forward and which this whole House can vote for so that the Senate can take it up, hopefully, very quickly in September. Then we will have some genuine civil service reform.

Let me conclude, before I yield, by making this further point. I would like to commend the gentleman from Arizona (Mr. UDALL) for the fine job he has done in the Committee on Post Office and Civil Service. I thought a couple times maybe things slipped away from us, but we have a very independent minded committee. The gentleman was trying to lead the committee through a real "mine field" during the debate on the bill. The gentleman was leading the fight for the administration in many instances when he did not even agree with the administration position; so I think the gentleman is to be commended for coming in and doing this great job.

Although I spoke in jest of the gentleman from Illinois (Mr. DERWINSKI), I want to say that he has done an outstanding job.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Speaker, the gentleman caused me to ask the gentleman to yield. Here again I want to be educated about the legislative process, because I do not have the experience.

Does the gentleman give me to understand that the gentleman voted to add this title to the bill in committee, but now wants it removed on the floor? I was wondering why the gentleman would proceed in that manner. Would the gentleman enlighten me on that?

Mr. LOTT. Well, I have consistently voted for the Federal firefighters bill, as the gentleman from Virginia knows; but I have been convinced in this instance we added several amendments to titles that really should not be taken up in considering civil service reform. Let us

keep our eyes strictly on civil service reform. We will have opportunities to take up the Hatch Act, we have already done it, and maybe we will have a conference report to vote on.

As the gentleman knows, the President has vetoed this already. In this instance, we should proceed on civil service reform and not in other areas.

Mr. CHARLES H. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. Mr. Speaker, does the gentleman know whether the bill which is pending before us, for which we are seeking a rule, will eliminate the authority of the President to create new political positions, as was done recently? Will it clean up this type of thing or tighten it up in any way?

Mr. LOTT. I suspect the distinguished gentleman from California might know better the answer to this question than I do. I think the gentleman has made a point about this legislation that has bothered me the most the whole way through; that is, the possible continuation and possible proliferation of the civil service abuse. I think there are going to be some problems, unless we are very careful as we debate this legislation on the floor, and provide amendments to guard against that.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Speaker, I was glad to hear the gentleman say that the gentleman will support the Hanley amendment to keep the veterans preference in the act.

I might just say, that if we analyze what has been done by the committee, some might think they are knocking out the World War II and the Korean veterans; but most of these veterans, the average age of the World War II veteran is 59 years of age, and the average Korean veteran is 49 years of age, so he is not really applying for these Government jobs. That just leaves the Vietnam veteran. We are hurting him under this act and we should support the Hanley amendment. The 15-year restriction really goes right to the Vietnam veteran.

Mr. Speaker, I certainly hope the committee in its wisdow will knock this out and support the Hanley amendment.

Mr. LOTT. Mr. Speaker, I appreciate the comments of the gentleman from Mississippi and I agree with the gentleman.

Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Mr. Speaker, I rise in support of this rule and the bill it makes in order—the Civil Service Reform Act of 1978. This is a 1-hour, open rule which waives section 402(a) of the Budget Act—the requirement that bills be reported prior to May 15th—and waives the germaneness rule against the committee substitute, except for titles IX and X which deal with the Hatch Act and the Federal Firefighters Basic Workweek.

Mr. Speaker, I think it is apparent from the action by the Post Office and Civil Service Committee and the testimony we heard in the Rules Committee yesterday that this is a nonpartisan issue—a good government issue. And while there are some disagreements over portions of this bill as reported, I think everyone is in agreement with the President's stated goal of making our civil service system more efficient and effective, while increasing work incentives and protecting workers' rights. In unveiling his civil service reform plan before the National Press Club last March 2, the President said, and I quote:

> The single most important step that we can take is a thorough-going reform of the civil service system. Civil Service reform will be the centerpiece of Government reorganization during my term of office.

In his message to the Congress later that day, the President observed that:

> The present system has become a bureaucratic maze which neglects merit, tolerates poor performance, permits abuse of legitimate employee rights, and mires every personnel action in red tape, delay and confusion.

The central elements of the President's reform plan have been retained in the bill before us today. These include:

Creation of a senior executive service for management positions comprising grades GS 16–18, on a 2-year trial basis in three executive departments;

Provision of merit system principles to serve as guidelines for executive agencies;

Establishment of a new program for labor-management relations, allowing employees to bargain through their unions with agency management on issues other than wages and fringe benefits;

Delegation of employee appointment process to individual agencies;

Specification of prohibited employee practices including reprisals against so-called whistleblowers;

Provision for merit raises rather than step increases for GS 13–15 personnel;

Salary and grade protection for employees affected by reclassification or downgrading;

Alteration in veterans' appointment preference rules; and

Establishment of a level V ceiling on combined Federal pay and pension for retired military officers working for the Government.

In addition, Mr. Speaker, as I already mentioned, the bill contains the so-called Hatch Act Reform and Federal Firefighters' bills as titles IX and X respectively, though these are not protected against points of order and, in my opinion, they are not germane to the bill. In any event, I would hope this important legislation is not encumbered by such extraneous matters. It is not befitting what the President has called the centerpiece of his Government reorganization efforts.

I urge adoption of this rule.

In this day of taxpayer concern, rising inflation and public cynicism toward Government, I find it very reassuring that the Congress and the administration have undertaken a plan that is designed to increase the efficiency of the Federal Government. To be sure, this administration is not the first to recognize the problems inherent in the present civil service system. In fact, civil service reform has been a major concern of the past several administrations.

The task of reforming the present system is an onerous task indeed. The question was how we would proceed to give the power that the President needs to administer the bureaucracy without reverting back to the spoils system that mandated the formation of a civil service system a century ago. We in this Congress have a duty to provide the President with enough power to control the bureaucratic system that has been delegated to him.

There are those who feel that this piece of legislation grants the President too much power. To those people I answer that it is the Congress responsibility to oversee the development of this new policy to make sure that we do not allow the present problems to become overcorrected and thus lose control of the bureaucracy through new legislation.

This Congress has a tendency to overcorrect and overregulate. I would like to point out that in all fairness to Federal employees, the career civil servant is overall a dedicated, competent, and highly professional individual. This legislation must not be construed to be a blow to the Federal employee. The problems that we now face are a result of organizational problems that grew from overprotection for employees and unchecked growth of the Federal labor force.

The Civil Service Reform Act of 1978 is the culmination of extensive research and investigation by this administration, past administrations and this Congress. It will give managers better tools with which to manage this delicate instrument of Government that we call the bureaucracy. This piece of legislation must by no means be construed to be a cure all for the basic problems of the management of the Federal work force, but it is a start and a step in the right direction.

Civil service reform is a milestone in this Congress attempts to cut the Federal redtape that has engulfed both our governmental institutions and our private institutions. I cannot sufficiently express my approval of the fact that the Congress is beginning to react to the demands of the voters, the taxpayers and the citizens of this Nation. We must respond to the costly and burdensome restrictions that we have created by overregulation. The only reform is that which removes the restrictions and regulations that have hindered the performance of the public and private sectors. Allow managers to manage as they know best: unnecessary regulation only causes terrible wastes of money, time and talent.

I strongly urge the passage of this

momentous piece of legislation. I hope that it will continue to have the bipartisan support that it so richly deserves.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. ROUSSELOT), a member of the Committee on Post Office and Civil Service.

Mr. ROUSSELOT. Mr. Speaker, I want to address the problem that the gentleman from Mississippi (Mr. MONTGOMERY) and Members of the Committee on Veterans' Affairs have raised.

In the committee we voted on the Hanley amendment, which would keep the veterans' preference law as it is. I wish to assure the Members that many of us on the committee want to keep that law the way it is. The vote was fairly close in committee.

Those of us who supported the Hanley amendment in committee will be active here to see that the bill is amended to preserve the present law. We wish to support veterans' preference, and we think that all Members should be put on notice that many members on the committee want to retain the veterans' preference as it is.

We do not believe that the current practice of veterans' preference denies access for women, minorities, or nonveterans to Federal employment. We will completely reject that argument during the debate on title III.

Mr. Speaker, the rule does clearly allow the Hanley amendment to be offered, and many of us on the committee will support it.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, the Civil Service Reform Act of 1978, H.R. 11280, is a measure that is certainly salutary in its objectives, if its objection is truly reform and not the politicization of the civil service. I want to join my colleagues in commending the gentleman from Arizona, along with the gentleman from Illinois, for their monumental efforts in bringing this measure to the floor. However, I do deplore the haste with which this bill was first considered in committee and now brought to the House floor, while I have differences of opinion with several members of the committee concerning various aspects of this measure, it is extremely important to the future administration of our Federal bureaucracy that we carefully construct legislation that will properly reform the civil service system and insure the preservation of merit system principles.

I hope that my colleagues, in addressing themselves to this proposal, will carefully consider the amendments that are to be proposed, and I can know that you will not forget the fact that this is major reform, and that this measure requires close attention in order to adequately protect the multitudes of career employees who are today performing the valuable delivery of services upon which the strength and vitality of our Federal Government and country exists.

Under the guise of reform we sometimes steamroller over important rights and obligations, and I hope that this will not be the case in today. Instead, I again urge close scrutiny of the various amendments that will be offered during the consideration of this bill, particularly with regard to the proposed dilution of veterans' preference, an extremely controversial aspect of this measure.

Mr. LOTT. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Speaker, I thank my colleague for yielding this time to me.

The question I would like to raise as a Member who has been approached by the administration—and it is rare that I am approached by Cabinet officers or members of this administration to seek my support—is this: The one thing I have in the back of my mind is this question, an unanswered question. There are those of us who would like to help the President in those areas where his hands are tied, and I think we all agree the problems are such that he needs help.

But when I look at the actions the President has taken in those areas where he does have control, it makes me wonder what he will do if we give him more discretion.

I think we need only to look at the Marston firing earlier this year. Then we look at this request for broadened authority in terms of his appointing a political crony of our Speaker who is fired and then gets a $50,000 White House job. Then we see what he has done in terms of the Federal Election Commission where callously and politically, he is trying to ram down our throats a non-Republican, Republicans, an appointee that no Republican seems to want.

My reply to Cabinet officers when they call me is that if the President callously and politically acts that way in areas over which he does have control, what will he do if we give him more control over these areas where now by law his hands are tied?

It is the whole question of credibility. I cannot trust the White House to make nonpartisan decisions if they are going to fire a Marston, if they are going to give a Griffin, a political crony, a big job in the White House, and if they are going to recreate the spirit of the law by appointing a Sam Zagoria to the Federal Election Commission.

Mr. Speaker, if every Republican is opposing that appointment, why should we on the minority side believe that if the White House is given these new civil service reforms, the President will do anything other than what has been done on those occasions?

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, those are certainly legitimate concerns. Going back to the gentleman's opening comment, I, too, have been somewhat surprised by the emphasis that the administration has put on this bill; I have been surprised by the Cabinet interest and the direct personal Presidential interest.

It is important, when you look at the big picture of all of the legislation we have been working on, that it seems to have had an unusual amount of significance in their overall package. I think that during the Republican administrations, when we had Presidents who have tried to put some of their people into the proper positions, there has been a feeling on the Democratic side that that was wrong. Now when we have a Democrat administration, all of a sudden there is a need to open up the civil service a little bit and have the senior executives have an opportunity to have these higher positions. I think there is some danger here of further use of politics in these decisions. But we as Republicans, I think, have to rise above partisan politics, as the gentleman from Illinois has often said, and the more statesmanlike position is to try to get it done while we have a Democratic President, and then maybe in 1981, when the Republican President comes in, we will have an opportunity to make some corrections.

Mr. ASHBROOK. What you want to do is what the President and his administration has not done, and that is to address the civil service bureaucracy with a degree of objectivity.

Mr. LOTT. I hate to run the risk of killing this basic bill, but as I said in the Committee on Rules yesterday, this is a basic Republican bill in philosophy.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Speaker, I will make the point in general debate that this is an issue that is above partisanship. Civil service reform is good government. The kinds of appointments the gentleman from Ohio complained about were largely political appointments. We have to keep in mind that, as a general rule, Democrats are more skillful political operatives than Republicans. So I do not think we should so much damn Mr. Carter as to say that the previous Republican administrations were not as effective or did not have as good gut political instincts. I think we have to be fair about Democrats being better politicians.

Mr. LOTT. Thank you, "Ambassador."

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Speaker, I want to say, in response to the point made by the gentleman from Ohio (Mr. ASHBROOK), we are trying to bring this out in the open so that every President will have the right to manage the Federal Government. Part of the seeds of Watergate were sown in 1969. When the Nixon people came in, they wanted to make some changes and they found all of these Johnson-Kennedy people, who were held over, were holding the reigns of power, and they could not get rid of them. Eight years later I am screaming and yelling that the Nixon holdovers are there when Jimmy Carter gets to town. "President" Philip Crane, in January 1981, with the help of the gentleman from Ohio, will get from this bill the kind of tools you would want him to have

to shake up the bureaucracy and make the Government work. We are trying to help the Republicans.

Mr. ASHBROOK. So that it is very clear, what we are talking about is spoils. What we are talking about is throwing the rascals out just because they may be Johnson-Kennedy people or because they may be Nixon-Ford people. I thought we were supposed to be talking about merit. But I guess it is out in the open now that we are talking about pure, crass politics.

Mr. UDALL. We will have it all out in the open now.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

Mr. Speaker, I would like to know where these Ford-Nixon holdovers are who are running the Government today. Can the gentleman name names?

Mr. UDALL. I filed a long report back in December 1976, or January 1977, listing a lot of names.

Mr. ROUSSELOT. Are they still present in the Carter administration 2 years later?

Mr. UDALL. They got themselves embedded. They are now dedicated career, loyal servants. They went in as political people to carry out the mandate of the Ford-Nixon administration. And then, as Jimmy Carter approached from Georgia with that army of people he was going to put in there to get his policies into effect, we suddenly found that these dedicated soldiers are career employees. We are going to bring all of this out in the open with this bill. The senior executive service is the top one-third of 1 percent of Federal employees.

Mr. ROUSSELOT. The gentleman is going to name the ones who are Ford-Nixon holdovers who now have the levers of power?

Mr. UDALL. I will get the gentleman a copy of the report and try to get him some of the names.

Mr. ROUSSELOT. I will be glad to see it.

Mr. MEEDS. Mr. Speaker, I yield 7 minutes to the gentleman from Missouri (Mr. CLAY).

Mr. CLAY. Mr. Speaker, I rise in opposition to this rule. My opposition basically falls into three categories. First, I resent the thuggish, alley tactics employed by the administration on members of the Rules Committee to set the stage for deleting two titles of this bill. They pressured not only the members of the House Post Office and Civil Service Committee, but also the members of the Rules Committee. Cabinet members called members of the Post Office Committee and also members of the Rules Committee. We have had a tremendous amount of pressure from people in the armed services, generals calling to make sure that the administration got what it wants. X Members of Congress have called, and yesterday even a little paperboy encouraged me to go along with the President's proposal.

Second, Mr. Speaker, I resent the unbelievable climate of urgency in which this bill and the rule was considered. A system which has taken over 80 years to develop is now being proposed that we destroy in a matter of 80 days. To be truthful with the Members, nobody in this House or in the administration really knows exactly what this bill is all about, what is in it, or how it will impact on Federal employees.

We saw this same kind of urgency displayed some 10 years ago when we rushed through the Postal Reform Act. That was going to be the great panacea. It was going to solve and resolve all the problems in our Postal System, and it too was the legislative centerpiece of the President at that time.

Third, Mr. Speaker, I oppose this rule because I resent the arbitrary, capricious, and inconsistent manner in waiving points of order for certain titles, and not for certain other titles.

Mr. Speaker, this rule if approved will allow points of order against titles IX and X as being nongermane, while waiving points of order against title VIII, which is of more questionable germaneness than titles IX and X. Title IX, the Hatch Act reform, is obviously an integral part of civil service reform. Notwithstanding that some of us may differ on the merits of title IX, I contend that it is germane. The issue is emotional and controversial, but still germane. Section 1206 of H.R. 11280 charges the special counsel of the Merit Systems Protection Board with the responsibility to investigate allegations of improper political activities by Federal employees. Federal employees in that context include certain Federal, civilian, and postal employees, as well as certain State and local officers and employees.

Because the special counsel's authority is so broad that it extends to these employees, inclusion of title IX is appropriate. Title IX belongs within the context of this bill.

Although the House approved this legislation in the last two Congresses by overwhelming margins, it has become increasingly clear that the other body will not act on Hatch Act reform this year. I offered my amendment in committee in order to insure that both Houses of Congress had the opportunity to work their will in considering reform of the Hatch Act.

Many of us have worked hard and long in pressing for passage of this and other legislation in recent years, only to see it languish and die in the other body.

Mr. Speaker, the issue of full political participation for Federal employees and protection of the public interest should be addressed here and now. I have worked long and hard to produce a civil service reform bill that balances the rights of management and workers. The bill recommended by the administration was too management oriented. The committee bill is a great improvement over the President's bill. An essential part of this balancing is title IX—Hatch Act reform.

Some has asked us why is it important to attach this amendment at this time to this piece of legislation. The answer of course seems obvious. Where else would an amendment to extend constitutional rights to civil service employees be attached if not to a measure to reform the civil services system? If we are truly attempting to reform the archaic, Federal system, Hatch Act revision becomes mandatory.

Federal employees have been denied since 1939 their legal and constitutional rights to participate like other citizens in the political decisions affecting their lives. That decision to prohibit Federal employees from engaging in partisan politics was the overreaction of an overzealous Congress responding to an overdramatized crisis. For some unknown reason some believe this amendment does violence to the attempt to reform the civil service. For some reason they would like to play it safe. But let me recall for them what Ben Franklin said about that:

> Those who would give up essential liberty to purchase a little temporary safety, deserve neither liberty nor safety.

Those opposing this amendment say it should be defeated because the time is not right. They say that the Civil Service Reform Act is not the right vehicle for Hatch Act revision. I answer those critics by quoting a great American patriot who was confronted with a similar dilemma. He refused to compromise what he believed to be right, just and fair and his sterling remarks resulted in the shot for liberty which was heard around the world. Patrick Henry said to the doubting Thomas:

> When shall the time be right? Shall it be the next week or the next year?

Mr. Speaker, this rule should be defeated. A Democratic President who claims this piece of legislation to be the centerpiece of his legislative program ought to sit down with the Democrats of this Chamber—as opposed to sitting down with the leaders of the U.S. Chambers of Commerce—and propose a bill that will in effect protect the basic rights of Federal employees.

I urge defeat of the rule.

Mr. MEEDS. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. CHARLES H. WILSON).

Mr. CHARLES H. WILSON of California. Mr. Speaker, I rise in opposition to this rule—which subjects only titles IX and X of the bill to a point of order on the grounds of germaneness.

For the life of me, I cannot understand how and why title IX should be treated in this dscriminatory manner.

The facts are fairly obvious—and the connections between Hatch Act reform and the rest of H.R. 11280 are quite strong. First, the bill, in section 2302—on page 138, beginning on line 24—defines improper political activities as a prohibited personnel practice. Title IX of the bill states exactly what these improper political activities are. Second, the bill charges the Special Counsel of the Merit System Protection Board with

responsibility for not only investigating prohibited personnel activities in general but improper political activities in particular. (See p. 160, beginning on line 24.) Title IX of the bill defines more fully these activities which apply to Federal civilian as well as postal employees.

Mr. Speaker, it is inconceivable to me that this bill—which touches on virtually every aspect of civil service—should have political activities and firefighters singled out for this kind of shabby treatment.

Title IX is virtually identical to H.R. 10, the Federal Employees' Political Activities Act of 1977, which passed the House on June 7, 1977, by a vote of 244–164. The only major differences between title IX and H.R. 10 is that title IX designates the special counsel of the Merit Systems Protection Board as the enforcing authority and the Board as the adjudicatory authority. H.R. 10 designated the general counsel of the Civil Service Commission as the enforcing authority while the commission would have been the adjudicatory authority. These changes assume that the Civil Service Commission will be superceded by the Office of Personnel Management and the Merit Systems Protection Board established under Reorganization Plan No. 2 of 1978. The investigative procedures of H.R. 10 were deleted to parallel those established in H.R. 11280.

Although both the committee and the House approved this legislation in the last two Congresses by overwhelming margins. It has become increasingly clear to me that the other body will not act on Hatch Act reform this year. The gentleman from Missouri (Mr. CLAY) offered his amendment in committee in order to insure that both Houses of Congress have the opportunity to work their will in considering reform of the Hatch Act. Many of us have worked long and hard in pressing for passage of this and other legislation in recent years only to see it languish and die in the other body.

Mr. Speaker, the issue of full political participation for Federal employees and protection of the public interest should be addressed here and now.

Inclusion of Hatch Act reform does not constitute a "burden" on civil service reform. Civil Service reform and Hatch Act reform are inextricably interrelated. Each insures that the people's business—the business of our Government—is conducted in a fair and impartial manner.

Inclusion of Hatch Act reform in this bill is not "untimely" as the administration would like the public to believe. There can be nothing more "timely" than providing Federal employees with the right to full participation in the political process of our nation.

I also want to point out, Mr. Speaker, that this bill is 390 pages long. The committee report is—even today—not generally available to the public despite the fact that it was reported 2 weeks ago. The report is 461 pages long. And we are supposed to vote on this comprehensive legislation, ill-informed and ill-prepared.

I urge a no vote on this rule.

Mr. MEEDS. Mr. Speaker, I yield 3 minutes to the gentleman from Virginia (Mr. HARRIS).

Mr. HARRIS. Mr. Speaker, I want to say I appreciate very much the education in parliamentary procedure that we are all receiving here today. The way we construct the rule, apparently, is to waive points of order with respect to the things that are not subject to points of order and not waive points of order with respect to those things that are possibly subject to points of order.

I wonder, as we have talked about the Rules Committee and the rules procedure over the years, if we do this House any great honor by proceeding in a manner like this. I think it is wrong and I think the procedure is wrong to schedule a bill of this magnitude in this manner.

I wonder, Mr. Speaker, if one of my colleagues would hold up the bill and show us the size of the bill that this body is called upon to consider?

There are 11 titles and hundreds of pages.

We had been told that we were going to schedule it in September but now we schedule it on Friday, with 24 hours notice. The House says be ready, Members of the Congress, you are going to consider this 200-page bill with 11 titles tomorrow on the House floor. We are going to reorganize a system that has grown over the last 90 years, a system to protect against the spoils system, reorganize it in the name of efficiency, reorganize it in the name of better management. Forget about the people. You are just dealing with three and a half-million bureaucrats. Who cares about them? I mean, after all, they are the ones we kick around but still expect to run our Government. Do not worry about them. Go ahead and pass the bill. Do not worry about whether their rights are protected or not. Do not worry about whether we politicize the civil service system, just go ahead and pass the law, go ahead on it, get it adopted.

I think that is a great mistake. You have all heard the argument made that we have got to have a bill like this so that when a President Nixon comes into office he is able to reorganize this Government to his liking. Get the law out of his way. Let him come in and make sure that every bureaucrat is doing what he wants him to do so that it is the type of Government that he wants to have.

That is what is being proposed by this rule.

That is what is being proposed in the name of efficiency.

I think it is wrong to have a bill like this brought up in this manner.

I also think that the statement has been made that this somehow keeps the political appointees out of the career ranks. It does not. It opens the door. It sets up a system to get all political appointments on a career status. Something that has been tried over the years.

What it does, No. 1—and, hear this—it allows political appointments to be made within the Senior Executive Service.

The SPEAKER. The time of the gentleman has again expired.

Mr. MEEDS. I yield 1 additional minute to the gentleman from Virginia (Mr. HARRIS).

Mr. HARRIS. It says that the political appointees in the Senior Executive Service can acquire permanent status in grade 15.

We will be establishing a political bone yard in grade 15 that you cannot get them out of.

That is what they are trying to sell in the name of reform.

This House made this mistake before, without necessary thought, without necessary analysis, we said that we were going to reorganize our Postal Service.

I challenge every Member in this House that if they vote for this rule, they are saying to the public: We are going to do to the Federal Government what we did to the Postal Service. We are going to do it without necessary thought. We are going to do it without necessary consideration.

That is what we are going to be telling, them, that is what we are going to do, that we are going to "postalize" the whole Federal Government.

I do not think that that is what you want to do to your constituents.

Mr. MEEDS. Mr. Speaker, I yield 5 minutes to the gentlewoman from Maryland (Mrs. SPELLMAN).

Mrs. SPELLMAN. Mr. Speaker, I am just going to address myself to a very few subjects, although there are so many things that I could talk about.

I would like to reiterate what my colleague, the gentleman from Virginia (Mr. HARRIS) just stated, and that is that we had been advised that this bill was going to be brought up in September. We, therefore, expected to have plenty of time to discuss this legislation with the Members of the House. And the House would then have had plenty of time to do its studies. But, instead, here we are today.

The bill contains not the 200 pages which my colleague from Virginia (Mr. HARRIS) referred to—and this is the first time I have heard him make an error—but 390 pages.

I wonder whether, except for those persons who served on the committee, there is one member here who is really familiar with 10 of those 390 pages.

The report has 461 pages. Do the Members know that there are no copies available yet for the public? Nonetheless, we are rushing headlong into attempting to enact legislation without even giving the public an opportunity to become acquainted with its contents. There is only one copy available for each Member.

Why this rush, Mr. Speaker? Why, when we are changing a system that has been in effect for 100 years, are we rushing pellmell into making those changes without the kind of deliberation changes like that deserve?

Mr. Speaker, I think we ought to be taking a very good look at this legislation. I am concerned about the rule,

about the matter of fairness. Is it really fair for the leadership to decide which parts of the bill it does not want and to pull those out? There are other parts of this bill which are equal in germaneness to the two titles that are being contested. Moreover, who should be making those decisions? Should those decisions not be made by the Members of the House?

Mr. Speaker, I think these are very serious questions. We are denying the Members the opportunity to vote on these matters. They could have that opportunity if those titles were left in the bill and then amendments were brought up to delete them.

Mr. Speaker, I want to ask the Members to go through this bill while we are debating it. They are going to be hearing comments such as those stated by the gentleman from Arizona, our excellent leader, with whom I almost never disagree, but with whom I must differ on this particular measure. He has said that there will be only 10 percent of the SES personnel who are political appointees.

Would the Members be interested in a statistic which is a factual one? That is that 100 percent of the SES could conceivably be political, not just 10 percent, but 100 percent.

Mr. Speaker, since the Senate adopted the administration version, if we were to agree to that in conference, there would be no provision to insure that anybody would have to come from within the system. Yes, 100 percent political—not 10 percent. Fortunately, the committee has cut the odds down somewhat and I hope some of us will insist on holding our ground in the Conference Committee.

As the Members listen to the debate on this bill, I ask that they listen very carefully and hear both sides of the story. There have been a great many misinterpretations, and there have been a great many misrepresentations. Of course, I would have preferred that we not consider this bill in haste. It is much too important. Let us adopt a bill which can last another 100 years. Let us move with deliberation.

Mr. LOTT. Mr. Speaker, I yield back the balance of my time.

Mr. MEEDS. Mr. Speaker, I yield myself such time as I may consume.

I do not intend to get into the merits of the legislation before us or the legislation which this rule makes in order. However, there have been two questions which I think were raised and require some answers.

First as to the time, I have talked with the gentleman from Arizona (Mr. UDALL) about that matter; and he informs me that he advised the committee the day this bill was reported out that he intended to have it on the floor this week. I know from reading stories in the newspapers that it was initially proposed to be on the floor this week. The matter has been before the Rules Committee since August 3, last Thursday.

I know it has been scheduled before the Committee on Rules most all of this week. It is usual and customary and clearly the people who have spoken to this issue know it is usual and customary to take a bill to the floor as soon as possible after it emerges from the Committee on Rules; so there should be no surprise here. There has been ample time for everyone to consider this.

Mr. Speaker, we have structured the rule in such a way that there ought to be ample debate of all the issues.

The second thing is this, that there seems to be some hue and cry that this rule is unfair. Somebody said, "Playing games." Far from it, we are stopping games from being played by this rule. This rule refuses to waive a point of order on germaneness against two titles of this bill, which are clearly both substantively and technically nongermane to this bill. The Committee on Rules concluded that Hatch Act reform and firefighters should not be allowed to hitchhike on the back of civil service reform. That is all this rule does. It is a fair rule. It gives ample opportunity for discussion of all the issues. This rule should be adopted.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HARRIS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 357, nays 18, not voting 57, as follows:

Diggs	Milford	Symms
Fraser	Miller, Calif.	Teague
Frey	Murphy, N.Y.	Thone
Giaimo	Nolan	Tsongas
Gibbons	Pattison	Walsh
Harrington	Poage	Wampler
Harsha	Pressler	Wydler

The Clerk announced the following pairs:

On this vote:

Mr. Richmond for, with Mr. McDonald against.
Mr. Rodino for, with Mr. Diggs against.

Until further notice:

Mr. Breaux with Mr. Armstrong.
Mr. Le Fante with Mr. Marriott.
Mr. Jenrette with Mr. Cochran of Mississippi.
Mr. Giaimo with Mr. Pressler.
Mr. Murphy of New York with Mr. Quie.
Mr. Pattison of New York with Mr. Rudd.
Mr. Shipley with Mr. Ruppe.
Mr. Teague with Mr. Sawyer.
Mrs. Lloyd of Tennessee with Mr. Wampler.
Mr. Long of Louisiana with Mr. Wydler.
Mr. Bowen with Mr. Caputo.
Mr. Ambro with Mr. Cohen.
Ms. Boggs with Mr. Frey.
Mr. Harrington with Mr. Harsha.
Mr. Metcalfe with Mr. Walsh.
Mr. Ireland with Mr. Symms.
Mr. Huckaby with Mr. Skubitz.
Mr. Brooks with Mr. Latta.
Mrs. Burke of California with Mr. Fraser.
Mr. Dent with Mr. Hubbard.
Mr. Luken with Mr. Milford.
Mr. Nolan with Mr. Roncalio.
Mr. Sisk with Mr. Tsongas.
Mr. Breckinridge with Mr. Miller of California.
Mr. Stark with Mr. Sarasin.
Mr. Gibbons with Mr. Thone.

So the resolution was agreed to.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO FILE REPORT ON H.R. 11733

Mr. JOHNSON of California. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation may have until midnight tonight, Friday, August 11, 1978, to file the committee report on H.R. 11733, the Surface Transportation Assistance Act of 1978.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION FOR COMMITTEE ON AGRICULTURE TO FILE REPORTS ON H.R. 13750 AND H.R. 12101

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight tonight, Friday, August 11, 1978, to file reports on the bills H.R. 13750, the Sugar Stabilization Act of 1978, and H.R. 12101, the Farmers and Consumers Marketing Act of 1978.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, will the gentleman please repeat the bills that he wants to consider?

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Washington.

Mr. FOLEY. The bills are H.R. 13750, the Sugar Stabilization Act of 1978, and H.R. 12101, the Farmers and Consumers Marketing Act of 1978.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, this has nothing to do with the grain reserve?

Mr. FOLEY. No. That bill has not yet been reported by the committee.

Mr. ROUSSELOT. I thank the gentleman from Washington.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

FORTY-FOUR YEARS OF LEADERSHIP BY GEORGE MAHON

(Mr. ROONEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

● Mr. ROONEY. Mr. Speaker, it is with great pleasure that I take this opportunity to commemorate the many years of public service given to this country by GEORGE MAHON.

He represents the very best of men that America can produce. His qualities have dignified and enhanced the body of Congress that he has served so well for the past 44 years and his wise leadership has well served the interests of this country as well as of his constituents.

There are few men who can wear power so well. GEORGE MAHON has used his talents to preserve our fiscal integrity and has fought hard to maintain his ideals. He has also, and most importantly, retained his perspective on himself. He never compromised his principles nor faltered in his beliefs that Government must be for all the people. His distinctive leadership qualities have honored us all.

It has been my privilege during the 95th Congress to have been his neighbor in the Rayburn Building. I have enjoyed his company and take great pleasure in our relationship.

I thank him for his friendship, his many, many years of work, and for his unwavering adherence to the values that this country esteems in men. He will be greatly missed.

My hopes go with him, and with Mrs. Mahon, upon his retirement that the coming years are happy ones. He has won the respect of his colleagues and of his country.●

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO FILE REPORT ON H.R. 13650

Mr. UDALL. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs may have until midnight tonight to file a report on the bill (H.R. 13650) to authorize the Secretary of Energy to enter into cooperative agreements with certain States respecting residual radioactive material at existing sites, to provide for the regulation of mill tailings under the Atomic Energy Act of 1954, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

APPOINTMENT OF CONFEREES ON S. 2701, AMENDING WATER RESOURCES PLANNING ACT

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2701) to amend the Water Resources Planning Act, with a House amendment thereto, insist on the House amendment, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona? The Chair hears none, and, without objection, appoints the following conferees: Messrs. MEEDS, UDALL, VENTO, and LUJAN.

There was no objection.

CIVIL SERVICE REFORM ACT OF 1978

Mr. UDALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11280) to reform the civil service laws.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CLAY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 340, nays 13, answered "present" 1, not voting 78, as follows:

Mr. MOORE and Mr. CLAY changed their vote from "no" to "aye."

So the motion was agreed to.

The result of the vote was announced as above recorded.

Mr. CLAY. Mr. Speaker, I move to reconsider the vote by which the motion was agreed to.

Mr. UDALL. Mr. Speaker, I move to lay the motion to reconsider on the table.

The SPEAKER pro tempore. The question is on the motion to table offered by the gentleman from Arizona (Mr. UDALL).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CLAY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 327, nays 8, not voting 97, as follows:

So the motion to table was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 11280, with Mr. DANIELSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Is there objection to dispensing with the first reading of the bill?

Mr. BAUMAN. Mr. Chairman, reserving the right to object to dispensing with the first reading of the bill, can the gentleman from Arizona tell the Committee what the schedule for the rest of the afternoon might be?

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Arizona.

Mr. UDALL. As I told the gentleman from Maryland and other colleagues it would be part of my purpose, based on arrangements and discussions with the gentleman from Missouri (Mr. CLAY) and other Members who are concerned with this bill, that we complete general debate in order under the rule and at the conclusion of the general debate, without reaching points of order or amendments, I will move that the Committee do now rise, and we would conclude the bill at another time.

I had promised the leadership to try to get through the bill today and I thought we had some hope of doing that until these events occurred.

There are other conference reports and other matters that are going to be scheduled, but in any event the House will conclude its business by 3 o'clock. But I cannot guarantee that at about 1:30, when we will conclude general debate, we will conclude the day's business. Other matters will be scheduled.

Mr. BAUMAN. Can the gentleman tell us what other matters will be scheduled?

Mr. UDALL. The leadership is looking for some other business, and I cannot say what, but I cannot guarantee there will not be other business.

Mr. BAUMAN. In the absence of information as to the other scheduled matters, and in view of the fact that many Members wish to depart, I will be constrained to object to dispensing with the reading of the bill unless we know precisely what the schedule will be.

Mr. Chairman, I object.

Mr. UDALL. Mr. Chairman, will the gentleman withhold that objection for a moment and will the gentleman yield?

Mr. BAUMAN. I will withhold the objection and I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, in reply to the gentleman's question, I just talked to the Speaker and to the minority leader about 5 minutes ago about the situation, that we could not go beyond the general debate today, and they are conferring with other chairmen about various conference reports and other matters. They will be making an announcement as soon as they can, so I hope the gentleman will withhold for a minute.

The gentleman will have other opportunities to object, and I know he has sufficient parliamentary skill to take advantage of those opportunities, so I hope the gentleman will withhold his objection.

Mr. BAUMAN. Mr. Chairman, there are 138 pages in the original bill that need to be read, and I am sure the President would want us to know the contents of his major civil service reform, and I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk proceeded to read the bill.

Mr. DAVIS (during the reading). Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic devcie.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The Clerk will read.

The Clerk continued to read the bill.

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent that further first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, could the gentleman from Arizona now inform the Committee what the program will be?

Mr. UDALL. Mr. Chairman, if the gentleman will yield, the leadership has advised me that following the one hour of general debate on this bill, they will call up for action under previous notice to the House the bill, H.R. 13007, the Electronic Fund Transfer Act, under an open rule, with one hour of debate, but in no event will the House continue legislative debate beyond 3 p.m. this afternoon.

Mr. BAUMAN. So if the electronic fund transfer bill is not concluded by 3 p.m., there will be no vote, I assume?

Mr. UDALL. The gentleman is correct, and I suspect there may not be a disposition to use time or to extend remarks and we may not use our full hour of debate.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, can the gentleman, or somebody from the Democratic leadership, tell us if the gentleman from Illinois (Mr. ANNUNZIO) has been contacted or if the gentleman is prepared to deal with the electronic fund transfer bill? I know the gentleman worked very hard on that bill in the Committee on Banking, Finance and Urban Affairs. Is the gentleman aware the bill was coming up? There were several amendments.

The CHAIRMAN. The Chair will announce that the gentleman from Illinois (Mr. ANNUNZIO) has been contacted and is expected to be available on or about 1:15 p.m. this afternoon.

Mr. BAUMAN. Mr. Chairman, further reserving the right to object, I would like to ask the gentleman from Arizona one other question. There are a number of bills now in the legislative nether land, such as CETA and foreign aid. Will this bill be consigned to that same ethereal place? Does the gentleman know when this bill will be taken up again?

Mr. UDALL. Mr. Chairman, if the gentleman will yield, some have referred to this bill as an uncooked turkey waiting to be put in the oven.

Mr. BAUMAN. Certainly not the gentleman from Maryland.

Mr. UDALL. We do not consider this bill in that category at all. The leadership has a very heavy schedule, as the gentleman knows. I have asked the Speaker to put it on sometime next week; if not, we go off into limbo until September, as the gentleman knows.

Mr. BAUMAN. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Without objection, the further first reading of the bill will be dispensed with.

There was no objection.

The CHAIRMAN. Under the rule, the gentleman from Arizona (Mr. UDALL) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. DERWINSKI) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this is a major bill, and it is one on which the Committee on Post Office and Civil Service has worked long and hard.

Mr. Chairman, the bill we are considering today is the most comprehensive reform of the civil service laws ever presented to the House. It relates to practically every aspect of civil service employment in the U.S. Government—appointment, veterans' preference, pay, classification, labor relations, political rights, the organization of agencies in the executive branch responsible for administering the civil service system, and insuring fairness and equity for employees, and a host of other issues which we have deliberated for the last 5 months.

Chairman NIX introduced the President's proposal on civil service reform on March 3. Following that, our committee conducted 13 days of public hearings in March, April, and May. More than 200 witnesses, representing all facets of public life in this country, testified before our committee. Following those hearings, our committee met for 10 days to mark up this legislation. Some 77 amendments were considered and finally, on July 19, by a vote of 18 to 7, the committee ordered the bill reported with a committee amendment.

This bill is divided into 11 titles. It is designed to resolve some of the major problems which the President and many

Members of Congress believe hinder Federal agencies from functioning effectively under the civil service system.

There are delays in the present system in both hiring and firing. The inflexibility in the highest levels of the civil service frustrates any President who is elected by the people to carry out a program. Employees are frequently discriminated against because in good faith they attempt to expose wastes of the taxpayers' money or agency mismanagement. The classic example in recent years is Ernest Fitzgerald, whose efforts to bring to the attention of the people the incredible cost overruns of the C5A transports resulted in a bureaucratic snarl in an effort to silence him or dismiss him. Years ago, Dr. Janet Kelsey, who discovered the tragic effects of thalidomide, was at the same time celebrated as a hero to the people and an enemy within the Food and Drug Administration.

President Carter has proposed legislation to improve the civil service system and to prevent the kinds of abuses illustrated in the Fitzgerald and Kelsey cases.

Title I of H.R. 11280 establishes by law the general policies of the merit system principles which shall prevail throughout the executive branch. This title also lists specific prohibited personnel practices, protects employees from reprisals because of whistle blowing, and generally provides protection for all employees against discrimination, political coercion and other unfair retributory or illegal actions.

Title II establishes by law the Office of Personnel Management and the Merit Systems Protection Board to take over the responsibility now vested in the Civil Service Commission.

Title III principally relates to veterans' preference. The committee recommends that veterans' preference for Vietnam Era veterans be improved by creating more job opportunities in the Federal service. This will be accomplished principally by eliminating appointment preference for retired military officers above the rank of captain, limiting preference to a 3-year period for retired officers and enlisted men below the rank of major, and generally limiting veterans' preference to a period of 15 years following separation from the armed services. The changes will not apply in the case of a disabled veteran.

Title IV establishes the senior executive service, which will include the management positions now generally known as supergrades. It will also include some executive level V and executive level IV positions. This is critically important to effective management of any President's program. Unless greater flexibility is established at the GS–16, 17, and 18 level, no President can carry out the program upon which he was elected in a manner which the people are entitled to expect. The senior executive service fairly protects the rights of employees appointed to these positions, and insures that an employee who retreats from a senior executive service position is guaranteed placement, either in the job he had or in a job of comparable pay.

Title V establishes a merit pay system rather than a longevity pay system for management employees in grades 13, 14, and 15.

Title VI improves the research and demonstration projects of the executive branch.

Title VII establishes a new labor-management relations program. Rather than enacting into law the skeleton outline of the Executive order on labor-management relations, the committee has approved what we believe is a fair and responsive program. We have attempted to navigate a course which gives Federal employees greater rights in labor relations than they have heretofore enjoyed. At the same time we have preserved the rights of management to run the shop. I believe the time has simply come for Federal employees to enjoy some, if not all, of the same rights which employees in the private sector have had since 1935. We do not permit bargaining over pay and fringe benefits, but on other issues relating to an employee's livelihood, we do permit collective bargaining between Federal employee unions and agency management. To those who claim the Government will simply go up in smoke if this labor provision is adopted, let me refer you to those who said the world would go up in smoke if the Waggonner Act were approved, or the Social Security Act, or the medicare bill, all of which have contributed so much to improve the quality of American life.

Title VIII incorporates the provisions of the Nix bill on downgrading of Federal employees. This legislation has already been reported out of our committee, but we believe that because of the lateness of the hour, action by the Senate might not be possible. The administration supports the enactment of title VIII.

Title IX incorporates the provisions of the Hatch Act reform, which previously passed the House and is now pending in the Senate. I am sure there will be others who will address that issue at greater length.

Title X incorporates the provisions of the firefighters' work week bill, which previously passed both Houses but was vetoed by the President.

On both of these issues I think it is fair to say that if the House approves this bill with these provisions intact, there is some doubt that the Senate would be willing to go to conference. I personally supported and voted for both of these bills as separate legislation, and I have nothing but high regard for my colleagues from Missouri and Virginia who are their sponsors, but their inclusion could jeopardize the possibilities for enactment of the civil service reform bill this year.

Title XI includes miscellaneous and technical provisions, including a decentralization of government study proposed by my colleague from Iowa, Mr. LEACH.

Mr. Chairman, I believe the committee has worked out a very good bill. It gives the administration most of what it wants. It gives our friends in labor a positive program to achieve many of the rights which other citizens have enjoyed for decades. It improves the protection for employees and it provides for the establishment of a new system of high level management which I believe is necessary.

I urge my colleagues to support the committee amendment.

Mr. DERWINSKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as we proceed into the critical phase of amending and shaping this legislation I hope Members on both sides of the aisle will keep an objective eye on what should be our ultimate goal—that is, the enactment of honest and unbiased civil service reform.

This legislation offers the Members of the House the opportunity to reinvigorate a Federal civil service merit system that, during its 95-year lifespan, has become immune to effective management.

It is my strong personal opinion that civil service reform is a nonpartisan issue and that reform is good Government. I hope that feeling is shared by my colleagues.

While I voted in committee to report this legislation to the floor, in the interest of promoting a sound concept, there are parts of the committee-reported bill I strongly oppose, and would like to sketch out these areas so that when we get to the amending process we will have a better idea of the key issues.

The most damaging addition to the bill is title IX which contains the language of H.R. 10, a bill emasculating the Hatch Act and opening the door to politicization of the civil service system. The inclusion of this title is contrary to the concept of reform legislation.

In his message transmitting his civil service reform legislation to the Congress, President Carter declared one of his major objectives was "to strengthen the protection of legitimate employee rights." A fundamental right of employees under the civil service merit system is to be free from and protected against political coercion. Repeal of the Hatch Act, as proposed in title IX destroys that protection. The ability of the civil service to perform in an efficient and unbiased manner would be seriously impared by title IX.

The administration opposes the inclusion of title IX in this legislation and so I urge all of my colleagues to join in opposing and rejecting title IX, or any modification of it.

My Democratic colleagues should be particularly concerned with the addition of title X to the bill, which is a gratuitous slap at the President. This title contains the provisions of H.R. 3161, a bill reducing the basic workweek of Federal firefighters which President Carter vetoed less than 2 months ago and returned to the Congress with a strong message of rejection.

The firefighters' workweek legislation has nothing to do with civil service reform. It is a bill that cannot stand on its own merit and adding it to this bill is simply a move to complicate House consideration of essential reform legislation.

The language in this bill diluting the veterans' preference laws should also be rejected.

The fundamental thinking behind the veterans' preference laws, which date from 1865, is to compensate those who served our Nation honorably in time of war by providing qualified applicants with certain preference in appointment. These laws also grant preference for retention rights during a reduction in force.

The title dealing with the senior executive service was caught in, and became the victim of, one of the many crossfires in committee. To limit the SES to a 2-year experimental program in just three agencies, and the committee amendment does, is to dilute legitimate reform. The senior executive service is a cornerstone of this legislation, and I urge support of an amendment to restore the bill to its original purpose as recommended by the administration.

The labor-management provisions of the bill, in title VII, expand considerably the scope of bargaining beyond that established under Executive Order 11491, the Executive order which presently governs labor-management relations in the Federal sector.

Under the committee bill, Federal employees unions will have the right to negotiate such management-oriented issues as promotion standards, job classification, and reduction-in-force standards and procedures.

I suggest to those who are interested in true reform that it is important to correct title VII so that it essentially conforms with the Executive order, as originally proposed, and supported by the administration.

One other feature that needs remedial attention is that language covering the Federal Bureau of Investigation into certain titles of the bill. An amendment to grant exclusion to the FBI, because of its special personnel requirements, deserves support.

Mr. Chairman, this legislation clearly needs some major surgery. But I believe that beneath its burden of special interest fat, the bill contains the muscle of sound civil service reform.

Whatever legislation is enacted will be administered by both Democratic and Republican administrations in the future. Shortsighted concessions to the voices of special interest is not service to the public which, as we know through proposition 13 and a host of other indicators, strongly favors a government more efficient and responsive to its needs.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to our distinguished statesman, the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, I rise in support of the Hanley amendment to title III of H.R. 11280, the Civil Service Reform Act of 1978. As you know, this amendment would preserve veterans' preference in Federal employment as it presently exists.

There is very little new which can be said about veterans' preference. Emotions run high on all sides of the issue and it has become difficult to separate the fact from the fiction. To put the matter into perspective, I would like to offer the Members a short history on veterans' preference practices.

The first granting veterans' preference followed the Civil War—1865—and provided that—

> Persons honorably discharged from the military or naval service by reason of disability resulting from wounds or sickness incurred in the line of duty, shall be preferred for appointment to civil offices, provided they be found to possess the business capacity necessary for the proper discharge of the duties of such offices.

In 1876, the Congress went on to grant veterans' preference in reduction-in-force actions in the Federal service. This law also extended protection to the widows and orphans of deceased soldiers and sailors. For those who are unmoved by this historical affirmation of veterans' preference, I would remind them that George Washington, then a colonel, communicated to the Virginia House of Burgesses in 1754, that "special assurances" should be given to service-connected disabled veterans that they would not be "discharged and turned upon an uncharitable world to beg, steal, or starve. * * * There are few men who would choose to have their lives exposed, without some view or hope of a reward, to the insults of a merciless enemy."

The Veterans' Preference Act of 1944, which is the basis for most of the current practice, granted veterans preferential treatment in Federal employment. Basically, the law provides:

First. Five point preference added to the minimum passing score (70) received by the veteran;

Second. Ten-point preference for disabled veterans;

Third. Preference for job retention in the event of a reduction in force;

Fourth. Reemployment rights in the event of interruption for military service;

Fifth. Preference in meeting medical/physical requirements;

Sixth. Certain preferences in appeal rights;

Seventh. Absolute preference for certain jobs at lower levels; and

Eighth. Miscellaneous benefits/preferences.

The Schroeder amendment adopted in the Post Office and Civil Service Committee seeks to drastically reduce and damage these preference rights. I strongly oppose the Schroeder amendment and urge my colleagues to examine the arguments presented by the gentlelady from Colorado in support of her amendment. The hearing record is clear in its refutation of the charges that veterans' preference has led to discrimination against nonveterans, women, and minorities.

The Honorable RAY ROBERTS, chairman of the Committee on Veterans' Affairs. has stated that he is not convinced by the testimony presented in favor of this dilution of veterans' preference. In a letter to Representative HANLEY. the author of this amendment, Representative ROBERTS asserts that:

> Our Subcommittee on Education and Training recently conducted oversight hearings on the Administration's proposal to amend the Veterans' Preference Act. Based on testimony presented by the Chairman of the Civil Service Commission, Mr. Alan Campbell, and the major veterans organizations, many of us are not persuaded that the proposal has merit. The average age of World War II veterans is now 59 years. Obviously, his eligibility for veterans' preference will have no major impact on employment during the next ten years. The Korean veteran, whose average age is 48, is well established in his career. However, many Vietnam veterans are finding it extremely difficult to obtain employment. The rate of unemployment among this group now stands at about ten percent.

The Schroeder amendment, limiting preference to a one-time use within 15 years from the date of discharge will not aid the Vietnam veteran, but will, in fact, eliminate many veterans of that era from the benefit of preference practices.

We, in the Congress, must hold fast to the commitment made to the veteran years ago when we promised readjustment assistance to those who risked their lives in defense of this country. Veterans' preference does not give an unfair advantage to veterans seeking Federal employment, but merely facilitates the hiring of well-qualified applicants whose careers have been interrupted or delayed because of military service.

I urge my colleagues to join me in support of the Hanley amendment and in support of those men and women who served us all without question or reservation.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the comments that have been made by the gentleman from Illinois (Mr. DERWINSKI). I know that the gentleman from Illinois and the gentleman from Arizona (Mr. UDALL) have been very diligent in trying to get this very much needed reform through the Congress. We are surprised at the dilatory tactics of some of our good colleagues who, in an effort to jam almost everything in the book into this bill, have unfortunately confused the issue of true civil service reform.

I do not argue against the ability of those Members today to carry on what has been a legislative procedural filibuster, because I engage in that all the time myself.

Mr. CLAY. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. Mr. Chairman, I do not have the time. I will ask our colleague, the gentleman from Illinois (Mr. DERWINSKI), if he wishes to yield to the gentleman.

Mr. DERWINSKI. I will yield to the gentleman from Missouri (Mr. CLAY) so that the gentleman from California and he may have a friendly discussion.

Mr. ROUSSELOT. I assure the gentleman the discussion will be very friendly.

Mr. CLAY. Mr. Chairman, I feel somewhat like Hamilton and Burr or Brutus and Caesar.

I will ask my good friend, the gentleman from California (Mr. ROUSSELOT), if he would care to name those Members who have engaged in dilatory tactics this morning. I am sure the gentleman does not want to impugn the character of every Member over here who has been attempting to resolve some issues that ought to be resolved and who are pre-

pared to offer some perfecting amendments to this bill.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman from Illinois will yield, does the gentleman from Missouri (Mr. CLAY) think it is necessary to name names?

Mr. CLAY. I do not think the gentleman ought to impugn the motives of every Member.

Mr. ROUSSELOT. I do not want to impugn any Member, and I have admitted I engage in such tactics all the time when I think issues need to be resolved. When we do that, we are stalling for time; that is all we are doing.

I do not think I need to name names, because the record will be very clear tomorrow as to who is engaged in legislative procedural tactics. That is a very natural procedure, and I do it all the time when I am trying to get issues clarified that I think are not being clarified.

Mr. CLAY. But the gentleman is not being "dilatory"?

Mr. ROUSSELOT. Oh, yes, I think I am dilatory at times.

Mr. DERWINSKI. Mr. Chairman, if I could reclaim my time, I seem to recall that there is a line in Shakespeare that runs something like this: "It takes one to know one."

Mr. ROUSSELOT. Yes, that is right, and I accept that honor.

Mr. DERWINSKI. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Chairman, my opinion of this civil service reform legislation is well known within the Post Office and Civil Service Committee, on which I serve. I hope that my colleagues, who are not on this committee, have had or will have the opportunity to read the committee's report on H.R. 11280, and particularly the additional views of the Members who considered this bill in committee.

There are numerous amendments pending to H.R. 11280 which other Members and I will be offering today in hopes of improving this legislation, for I truly believe that this major proposal must be substantially revised before this bill is transformed into a credible piece of civil service reform legislation.

It is indeed unfortunate that the President has chosen this vehicle to "reform" the civil service system. As I pointed out in my personal views, in the committee report many parts of this legislation and especially the cornerstone of this bill, the senior executive service, is really a rehash of legislation that had been offered in prior Congresses, and which for the most part, has been discredited.

It is not right that the American public which desires and deserves civil service reform should be misled into believing that H.R. 11280 is such reform. This bill in its present form is far from reform. It is change, but change for the worse, not for the better.

Alan May, coauthor of the infamous "May-Malek Manual" which was to serve as the Nixon administration's plan to politicize the Federal bureaucracy, is quoted as saying:

> I congratulate President Carter on his proposed civil service reforms. It was exactly to that kind of result that my manual was written. There are many ideas in (this legislation) that resemble the May Manual.

Mr. May was convicted for his role in politically clearing civil service candidates for positions at the GS–13 level and above.

Two former executive directors of the Civil Service Commission, Bernard Rosen and Nicholas J. Oganovic, are actively opposing this legislation. Surely their opposition, coupled with their expertise, should raise some doubts in the minds of my colleagues about the merits of this bill.

I ask each of my colleagues, as we approach the amendment process, to keep an open mind. Disregard the slogans, the labels, everything but the substance. Instead, I urge my colleagues to please carefully consider the arguments set forth in support of the amendments to be offered to this bill and not be persuaded to oppose an amendment simply because administration spokesmen rise to argue against these amendments with generalities such as this particular amendment being too "restrictive or too burdensome."

I will reserve any further comments that I may have regarding this legislation until such time as we resolve ourselves into the Committee of the Whole for the purpose of offering amendments.

Mr. HANLEY. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, I do not believe there is a question at all that congressional attention to the civil service system is long overdue. Unfortunately, expediency has been the order of the day, as opposed to responsibility. Earlier, the gentleman from California (Mr. CHARLES H. WILSON)—and I do not see him here at the moment—asked: Is it fair to say that some games have been played?

I would respond to Mr. WILSON in the sense, yes and indeed, virtually every game has been played from three-card Molly right on through a good shell game. Unfortunately, the subject matter has become completely confused, distorted. Early on, I committed myself to civil service reform if done in a responsible way. I urged the President that in recognition of the scope of this undertaking, whereas we are about to turn around the system that has been in order for better than 100 years, let us be a bit more deliberate. Let us, hopefully, effect decent compromises with dissident entities. I urged that we take the remaining months in this Congress and do the spadework, setting a target for early on in the 96th Congress, at which time we would commit ourselves to civil service reform as an absolute priority. At that time, we would have welded together a highly responsible package, something that would have prevented the occurrence in Chicago this week at the AFGE convention, an upheaval that was totally unnecessary had the executive branch been somewhat more deliberate.

The civil service reform issue just about blew that association apart. As opposed to supporters, the President now has dissenters, and that is most unfortunate.

Mr. Chairman, I will take the remaining moment or two that I have to allude to another subject matter terribly close to my heart, and one that we will be hearing a great deal about as we pursue this subject matter—veterans' preference. I would like to restate at this moment that I have agreed to no compromises whatsoever.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. UDALL. Mr. Chairman, I yield 3 additional minutes to the gentleman from New York.

Mr. HANLEY. I have agreed to no compromises whatsoever. One of the great disappointments to me is the attitude of the executive branch with respect to the traditional veterans' preference from the standpoint of career employment. I am distressed at the editorial which appeared in the Washington Post this morning, which portrays me as an ogre, anti-Vietnam veterans.

I want to assure the Members today that this position is in complete accord with the desires of 95 percent of the Vietnam veterans. That is what it is all about. Our Nation established a principle many years ago during its periods of hostility, and now that the embers have cooled off and we do not have any hostile actions, we are saying to the men and women who served, "What we told you some years ago when you were members of the various branches of the Armed Services no longer prevails, and we are about to change the ground rules."

I do not accept that, and I am assured that most Members of this body will not accept that on the fundamental basis of principle. I think of the faith and integrity of the U.S. Government. That is the principle at stake here on the matter of veterans' preference.

With regard to minorities and women and career employment, as we get into this matter we will cite the figures of the Department of Labor with respect to the fair treatment given women and minorities through the traditional veterans' preference.

So we will be getting into that. We will be getting into a number of other things.

I recognize the essentiality of providing the President of the United States with the tools which he deems proper and appropriate to manage the store, and, unless there are some amendments adopted that I am unaware of at the present time, I, in all probability, will be supporting this bill. I simply say that I do so reluctantly because had we trod another course, that course would have minimized the margin of error associated with a transition of this degree.

I thank the gentleman for the time.

Mr. ROBERTS. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Texas (Mr. ROBERTS) such time as he may consume.

Mr. ROBERTS. Mr. Chairman, I commend the gentleman from New York for all he has done, in perfecting his amend-

ment. I also will oppose sections of this bill. I would point out that the first persons to be hit under this bill will be the wives of veterans who are missing in action.

I strongly oppose the provisions of this bill that eliminate veterans preference.

Mr. Chairman, I will oppose the passage of H.R. 11280, the civil service reform bill as reported. I cannot support it in its present form. I am opposed for many reasons.

First, the Senior Executive Service proposed in title IV of the bill would create a totally new personnel system encompassing most Government executives in positions above GS–15 and below executive level III, "or their equivalents." Among the "equivalents" which would be covered are approximately 400 managers in the Veterans' Administration's Department of Medicine and Surgery including the Directors and Chiefs of Staff of most of our 172 VA hospitals and Department of Medicine and Surgery executive positions in the central office.

Part and parcel with establishment of the Department of Medicine and Surgery in 1946 was the creation of a consolidated personnel system from key employees in the Department. In establishing the Department of Medicine and Surgery, Congress recognized the need for a separate authority for employing and paying key personnel. Like the VA system, the Senior Executive Service is designed to promote flexibility in personnel practices. It is not, however, geared to the special requirements of managing a consolidated health care delivery system. Inclusion of title 38 managers in the proposed bill raises the following concerns:

Coverage: While the directors and chiefs of staff at most of VA's hospitals would be included in the proposed Senior Executive Service, individual positions at some of the agency's smaller hospitals and clinics could be excluded by the Office of Personnel Management.

Position authorizations: Position authorizations for the Senior Executive Service are to be based on agency requirements which are tied to program activities and budget requirements. While the need for VA hospital management positions is obvious, more administrative resources would be needed to justify these needs to the Office of Personnel Management biennially, and the Veterans' Administration would lose considerable control since the Office of Personnel Management would have final authority for approving position allocations and could even, at their initiative, withdraw position allocations.

Staffing and appointments: Under the Senior Executive Service, the Office of Personnel Management will approve managerial qualifications of all executives and, therefore, current flexibility in selecting candidates would be lost to VA.

Pay: The Senior Executive Service would provide five or more basic pay rates ranging from GS–15, step 6 (currently $ 42,201), to executive level IV (currently $50,000). Adding bonuses would boost the pay for SES positions to 95 percent of executive level II (currently $54,625). Basic pay rates for title 38 managers currently range from $39,172 to $50,000, but physicians may receive an additional bonus which now averages $7,000 a year. Future nonphysician hospital directors might recognize pay benefits under the Senior Executive Service. However, most current hospital directors are at or near the $47,500 salary limitation and since few would qualify for the "top" SES pay level, they are unlikely to recognize any pay benefit from inclusion in the Senior Executive Service. Of greater concern, however, is the loss of pay which would befall chiefs of staff of VA hospitals and central office physicians and dentists if included in the Senior Executive Service. The loss of the "special pay" currently available to these individuals would make acceptance of a managerial position very unattractive to them and is likely to have an adverse effect on recruitment of top-notch physicians and dentists for these key managerial positions.

A minimum and maximum salary for graded positions in the title 38 pay system is now prescribed in the law. The Administrator is authorized to pay at any rate within this range of salaries and to establish pay incentives for special achievements and performance. In the case of top managerial positions, particularly in the assignments of hospital directors and chiefs of staff, this flexibility is necessary to meet the current and unique needs of our health care delivery system. The inclusion of such positions in the Senior Executive Service could severely curtail the current VA authorities in pay policies for these employees.

Performance evaluation: The pivot of the Senior Executive Service's system for granting awards and removing executives is the performance evaluation system. This system calls for annual evaluation, based on predetermined performance requirements, of each executive by a performance review board. Under the Senior Executive Service the Veterans' Administration no longer would have primary responsibility for establishing the framework of this system nor for its application in evaluating individuals. This control will have been lost to the Office of Personnel Management and performance review boards whose members may be from outside the Department of Medicine and Surgery. The very real difficulty of achieving and administering an objective, realistic, valid and creditable performance evaluation system to meet the unique needs of the Department of Medicine and Surgery is also of concern to me.

Mr. Chairman, I have also given much thought to the administration's proposed plan to terminate veterans' preference for millions of veterans—and drastically limit the benefit for so many others under the guise of "helping Vietnam veterans." It is a sad day we find ourselves in.

Is it any wonder veterans are sounding off about the "anti-veteran" attitude of this administration? Never have we witnessed so many actions that seem to slight the man who served his country honorably in time of war. Look at the record. Last year the administration decided to provide full veterans' benefits to veterans who were discharged under conditions other than honorable. You will recall the Congress spent most of the session working out a solution to the problem. The Secretary of Health, Education, and Welfare suggested the administration was thinking of transferring the veterans compensation and pension program from VA to HEW as part of a welfare reform package. We finally resolved that. There was some thought of dismantling the Veterans Administration through a reorganization plan. It took us some time to get a commitment from then OMB director, Bert Lance, that this would not be done.

This year, the administration was determined to close 3,132 VA hospital beds with a reduction of 1,500 employees. Although the House acted to assure this would not happen, it still is not resolved. The administration also proposed to terminate research programs being conducted in about 60 VA hospitals. The House stopped that from happening. The administration's proposed 1979 VA budget was deficient by more than $1 billion. The House restored the funds in its First Budget Resolution.

Now the administration is proposing that we limit the use of the 5-point veterans' preference, which will have a tremendous impact on Vietnam veterans while expanding eligibility for Federal employment for nonveterans through noncompetitive appointments. While this bill would take away veterans preference for a person who served in Vietnam, the President, by Executive order, has made thousands of volunteers for as little as one year of service in the Peace Corps, VISTA, and ACTION eligible for a noncompetitive excepted appointment to a Federal Civil Service job. Think of that. Take away the 5-point preference for honorable military service during a war and, grant instead, a noncompetitive appointment to those who avoided the draft and who selected alternative civilian service instead. What kind of logic is this? What rational explanation can one give for such a policy?

In all of my years in the Congress, I have never known any administration to suggest that veterans' preference is a readjustment benefit and should be terminated after a limited period of time. When first enacted, it was given for life and has remained intact until now. The first mention of veterans' preference in connecion with reduction in force (RIF) procedures appeared in an act of August 15, 1876 (19 Stat. 169) which stated:

That in making any reduction in force in any of the executive departments, the head of such department shall retain those persons who may be equally qualified, who have been honorably discharged from the military

or naval service of the United States and the widows and orphans of deceased soldiers and sailors.

The act of August 23, 1912 (37 Stat. 413) provided:

That in the event of reductions being made in the force in any of the executive departments, no honorably discharged soldier or sailor whose record in said department is rated good shall be discharged or dropped or reduced in rank or salary.

The objective of the Veterans' Readjustment Act of 1944, with reference to the employment of veterans, was to safeguard their preference in employment, both private and public.

In June of 1944, two major pieces of veterans legislation were enacted: The Veterans' Readjustment Act and the Veterans' Preference Act. The legislation was adopted with no adverse comment having been offered by any Member of Congress. To the best of my knowledge, there has never been any controversy, until now, on providing a preference in employment for veterans.

Mr. Chairman, I will have much more to say about this when the amendment is offered by the gentleman from New York, Mr. HANLEY, to strike those provisions of the bill that will adversely affect Vietnam veterans, and I hope my colleagues will pay close attention to the debate at that time and support us in our efforts to fulfill a commitment we made years ago to care for those who have defended our country in time of need.

Mr. UDALL. Mr. Chairman, I yield 1 minute to the gentleman from Missouri (Mr. CLAY).

Mr. CLAY. Mr. Chairman, there has been a great deal of discussion and attention focused on the President's civil service reform bill. Many of us have devoted untold hours to make this legislation a true reform bill. H.R. 11280 which is now before the House is such a bill—it gives the administration the flexibility it has sought for management while at the same time providing certain basic and necessary rights for Federal employees.

The two sections of the bill which I want to address specifically are title VII, providing for a strong Federal labor-management relations program which is long overdue, and title IX, providing for reform of the Hatch Act. These are two basic elements which go hand in hand when we talk about reforming the entire Federal civil service system.

Title VII of H.R. 11280 establishes a statutory labor-management relations program for Federal employees. It provides for the right to collective bargaining for Federal employees, an independent Federal labor relations authority (FLRA), the resolution of disputes by the intervention of neutral, independent, third parties, and judicial review and enforcement of the decisions and orders of the FLRA.

The Post Office and Civil Service Committee with title VII has adopted an evolutionary, balanced approach to the improvement of the Federal labor-managament relations program. When the National Labor Relations Act was enacted in 1935, Federal employees were excluded from its coverage. In 1962, however, the late President John F. Kennedy, in recognition of the growing need, established a formal labor relations program for the Federal work force. That program was refined by President Nixon's Executive Order 11491 which, as amended, has been the foundation of the Federal labor-management relations program.

Executive Order 11491 was a milestone in its time. Today almost 60 percent or 1.2 million of all Federal employees are represented by 86 different employee organizations in over 3,500 bargaining units.

The growth of the Federal work force and changes in our time dictate that labor-management relations in the Federal sector must become more in step with the seventies—recognizing that there are nevertheless difference between the public and the private sector.

During 1977, the Subcommittee on Civil Service which I chair conducted exhaustive public hearings on labor-management relations—receiving testimony from over 40 witnesses in the course of 5 days of public hearings. Testimony was overwhelmingly in support of the thrust of the committee's legislation because the existing program was susceptible to the whims of an incumbent President, limited in its scope, management oriented, and lacking in the opportunity for judicial review of decisions of the Federal labor relations council.

Although the administration belatedly came forth with a statutory labor-management proposal. Their program would have done little more than codify the Executive order. The committee's efforts to reconcile some of the differences between its position and the viewpoint of the administration were exhaustive but—notwithstanding long and involved efforts—the administration's concessions in the committee were so insignificant as to render them virtually meaningless.

Title VII, as approved by the committee, represents a balanced, impartial approach to resolving the principal differences between two points of view, the print which—in some respects—would adopt in the Federal sector many practices which are prevalent in the private sector and the administration proposal which, for all practical purposes, would simply codify Executive Order 11491 with its confused, management oriented, duplicative, antiquated approach to labor-management relations.

I want to assure my colleagues that title VII takes a middle ground—retaining management rights which are necessary to function with flexibility and effectiveness. On the other hand, the committee bill will not permit agencies to unilaterally remove any issue from bargaining simply by issuing a regulation.

I also want to assure my colleagues that there is nothing in this bill which allows Federal employees the right to strike, to have an agency shop, or to negotiate over pay and money-related fringe benefits.

I urge my colleagues to reject any weakening amendments.

Mr. Chairman, another provision of the bill which the Members will be hearing a great deal about today is title IX. Title IX, as everybody by now knows, provides for reform of the Hatch Act. Earlier, during the debate on the rule, I addressed why I strongly believe title IX is germane and appropriate. In addition, the committee supported my position by adopting my amendment by a vote of 13 to 10.

Title IX is virtually identical to H.R. 10, the Federal Employees' Political Activities Act of 1977, which passed the House on June 7, 1977, by a vote of 244 to 164. The only major difference is that title IX designates the special counsel of the Merit Systems Protection Board as the enforcing authority and the Board as the adjudicatory authority. This change reflects the fact that H.R. 11280 takes into account that the Civil Service Commission is being superseded by the Merit Systems Protection Board and the Office Personnel Management.

There has been a great deal of speculation and discussion as to why I sought to amend the civil service reform bill to include modification of the Hatch Act. I want to address this issue here and now.

Although both the committee and the House approved this legislation last year, it became increasingly clear to me that the other body would not act on Hatch Act reform this year. In offering the amendment in committee it was my hope it would help to insure that both Houses of Congress have the opportunity to work their will in considering reform of the Hatch Act.

My intention has never been to gut the civil service reform bill by offering my amendment. I reject the thinking of critics who say that modifying the Hatch Act within the context of civil service reform will inject too much politics into the system. There is no greater priority for Federal employees than broadening the extent to which they may participate in political activities while strengthening protections to both the public and employees against coercion and improper political activities.

Extending constitutional rights of free speech and association to Federal employees is an integral part in the reform of the entire civil service system.

I urge my colleagues to defeat any motion which may be offered during today's debate which seeks to delete title IX from H.R. 11280.

I urge my colleagues to support H.R. 11280, the President's civil service reform bill, as reported out of the House Post Office and Civil Service Committee.

Mr. UDALL. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Michigan (Mr. FORD), a member of our committee.

Mr. FORD of Michigan. Mr. Chairman, today, we are considering the President's civil service reform bill. I have supported the administration's efforts to bring more accountability to the management of Government programs through the creation of a senior executive service and by streamlining the appeals process for grievances. In order to maintain a fair

balance, however, between these increased management prerogatives and flexibility and the legitimate rights of Federal employees, a progressive labor-management program is essential.

In view of this need to achieve a balanced bill and at the urging of the administration, Congressman CLAY, as the chairman of the Subcommittee on Civil Service, and Congressman SOLARZ, as a member of the full committee, joined me in an effort to arrive at a compromise labor-management section to this bill. Title VII of the committee print, which I strongly supported, was the result of those efforts with assistance of the committee's Democratic caucus and would have insured a proper balance between the competing interests of management and flexibility and employee rights. While we made major concessions in the committee print, there was only insignificant movement by the administration from its initial proposal.

Title VII, as approved by the committee, is based upon H.R. 9094, a bill sponsored by Mr. CLAY and myself, for which public hearings were held on September 15, 1977 (serial No. 95–31). Earlier, public hearings were held on related labor-management legislation on April 21, 26, 1977 and May 3, 5, 10, 1977 (serial No. 95–30).

A committee print of title VII was used for markup purposes. That print was similar to H.R. 9094 except that it: First, did not grant agency shop automatically upon election of an exclusive representative; a second election was required for agency shop; second, contained no provision for an "alternative labor organization"; third, a management rights clause was added; and fourth, there was no provision for the negotiation of pay and other major money related fringed benefits.

The administration's labor-management proposal was similar to Executive Order 11491, under which the existing labor-management relations program is operated, with two exceptions: First, it established an independent full-time Federal Labor Relations Authority (FLRA) as the successor to the Federal Labor Relations Council; and second, it permitted agencies and unions to negotiate most grievance and arbitration matters which may now be appealed only under statutory procedures.

Title VII, as approved by the committee, represents a balanced, impartial approach to resolving the principal differences between two points of view—the print which, in some respects, would adopt in the Federal sector many practices which are prevalent in the private sector and the administration proposal which, for all practical purposes, would simply codify Executive Order 11491 with its confused, management-oriented, duplicative, antiquated approach to labor-management relations.

The Udall compromise amendments that passed in committee, while modifying title VII even further, are still a step, although a modest step forward in providing protections for legitimate employee rights. Any further cutbacks in title VII, however, would seriously threaten our efforts to achieve this equilibrium.

Collective bargaining is not new to the Federal Government. Under Executive orders, 58 percent of the work force has been organized into exclusive bargaining units, and agreements have been negotiated covering 89 percent of those organized. Though the Civil Service Commission tells us that the Federal labor movement can be traced back to the 19th century, the modern era began in 1962, when Executive Order 10988 was issued. Since that time, there have been several changes in the order. However, the basic thrust and intent remains the same. The system as it now exists still contains the inherent shortcomings that come from being created, governed, and administered by management alone. To continue to tinker with the Executive order system is to delay the obvious: What is now needed in the Federal Government is a labor-relations program based upon legislation.

I have been quite frankly surprised with the rhetoric and hysteria that has accompanied consideration of title VII. It is not a radical departure from the present system, but is a small, incremental step forward.

As the sponsor of H.R. 1589, the Federal Employees Labor Relations Act of 1977, the precedessor to H.R. 9094, which provided for the negotiation of pay and fringe benefits; the negotiation of all agency regulations; and automatic agency shop; and a limited right to strike (based on Canadian law)—all of which, I might emphasize, have been deleted from title VII—I can assure Members that expansion in the scope of bargaining in title VII has been a very modest, incremental step that comes nowhere near the scope of bargaining that most States permit for public employees or that we permit for postal workers.

In fact, this incremental approach was followed by President Ford in 1975, when he amended the Executive order governing Federal labor-management relations to permit negotiation of agency regulations, unless a compelling need existed. Under this amendment an agency could not take an item, that is otherwise negotiable, off the bargaining table by simply issuing a regulation, unless there was a "compelling need" to do so.

However, higher level agencies, such as the Civil Service Commission (the Office of Personnel Management under this bill), can now issue regulations that remove the ability of agencies to bargain over items, even if they wish to do so. The Udall compromise simply takes the "compelling need" test, and moves it upstairs, applying it to Government-wide regulations of the Office of Personnel Management. Even if there is no compelling need for that regulation, the regulation still stands. All title VII does is to say—if the matter that the regulation is the subject of is otherwise negotiable, labor and management must sit down and talk about it in good faith. They need not necessarily agree.

Much of the criticism directed at the Federal Government concerns the size and unmanageability of the executive branch. This situation is merely aggravated by the existence of a centralized monolithic personnel body imposing uniform standards that cut across every level and location in the Federal Government. Such a system fails to take into account the divergent working conditions and needs of different agencies and offices around the Nation. The compelling need test in title VII would in no way hamper the ability of these agencies to issue necessary Government-wide regulations. It would insure, however, that employees would not be deprived of their legitimate right to bargain over the terms and conditions of their employment, except where a genuine need to so exists. Local managers then and the democratically elected employee representatives would be given the flexibility to engage in open discussions and to attack their problems at the local level—when it is appropriate to do so—with greater logic and efficiency than the present system allows. This in turn helps to promote better government for all citizens.

Even if there is no "compelling need" for a regulation, the item may not be the subject to negotiation because it has been excluded by the statutory management rights clause in title VII. Title VII's management rights clause still bars a wide range of subjects from the negotiation process. Management would retain the right to determine the mission, budget, internal security, or personnel necessary to conduct its work; to direct its employees; to assign work, to contract out or take actions necessary in the event of national emergencies. And I might further point out that no matters that are governed by statute (such as pay, money-related fringe benefits, retirement, and so forth) could be altered by a negotiated agreement.

Statutory management rights clauses are totally alien to the private sector. They are part of the negotiation process. And I suspect that in the Federal sector that management rights clauses even stronger than this statutory one may be negotiated—particularly since Federal unions do not have the bargaining chip, the negotiation table to threaten a "withholding of employment."

One of the central elements of a fair labor relations program is effective, impartial administration. Title VII provides for the creation of an independent and neutral Federal labor relations authority to administer the Federal labor management program and subjects the decisions of the authority to judicial review. Currently, the Federal labor-management program is administered by the Federal Labor Relations Council which is composed of three administration officials, the Secretary of Labor, the Chairman of the Civil Service Commission, and the Director of the Office of Management and Budget, none of whom can be considered neutral. In addition, the decisions of the Council are not subject to judicial review.

The Federal labor relations authority, patterned after the NLRB, would insure that the administration of this program is free from bias toward either party. Impartiality is guaranteed by pro-

tecting authority members from unwarranted "Saturday night" removals. The administration during committee markup eventually changed its position from supporting removal of authority members at the President's sole discretion and accepted removal for cause only.

By providing for judicial review of the authority's decisions, similar to that provided under the National Labor Relations Act, the right of both sides to receive an impartial decision is further strengthened, while making the authority more accountable for its actions. Judicial review is one of the primary benefits of a statutory program over an Executive order, and to limit such review also limits the advantages of codification.

Title VII would permit agencies and unions to negotiate grievance and arbitration procedures to cover most, but not all, matters which may now be appealed only under statutory procedures under the Executive order. Binding arbitration has been permitted for grievances (as opposed to statutory appeals) since President Nixon issued his Executive order in 1969. It has worked well as an expeditious, credible and cost-effective means of dispute resolution. Thus, title VII does not represent a change, but rather an extension of the well-tested provisions of the Executive order. The committee print would simply extend the coverage of arbitration procedures somewhat further than the administration has proposed.

From the management's point of view, arbitration provides a businesslike approach to grievance and appeals handling. The union, which must decide whether to arbitrate, can serve as an effective screening device in frivolous, costly grievances. Further, the arbitration process is more efficient, less time consuming, and less formal than the statutory appeals system. Finally, the costs of arbitration (which tend to average about $840 per case, excluding attorneys fees) are generally—though not always—shared equally by the union and agencies, rather than by the taxpayer who bears the burden under the statutory appeals process. The more issues we can arbitrate, rather than going through the statutory appeals process, the more money we can save the public.

Classification appeals would also be subject to the negotiated arbitration procedure under title VII. The fact that pay and classification are nonnegotiable makes this provision important, because it would assure that questions relating to classifications are equitably resolved. For a Federal employee, it is his or her classification that determines their grade level and ultimately how much they earn.

The present classification appeal procedure is a unilateral procedure. Title 5, section 5112(b) of the United States Code provides that an employee may appeal to the Civil Service Commission at any time and the Commission will review the appropriateness of the classification. The procedure does not provide for a hearing before the Commission or for any outside third party review.

The failure to provide for these minimal procedural guarantees has placed the credibility of the classification appeal system in doubt. Because pay is a function of classification the Civil Service Commission has a vested interest in holding grades down. (Under the administration's proposal, this will be intensified, since the Office of Personnel Management, headed up by one politically appointed Director, will replace the Civil Service Commission, which at least in theory is a more neutral body. Fair and unbiased decisions could not be expected to be rendered by one of the parties to the dispute.) Thus, employees would be very skeptical of the decisions rendered by this special interest group.

Title VII would provide for procedural guarantees and eliminate the inherent conflict of interest that now exists. It can afford an employee the right to test the accuracy of their classification through the grievance procedure, just like any other personnel matter, with arbitration as a final step. It is a fair system and one which can keep the faith between management and employees. It is especially important that we bring impartiality into the classification appeal process since we have excluded pay from the negotiation process.

Finally, the administration has already recognized the competency of arbitrators to consider classification issues. Under their proposal when an employee is reduced in grade they can challenge that action as an adverse action through the negotiated grievance procedure. Thus, title VII is not proposing anything which is radically out of the ordinary. It is merely extending the grievance procedure to include grievances concerning upgradings as well as the downgradings which are covered by title VII proposed by this committee and the President.

During committee markup, I offered an amendment to add a new provision, section 704(c), which is intended to preserve the scope of collective bargaining heretofore enjoyed by certain trade and craft employees. This includes certain trade and craft employees of the Department of the Interior, and those trade and craft employees in units or portions of units, transferred, effective October 1, 1977, from the Department of the Interior to the Department of Energy. This provision is required because of two recent rulings by the Comptroller General which invalidated certain collectively bargained provisions and held that specific legislative authorization is necessary for these employees to continue to negotiate such provisions in accordance with prevailing private industry practice. Decisions Nos. B–189782 (February 3, 1978) and B–191520 (June 6, 1978).

Certainly, we should not now be narrowing the preexisting collective bargaining practices of any group of Federal employees. This provision of the bill would have the effect of overruling the two Comptroller General decisions, and would adopt his own suggestion for specific legislative authorization. The provision would specifically authorize the continuation of prior collective bargaining practices, and would allow these employees, whom Congress already sought to protect in the savings provision of 1972 wage board reform law, to continue to negotiate their terms and conditions of employment in accordance with the prevailing practice principle. I do not intend to expand nor contract the scope of bargaining that existed prior to the Comptroller General decisions. In the past, these employees have negotiated wages, pay practices, and other practices in accordance with the prevailing practice principle. This has produced some of the most stable and effective collective bargaining in the history of public employee labor relations. It has enabled the Federal Government to procure and retain qualified craft employees who otherwise might choose employment in private industry, by insuring that they will enjoy comparable terms and conditions of employment.

It is not the intent of this provision to interfere with the current system of providing the employees in question with retirement benefits, life insurance benefits, health insurance benefits, and workmen's compensation. Those benefits would not become negotiable and would continue to be paid to those employees exclusively pursuant to the Federal statutes in effect.

For over 16 years now, Federal public employee organizations have shown themselves to be responsible parties in the Federal government's labor-management program. Even President Ford recognized the maturing of employee organizations, when he amended the Executive order in 1975. The bill reported by the committee also recognizes the progress we have made in labor-management relations in the Federal sector. A close and dispassionate reading of title VII should indicate that it is only a modest, but we feel vitally important step forward.

I ask my colleagues to support the progressive, but responsible approach the committee has produced in title VII.

Mr. DERWINSKI. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa (Mr. LEACH).

Mr. LEACH. Mr. Chairman, I would like to compliment the gentleman from Pennsylvania (Mr. NIX) for his even-handed leadership of the committee. This will be a fitting cap to a fine career in this body.

I would also like to compliment the gentleman from Arizona (Mr. UDALL) who with great statesmanship has supported positions he has not always agreed with, and the gentleman from Illinois (Mr. DERWINSKI) (who has continued to suport Executive flexibility during an administration not controlled by his party.

The bill before us is in essence bipartisan. The approach of the Carter administration follows broadly the efforts of the last two Republican administrations. But the fact that the House is now able for the first time to consider the measure reflects above all on the legislative leadership of Mr. UDALL and Mr. DERWINSKI. Their achievement in getting this bill to the House floor cannot be underestimated.

Mr. Chairman, I would like briefly to touch on five amendments I offered in committee, two of which were accepted and three of which I intend to offer for further consideration on the House floor.

The first deals with the issue of decentralization.

A suspicious public looks upon Washington, D.C., as the center not only of excessive bureaucratic authority but as the beneficiary of substantial profit from governmental enterprise. Today every major Federal department is headquartered in Washington, D.C. The vast majority of supergrades, choice political appointments, and other highly paid jobs with the greatest policymaking authority are located in this area. Yet those in the regional and local offices of these major departments and agencies are frequently in far greater contact with the daily administration of Federal programs.

I am convinced there is something inherently wrong with the creation of a "single factory town" which lacks a Main Street, which knows no Willie Lomans or Archie Bunkers. A prudent decentralization of services is needed to bring Government closer to the people who must bear the cost and share the benefits of Federal programs. Hopefully the forthcoming study, required in this bill, will give us new direction in diminishing the arrogance and unresponsiveness which tends to accompany a concentration of power.

A great concern of all of us who have ever served in the executive branch is the inflexibility of promotion policies. This bill is designed above all to bring greater accountability into the senior executive level. I am convinced a secondary goal should be to develop ways to reward and promote on merit at more junior levels. Accordingly, I was pleased the committee accepted my amendment to allow far greater flexibility in promotions than currently exists under the Whitten amendment. First enacted during the Korean war, the Whitten amendment limits the number of promotions which may be made in a single year. Yet one of the problems with an inflexible civil service system is that often competent individuals, particularly women and younger employees, are underutilized by the Federal Government. Qualified individuals may, for a number of reasons, be forced to enter the Federal workforce at levels of responsibility below their capability and the Whitten amendment has been a barrier to the promotion of these individuals. The committee has in my judgment wisely expressed its desire that authority be created for a more flexible application of the Whitten amendment in the future in instances where there is clear evidence of merit and dedication to the career service.

Although I was pleased with committee recognition of the objectives of decentralization and more rapid merit promotion, I was disappointed that the bill continues to miss the mark on three key aspects of Government reform.

First, the committee rejected an amendment I offered to limit, for the duration of this administration, the size of the Federal work force to the number so employed at the outset of the current administration. Statistics issued by the Civil Service Commission indicate that the size of the Federal work force, exclusive of the U.S. Postal Service, has grown in the past year and a half by more than 112,000 and I can conceive of no better vehicle to halt further growth in the Federal bureaucracy than the civil service reform bill itself. Something is wrong with any society that becomes topheavy with bureaucracy and I would hope to obtain bipartisan support for my amendment to place a cap on Federal employment on the House floor.

Second, I was disappointed that the committee failed to approve a provision clarifying the ethics obligations which the Federal Government should require of its employees at all levels. The rejected amendment would have prohibited Federal employees, or unions representing such individuals, from soliciting gifts, favors or related items—either for the Federal employee or the employee's family—from any person, corporation or group which may be substantially affected by the performance or nonperformance of the employee's official duties or the official functions of the agency for which the employee is working. Although our committee has approved ethics legislation dealing with Government officials, most of that legislation does not extend to the rank and file membership of the Federal work force. The majority of the concepts embodied in the rejected amendment are contained in existing Executive Order 11222 and ought, in my judgment, to be incorporated into statute.

Finally, I was distressed that the committee refused to ratify a proposal which, if adopted, would provide for expeditious suspension procedures for federally employed air traffic controllers who deliberately engage in job actions now barred by law or executive order. To permit a limited number of Federal employees to hold the innocent taxpaying public hostage, by slowing down or stopping air transportation, should not be tolerated, and prompt action should be taken to deal with such action, within reasonable guidelines protecting the employee. To permit such abuses of the public trust to continue is unconscionable.

It is my hope that the full House will give careful consideration to the merit of these mandatory provisions and will take affirmative action to strengthen the bill and thereby enhance the integrity and responsiveness of the Federal bureaucracy.

Mr. QUAYLE. Mr. Chairman, will the gentleman yield?

Mr. LEACH. I am happy to yield to my colleague, the gentleman from Indiana (Mr. QUAYLE).

Mr. QUAYLE. Mr. Chairman, I thank my colleague, the gentleman from Iowa (Mr. LEACH) for yielding to me.

Mr. Chairman, I take this opportunity to express my support for civil service reform as a first step to making Government more responsive and effective. During the course of this debate I hope that we can make improvements in this bill, H.R. 11280, that will help bring bureaucracy under control and give the executive branch the tools it needs to carry out its mandate from the people.

Through the adoption of Reorganization Plan No. 2 by a vote of 381 to 19 on Wednesday, the House has gone on record in support of the President in his pledge to reform and reorganize the civil service. The reorganization plans create the mechanism through which reform can be achieved. Now we must face the challenging task of giving the new Office of Personnel Management, the Merit System Protection Board, and the Federal Labor Relations Authority the necessary tools to accomplish real reform.

Under our present civil service system, the Federal bureaucracy has grown unresponsive and now consumes 22 percent of the gross national product. It threatens our economic strength and productivity.

Since 1930, the Federal payroll has increased dramatically by 462 percent while during the same timespan the entire population of the United States increased by only 71 percent.

We have an opportunity through civil service reform to harness this bureaucracy by rewriting the archaic laws which were originally drafted to protect against the political spoils system.

Today we are threatened by an even greater spoils system which through its hiring and firing policies virtually guarantees a job to anyone who passes a year's probation.

The sluggish civil service appeals system can take 6 to 18 months. As one veteran bureaucrat explained it:

> Firing anyone is a practical impossibility. The standard procedure is to promote them out of your department if the worker is disruptive or incompetent.

In 1976, only 0.004 percent of all Federal workers were fired. Most of the terminations were first-year employees. So their supervisors found less than one four-thousandths of 1 percent of all Federal employees remiss in their duties.

Yet the files in my office and other congressional offices would indicate this is an inaccurate figure. I get letters from Federal agencies sometimes weeks or even months after my initial request. When the letters finally arrive, they contain factual errors or they are impossible to understand due to the bureaucratic jibberish which we have all come to expect.

Mediocrity tends to be equated with competence since both are rewarded essentially to the same degree. While persons employed in the private sector are expected to attain a certain performance level in order to receive a pay increase, civil servants are not.

In 1976, only 835 of the classified employees in the Government eligible for pay increases were denied a step advance in pay. This is well below 1 percent.

In order to confront the problem of the bureaucracy we must deal with the bureaucrats themselves, who seem to multiply regardless of our reform or reorganizational efforts.

Every President since Herbert Hoover has pledged to reduce the size of the Federal bureaucracy, but to no avail. At the end of each administration the number of employees has swelled from the previous one. Where the population of the United States has increased 60 times since the founding of the Republic, the size of the bureaucracy has increased more than 8,000 times.

But we cannot honestly blame the Presidents. None of the Presidents to date have had much control over the growth of this sector—each President's appointment powers have been severely limited. President Carter could appoint only 2,200 of the nearly 3 million Federal workers.

This figure includes 500 personal White House staff and one-third of the remainder are private secretaries and confidential aides.

At the burgeoning Department of Health, Education, and Welfare, the President can appoint less than 150 of the 153,000 employees. Throughout Government his entire list of appointees amounts to less than 1 percent of all Federal appointees. Thus these workers are not in anyway responsible to the American people who elect the President. They are part of a system that began long before the current administration and will continue long after President Carter has left Pennsylvania Avenue.

But we need to put a stop to this spoils system.

The civil service system must be revised to give the President more authority over the makeup of the Federal agencies. First, a greater portion of the Federal employees should be appointed by the President.

Second, Congress must develop a system to insure that the same merit incentives which operate in the private sector also operate in the Federal Government. Federal employees should know that a fine job will be rewarded, but inferior work will result in a hearing and dismissal.

Third, we should begin to study immediately to develop a mandatory program of rotation for key bureaucrats in policymaking positions both in Washington and in regional offices throughout the country. We need fresh new ideas, not retreads from year to year and administration to administration.

There have been promises of reform and Government reorganization since before I was born. I would hope that we who stand here today would finally begin to act to develop genuine civil service reform.

Mr. DERWINSKI. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, I am glad that, through the wisdom of the leadership, we have decided to postpone this bill for a week or until September. I think that with more time, we will be able to come up with a much stronger bill.

Mr. Chairman, I would like to say at this time that I plan to introduce amendments regarding the FBI which will cover three titles, title I, IV, and VI, and I hope the amendments will all be considered en bloc.

What the amendments ask for, and what I think is a most reasonable request, is that the FBI be excluded from the direct application of the bill's civil service principles. The rigorous and dangerous duties performed by the Bureau's employees do not lend themselves to many aspects of bureaucratic regulations.

Mr. Chairman, there are going to be many important amendments coming up. I think the one to place a civil service ceiling by the gentleman from Iowa (Mr. LEACH) is one of the key amendments. We are certainly wise today in giving the entire body an opportunity to study the amendments and review the entire bill.

Mr. DERWINSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Maryland (Mr. STEERS).

Mr. STEERS. Mr. Chairman, I rise in opposition to this so-called civil service reform bill, and I will give reasons in greater detail at a later date.

However, I do want to bring out briefly at this time the fundamental problem with this bill. We have talked here a lot about amendments. I say that it is not only the amendments to the bill which are making it questionable; it is the heart of the bill, the Senior Executive Service, which makes it pernicious, regardless of amendment.

I remind the Members that we now have a schedule C which was created under the administration of President Eisenhower, a Republican President. I think that was a step backward, a step toward the spoils system. Now we propose to more than double the number of employees of the Federal Government who will be lackies to the top people in each future administration.

We often talk about the political machinations of President Nixon, and I am a severe critic of those machinations and of that President. We talk also about Mr. Carter not being that sort of man, and we sort of skip over the problem of his successor. But I point out to this body that, even with this President, the selection of proper Government servants is not just a matter of improprieties, scandals, and illegalities; it is also what Mr. Carter was talking about over there in Fairfax the other night, when he spoke so earnestly about weeding out incompetents.

I do not agree with what the American Federation of Government Employees said about President Carter. They accused him of "blatant lies" to the American people. I have no reason to endorse that word "blatant."

There is an old adage about which one we would choose for President: An honest blunderer or a clever knave. Some people have accused President Nixon of being a clever knave, and I do not want to accuse Mr. Carter of being an honest blunderer; but when he talks about weeding out incompetents, I point out that many people have challenged his competence. Has Mr. Carter given us reason to believe that he would pick competent people. Have Mr. Carter and his White House pals been running the country effectively? I wonder whether we should double their power to pick friends, cronies, political helpers, and general hangers-on.

The Senior Executive Service strikes at the heart of the merit principle. It restores the spoils system we got rid of nearly a hundred years ago.

It is my observation that there are bad apples in private barrels, as well as in the Federal public service barrel, and the ratio in the two sectors, public and private, is about the same. The great bulk of Federal servants consists of honest, diligent, intelligent, loyal and expert people, and I know this from direct observation during the years I served as a Government bureaucrat.

This bill, and its clear return to the spoils system, subjects our Federal work force to twin evils in the office of the Chief Executive: A clever knave or an honest blunderer. We have had incumbents of both kinds in the past, and the last thing we should do is more than double the damage, a future incumbent, or this incumbent, can inflict on good government by passing this bill.

Mr. UDALL. Mr. Chairman, I yield such time as he may consume to the gentleman from Virginia (Mr. HARRIS).

Mr. HARRIS. Mr. Chairman, H.R. 11280 is a comprehensive bill with a noble objective, to "reform" the civil service system. It presented to the committee and to me a serious challenge which I was prepared to meet when the bill was submitted on March 3, 1978.

Yet I was compelled to vote against the bill because I believe it is fatally flawed: It will open the door to politicization.

Cleaning up and streamlining the operations of the Federal Government is a worthy goal, an effort I support fully. Citizens should not have to wade through layers of bureaucracy to get their questions answered, to track down their social security check, or understand our tax laws. Government should be understandable; Government should be accessible. Government should not be a bureaucratic monolith impossible to cope with. Government should be responsive with decisions based on justice, not on political intrigue or pressure.

Pursuant to the goal of developing a sound bill, I participated in 15 hearings, 12 in the Congress and 3 in agency headquarters here in Washington, and 10 days of markup. Additionally, I personally held three "town meetings" in my district to hear the views and suggestions of the citizens of the Washington area, Federal employees and non-Federal employees, individuals probably most familiar with the operations of the Federal Government.

The most persistent thread in the comments we heard from rank-and-file workers was that various provisions of this bill were a threat to the morale and structure of a nonpartisan, professional civil service system.

On February 27, 1978, I introduced H.R. 11365 which contains several strong provisions that would make innovation possible but insulate the Federal Government against a spoils system. During the committee markup, after discussing these provisions with Civil Service Commision officials and other witnesses during the hearings, I attempted to get the safeguards embodied in my bill into H.R. 11280. Most were rejected.

I am dismayed that this committee has apparently articulated the thesis that politicizing the system is essential, in fact, is the centerpiece of a responsive

and revitalized government. In fact, it was said of my amendments to prevent politicization that some would be a "bodyblow" to the bill.

I am afraid that in the name of "civil service reform" the House Post Office and Civil Service Committee has developed "civil service chaos." While the bill has some sound provisions, many elements which would have made it a true landmark for good government are lacking. My primary fear is that this bill will begin a slow unraveling of our merit system, a system that insures the impartial administration of our laws. This conclusion is inescapable: This bill opens the door for the politicization of the civil service system.

AN OPEN DOOR FOR POLITICAL MANIPULATION SENIOR EXECUTIVE SERVICE

The committee's adoption of an amendment to implement the Senior Executive Service in three agencies over a 2-year period is an appropriate go-slow approach. However, the Senior Executive Service, while meritorious in purpose in many ways, will allow too many career jobs to become political because of a fundamental flaw in the way appointments can be made. Currently, there are important safeguards and procedures that keep the designation of career and political positions at the high levels of government quite distinct. Congress decides which jobs will be filled by political appointees at executive levels. For those GS–16, 17, and 18 pay grade levels, the President can designate which jobs should be political according to clear standards.

I offered a substitute to title IV, the Senior Executive Service, which would have made the SES a career service only. My substitute failed. If the President wished to designate certain jobs at these levels to be filled by political appointees, the duties of the job would have had to meet certain standards prescribed in law, such as engaging in the advocacy of administration programs or serving as a confidential assistant to a political appointee.

Under this bill, although there is a numerical limit on the number of jobs that can be filled by political appointees, this limit has no relationship to the responsibilities of the job. Thus, the head of a division handling grants, contracts, or tax returns can be a political appointee. By adopting my substitute, Congress would have been exercising clear controls over which positions are filled by career individuals and which by political appointees. And it would have provided that the type of appointment—career or political—would be determined by the responsibilities of the job, not an arbitrary agency or Government-wide "magic" number.

EXCEPTING POSITIONS FROM THE CAREER SERVICE

Similarly, my amendment to provide clear criteria for excepting positions from the career competitive service for all general schedule jobs would have insured against manipulation of jobs. Under the current law, which this bill does not change, the President can put a "competitive service" position in the "excepted service"—individuals not hired by competitive examinations and appointment—by only determining that "conditions of good administration warrant" this action. There are standards in regulations which can be changed any time. My amendment would have firmly fixed strong standards in law.

We have heard too many stories of a "buddy system" and end runs around the merit system, stories of jobs being "moved" from a competitive hiring designation to "excepted" to accommodate a favored candidate. There is room and there is a need for noncompetitive positions in the executive branch, but there should be strong controls. My amendment, which was defeated, would have provided these controls.

POLITICAL INFLUENCES IN PERSONNEL ACTIONS

The section of the bill on merit employment would have been strengthened had the committee adopted my amendment to clearly bar unwarranted political recommendations in hirings, promotions, and other personnel actions. Under my amendment, political recommendations from Members of Congress, their staff, White House officials, and political appointees in the executive branch would have been explicitly prohibited. The notion that elected and other political officials ought to "determine who gets what jobs" in the career merit system is simply wrong. Some argue that it is a "fact of life." If so, it is wrong. It is time to stop winking at it. If we are going to have true civil service reform, then we must get politics out—once and for all. It has not been that long since the very foundations of our Government were almost pulled out from under us by inside political manipulation. My amendment would have greatly improved this bill.

The bill allows the new Office of Personnel Management to delegate to agencies various personnel functions, such as examining, hiring, and promotions. While allowing agencies to perform personnel functions previously centralized in the Civil Service Commission may speed up these procedures, I am concerned that here again the floodgate may be opened for improper political influences. This is why I offered an amendment to require that every chief personnel official be a career employee. I cannot see any reason why a personnel official, clearly performing an administrative function, should be a political appointee. This was another effort to keep politics out of the merit system; yet the committee rejected the inclusion of this provision.

AN IMPARTIAL MERIT SYSTEM PROTECTION BOARD

The bill establishes a new Merit System Protection Board to handle alleged violations of civil service rules and regulations. I believe the composition of this board would have been strengthened by the requirement that one member be from the career ranks of the Federal Government as I proposed. As it stands, these three political appointees, can be the former board chairman of a corporation or the former head of a campaign. While the bill rightly insures a political mix, I believe that a career employee could have provided an important career employee perspective in the Board's proceedings.

Similarly, the selection of the Chairman of the Board is faulty since the bill provides that "the President shall from time to time designate one of the Board members as the Chairman of the Merit System Protection Board." My amendment, which was defeated, would have required the Board members to elect a chairman every 2 years. Under the bill, the President can choose one Chairman, and the next month choose another. This, I believe, is a loophole that can lead to political shuffling and reshuffling.

CLEAR RESPONSIBILITY AT THE TOP FOR THE MERIT SYSTEM

Under the bill submitted by the administration, the delegation of personnel administration caused me great concern. The bill allowed the President to delegate responsibilities to the Director of the Office of Personnel Management who in turn could delegate to agencies. The General Accounting Office could investigate violations of the merit system if requested by Congress. The Special Counsel could investigate complaints and the Board could hear them. But the bill was very fuzzy as to who in fact was responsible—where did the buck stop?

I offered several amendments which were accepted that make it clear that the Director of the Office of Personnel Management is the individual responsible for compliance with civil service laws and procedures. Thus, for example, if an agency adopts a hiring procedure that gives favoritism to certain applicants, OPM cannot "get off the hook" by saying the agency was in charge. OPM cannot turn a blind eye. OPM is responsible for seeing that merit system principles are enforced and that corrective action is taken when violations occur.

EMPLOYEE RIGHTS AS PRIVATE CITIZENS

I continue to believe that employees should be able to engage in voluntary political activities as private citizens and I helped draft H.R. 10, which would revise the current Hatch Act prohibitions on those rights. However, I do believe it is wrong to tie those revisions to a legislative vehicle that opens the door to politics within the system. The Hatch Act has never protected employees from on-the-job political pressures; a strong, impartial merit system provides that protection. But this bill severely weakens many of those protections.

OPEN AVENUE OF COMMUNICATION FOR OPM AND THE BOARD

I am pleased that the committee adopted my amendments to allow both the OPM and the Merit System Protection Board to express their views directly to Congress without clearance by another agency. Our committee has too often been frustrated by the Office of Management and Budget's stranglehold on agency statements to Congress. Under my amendment OMB can make its views known; there is no barrier. But these agencies can express their views on policies, answer questions directly, and present testimony to congressional com-

mittees without first getting their views cleared and laundered by OMB. This is a most important Government reform.

EMPLOYEE PAY: A MIXED PICTURE

The committee adopted my recommendation that supervisory employees in GS–13–15 grades continue to receive annual comparability adjustments. Keeping Federal pay rates competitive with those of private industry is a sound principle, established by the 1970 Federal Pay Comparability Act. Had we deprived employees in these grades annual comparability, I believe we would have violated the basic principle of our Federal pay system.

However, the committee did not accept my amendment that would have guaranteed true comparability. My amendment would have removed the loophole in the current law that has allowed Presidents of both parties to deviate from true comparability six times since 1970. We understand the President will follow this unfortunate precedent again this year. The concept of comparability is negated if inherent in the law is an escape hatch allowing the President to thwart it.

The new merit pay system, to reward GS–13, 14, and 15 supervisory employees for performance on the job, is a worthy concept. However, it would be a new system and I believe Congress needs to know in the future whether it is actually working, whether it is in fact improving performance. Thus, I am pleased that the committee accepted my amendment to require the Office of Personnel Management to report in 3 years on whether it is working and how. My amendment requires OPM to show us in quantitative terms if it is achieving the purposes set out in this legislation. It is my hope, for example, that we can determine that because of merit pay incentives, social security claims processing has been speeded up or decisionmaking on grants has been expedited and that such improvements are saving taxpayer dollars. My amendment also requires OPM to recommend changes in the law to improve the new pay system. Instead of letting a program grind on interminably without close scrutiny, this amendment will provide a proper mechanism for a review in 3 years.

CONTROLLING GOVERNMENT GROWTH

I am pleased that the committee has essentially incorporated my bill, H.R. 8332, which begins a process of curbing the growth of top, political appointive positions. There has virtually been no control in the growth of executive level positions in the Federal Government, since Congress has created them sporadically without any sense of overall planning or consistency. In fact, the Civil Service Commission is unsure of the exact number of executive level positions.

Creating a new Assistant Secretary position at executive level III or a deputy at executive level IV may be justifiable. Yet we have the questionable situation of the Administrator of the National Aeronautics and Space Administration at level II—$57,500—and the Administrator of the General Services Administration at level III—$52,500.

Under my bill and the provisions added to H.R. 11280, the number of positions becomes fixed and the President is required to send to Congress a plan in 2 years for bringing some order and coherence to what is presently a hodgepodge.

Similarly, the committee has incorporated certain provisions of H.R. 5054 which will bring some sense to the "supergrade sprawl." This bill reaffirms the concept of a central supergrade pool and repeals the many "extraneous" authorities outside the pool that have been enacted.

Both of these sections represent an attempt to have a government that is controlled, orderly and rational.

I am concerned and will continue to oppose an amendment adopted on a voice vote to require the Office of Personnel Management to conduct a study of the location of Federal agencies and a review of the possibility of relocating agencies out of the Washington, D.C., area. First, this is an inappropriate mission for the OPM. Second, the amendment does not provide clear direction for the study by specifying the criteria that should be considered, for example, the effect on employment or unemployment, the need for access to the President and Congress, cost to the taxpayer, environmental considerations, or delivery of services. Third, there is no apparent purpose or demonstrated need for the study. Another useless study will not improve Government efficiency.

Despite these meritorious changes, the bill adds up to a minus—not a plus—for the Federal employee and the American taxpayer. This bill is an unfortunate chapter in the history of an impartial, nonpolitical Federal Government. It may shake the very foundations of our merit system. It suggests that political affiliation is more important than competence. By creating cracks for political influences to seep into the system, it makes the argument more valid that Federal employees should be denied rights of citizenship in order to protect them. Should H.R. 11280 be enacted into law, protections for the employee will be greatly diminished and the merit system will be placed in great jeopardy.

Mr. DERWINSKI. Mr. Chairman, I yield myself 30 seconds just to say—and I would like my friend, the gentleman from Virginia (Mr. HARRIS) to listen—that I have a solution to this minifilibuster we ran into.

I have been accused of being a friend of the White House. Therefore, I am going to ask the President to threaten to make personal appearances for the gentleman from Virginia (Mr. HARRIS), for the gentlewoman from Colorado (Mrs. SCHROEDER), for the gentleman from Missouri (Mr. CLAY), for the gentleman from Michigan (Mr. FORD), and for the gentlewoman from Maryland (Mrs. SPELLMAN), unless they cease their filibuster against the bill.

Mr. UDALL. Mr. Chairman, I yield such time as she may consume to the distinguished gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Chairman, I rise in support of H.R. 11280, the Civil Service Reform Act of 1978. In producing this bill, the Committee on Post Office and Civil Service has gone through one of the longest markups in its history. Nary an issue of civil service law was omitted from this discussion or absent from the administration's proposal or the amendments offered to it.

I believe this bill represents a fine example of the kind of give-and-take which should, and must, go on between Congress and an administration in order to create acceptable legislation which has such scope and impact. Everything in this bill is not acceptable to all concerned, but there are more pluses than minuses for all.

Before I discuss my own amendments to the bill, I want to make a couple of general comments about provisions in the bill.

One of the reasons this bill was presented to Congress was to loosen alleged restrictions on firing incompetent Government employees. This motivation was all blamed upon the laws in force. As a one-time executive branch civil servant myself, I must say that I have personnally witnessed these difficulties. However, I cannot place all the blame on the laws. I want to point out a couple of other factors which I believe play a more major part.

First, few managers like to fire people. As Mr. SOLARZ pointed out in our committee debate, the firing rate in large private sector corporations is not that much greater than in the Government. How often do we read in the business pages of a formerly powerful industrial manager who has been "promoted" to be vice president of nothing? What do we say about the private firms which are springing up which are hired by other private companies to do their firing? Consumers pay for the expenses of keeping these employees on and paying for their easing out, just as taxpayers pay for those Government workers who are not doing their jobs.

Second, Government managers are directed by politicians. The 750 or so high-level jobs a new administration fills are not staffed, in general, by people who have been in the business of firing anyone but by people who have done their best not to offend, at least directly, any registered voter.

Mr. Chairman, these are two factors of the human condition applied to the executive branch which I believe override the ease or difficulty of the law itself. To the many, many competent Federal employees who are concerned that this bill will mean mass dismissal, I say that in years to come they will have to put up with colleagues who do not pull the load. To those who claim this bill will make the Government as efficient as the private sector, I say look at the private sector.

Mr. Chairman, the second point I want to discuss in general is the firefighters' hours legislation which was attached to the bill. I was taken aback when the President vetoed the bill, H.R. 3161. As chairwoman of the Subcommittee on Employee Ethics and Utilization I was, I assure you, under the impression that

the President's promise that he would sign this legislation was in effect. Others were also. We passed the bill by a substantial margin and the Senate passed it by unanimous consent. Never, although I asked them, did the Civil Service Commission propose alternatives to the bill which they would find acceptable. Never, before the President's veto message, had the administration cited the figures on its costs in that message, figures which were twice as high as our own Budget Office compiled. I have yet to find the horrors in the bill which the President discovered at the last minute. I urge my colleagues to vote to retain this amendment if a move is made to remove it.

I introduced three amendments which were accepted by the committee and upon which I would like to add comment. These amendments modify veterans preference, enlarge whistleblowing protections, and modify present dual compensation laws.

VETERANS PREFERENCE

My amendment makes three changes in the administration's proposed changes in present veterans preference law. The amendment was approved by a 16 to 9 vote, as a substitute for Congressman HANLEY's amendment to retain most of the present law.

My amendment first alters the administration's proposal to reduce present lifetime veterans preference to 10 years following discharge by permitting one time use of veterans preference in successful competition for a permanent job in the 15-year period after discharge. This change will include all veterans discharged since the Vietnam era began—August 5, 1964—under the new veterans preference policy.

Vietnam era veterans will have a better crack at Federal jobs under this amendment. We know for a fact that veterans preference has worked well in assisting veterans in obtaining Federal jobs; 50 percent of the Federal work force, versus 25 percent of the national work force, is veterans. But lifetime veterans preference has not worked well: The 8 million Vietnam era veterans—nearly one-third of the 27 million total veterans—only hold 9.6 percent of the Federal jobs which veterans overall have obtained. This is not because Vietnam era veterans do not want Federal jobs, it is because, even with preference, they cannot compete with the more experienced, older veteran with lifetime preference of his own.

The one time use aspect of this part of my amendment is an idea that has been adopted by some States, including Colorado, New York, and Oregon, with little repercussion. Only one-third of veterans ever seek to use preference more than once. Moreover, multiple preference can only be used again by a veteran who seeks a job on another register, rather than for promotion in his own agency. This thwarts those who are working their way up the promotion ladder of such agency.

The second part my amendment replaces the administration proposed protection against layoffs, retention preference—3 years plus a time equal to length of military service—by a flat 8-year period after beginning a permanent Federal job. Following that period the veteran would have job retention equal to that of nonveteran coworkers: that is, on basis of length of service and quality of performance. Under present law veterans have lifetime retention preference and "bumping rights" over nonveteran employees.

Lifetime veterans preference cuts against younger veterans, too. The older veteran with more time in service always has a higher preference. Young veterans get bumped—although not as fast as nonveterans—in any major reduction in force.

Moreover, a supervisor doing hiring is not going to hire a veteran with a higher amount of preference than himself, if it can at all be helped. For the rest of his career he faces the possibility that he, rather than his subordinate, will be out in the street after a reduction in force.

Present law permits veterans with a 50 percent or more disability eligible for noncompetitive appointment to Federal jobs. My amendment reduces this requirement to 30 percent. This doubles this disabled veterans pool to 996,000. Along with the provisions of the administration bill which retain present lifetime 10-point veterans preference for our 2.2 million disabled veterans, and the reduction of numbers of general 5-point veterans pool, far greater opportunities for Federal employment for those who have suffered most in serving our Nation will be present than are now.

Mr. Chairman, I want to let my colleagues know that since the committee reported H.R. 11280, Congressman BONIOR, chairman of the Vietnam veterans in Congress, has come forth with a very reasonable amendment to my amendment to make absolutely sure that all Vietnam veterans are covered by its intentions. This combination will assure that the intention of veterans preference—to provide readjustment and to provide special assistance to disabled veterans—will thrive.

WHISTLEBLOWING PROTECTION

Right now, a Federal employee who "blows the whistle"—sometimes even to a congressional committee—on activities at his agency which are a violation of law, mismanagement, abuse of authority, waste of funds or a danger to the public may be more likely to be harassed or fired than praised or rewarded. There is no effective means other than drawn out administrative and court proceedings for a whistleblower to set things right. We all lose when reasonable and constructive criticism of agencies by those who know them best is stifled.

My amendment to H.R. 11280 enhances the ability of the Special Counsel at the Merit Systems Protection Board to protect whistleblowers from reprisals by other agency personnel. It also increases the clout the Special Counsel has to assure that proper corrective actions are taken to prevent further reprisals.

My amendment also enlarges the scope of matters which may be disclosed. The administration proposal only permitted public disclosure by a whistleblower of violations of laws or regulations. My amendment permits, with the proviso that all matters of national security or privacy be pursued within Government, that a whistleblower may disclose mismanagement, abuse of authority, waste of funds, and danger to public health or safety. Matters in such categories—for example, an agency's purchase of 10 cent bolts for $8 a piece—may not violate any laws, but certainly the public should have an opportunity to hear about. If we in Congress are going to act as effective checks on excesses in the executive branch, we have to hear about such matters.

I want to thank Congressmen HANLEY, LEHMAN, and GILMAN for their assistance in its development, and especially thank Congressman HANLEY for his amendment to it during committee markup which adds to the effectiveness of the Special Counsel in assuring that in whistleblower situation proper corrective actions are taken by agencies.

DUAL COMPENSATION OF RETIRED MILITARY PERSONNEL WORKING FOR THE FEDERAL GOVERNMENT

My amendment to limit the total compensation for future retired—nonwartime disabled—military personnel holding Federal jobs to executive level V—now, $47,500 per year—was adopted by the committee by voice vote.

There are now an estimated 2,000 retired military officers working in the Federal Government who draw combinations of military retired pay and Federal salaries amounting to $50,000 to $80,000 per year. Such people have created the bad connotation of the term "double dipper", and the vast majority of retired military personnel, with $200 to $300 per month pensions, low level civil service jobs, and total incomes at about the U.S. average have suffered by this connotation. Military officers who stay in the military also are affected by those who do not: Those who stay have their pay capped at executive level V.

The present dual compensation law, with its exceptions and its distinctions, makes any debate on this matter a burdensome task. The President's Commission on Dual Compensation earlier this year suggested many changes in the present military retirement system. Although these suggestions have yet to be proposed to Congress, when they are, I believe that my amendment, which eliminates many of the problems we have faced reaching the real issues, will help us have the considered debate these issues deserve.

Mr. UDALL. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. PANETTA).

● Mr. PANETTA. Mr. Chairman, it is always easy to say that any bill is the most important piece of legislation we will consider this year. Perhaps it is true of H.R. 11280, the Civil Service Reform Act of 1978, but I am concerned that by using such sweeping language we will lose sight of what is really important about this bill.

First, it is fair to say that every sin-

gle piece of legislation this House passes from now on will be affected by the proposals contained in this bill. Each time a bill leaves the Congress and goes on to the bureaucracy. its very success is dependent upon the management talent of our civil service. By giving that talent an opportunity to use modern management tools to improve efficiency and effectiveness, we will be improving every single piece of legislation we pass here.

Second, it is also fair to say that while the President has justifiably stressed reorganization of the Government, all of these proposals will be meaningless and worthless unless we regain control of the processes within the bureaucracy. The time, thought and effort put into reorganization both by the President and the Congress deserves the benefit of the improvements H.R. 11280 will bring to the civil service.

And third, we must remember that the expression of taxpayer dissatisfaction symbolized by proposition 13 in California was not merely a call to cut back government. It was a statement of frustration with the operation of government and with its unresponsiveness to the people. This bill, again, gives us the opportunity to respond to the feelings symbolized by proposition 13 in a significant and responsible fashion.

By showing the people that we do understand, care about, and share their concern about how our Government works, we can play an important role in helping people regain trust and confidence in Government, in democracy. This, indeed, is an important part of why we are here as Representatives of the people.

While there are legitimate concerns about aspects of this long and complex bill, I hope Members will make good faith efforts to resolve those disputes amicably and positively. While some of us may argue that energy is more important than civil service reform or that tax reform is more important, I believe that these worthwhile measures will not receive the support they deserve from the people unless and until the people see their Government working for them again. The best way to do this is to implement the broad principles contained in H.R. 11280. In so doing, we will quite possibly be acting on the bill that is most important of all to the people themselves.●

Mr. UDALL. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. GARCIA), a member of our committee.

Mr. GARCIA. Mr. Chairman, I rise in support of the provision in this bill which will limit a veteran's preference for employment in the Federal civil service. I support the changes in this bill regarding veterans preference because I truly believe it will help those veterans America has been trying to forget. I am talking about those veterans who served in Vietnam. That war is an experience we as a Nation, prefer to overlook—and in the process we have also overlooked those who served our country there—a tremendous number of whom did not have the resources to avoid the draft or to leave the country. A great many of these came from communities such as my own. I see them today—and they are still hurting.

I believe the modification in the preference will help the Vietnam veterans because they will no longer have to compete with veterans of previous wars, whose score for a Federal civil service job is the result of many years of work experience as well as the 5-point preference. I am a veteran of the Korean war and I am ready to put aside my own self-interests, and the self-interests of those who served with me and before me, so that we may achieve a more equitable situation for those served in Vietnam.

I urge my colleagues to join me in defending the rights of our disenfranchised veterans, who have been the victims of America's actions several times over.

● Mr. GOLDWATER. Mr. Chairman, it has come to my attention that during consideration of House Resolution 11280, the Civil Service Reform Act, there has been discussion as to whether the Federal Bureau of Investigation should be excluded from participation in certain provisions of the measure. It is in conjunction with this possible exclusion that a question has been brought to my attention that so excluding the FBI would mean that it would not be under the "whistleblower" clauses of that act. The concern expressed has been that without such "whistleblower" protections, there would not exist the capability for FBI employees to bring to the attention of proper authorities instances of excess, impropriety, mismanagement and the like. I would like to state for the record that it is my understanding that there are, indeed mechanisms available to FBI employees to report such activities, should they exist. Such mechanisms exist both within the FBI itself and the Department of Justice, of which it is a part.

There are two bodies within the FBI which report directly to the Director—the Office of Legal Counsel and the Planning and Inspection Division. The Office of Legal Counsel is charged with advising the Director on the propriety, legality and correctness of any action, actual or contemplated. The Planning and Inspection Division is responsible for conducting a continuing program of inspection of all FBI operations at both the Headquarters and field level. During these inspections employee participation is actively solicited and any allegation may be received which would bear upon matters which might be termed "whistleblowing." All allegations receive a vigorous investigation, the results of which are reported to the Director for whatever action he deems appropriate.

Further, within the Planning and Inspection Division there is an Office of Professional Responsibility which investigates more serious allegations of misconduct or possible criminality. The results of these investigations are provided the Director and the Department of Justice. Allegations may be brought to the attention of this Office by any employee at any time. In addition, there is within the Department of Justice a separate Office of Professional Responsibility which investigates similar allegations, to include those made by or against FBI personnel. The investigations may be conducted with or without the assistance of the FBI, as the situation dictates.

I would also note that beyond this level of protection the FBI also receives active oversight from six committees of Congress—the House Judiciary, Intelligence, and Appropriations Committees, and their counterparts in the Senate.

It is possible that some might question whether, even with the existence of such internal bodies clearly evidenced, it might not be possible that retribution could be visited upon an employee who chose to exercise "whistleblower" rights and responsibilities. I would note that should an unlikely event occur there still resides with the Attorney General the ability to audit and correct any personnel action taken by the Director of the FBI. These provisions are set forth in title 28, Code of Federal Regulations, subpart X, section 0.137.●

Mr. UDALL. Mr. Chairman, I have no further requests for time, and I yield back the remainder of my time.

The CHAIRMAN. All time for general debate has expired.

Mr. UDALL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURTHA) having assumed the chair, Mr. DANIELSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that the Committee, havreported that the Committee, hav-11280, to reform the civil service laws, had come to no resolution thereon.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks on the bill just debated, H.R. 11280.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

PERMISSION FOR SELECT COMMITTEE ON ASSASSINATIONS TO SIT NEXT WEEK DURING 5-MINUTE RULE

Mr. STOKES. Mr. Speaker, I ask unanimous consent that the House Select Committee on Assassinations be permitted to sit throughout next week, notwithstanding the fact that the House may be sitting under the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11622, FUELS TRANSPORTATION SAFETY AMENDMENTS ACT OF 1978

Mr. MURPHY of Illinois, from the Committee on Rules, submitted a privileged report (Report No. 95–1476), on the resolution (H. Res. 1311) providing

for the consideration of the bill (H.R. 11622) to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas, petroleum, petroleum products, and certain other materials, to provide standards with respect to the siting, construction, and operation of liquefied natural gas and liquid petroleum gas facilities, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PERMISSION FOR COMMITTEE ON INTERNATIONAL RELATIONS TO FILE REPORT ON H.R. 11942, AMENDING THE CLAYTON ACT

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on International Relations have until midnight to file its report on the bill H.R. 11942, to amend the Clayton Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 13007, ELECTRONIC FUND TRANSFER ACT

Mr. MURPHY of Illinois. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1278 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1278

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 13007) to amend the Consumer Credit Protection Act to establish rights, remedies, and responsibilities for all participants in the utilization of electronic fund transfer services. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. MURPHY) is recognized for 1 hour.

Mr. MURPHY of Illinois. Mr. Speaker, I yield the usual 30 minutes for the minority to the distinguished gentleman from California (Mr. DEL CLAWSON), and pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1278 provides for an open rule with 1 hour of general debate on H.R. 13007, the Electronic Fund Transfer Act. The rule provides for one motion to recommit.

This bill amends the Consumer Credit Protection Act to establish rights, remedies, and responsibilities for all participants in the utilization of electronic fund transfer services. Since this new payment mechanism of electronic fund transfer lacks established rules and regulations, this legislation attempts to correct this situation and protect the consumer. The two most crucial problems presented by electronic banking because of potential crimes are who should bear liability for unauthorized transfers and whether or not anyone should be permitted to distribute validated EFT cards or other means of access on an unsolicited basis. Presently there is no Federal law to protect consumers in this regard. Thus, I urge the adoption of House Resolution 1278 in order that H.R. 13007 may be considered.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, House Resolution 1278 provides 1 hour of general debate for the consideration of the bill H.R. 13007, the Electronic Fund Transfer Act.

Mr. Speaker, this is a rare rule, in that it does not include any waivers of points of order. It does allow all germane amendments to be offered. It is an unencumbered, unusual product of the Committee on Rules.

Mr. Speaker, the bill made in order by this rule establishes rights, remedies, and responsibilities for all participants in the utilization of electronic fund transfer service.

Mr. Speaker, the rule is completely acceptable and I recommend its approval and adoption.

Mr. Speaker, I have no further requests for time.

Mr. MURPHY of Illinois. Mr. Speaker, I have no additional requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, I take this time in order to inquire of the distinguished majority leader as to the program for the balance of the day and for next week.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, it is our plan to complete action today on the electronic fund transfer bill, which will come up immediately in the Committee of the Whole. Having done that, we will rise and that will conclude the business for this week.

We would hope to come in at noon on Monday and begin with the foreign aid appropriations. We want to complete consideration of that appropriation bill.

When that is done, we plan to take up House Joint Resolution 638, to extend the deadline for ERA ratification. That is under an open rule with 2 hours of debate. We would hope to take the rule and general debate on Monday.

Then on Tuesday we would hope to come in at 10 o'clock to conclude action on that resolution extending the deadline for ERA ratification, and to take up House Concurrent Resolution 683, the second budget resolution, completing the general debate on Tuesday.

On Wednesday we will meet at 10 a.m. and conclude consideration of the second budget resolution. Following that, if there is time left on Wednesday, and surely on Thursday, when we will again come in at 10 a.m., we will take up the conference report on H.R. 13467, supplemental appropriations; the conference report on H.R. 12935, legislative appropriations; the conference report on H.R. 12602, military construction authorizations; the conference report on H.R. 12240, intelligence and related program authorization; and the conference report on S. 9, Outer Continental Shelf Lands Act.

After that we would like to return to the civil service reform bill and complete consideration. We also hope to take up H.R. 12432, the Civil Rights Commission authorization, and complete consideration thereon.

In the time remaining we would then take up Senate Joint Resolution No. 4, the Hawaiian Native Claims Study Commission Act, and H.R. 11711, adjustment assistance programs improvements. Each one of those bills is under a 1-hour rule.

Then we have scheduled H.R. 11622, Fuels Transportation Safety Act amendments, and that is also a 1-hour open rule.

The August district work period will begin at the close of business on Thursday and continue until we reconvene at noon on Wednesday, September 6, 1978.

The House will adjourn by 9 p.m. on all days except Wednesday, on which day we may work later.

Conference reports, of course, may be brought up at any time, and any further program will be announced later.

Mr. RHODES. Mr. Speaker, would the gentleman be willing to conjecture and delve into the recesses of his mind and give us some idea as to what might happen after the August recess?

I know it is still the intention of the majority leadership—and the minority leadership shares in that—to adjourn this session of the 95th Congress at some time early in October. If that is indeed to be accomplished, it seems that there should be some action taken to sort out those bills from the many bills which are now going through the various committees that must be acted upon or on which the leadership desires that action be taken in this Congress, with full consciousness of the fact that there are many bills which, of course, Members of the House might want to bring up but which under no circumstances will be considered by the other body.

The idea that I have in mind is, of course, that we might be able to put together an agenda which would give all of us some very good idea as to what bills will be considered and when they will be considered so we can definitely plan on a time for adjournment.

Is the majority leader preparing the groundwork to do such a thing as this?

Mr. WRIGHT. Mr. Speaker, if the gen-

tleman will yield, the answer is "Yes." We have been engaged in that kind of an exercise now for some days.

There are, as the gentleman rightly observes, some bills that are "musts." We must complete action, for example, on the budget resolution. We want very desperately to complete action on a comprehensive energy program. There is an aircraft noise abatement bill, there is an airline deregulation bill, there is a Highway Improvement Act, and there are numerous expiring authorizations that ought to be attended to.

Once all appropriations, all expiring authorizations, the energy legislation, and the tax bill are handled, there is actually a modest number of remaining "must" bills.

We still hope to be able to adjourn on or about the 7th of October. There may be some unavoidable slippage. We hope to be able to avoid a postelection session. That may, however, become unavoidable.

Mr. Speaker, I would be happy to meet with the minority leader and discuss with him these particular pieces of legislation.

Mr. RHODES. Mr. Speaker, as my good friend, the majority leader, knows, we have talked about this informally, and I stand ready to sit down with him at any time to try to determine what pieces of "must" legislation there are. Of course, one of the reasons this colloquy was prompted was because of the fact that we have been considering a bill today which I think most people feel has no chance whatsoever of becoming law.

I do not know the probable fate of the bill which is now before us, but I sort of have my doubts about that, too. I do not see any reason—there may be reasons of which I am not aware—why it should be necessary to take up the time of the Members of the House considering a bill which obviously will have to go over to the next session, and I would hope we could work something out so that that would not be necessary except in the most remote circumstances.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

Mr. Speaker, on the point that the gentleman from Texas just mentioned, I understand that the news wires this afternoon carried a statement by the majority leader of the other body in which he said he had abandoned any hope of adjourning on October 7. I wonder if that is also the view of the House leadership.

Mr. WRIGHT. If the gentleman will yield, that is not the view of the House leadership at this time.

Mr. BAUMAN. It is still the hope of the leadership to work toward that date?

Mr. WRIGHT. We have not abandoned that hope.

Mr. BAUMAN. I have one further question. I notice that the majority leader has announced the scheduling of ERA ratification on Monday and Tuesday. In conversations with the managers of the foreign aid bill on both sides of the aisle in the last 2 days—and perhaps the gentleman has also spoken with them—they indicated it would be almost impossible to finish the foreign aid bill in an additional 1 full day of debate and that it might even go into 2 days. Can the gentleman give us a more realistic estimate as to what the program on Monday and Tuesday might be if that occurs? Will we still bring up the ERA bill on Wednesday?

Mr. WRIGHT. We would have to do the best we can, I say to my friend, the gentleman from Maryland, depending upon the time frames with which we are confronted. It is mandatory to complete action on the budget resolution. That, I would suggest, should be considered the centerpiece of next week's program, and we cannot allow anything to squeeze that out. Obviously, the law compels us to act within certain time frames on that particular legislation.

I cannot forecast for the gentleman how long it will take us to complete action on the foreign aid bill, or any of these bills, really. We have simply tried to put together the best program we thought might be realistic.

Mr. RHODES. Mr. Speaker, may I ask about the priorities the majority leader places on the program? If indeed the foreign aid appropriation bill goes well into the night, is it possible that at some point the bill will be called and taken off of present consideration and that we would then proceed to the ERA rule, rather than have the ERA rule slip until Tuesday?

Mr. WRIGHT. If the gentleman will yield, I would prefer not to anticipate that contingency. We confidently expect to conclude the consideration of our foreign aid appropriation bill by a reasonable hour on Monday.

Mr. RHODES. Mr. Speaker, I am glad to see the majority leader has his usual optimism, and I hope the gentleman is correct.

ADJOURNMENT TO MONDAY, AUGUST 14, 1978

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING ON TUESDAY, AUGUST 15, 1978

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Monday, August 14, 1978, it adjourn to meet at 10 a.m., on Tuesday, August 15, 1978.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 6669, NATIONAL CLIMATE PROGRAM ACT OF 1977

Mr. BROWN of California. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill H.R. 6669, National Climate Program Act of 1977.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

ELECTRONIC FUND TRANSFER ACT

Mr. ANNUNZIO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 13007) to amend the Consumer Credit Protection Act to establish rights, remedies, and responsibilities for all participants in the utilization of electronic fund transfer services.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ANNUNZIO).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 13007, with Mr. PANETTA in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Illinois (Mr. ANNUNZIO) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. WYLIE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I appreciate this opportunity to explain the contents and purpose of H.R. 13007. The Electronic Fund Transfer Act. This landmark legislation would for the first time provide protection for consumers when they use electronic fund transfer services, such as 24-hour cash cards or telephone billpaying services. The bill would require disclosure of the rights and liabilities of consumers and financial institutions when electronic fund transfer services are used. Consumer liability for unauthorized transfers would be limited to $50. However, there are several qualifications to the $50 limit, such as that the $50 limit would not apply if a consumer engaged in fraud, would not apply if a consumer wrote his secret number on the card and this caused the loss, and would not apply if the consumer failed to notify the institution within a reasonable time after learning that his or her EFT card had been lost. Distribution of unsolicited validated EFT cards would

be prohibited and prompt error correction would be required.

The House Banking, Finance and Urban Affairs Committee reported this legislation out by a unanimous-voice vote and the Subcommittee on Consumer Affairs reported out this legislation by a strong margin of 7 to 2. All 10 members of the subcommittee and an additional 6 members of the full committee are cosponsoring the bill.

HEARINGS

This legislation has gone through many changes. The subcommittee on Consumer Affairs went to great lengths to get input on this legislation from all concerned parties. Extensive hearings were held here in Washington and three field hearings were held around the country. We heard from consumers, bankers, merchants, consumer groups, and Federal agencies. We have listened well to their suggestions and drafted a bill that meets the needs of consumers, but carefully avoids burdens on financial institutions.

NEED FOR EFT LEGISLATION

Electronic banking is a new way by means of computer technology to pay for goods and services instead of paying by cash, checks, or credit card. The most usual method used for electronic fund transfers is for the consumer to initiate the transaction by inserting a plastic card, which looks like a credit card, into an electronic terminal and then punch in a secret number. The consumer is then able to perform any number of transactions such as withdrawing cash, transferring funds from checking to savings, or paying a bill. Although these EFT cards look like credit cards, there are important differences. Unlike credit cards where, by law, a consumer can incur no more than a $50 liability if the card is lost or stolen, with EFT cards there is no such limit. Not only is there no limit for the consumer on his or her liability, but also rather than the loss being credit extended, with EFT cards, it is the consumer's hard-earned money deposited in an institution that can be lost forever. Unfortunately, many institutions have emphasized the convenience and so-called safety of electronic banking services and failed to point out the dangers in EFT use.

Most consumers are not aware of the great risks they run in using EFT services today. Some consumers have, to their great misfortune, found out these risks the hard way—after their money was stolen and the financial institution refused to recredit their account.

There is a need for this legislation because today there is no Federal law to protect consumers who use EFT services and only a few States have EFT consumer protection laws. Electronic banking is rapidly growing and spreading across the country. There are already an estimated 10,000 automated teller machines in operation. The State of Wisconsin alone had approximately 1 million EFT transactions during 1977. As electronic banking services grow, criminal activities such as fraud and embezzlement are mounting and consumers are suffering losses calculated in the thousands of dollars. Federal EFT legislation is urgently needed now.

SUBCOMMITTEE MEMBERS' AND CHAIRMAN REUSS' CONTRIBUTIONS

Mr. Chairman, a great deal of the credit for this legislation goes to members of the House Banking Consumer Affairs Subcommittee who have worked long and hard to bring this bill to the floor. The members of the Subcommittee are: GLADYS NOON SPELLMAN, BRUCE F. VENTO, the late CLIFFORD ALLEN, FERNAND J. ST GERMAIN, JOSEPH G. MINISH, WALTER E. FAUNTROY, CHALMERS P. WYLIE, MILLICENT FENWICK, and THOMAS B. EVANS, JR.

I want to pay special tribute to the ranking minority Member, the gentleman from Ohio (Mr. WYLIE) for his great cooperation and hard work on this bill. He has offered a number of excellent suggestions which have improved the bill and as always he has made my job as chairman a much easier one. Through Mr. WYLIE's assistance, the subcommittee was able to hold field hearings in Columbus, Ohio, one of the key test markets for EFT in this country. I also have special thanks for Mr. VENTO. He has followed this legislation carefully and contributed significantly to the high quality of this bill. With Mr. VENTO's help, the subcommittee was able to hold field hearings also in St. Paul, Minn., where excellent witnesses provided the subcommittee with the input of the people which was a refreshing relief from the input of Washington lobbyists.

I want to express special appreciation to Chairman REUSS. His efforts in support of this legislation have been tireless. His contributions have made this legislation a thoughtful and fair bill that we all can be proud of.

CONTENTS OF THE LEGISLATION

This bill addresses the major EFT consumer protection issues such as limiting liability for unauthorized use and prohibiting unsolicited distribution of validated EFT cards. Limiting consumer liability for unauthorized use of EFT cards is extremely important because consumers in all parts of the country are suffering losses because of EFT services. A consumer from Texas had $2,300 stolen from his checking account. The theft occurred as a result of the loss or theft of only his EFT card. The secret number was not lost or stolen. In spite of the fact that institutions claim no thief could ever gain access to a consumer's account without both the EFT card and the secret number, this thief did manage to do so. The consumer wrote me a letter in which he stated that,

> Strictly speaking as a consumer, I feel totally victimized by the system as relates to my loss. I hazard to guess that other owners of such a "debit card" are unaware of the potential for the same thing to happen to them.

A consumer from Ohio had $1,350 stolen from her savings account. She believes the debit card and secret number were stolen. Although she was willing to take a lie detector test that she had no knowledge of the withdrawals, the institution refused to repay her losses.

The $50 standard of this bill is similar to the Truth in Lending Act's $50 limit for consumer on liability for credit card losses, which has proved to be quite successful. Adopting a similar $50 standard for electronic fund transfers would help end confusion between credit cards and debit cards and would be a major factor in persuading consumers to accept electronic fund transfer services. If, to the contrary, industry is permitted to adopt a negligence standard, providing no institution liability if the consumer was negligent, then every loss will result in costly litigation since banks will always claim consumer negligence. Banks will have no incentive to provide secure electronic fund transfer services. We will be telling the banks they have no responsibility to protect consumers and we will be telling the consumer that every time they lose a nickel they will have to hire a lawyer and go to court to get their money back. These lawsuits will be expensive and time-consuming to both consumers and financial institutions.

This bill does not make an institution bear all the responsibility for unauthorized use losses. It only requires that the institution share the risk of loss with the consumer. Sharing the risk is certainly fair since it is the banks that are offering this service and who can control how secure it is. Of the few States that have limits on liability, seven have adopted a $50 limit. Some State officials, such as those in Wisconsin and Iowa (where a $50 limit has been adopted), have indicated that the banks are not experiencing any difficulty with the $50 limit. Consumer losses from unauthorized use will be much worse if distribution of unsolicited EFT cards is continued to be permitted.

Even though a law was passed to stop unsolicited distribution of credit cards because of tremendous losses suffered by consumers and credit card issuers, institutions demand the right to distribute validated EFT cards unsolicited. This is also in spite of the fact that the number of credit cards in circulation has grown enormously without unsolicited distribution. A consumer from Georgia suffered a devastating financial loss because her bank sent her first an unsolicited EFT card and then an unsolicited secret code. A thief stole and used the card and number. The thief, who has been arrested, stole first the card and then the secret number from the consumer's mailbox. The thief then over a period of several months withdrew $50 to $100 a day from the consumer's savings account until all $4,500 was withdrawn. The bank then notified the consumer that the account was empty.

The bank has refused to reimbuse her. It claims she waited too long to notify them of the loss. The $4,500 stolen was the proceeds from a life insurance policy on a family member. So the consumer, who has little money, is now without the insurance proceeds. This loss happened even though the consumer was careful, because her bank was irresponsible. This is the nightmare institutions claim can never happen. It has happened and it will undoubtedly happen many more times if distribution of unsolicited vali-

dated EFT cards is permitted and consumer liability is not limited.

The correction of errors section is one of the most important in the bill. The time period to correct errors of 11 days after error notice or 45 days, if the institution has provisionally recredited the consumer's account, is both fair and reasonable.

Section 914 of the bill deals with a consumer's right to privacy with regard to his or her electronic fund transfers. This is an important right considering the centralization of records that EFT permits. The section specifies six circumstances under which EFT information may be disclosed by an institution. This section of the bill is intended to be consistent with the privacy title of the Financial Institutions Regulatory Reform Act.

This legislation spells out the relationship between this bill and State laws. Section 920 reflects respect for State laws by providing that State laws will only be superseded if they are inconsistent with the Federal law and then only to the extent of the inconsistency. Furthermore, the committee report makes clear that unless there is express action by the Federal Reserve Board to preempt a State law, both the Federal and State law would remain in effect. For preemption to occur, the Board would need to take affirmative action which would occur only with notice and opportunity for comment by interested parties.

Section 921 provides that if a State with a substantially similar law and adequate provision for enforcement applies for an exemption so it can enforce the Federal EFT law, the Board must grant it an exemption. This section affords States the opportunity to experiment and to legislate with their own particular local situation in mind to produce a strong State law. These two sections successfully recognize the important balance necessary between the need for a comprehensive, uniform Federal EFT law and the need to be responsive to particular State conditions.

Opponents of this legislation would like to strike out one of its key provisions, criminal liability. Taking out criminal liability would give anyone with an electronic fund transfer system a license to steal. No matter how flagrant the violation, no matter how many thousands of consumers would be financially destroyed, the individual responsible would not be prosecuted. Contrary to what opponents say, the bill's criminal penalties do not apply to technical or accidental violations. Criminal penalties apply only to violations which are willful, knowing, and with intent to defraud. There is no substance to claims that the FBI or Justice Department will need to spend thousands of hours investigating EFT cases. Under the Truth in Lending Act there have been few criminal prosecutions because the standard of proof is so high. The EFT bill requires an even higher standard of proof since any violation must have been done with an intent to defraud. The criminal penalty in the bill is, as in Truth in Lending, 1 year in jail or a fine of $5,000, or both. These criminal penalties will be an effective deterrent to violations of this EFT legislation, an effective deterrent that neither civil nor administrative enforcement can match. Given the fact that the financial harm for a violation of this law could be catastrophic to consumers, these criminal penalties are certainly appropriate.

CONCLUSION

Opponents of this bill have attacked it as being premature, but this can hardly be the case since the Federal Home Loan Bank Board has already studied the issue for 4 years and issued final regulations, and the National Commission on Electronic Fund Transfers has also studied the issue for several years and recommended consumer protection legislation. Electronic fund transfer services are available now and consumers are losing thousands of dollars using these services today, so legislation cannot wait. Also, if we were to wait, institutions would later claim it was too late to change their computer systems.

This legislation has been carefully and thoughtfully drafted to reflect the needs of consumers, bankers, and merchants. I believe passage of comprehensive and fair legislation is essential to acceptance by consumers of electronic fund transfer services. Enacting this bill, then, will prove a great benefit to industry as well as to consumers.

I urge you to vote for this important consumer protection legislation.

I yield now to my distinguished chairman of the full committee, the gentleman from Wisconsin (Mr. REUSS).

Mr. REUSS. Mr. Chairman, I rise in support of H.R. 13007, the Electronic Fund Transfer Act. I would also like to once again commend my colleague, Mr. ANNUNZIO, for providing the House an opportunity to discuss this important and long overdue legislation. I support the objectives of this measure and would like to comment on the need for its enactment.

Although electronic banking has grown at an incredible rate in the last decade, many problems have arisen with the systems. Newspapers across the country have reported tragedies in which consumers lost all or most of their life savings through stolen or unauthorized use of their debit cards. Because only a handful of States have liability clauses covering electronic fund transactions, countless consumers have been forced to absorb these losses.

Because of this adverse publicity, many consumers are wary of using the machines and development of the technology has been hampered. History shows us that consumers are slow to accept change. This can be seen by the years of coaxing required by the banking industry to make checks acceptable to consumers who were used to dealing on a cash basis. This can be seen again by the media blitz which preceded a wide usage of credit cards. Consumers are now being asked to accept banking by computer with the knowledge that there is no liability limit if their cards are stolen or used by unauthorized persons.

H.R. 13007 will go a long way in assuring consumers that electronic banking can be trusted and is an acceptable method of transacting their money. By establishing uniform guidelines and most importantly, a clear cut $50 liability limit, consumers will overcome many of their apprehensions of banking by electronic means.

Pending passage of the act, consumers can be assured that debit cards are similar to credit cards in most ways. Without the act, there is no such assurance.

For these reasons, I believe that H.R. 13007 will prove a great benefit to the banking industry and consumers alike. Only through a wide acceptance of electronic fund trasfers can the machines prove profitable for banks. As the system gains acceptance, it will become increasingly more feasible for the industry to develop terminals outside of banks—in shopping centers, work places, and recreational facilities.

And as the technology expands and develops, banking by computer will prove to be of great convenience to consumers.

Only through the passage of H.R. 13007 can the predictions of the checkless, cashless society of the future be realized. The act will prove a great boon to consumer acceptance of electronic banking while not unduly restricting development of this growing technology.

Mr. ANNUNZIO. Mr. Chairman, I thank the chairman of the committee.

Mr. WYLIE. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, first of all, I want to acknowledge the complimentary remarks of my chairman of the subcommittee, the gentleman from Illinois (Mr. ANNUNZIO), and say to my friend the feeling is mutual.

I want to compliment the chairman of the subcommittee, Mr. FRANK ANNUNZIO, for his diligent and conscientious hard work in helping to formulate workable legislation on this new method of bill paying. I think it is fair to say that the gentleman from Illinois (Mr. ANNUNZIO) and I started from different vantage points when he introduced his original EFT bill. "EFT" of course is an acronym for electronic fund transfer. I think it is fair also to say by working together we have developed a fair and equitable bill which will prove beneficial to those who offer this service and the consumers who use it.

I appreciate the fact that the chairman mentioned the hearings which we held in my own city of Columbus, Ohio, which has become known as Test City, U.S.A. I guess the theory is that if it will sell in Columbus it will sell anywhere.

While there we visited the second busiest electronic fund transfer terminal in the United States on the campus of Ohio State University. We found the students there, the young people at Ohio State University really do use the EFT and regard it as an efficient method of transferring funds and they use it as a convenient way to pay their bills.

Mr. Chairman, an electronic funds

transfer is activated by insertion of a plastic card similar to a credit card on which is encoded an electronic tape in an EFT receptacle on which is implanted with an electronic tape. The card holder has an individual personal identification number known only to the customer unless he gives the number to someone else. The process is activated when the card holder punches in his personal identification number into the automatic terminal device. Then, the type of transaction is selected, the amount of money involved, the name of the person, and other pertinent information is punched into the terminal and simultaneously is displayed on a small television-like screen which can be shielded from the view of passersby. At the end of the transaction, the card holder receives a slip which he may examine and place in his file for future reference and conformance with the transaction when his monthly statement arrives.

I think it should be pointed out at the outset that this is a type of service which should be made available to a consumer if that consumer determines that this method of paying his bills will benefit him. If the consumer does not want it, he does not have to sign up for it. If the consumer does sign up for and receives a debit card and finds this method of bill paying not to his liking, all he has to do it cut up the debit card in little pieces.

EFT is not to be confused with cash or check or a credit card. It is a new technology that should be allowed to develop as much as possible in the marketplace. We might never know what advantages it can provide if its developers are not allowed to experiment. The technology is really in its infancy and should be allowed to grow. At the same time, an electronic blip which signifies that money has been taken from your account and transferred to someone else's can be frightening to some people. This bill provides the basic framework of that fine line between allowing the industry to develop and at the same time providing adequate consumer protection.

EFT is not a familiar term to the average American. Even after the passage of this bill, most Americans will still buy groceries with cash or check.

Self-service banking made its debut in the Columbus test market more than 10 years ago. After a decade, automated banking is second nature to thousands of central Ohio residents. The 24-hour automated teller machine which enables a person to get cash 24 hours a day, 7 days a week, is commonplace and popular. The pay-by-phone systems probably came first in terms of EFT bill paying services, although the college student who received money by telegraph was probably the first beneficiary of EFT.

Direct deposit and automatic payments—money transferred from social security or your payroll account to your bank for deposit—provide examples of EFT services which have been around for some time. The direct deposit of a social security check can give a senior citizen immediate and convenient access to his money. The most recent innovation is the point-of-sale terminal at retail establishments; the instant transfer of money from a customer's bank account to a merchant's account can offer great benefits in that you can bank when you choose.

In the book, "The Bankers," by Martin Mayer, reference is made to a study by the Special Committee on Paperless Entries, called SCOPE, sponsored by the California banks with the help of the Federal Reserve Bank of San Francisco. It was noted that in the previous year, the number of checks in California had reached a total of over 180 million a month, amounting to over two billion for the year. If EFT could reduce by 30 percent the number of these checks, there would be a substantial reduction in the cost of banking to the consumer and increased efficiency. One idea of EFT is to minimize the use of paper and the cost of handling that paper. On the average, 43 people handle a check from the time it is written until it is returned cancelled. Another purpose is to eliminate the requirement of using a check which is sometimes cumbersome. Have you ever tried to cash a check written on an Ohio bank in Chicago?

This legislation is significant because we are plowing new ground. The concept of EFT is to minimize the use of paper, to reduce costs and speed up financial transactions.

H.R. 13007 is a good bill, and I hope it becomes law before the end of the 95th Congress. The Banking, Finance, and Urban Affairs Committee has reported a bill that will protect consumers and electronic funds transfer users enough to encourage the growth of electronic funds transfer systems on the one hand. It is, at the same time, reasonable and workable enough for merchants and financial institutions to want to continue developing this new technology on the other.

COVERAGE

Section 903 defines "electronic funds transfer" as a paperless transaction by so-called 24 hour tellers or from cash dispersing machines, it also includes telephone bill-payer services, point-of-sale terminals at grocery stores, direct payroll deposit programs and pre-authorized payments.

FINANCIAL INSTITUTIONS

Institutions providing EFT services, like banks, S&L's, credit unions and non-deposit taking institutions would be required to disclose to the consumer the terms and conditions for use of an EFT account including liabilities, rights and duties, as outlined in section 904.

CONFIRMATION AND DOCUMENTATION

Since electronic banking is essentially paperless, consumers would otherwise be without proof of payment for all transactions, were there not some provisions for the documentation of transfers. Section 905 entitled "Transaction Confirmations" provides the methods by which transactions must be confirmed. With limited exception, prompt or immediate paper notification is required for each EFT transaction with a follow-up notification on the periodic statement. Receipts or periodic statements are, by law, prima facie proof of payment.

ERROR CORRECTION

It is said that computers are only as good as the persons operating them; there are bound to be mistakes from time to time. Wisely, we have included elaborate error resolutions procedures in section 908. Besides listing various types of recognized errors, the Fed is given authority to further extend the definition of error through regulations.

In addition, financial institutions are given 45 days to investigate alleged errors provided they have provisionally recredited the account during the term of the investigation.

LIABILITY: (1) UNAUTHORIZED USE, (2) SYSTEM MALFUNCTION

Liability for unauthorized use of debit cards and liability for EFT system malfunction are treated in sections 909 and 910, respectively.

A debit card is a piece of plastic resembling a credit card. On the back of the debit card, however, is a strip of tape electronically coded so that the card can access and activate EFT equipment like a 24-hour teller. Another distinction between a debit and credit card is that with a debit card you get a confidential personal identification or PIN number. To access EFT equipment, a user must place his card in the machine and also punch in his secret PIN number before initiating any transactions.

Once the machine is activated, the instantaneous nature of the transaction is sometimes frightening, because an account can be wiped out in seconds if the debit card and PIN number fall into the wrong hands. Therefore, some inducement is required for customers to be careful with their card and even more careful with their PIN number. Fairness in the allocation of liability for loss is necessary for the system to work. In this regard, we follow the precedent set by the uniform commercial code. Those in the best position to prevent or detect misuse should bear liability. Since it is the consumer that has dominion over his card and PIN number, he should be responsible for its use. EFT equipment and systems are provided, operated and maintained by the institutions, therefore it is the institution that should bear liability for system malfunction.

Consumers who are negligent enough to write the PIN number on the back of their cards or who irresponsibly give the card to other persons should bear liability for misuse.

MISCELLANEOUS CONSUMER PROTECTIONS

Section 910 prohibits false and misleading advertising of EFT services. In section 912 we insure that consumers are not forced to use EFT. Traditional payment mechanisms like cash, check, and credit cards will remain intact. Another consumer protective measure is found in section 913 where waiver of rights by contract is prohibited.

PRIVACY

One of the first problems addressed by the EFT Commission Report was privacy. Automated information retrieved

as it applies to personal financial records has become a real threat to privacy. A comprehensive, intimate, social diary can be constructed at the press of a button. Section 914 is in keeping with the need to maintain confidentiality of personal financial records. Information is disclosed only on a verified or need to know basis. This section is also in keeping with the final recommendations of the Privacy Protection Study Commission.

SOLICITED AND UNSOLICITED DEBIT CARDS

Let us not repeat the mistakes made through the unsolicited distribution of credit cards. Many financial institutions and consumers were hurt by that practice, which also ended in extensive litigation. On the other hand, we must not be so restrictive as to impair the marketing of EFT services. Since the success of EFT is contingent on widespread acceptance and use, I believe that distribution of a nonvalidated debit card on an unsolicited basis can be beneficial to the consumer. If the consumer wants the services, he gets his card validated after signing the disclosure form. Section 915 specifies the details on the issuance of debit cards.

PRICING OF EFT SERVICES

So that consumers are not unwittingly steered to use EFT over other payment mechanisms, section 916 provides that surcharges cannot be tacked onto the use of check, cash, or credit cards.

HOUSEKEEPING PROVISIONS

The remainder of the bill consists of housekeeping provisions common to most titles of the Consumer Credit Protection Act. They deal with civil and criminal liability (Sec. 917, 918), Administrative Enforcement (Sec. 919), Relation to and Exemption from State Laws (Sec. 920, 921), and we wind up with Reports to Congress (Sec. 922), Regulations (Sec. 923), and Effective Date (Sec. 924).

Mr. STANTON. Mr. Chairman, will the gentleman yield

Mr. WYLIE. I am pleased to yield to the gentleman from Ohio, the ranking Republican member of the Committee on Banking, Finance and Urban Affairs.

Mr. STANTON. Mr. Chairman, I appreciate the gentleman's yielding.

I rise in strong support of this legislation. This Electronic Fund Transfer Act provides the basic framework which defines the rights, liabilities, and responsibilities of all participating in the EFT system.

Mr. Chairman, I would also like to take just a second to extend my compliments to the gentleman in the well, the gentleman from Ohio (Mr. WYLIE), and to his counterpart, the chairman of the subcommittee, the gentleman from Illinois (Mr. ANNUNZIO), who, between them, have produced the major part of this legislation and who have worked closely together. We in the full committee appreciate their efforts.

Mr. Chairman, I am very pleased to announce to the House that whatever controversy we had has been settled in a good, precise legislative manner.

I know of no objection to this bill, Mr. Chairman.

Mr. Chairman, the Electronic Funds Transfer Act creates a basic framework defining the rights, liabilities, and responsibilities of all participants in an EFT system. We have fashioned a bill providing for consumer protection without impairing the development of an evolving technology.

This new generation of automated self-service banking offers tremendous potential in consumer convenience, lower cost, increased efficiency, and security. But no automated systems are foolproof; computers are no better than the people who operate them. Mistakes are bound to occur. Current law provides no machinery for resolving some of the problems that will inevitably arise because existing State and Federal laws governing checks and credit cards were not drafted with EFT in mind, leaving the rights of consumers, as well as financial institutions and retailers, undefined.

Principally, the bill addresses the need for full disclosure of EFT terms, adequate receipts as evidence of transactions, liability for unauthorized use, institutional liability for wrongful payment, prompt error correction and the marketing of EFT cards and services. Moreover, H.R. 13007 insures that EFT is an alternative to and not a substitute for present payment systems.

When the National Commission on Electronic Funds Transfer made its final recommendations to the Congress, they spoke about the four principal types of EFT that are available to consumers today: automated teller machines, where a variety of banking transactions can be performed at any hour of the day; pay-by-phone systems, permitting the customer to call his bank and order payment to third parties; direct deposit and automatic payment programs, where regular payroll deposits and bills are paid automatically; and, finally, point-of-sale terminals, which is a computer at a retail establishment enabling the consumer to access his bank account from the premises of the retailer.

Among other things, the Commission report observed that since the use of these EFT services was becoming widespread it would be beneficial for consumers and providers of EFT to set some ground rules for the system. Once the rules implementing EFT became a fixed matter, consumers would be less reluctant to use EFT because their rights would be protected. Financial institutions would have the benefit of knowing what the law is before investing in the expensive technology of EFT.

I would also remind my colleagues that this bill deals exclusively with the consumer aspects of EFT, the structural issues such as interstate branching, terminal sharing and the role of non-deposit-taking institutions have been left for another day.

Eight States already have laws dealing with the consumer aspects of EFT and 26 more States have other laws relating to EFT, while the Federal Governernment has nothing. I therefore urge my colleagues to support the Electronic Funds Transfer Act. It will pave the way for a nationwide, uniform EFT system with benefit to consumer and to the economy. We have studied the matter enough. The time to act is now. Consumers are in need of protection and financial institutions are in need of certainty.

Mr. WYLIE. Mr. Chairman, I thank the gentleman from Ohio (Mr. STANTON) for his compliment and for his contributions to making this bill the good piece of legislation which we now have on the floor today.

Mr. Chairman, I have included for the record, in layman's language, a capsulized explanation of the provisions of the bill.

Mr. ANNUNZIO. Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota (Mr. VENTO).

Mr. VENTO. Mr. Chairman, I rise in strong support of the bill.

We spent many hours in working on this legislation, starting in September 1977, with both the majority and minority members working hard on it.

I think this subcommittee is one of the finest, if not the finest, subcommittees on banking with whom I have worked.

Mr. Chairman, we started out and explored all of the facets of the electronic machines being used at the present time in financial transactions.

I think the bill we have come forward with is a well-thought-out, well-conceived bill.

Mr. Chairman, I want to pay special tribute to the chairman of the subcommittee and to the ranking minority members who have worked so diligently on this legislation and gave me an opportunity to participate freely and fully as a new Member of Congress in drafting this legislation.

Mr. Chairman, I also compliment the staff for their fine work on it.

Mr. Chairman, we have before us perhaps one of the most important consumer protection measures to come before the Congress.

I say this advisedly after working since September 1977 with my good friend from Illinois, FRANK ANNUNZIO, the other members and the staff of the Subcommittee on Consumer Affairs. We are on the brink of a whole new way of carrying on consumer affairs in retailing and banking. With the development of computer technology, we have seen opening before us the prospects of a virtually cashless, checkless society.

This is a possibility because of new techniques involved in electronic fund transfers provide a whole new spectrum of services from instant cash, salaries automatically deposited to one's account, to supermarket shopping without cash or checks. The future seems boundless for this new technology—except for the vulnerabilities in the systems that open them to consumer losses and crimes against which the victims may be completely helpless.

At the present time, I am told, electronic hobby stores sell sophisticated computer equipment which in the hands of skilled, unscrupulous technicians through their telephones, can gain easy access to customers' accounts in many financial institutions throughout the country.

The industry has attempted to mini-

mize the very real dangers of fraudulent uses of the electronic fund transfer systems and also to limit its responsibilities in extending protections to consumers. Nevertheless, the losses to the victims can be traumatic and financially disastrous.

Because access to electronic fund transfer systems is as close as the telephone, its scope is truly nationwide and has become one of Federal jurisdiction.

The Subcommittee on Consumer Affairs under FRANK ANNUNZIO's leadership has thoroughly studied the findings of the National Commission on Electronic Funds Transfer and has worked with all segments of the financial community to identify problems, abuses, benefits, and safeguards. The approach of the subcommittee has been a carefully reasoned one, limited to a bare bones approach of providing fundamental protection to the consumer without inhibiting innovation by the industry to exploit the cornucopia of services inherent in this new technology. What the committee seeks to do is to prevent EFT from becoming an electronic monster without a master.

I am not sure that even the most enthusiastic advocate of electronic fund transfer systems can envision their eventual applications, but I believe it is imperative that the Congress move now to extend the Consumer Protection Act to establish certain fundamental rights, remedies, and responsibilities for all participants in the utilization of electronic fund transfer services.

While there are other protections I would like to have seen in the bill before us, I am grateful for the inclusion of the $50 limitation of liability for account holders who lose a card or other means of access to EFT. I think very valuable, too, are the spelling out of the liability for system malfunctions and the prohibition of unsolicited cards or other means of access to EFT.

As a first important step to protect the users and prospective users of EFT, I urge the adoption of H.R. 13007.

Mr. ANNUNZIO. Mr. Chairman, I yield such time as he may consume to the gentleman from Georgia (Mr. BARNARD), a distinguished member of the full committee.

Mr. BARNARD. Mr. Chairman, let me at this time associate myself with the remarks of the chairman of the subcommittee and also with those of the ranking minority member.

Mr. Chairman, this legislation has been given very careful and deliberate study by the committee. Most adequate hearings were conducted which members of the industry and representatives of these regulatory authorities were heard. I think a very fair sounding was given to this piece of legislation, and I commend it to my colleagues in the House. It is a fair piece of legislation, and it certainly deserves a positive vote.

Mr. Chairman, it is an aniticipatory law. It is one that foresees possible dangers and corrects them before they occur.

For that reason, Mr. Chairman, we can recommend the bill to the Members and ask our colleagues to support it.

Mr. ANNUNZIO. Mr. Chairman, I have no further requests for time, and I reserve the balance of my time.

Mr. WYLIE. Mr. Chairman, I yield 2 minutes to the gentlewoman from New Jersey (Mrs. FENWICK), a member of the Subcommittee on Consumer Affairs.

Mrs. FENWICK. Mr. Chairman, I rise in strong support of this legislation, too.

I must say that when we first came to the whole subject, as a consumer advocate, I was very much in doubt as to whether this sort of thing would be useful. We were driven by our chairman and by our ranking member, the gentleman from Ohio (Mr. WYLIE). We were driven hard in this subcommittee and forced to listen to what is happening to the whole banking system in this regard in our country today.

Mr. Chairman, we were fortunate to have two leaders of this kind, and it is a great tribute to them that the bill has been brought out with such unanimous approval because it is a difficult subject. It is new. It seems to suggest all sorts of dangers to the ordinary consumer faced with his money being snatched away from him by the push of a button. If the machine is here, if it is being used in Ohio, as long as it has been used and is being used now, it is going to be used next year. We must come to grips with a system that will as far as possible protect the consumer and make it possible for the banks to administer. It is that compromise, that bringing together without loss on either side, of two interests which first appear to be conflicting which is the whole art of legislation. We should not deny the consumer the protection, nor should we deny the banking system the convenience. We find in good legislation not the chipping away of the rights of either but the coming together of the rights of both. I think this is a very good, sound piece of legislation in that regard.

I thank the Chairman.

● Mr. PATTERSON of California. Mr. Chairman, there is a great need for the legislation before us today. H.R. 13007, the Electronic Fund Transfer Act. This bill is the result of many long months of consideration by the subcommittee and the full committee and I am pleased today to rise in support of the act.

In hearings before the subcommittee, testimony was heard from members of the banking industry, from Consumer groups and individuals, from merchants and retailers. I firmly believe that we have received all possible input in forming this legislation and as a result, have produced a comprehensive and fair bill.

H.R. 13007 establishes guidelines for financial institutions to follow in the developing technology of electronic banking. Many consumers are frightened of banking by computer and what they view as a dehumanized approach to handling their money. The success or failure of this new payment mechanism hinges on consumer trust. However, to date, there has been little reason for consumers to overcome their wariness of these systems because of the absence of legislation addressing the many problems that can arise in EFT transactions.

H.R. 13007 will establish appropriate consumer safeguards for EFTS and will establish a uniform system of handling EFTS by financial institutions, yet will allow the orderly development of EFT systems for the benefit of our banking system. I will briefly review the sections of the act I deem the most essential:

In my opinion, section 303 of the act is the most vital. This section limits consumer liability to $50 if a consumer's debit card is stolen. This provision is modeled after the Truth in Lending Act's liability limit for credit card customers, which has proved very successful.

Also of key importance is section 915, which prohibits financial institutions from mailing out unsolicited validated debit cards. Consumers must be protected from the possibility of losing huge sums of money through the use of cards they never received. The potential for abuse is too strong to allow validated cards to be issued on an unsolicited basis.

Section 908, dealing with correction of errors, is one of the most important sections of this legislation. The act requires speedy corrections of errors, with 11 days allowed for the financial institution to resolve an error. This section is very necessary to the act, for without this stipulation a long error-resolution process could place great hardship on a consumer by tying up his funds.

As with any technology, many consumers will choose not to change but to cling to their traditional method of payment. Two provisions of this act are designed to insure that consumers have this right. Section 916, the discriminatory pricing section, prohibitis any seller from charging more for goods or services paid for by check than he would charge if paid for by EFT. This will insure that consumers will continue to have an option to use checks, and will not be penalized in any fashion for making that choice. Also, section 912 protects consumers from being forced to use EFT services. Under this section, no person may as a condition of extending credit, require EFT as a method of payment. Likewise, a consumer cannot be required to establish any account for the receipt of EFT as a condition of employment or receipt of a Government benefit.

H.R. 13007 was approved by the full committee by a 42–0 vote. This is a bill of which we may all be proud. This timely and thorough legislation provides significant consumer safeguards and will go a long way in promoting use of EFTS. I urge my colleagues to support the act.●

● Mr. LAFALCE. Mr. Chairman, I rise in support of H.R. 13007, the Electronic Fund Transfer Act of 1978. I particularly want to take this opportunity to commend the distinguished chairman of the Subcommittee on Consumer Affairs, the gentleman from Illinois (Mr. ANNUNZIO), for his long and arduous labors on behalf of this piece of legislation.

As a member of the Banking Committee and a participant at a number of public hearings concerning electronic

fund transfer system (EFTs), I have been very concerned with the vital need to strike a balance between providing essential protection for consumers' interests and creating the proper atmosphere for the full development of EFTS. I believe that the Banking Committee has, with the inclusion of the amendments being adopted today, struck the correct balance between these two requirements.

This bill will amend the Consumer Credit Protection Act to insure that all participants who utilize electronic fund transfer systems will be fully apprised of both their rights and responsibilities. The consumer will be more than adequately protected in terms of the correction of errors, liability for unauthorized transfers and system malfunctions, and confidentiality. Financial institutions will not have the necessary parameters and guidelines to proceed with the further development of these useful payment mechanisms, especially in regard to the issuance of debit cards and periodic statements.

I believe that the resolution of the question concerning discriminatory pricing is very welcome, because merchants will not be able to pass on any cost savings due to EFTS to their customers. A prohibition of that right certainly would not have been in the real interests of either the financial institutions or the merchants or consumers.

The passage of this bill will remove much of the uncertainty currently surrounding EFTS and will establish similar regulations for EFTS as those which already and, I might add, effectively exist for credit cards. No longer will either consumers or financial institutions be left in doubt as to each other's rights and duties and as to remedies for possible inequities involved in the use of the EFTS. Consumers will no longer be liable, in a financial sense, for an error on the part of the system and for the unauthorized access to their account by a third party; and financial institutions will now be adequately protected against fraud and other criminal uses of their systems. This is particularly important for consumers, since the creation of EFTS provided the possibility for a third party to have complete access to one's account, and this could involve the loss of hundreds or even thousands of dollars for the individual consumer.

For these reasons, Mr. Chairman, I strongly urge all of my colleagues to support the Electronic Fund Transfer Act which will afford financial institutions. merchants, and consumers with legal protection necessary for the mutually beneficial use of EFTS.●

● Mr. FARY. Mr. Chairman, I am pleased to rise in support of H.R 13007, the Electronic Fund Transfer Act. I am proud to be a sponsor of this important bill and I urge my colleagues to support it.

This legislation will, for the first time, establish uniform guidelines for the banking industry to follow in electronic fund transfer systems. The bill will cover electronic fund transfers such as telephone bill paying services, 24-hour cash dispensing machines, point of sale transactions, direct deposit of salary and preauthorized payments.

Electronic fund transfer systems are a rapidly growing technology. EFTS terminals are now located throughout the country, the most commonly offered service being automated teller machines. However, very few States have legislation governing EFT transactions. As a result, many consumers have lost hundreds of dollars when their cards were stolen or used by unauthorized persons. H.R. 13007 establishes a $50 liability limit very similar to the Truth in Lending Act's $50 liability limit for credit card customers. The few States which have liability statutes have adopted a $50 liability limit for consumers and all indications are that this is a workable solution for both the banks and consumers.

In addition to the liability measure, I view the section prohibiting the issuance unsolicited, validated debit cards of key importance to the act. A reoccurring problem with EFTS has been the issuance of unsolicited cards, complete with identification number and validation for use. There have been several cases where consumers have lost huge sums of money through the use of unsolicited cards, issued in their names, which never reached their hands. H.R. 13007 will effectively eliminate the threat of consumers losing their money in this manner. The act will allow the distribution of unsolicited cards, but with the stipulation that arrangements must be made by the consumer for validation of the card.

A great deal of work has gone into the shaping of this legislation. Extensive hearings were held by the Consumer Affairs Subcommittee in Washington, Chicago, Columbus, Ohio, and St. Paul, Minn. Testimony was heard from members of the banking industry, merchants, and consumer groups. All interested parties have been given ample opportunity to lend their suggestions to the shaping of this legislation.

The fact that H.R. 13007 cleared the full House Banking, Finance and Urban Affairs Committee without a single dissenting vote clearly shows that we have before us a fair and thorough bill.

I am pleased to lend my support to this measure and I urge my colleagues to do the same.●

● Mr. PRICE. Mr. Chairman, I am pleased to give my support to H.R. 13007, the Electronic Fund Transfer Act. This measure is the culmination of many months of extensive hearings and mark-up sessions and I believe we have before us today a bill which adequately protects consumers and that will not restrain development of electronic fund transfer technology.

I compliment the chairman of the subcommittee Mr. ANNUNZIO and the full committee for their dedication to this measure. There is a very real need for a basic framework for electronic fund transfer systems and for consumer protection in such transactions. I believe this bill accomplishes these objectives.

There are several sections of this bill which I feel are particularly essential to the act:

The provision limiting consumer liability to $50 is, in my opinion, the single most important protection offered by the bill and the most urgently needed. Electronic banking is a rapidly growing means of computer technology which is distinct from any other system of transacting money. The most headway has been made in the development of automated teller machines, most of which offer 24-hour service. To operate the machines, the customer is given a debit card and a personal identification number to use in making deposits, withdrawals or monthly installments. Because a debit card looks like a credit card, most consumers have equated the two cards as operating on the same principles. However, nothing could be further from the truth.

Losses incurred through stolen credit cards are protected under the Truth in Lending Act, with a specific $50 liability limit for consumers. There is no such Federal law covering EFTS transactions. There are only a few States which have any liability limit at all. H.R. 13007 will correct this discrepancy by imposing a similar law for consumers in the case of stolen debit cards.

Another important provision of the bill is the section outlining requirements for documentation of transfers. There has been little conformity to date in what is documented by banks in EFTS transactions and this has thoroughly confused many consumers. On the basis of the banks limited statements, many consumers have been unable to track transactions. The statements might give the day and the amount but no record of where the transaction took place. It is easy to see the difficulties that can arise from such a lax accounting system. If a dispute arises between a customer and a financial institution over a transaction, there is often little record of the transaction, save the date and the amount.

H.R. 13007 requires that banks provide customers with the following information: name and address of the financial institution, date, amount of transaction, account number, identification of transaction, name of seller, city and State of purchase transaction, ending balance and fees and service charges.

The bill also stipulates that the financial institution must send a monthly statement for each month in which a transaction occurs. Consumers must also be provided a receipt for all terminal transactions. This bill will greatly aid consumers in acquainting themselves with this new system.

Another important section of the bill deals with the problems posed by unsolicited, validated debit cards. The bill insures that a consumer will not receive a validated card from a financial institution by mail, unless it is at their request.

I believe we have before us a workable and credible bill. I am in full support of the act, and I urge my colleagues to lend their support.●

Mr. WYLIE. Mr. Chairman, I have no further requests for time, and I yield back the remainder of my time.

Mr. ANNUNZIO. Mr. Chairman, I

have no further requests for time, and I yield back the remainder of my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H.R. 13007

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Consumer Credit Protection Act (15 U.S.C. 1601 et seq.) is amended by adding at the end thereof the following new title:

"TITLE IX—ELECTRONIC FUND TRANSFERS

"Sec.
"901. Short title.
"902. Congressional findings and legislative purpose.
"903. Definitions and rules of construction.
"904. Disclosures required.
"905. Transaction confirmations.
"906. Periodic statements.
"907. Preauthorized transfers.
"908. Correction of errors.
"909. Liability for unauthorized transfers.
"910. Liability for system malfunction.
"911. False or misleading advertising.
"912. Compulsory use prohibited.
"913. Waiver prohibited.
"914. Confidentiality.
"915. Issuance of cards or other means of access.
"916. Discriminatory pricing prohibited.
"917. Civil liability.
"918. Criminal liability.
"919. Administrative enforcement.
"920. Relation to State laws.
"921. Exemption for State regulation.
"922. Reports to Congress by the Board and Attorney General.
"923. Regulations.
"924. Effective date.

"§ 901. Short title

"This title may be cited as the 'Electronic Fund Transfer Act'.

"§ 902. Congressional findings and legislative purpose

"(a) The Congress finds and declares that:

"(1) The use of electronic and computer systems to transfer funds offers many opportunities to provide credit, debit, and payment services more conveniently and efficiently, thereby benefiting all participants in the Nation's payments system.

"(2) Many aspects of electronic fund transfers are undergoing evolutionary changes and, thus, projections about future events necessarily involve a degree of speculation. Consequently, the appropriate approach to these new financial service concepts is, in general, to permit their further development in a free market environment and, to the extent possible, in a manner consistent with the nature and purpose of existing law and regulation governing financial services.

"(3) Existing law and regulations in the consumer protection area are incomplete or are not applicable to some aspects of the new financial service concepts.

"(b) The purposes of this title are to provide a basic framework establishing the rights, liabilities, and responsibilities of all participants in electronic fund transfer and to guarantee consumers and other customers of the system a number of basic rights in an electronic fund transfer environment.

"§ 903. Definitions and rules of construction

"(a) The definitions and rules of construction set forth in this section shall apply for the purposes of this title.

"(b) The term 'Board' refers to the Board of Governors of the Federal Reserve System.

"(c) In determining any time limit under this title which is applicable to any institution or customer thereof, the term 'business day' means any day on which the offices of that institution are open to the public for the transaction of substantially all functions.

"(d) The terms 'card' and 'other means of access', mean a card, code, or other means of access to a consumer account for the purpose of enabling the account holder or a person acting with such holder's authorization to initiate electronic fund transfers transferring money or credit to or from the account.

"(e) The term 'consumer account' means a demand deposit, savings deposit, or asset account (other than a trust account or a credit balance in an open end credit plan as defined in section 103(1) of this Act) established primarily for personal, family, or household purposes, and the term 'account' refers to a consumer account unless the context otherwise indicates.

"(f) The term 'electronic fund transfer' means any transfer of funds, other than by check, draft, or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument, or computer or magnetic tape so as to order, instruct, or authorize a financial institution to debit or credit a consumer account. Such term includes, but is not limited to, point-of-sale transfers, automated teller machine transactions, direct deposit of funds, and transfers initiated by telephone. Such term does not include (1) any check guarantee or authorization service which does not directly result in a debit or credit to a consumer account; (2) any transfer of funds, other than those processed by automated clearinghouse, made by a financial institution on behalf of an account holder by means of a service that transfers funds held at either Federal Reserve banks or other depository institutions and which is not designed primarily to transfer funds on behalf of an account holder; (3) any transaction the primary purpose of which is the purchase or sale of securities or commodities through a broker-dealer registered with or regulated by the Securities and Exchange Commission, as determined under regulations of the Board; (4) transfers from savings accounts to demand deposit accounts, for the purpose of covering an overdraft or maintaining an agreed upon minimum balance in the demand deposit account; and (5) any preauthorized transactions received by a financial institution in nonelectronic form. Except for the requirements of section 905(c) and section 912 an electronic fund transfer shall not include a credit to an account initiated by the Department of Treasury pursuant to Treasury Department Circular 1076, Revised (31 CFR part 209).

"(g) The term 'electronic terminal' means an electronic device, other than a telephone, through which an individual initiates an electronic fund transfer. Such term includes, but is not limited to, point-of-sale transfers, automated teller machines, and cash dispensing machines.

"(h) The term 'financial institution' means a State or National bank, a State or Federal savings and loan association, a mutual savings bank, a State or Federal credit union, or any other person who, directly or indirectly, holds a consumer account belonging to an individual; and the term 'institution' refers to a financial institution.

"(i) The term 'holder' when used in relation to a consumer account means the individual who is recognized as the owner of the account by the financial institution where the account is held. Where two individuals are joint owners of the account, the term refers to either or both of such individuals as the context may indicate or as may be determined under regulations of the Board. Where there is a separation of legal and equitable ownership, the term refers to the individual having control of the account, except that any financial benefits shall inure to the beneficial owner.

"(j) The term 'individual' means a natural person.

"(k) The term 'preauthorized electronic fund transfer' means an electronic fund transfer authorized in advance to recur at substantially regular intervals.

"(l) The term 'State' means any State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, or any territory or possession of the United States or any political subdivision of any of the foregoing.

"(m) The term 'unauthorized electronic fund transfer' means an electronic fund transfer from a consumer account initiated by a person without authority to initiate such transfer and from which the account holder receives no benefit. The term does not include any transfer described in section 909(a).

"§ 904. Disclosures required

"(a) The terms and conditions on which any institution maintains any consumer account which is subject to electronic fund transfers shall be disclosed in writing, clearly and in readily understandable terms, by the institution to the account holder at the time a consumer account becomes accessible to an electronic fund transfer. Such disclosures shall include, to the extent applicable:

"(1) The rights, duties, and liabilities of the account holder and of the institution under this title.

"(2) A description of the electronic fund transfers which the holder can initiate or authorize to be initiated, including any limitations on the frequency or dollar amount of such transfers, except that the details of such limitations need not be disclosed if their confidentiality is necessary to maintain the security of an electronic fund transfer system.

"(3) Whether the account holder can authorize a person other than an account holder to initiate any of the transfers described in paragraph (2), and how and to what extent such authority can be conferred.

"(4) Any service charges or other charges which the institution may make in connection with the operation of the account or any transactions therein.

"(5) The policy of the financial institution with respect to reversal of transfers, including, if applicable, a specific notice that transactions may not be reversed.

"(b) For any consumer account to or from which electronic fund transfers are being made and have been made by use of a card or other means of access prior to the date specified in section 924(a), the disclosures required under subsection (a) shall be made not later than the first periodic statement required by section 906 after such date.

"(c) For any consumer account to or from which electronic fund transfers begin to be made on or after the date specified in section 924(a), the disclosures required under subsection (a) shall be made by an institution to the account holder upon approval of the application and prior to initiation of the first electronic fund transfer to such consumer account.

"(d) A financial institution shall notify an account holder in writing at least thirty-one days prior to the beginning of the periodic statement cycle in which any change in any term or condition of the account required to be disclosed under subsection (a) becomes effective if such change would result in greater cost or liability for such holder or decreased access to the account. Subject to any restrictions which may be imposed by regulation by the Board, a financial institution may implement a change in the terms or conditions of an account without prior notice when such change is immediately necessary to maintain or restore the security of an electronic fund transfer system or a consumer account.

"(e) The Board shall issue model forms and clauses within one year of enactment for optional use by financial institutions to facilitate compliance with the disclosure require-

ments of this section and to aid account holders in understanding the rights and responsibilities of participants in electronic fund transfers by utilizing readily understandable language. Such model forms and clauses shall be adopted after notice duly given in the Federal Register and opportunity for public comment in accordance with section 553 of title 5, United States Code. The Board shall take account of variations in the services and charges under different electronic fund transfer systems and, as appropriate, shall issue alternative model forms and clauses for disclosure of these differing account terms.

"§ 905. Transaction confirmations

"(a) Except as provided in subsection (d), whenever an electronic fund transfer except a preauthorized transfer takes place with respect to any account, a confirmation containing the following information in writing shall be made available by the institution directly or indirectly to the account holder:

"(1) The date and amount of such transaction.

"(2) The account identification of the account with respect to which the transaction occurred.

"(3) Whether the transaction involved—

"(A) payment for goods and/or services,

"(B) a deposit of funds, or

"(C) a withdrawal of funds.

"(4) If a third party such as a seller of goods or services is involved in the transaction, the name of such third party and the city and State or foreign country in which the sale or other transaction related to the electronic fund transfer took place.

"(b) The information required under subsection (a) shall be made available at the time and place of any transaction to which the electronic fund transfer relates if that transaction takes place on the premises of the institution in which the account is held or at an electronic terminal off the premises of the institution. This requirement shall not be deemed to require that an electronic terminal be designed so that it ceases to operate if confirmation is temporarily unavailable from the terminal provided the account holder is made aware that no confirmation can be given at the time such account holder attempts to initiate a transactions and then such holder has the option whether to proceed with the transaction.

"(c) For a consumer account which is scheduled to be debited or credited by a preauthorized electronic fund transfer, the account holder shall promptly be given, directly or indirectly, by the institution, confirmation of the transfer by either positive notice when the debit or credit is made as scheduled, or negative notice when the debit or credit is not made as scheduled, in accordance with the regulations of the Board. The type of notice elected by the institution shall be disclosed to the account holder in accordance with section 904. The institution shall not be required to give such notice of the party initiating a preauthorized credit to the account holder's account provides a statement of the transfer to the account holder on or about the date the transfer takes place.

"(d) If an electronic fund transfer is initiated at a place other than an electronic terminal and not on the premises of the institution and is not preauthorized, an institution shall furnish a transaction number to the account holder (or person acting with such holder's authority) at the time the transfer is initiated. The institution shall, directly or indirectly, promptly confirm the transfer by furnishing the account holder with positive notice when the transfer is made or negative notice when the transfer is not made. The type of notice elected by the institution shall be disclosed to the account holder in accordance with section 904.

"(e) Whenever an electronic fund transfer transaction requires an account holder to begin using credit funds to enable the transaction to be completed, the account holder shall be notified, directly or indirectly, by the institution of the amount of credit funds transferred into the account to complete the transaction if the use of credit funds is the first such use in the billing period in which it occurs, and no such funds were in use at the commencement of that period. Any notice required under this subsection shall, within five days after the transaction to which it relates, be delivered in person, dispatched by mail, or dispatched by such other means as the Board may by regulation approve.

"(f) Any transaction confirmation furnished pursuant to this section and any periodic or other statement furnished pursuant to section 906 shall constitute prima facie evidence of the transactions therein set forth.

"§ 906. Periodic statements

"(a) An institution shall furnish to each account holder a periodic statement for each account which is accessible by electronic fund transfer at least once a month for each month in which an electronic fund transfer affecting the account has occurred, or at least once in each calendar quarter, whichever is more frequent. Such periodic statement shall include:

"(1) The name and address of the institution.

"(2) The date, amount, and identification of the account into or out of which funds were transferred for each electronic fund transfer occurring during the period covered by the statement.

"(3) An identification of each transaction indicating whether the transaction involved—

"(A) payment for goods and/or services

"(B) a deposit of funds,

"(C) a withdrawal of funds,

"(D) an extension of credit, or

"(E) the repayment of an extension of credit.

"(4) In the case of any transaction in which an electronic fund transfer is used to purchase goods, property, or services, or to repay an extension of credit, the name of the seller or credior in each such transactiotn and the city and State or foreign country in which such transaction occurred.

"(5) The balance as of the close of the period covered by the statement for each account of the holder that can be accessed by an electronic fund transfer.

"(6) Any service charge or other charges to the account holder occurring during the period covered by the statement.

"(b) A periodic statement required by this section shall, not later than the fifteenth day following the close of the period to which it relates, be delivered to the account holder in person, dispatched by mail, made available to the account holder pursuant to such holder's instructions to the institution, or dispatched by such means as the Board may by regulation approve.

"(c) In the case of a consumer passbook account which may be accessed by electronic fund transfers, a financial institution may, in lieu of complying with the requirements of subsections (a) and (b), upon presentation of the passbook provide the account holder in writing with the amount and dates of each such transfer involving the account since the passbook was last presented.

"§ 907. Preauthorized transfers

"(a) An institution may not make a preauthorized electronic fund transfer from an account except in accordance with a written authorization of the account holder, a copy of which shall be provided to the account holder when made.

"(b) An account holder may stop payment of a preauthorized electronic fund transfer from the holder's account by notifying the institution in writing unless State law permits such notification to be oral at any time until the institution makes payment to the seller.

"§ 908. Correction of errors

"(a) For the purpose of this section, an error consists of any of the following:

"(1) An unauthorized electronic fund transfer.

"(2) An incorrect electronic fund transfer from or to a consumer account.

"(3) The omission from a periodic statement of an electronic fund transfer affecting a consumer account which should have been included.

"(4) A computational error by the financial institution.

"(5) The receipt of an incorrect amount of money from an automated teller machine.

"(6) An institution's failure to comply with an account holder's request for any information or documentation required by this title concerning any electronic fund transfer in the account.

"(7) An institution's failure to stop payment on a preauthorized transfer from an account when properly instructed to do so.

"(8) The failure to make an electronic fund transfer to or from an account.

"(9) Any other error described in regulations of the Board.

"(b) Every institution at which any account subject to this title is maintained shall notify each account holder of the identity of a person or office and the address and telephone number at which the account holder may, in person, by phone, or in writing notify the institution of any error in the account. In order for the institution to be subject to the duties and liabilities imposed by this title with respect to the correction of errors, such notice to the institution must include the information required under subsection (c) and be mailed, telephoned, or delivered in person within sixty days of the last day of the time period covered by the periodic statement which relates to the alleged error, but the failure of an account holder to give such notice, or to give such notice within that period, does not affect any rights or remedies such holder may otherwise have. No notice or information given orally (whether in person or by telephone) to an institution by any individual shall create any liability on the part of the institution under this section, other than that arising out of the duty of the institution to inform such person of the requirement that the notice or information be confirmed in writing, unless such information is confirmed in writing, signed by or on behalf of the account holder, and mailed or otherwise delivered to the institution within the time required by this subsection.

"(c) Any notice of an error under this section shall set forth or otherwise reasonably enable the institution to identify the name and account identification of the account holder, and shall describe or identify the error which the account holder believes has been made.

"(d) Except as provided in subsections (e) and (g), if the financial institution determines that an error did occur, it shall promptly, but in no event more than one business day after such determination or eleven business days after notification, whichever is earlier, correct the error, subject to section 909, including the crediting of interest where applicable.

"(e) If a financial institution receives notice of an error in the manner and within the time period specified in subsection (b), it may, in lieu of the requirements of subsection (d), provisionally credit the consumer account for the amount alleged to be in error, subject to section 909, including interest where applicable, pending the con-

clusion of its investigation. Such investigation, shall be concluded not later than forty-five days after receipt of notice of the error. During the pendency of the investigation, the consumer shall have full use of the funds provisionally credited. Such provisional credit shall be made within ten business days after receiving such notice if the error involves a transaction between only the institution and the account holder, and within twenty business days if the error involves a transaction including a third party, such as a seller of goods.

"(f) If, as a result of an error on the part of the institution, any electronic fund transfers or payment of checks or other instruments or orders are refused, the institution shall notify each payee that such was the case, and shall pay or reimburse any charges incurred by the account holder as a result of such error or nonpayment.

"(g) If the financial institution asserts, after its investigation pursuant to this section, that an error did not occur, it shall deliver or mail to the account holder an explanation of its findings within three business days after the conclusion of its investigation, and upon request of the holder, deliver or mail to the holder reproductions of relevant documents which the financial institution relied on to conclude that such error did not occur.

"(h) If in any action under section 917 the court finds that a financial institution willfully asserted that a consumer account was not in error, knowing that the evidence available to the institution at the time of its investigation with respect to such error was clear and convincing, and that the only conclusion that could reasonably be drawn from such evidence was that the account was in error, then the holder shall be entitled to treble damages determined under section 917(a)(1).

"§ 909. Liability for unauthorized transfers

"(a) An institution is not liable to an account holder for a loss to the account if—

"(1) the loss is by means of an electronic fund transfer that is the result of fraud in which the account holder has participated,

"(2) an account holder provides the means of access to such holder's account to a third party, or writes or otherwise discloses the identifying access code or number on the card or other means of access, and the loss to the account results from an electronic fund transfer initiated, directly or indirectly, by the third party before the account holder notifies the institution that such third party no longer is to have access to the account and authorizes the institution to take the necessary steps to eliminate the access, or

"(3) an account holder has failed to notify the institution within a reasonable time after the account holder knows of the loss or theft of a card or other means of access: *Provided, however,* That unless paragraph (1) or (2) applies, the institution shall be liable to the account holder for loss in excess of $50 that could not have been avoided had the account holder made timely report of the loss or theft.

"(b) Except as provided by subsection (a), an institution shall be liable to an account holder for any losses to such holder's account resulting from an unauthorized electronic fund transfer of funds from the account if—

"(1) the means of access for such transfer was not a card or other means of access issued in accordance with section 904 and 915 and accepted by the account holder;

"(2) such transfer of funds occurs after the institution has been notified of the loss or theft of a card or other means of access;

"(3) the institution has not provided a method whereby the user of the card or other means of access can be identified as the person who is authorized to access the account by electronic fund transfer;

"(4) the institution has not furnished the account holder with written notice of the account holder's potential liability for losses in a form which sets forth the pertinent conditions clearly and in readily understandable language so that the account holder could reasonably be expected to have noticed it and understood its meaning; or

"(5) the institution has not furnished the account holder with a telephone number of the institution which any authorized user of the card or other means of access may use to notify such institution in the event of loss or theft of the card or other means of access.

"(c) Except as provided in subsection (a), providing for no liability on the part of the institution, and subsection (b), providing for full liability on the part of an institution, an institution is liable for all losses to the holder of a consumer account in excess of $50 resulting from unauthorized electronic fund transfers with respect to that account.

"(d) For the purpose of subsections (a) (2) and (b)(2), an institution is notified if an account holder or person acting on behalf of such holder takes such steps as may be reasonably required in the ordinary course of business to provide such institution with the pertinent information, whether or not any particular officer, employee, or agent of such institution does, in fact, receive such information.

"(e) In any action to enforce liability on the part of an institution for lesses to any consumer account resulting from an electronic fund transfer, the burden of proof shall be upon the institution to show that such transfer of funds was authorized or, if the transfer of funds was unauthorized, then the burden of proof shall be upon the institution to show that a condition set forth in subsection (a) applies, or that a condition set forth in subsection (b) does not apply.

"(f) Nothing in this section imposes liability upon an account holder for losses resulting from an unauthorized electronic fund transfer in excess of the holder's liability for losses under other applicable law or under any agreement with the institution.

"(g) The liability of an account holder for any unauthorized transfer from such holder's account where an extension of credit is or may be involved shall be determined in accordance with section 133 of the Truth in Lending Act.

"§ 910. Liability for system malfunction

"(a) Subject to the limitations in subsection (b), a financial institution shall be liable to an account holder or any person claiming under such holder for all damages proximately caused by—

"(1) the financial institution's failure to make an electronic fund transfer, in accordance with the terms, and conditions of an account, in the correct amout or in a timely manner when properly instructed to do so, except—

"(A) where the account has insufficient funds legally available for use;

"(B) where such transfer would exceed an established credit limit; or

"(C) where the transfer was initiated at an electronic terminal which, in connection with that transfer, was functioning solely as a machine dispensing cash.

"(2) the financial institution's failure to make, in accordance with the terms and conditions of an account, an electronic fund transfer due to insufficient funds when the financial institution failed to credit a deposit of funds to the account which would have provided sufficient funds to make the transfer; or

"(3) the financial institution's failure to stop payment on a preauthorized transfer from an account when instructed to do so in accordance with the terms and conditions of the account.

"(b) A financial institution shall not be liable under subsection (a) (1) or (2) if the financial institution shows by a preponderance of the evidence that its action or failure to act resulted from a technical malfunction—

"(1) caused by circumstances beyond its control, that it exercised reasonable care to prevent such an occurrence, and that it exercised such diligence as the circumstances required; or

"(2) of which the claimant knew or had reason to know at the time such claimant attempted to initiate an electronic fund transfer or, in the case of a preauthorized transfer, at the time such transfer should have occurred.

"(c) In the event a system malfunction prevents the execution of an electronic fund transfer initiated by an individual to another person, and such other person has agreed to accept payment by such means, the individual's obligation to the other person shall be suspended until the malfunction is corrected and the electronic fund transfer may be completed, unless such other person has subsequently demanded by written request payment by means other than an electronic fund transfer.

"§ False or misleading advertising

"No institution or seller may disseminate, or cause to be disseminated, any false or misleading advertisement which may induce any individual to engage in an electronic fund transfer.

"§ 912. Compulsory use prohibited

"No person may—

"(1) condition the extension of consumer credit to an individual on such individual's repayment by means of preauthorized electronic fund transfers;

"(2) require an individual to establish any account for receipt of electronic fund transfers as a condition of employment or receipt of a Government benefit; or

"(3) require an individual to make payment for goods or services by electronic fund transfers.

"§ 913. Waiver prohibited

"No writing or other agreement between an individual and any other person may contain any provision which constitutes a waiver of any right conferred or cause of action created (except as a compromise or settlement of a dispute between the parties) by this title. Nothing in this section prohibits, however, any writing or other agreement which grants to an individual a more extensive right or greater protection than contained in this title.

§ 914. Confidentiality

"An institution may not disclose information regarding any electronic fund transfer with respect to a consumer account except:

"(1) to the account holder;

"(2) to any other person who is a party to the transfer or is necessary to effectuate the transfer, but only to the extent that the information disclosed is necessary to effectuate or correct the transfer;

"(3) to communicate the terms and history of a credit transaction as defined in section 103(e) of the Truth in Lending Act involving the account holder to a consumer reporting agency as defined in section 603 (f) of the Consumer Credit Protection Act or to any other person meeting the requirements of section 604(3) of the Consumer Credit Protection Act;

"(4) to a person authorized by law to have access to the records of the financial institution in the course of such person's official duties;

"(5) pursuant to a court order; or

"(6) pursuant to the express written authorization of the account holder for a particular purpose.

"§ 915. Issuance of cards or other means of access

"(a) No person may issue to an individual any card or other means of access to such individual's consumer account, without further action by such individual in accordance with subsection (b), which may be used for the purposes of initiating an electronic fund transfer, unless such issuance is—

"(1) in response to a request or application therefor; or

"(2) as a renewal of, or in substitution for, an accepted card, code, or other means of access, whether issued by the initial issuer or a successor.

"(b) A financial institution may distribute to an individual on an unsolicited basis a card, code, or other means of access for use in initiating an electronic fund transfer from such individual's consumer account, if—

"(1) such card, code, or other means of access is not validated;

"(2) such distribution is accompanied by a complete disclosure, in accordance with section 904, of the individual's rights, duties, and liabilities which apply if such card, code, or other means of access is validated;

"(3) such distribution is accompanied by a clear explanation, in accordance with regulations of the Board, that such card, code, or other means of access is not validated and how the individual may dispose of same if validation is not desired; and

"(4) such card, code, or other means of access is validated only in response to a request or application from the individual, either in writing or by personal visit of the individual to the institution.

"(c) For the purpose of subsection (b), a card, code, or other means of access is validated when it may be used to initiate an electronic fund transfer.

"§ 916. Discriminatory pricing prohibited

"No seller may charge more for any consumer goods, property, or services if payment is made by check than the seller would charge if payment were made through an electronic fund transfer transaction.

"§ 917. Civil liability

"(a) Except as otherwise provided in this section, any person who fails to comply with any provision of this title with respect to any individual is liable to such individual in an amount equal to the sum of—

"(1) any actual damage sustained by such individual as a result of such failure;

"(2)(A) in the case of an individual action, under this subparagraph, an amount not less than $100 nor greater than $1,000; or

"(B) in the case of a class action, such amount as the court may allow, except that (i) as to each member of the class no minimum recovery shall be applicable, and (ii) the total recovery under this subparagraph in such action shall not be more than the lesser of $500,000 or 1 per centum of the net worth of the person; and

"(3) in the case of any successful action to enforce the foregoing liability, the costs of the action, together with a reasonable attorney's fee as determined by the court.

"(b) In determining the amount of award in any class action under subsection (a)(2)(B), the court shall consider, among other relevant factors, the amount of any actual damages awarded, the frequency and persistence of failures of compliance by the person, its resources, the number of individuals adversely affected, and the extent to which its failure of compliance was intentional.

"(c) Except with respect to sections 909 and 910, a person may not be held liable in any action brought under this section for by a preponderance of evidence that the violation was not intentional and resulted from a violation of this title if the person shows a bona fide error notwithstanding the maintenance of procedures reasonably adapted to avoid any such error.

"(d) No action under this section may be brought in any United States district court or in any other court of competent jurisdiction later than one year after the date of the occurrence of the violation.

"(e) Any action under this section may be brought in any United States district court without regard to the amount in controversy or in any other court of competent jurisdiction.

"(f) Any person who fails to comply with any requirement imposed under section 911 with respect to any individual who suffers actual damages from the violation is liable to such individual as provided in this section.

"(g) No provision of this section or section 918 imposing any liability shall apply to any act done or omitted in good faith in conformity with any regulation or official interpretation by the Board, or any failure to make disclosure in proper form if a financial institution utilized an appropriate model form or clause issued by the Board, notwithstanding that after such act or omission has occurred, such regulation or interpretation is amended, rescinded, or determined by judicial or other competent authority to be invalid for any reason.

"§918. Criminal liability

"Whoever willfully and knowingly and with intent to defraud—

"(1) gives false or inaccurate information or fails to provide information which is required to be disclosed by this title; or

"(2) otherwise fails to comply with any provision of this title;

shall be fined not more than $5,000 or imprisoned not more than one year, or both.

"§919. Administrative enforcement

"(a) Compliance with the requirements imposed under this title shall be enforced under:

"(1) Section 8 of the Federal Deposit Insurance Act, in the case of—

"(A) national banks, by the Comptroller of the Currency,

"(B) member banks of the Federal Reserve System (other than national banks), by the Board, and

"(C) banks insured by the Federal Deposit Insurance Corporation (other than members of the Federal Reserve System), by the Board of Directors of the Federal Deposit Insurance Corporation.

"(2) Section 5(d) of the Home Owners' Loan Act of 1933, section 407 of the National Housing Act, and sections 6(i) and 17 of the Federal Home Loan Bank Act, by the Federal Home Loan Bank Board (acting directly or through the Federal Savings and Loan Insurance Corporation) in the case of any institution subject to any of those provisions.

"(3) The Federal Credit Union Act, by the Administrator of the National Credit Union Administration with respect to any credit union insured under such Act.

"(b) For the purpose of the exercise by any agency referred to in subsection (a) of its powers under any Act referred to in that subsection, a violation of any requirement imposed under this title shall be deemed to be a violation of a requirement imposed under that Act. In addition to its powers under any provision of law specifically referred to in subsection (a), each of the agencies referred to in that subsection may exercise, for the purpose of enforcing compliance with any requirement imposed under this title, any other authority conferred on it by law.

"(c) Except to the extent that enforcement of the requirements imposed under this title is specifically committed to some Government agency under subsection (a), the Federal Trade Commission shall enforce such requirements. For the purpose of the exercise by the Federal Trade Commission of its functions and powers under the Federal Trade Commission Act, a violation of any requirement imposed under this title shall be deemed an unfair or deceptive act or practice in or affecting commerce under that Act. All of the functions and powers of the Federal Trade Commission under the Federal Trade Commission Act are available to the Commission to enforce compliance by any person with the requirements imposed under this title, irrespective of whether that person is engaged in commerce or meets any other jurisdictional tests in the Federal Trade Commission Act.

"§ 920. Relation to State laws

"This title does not annul, after, or affect, or exempt any person subject to the provisions of this title from complying with the laws of any State with respect to electronic fund transfers, except to the extent that those laws are inconsistent with any provision of this title, and then only to the extent of the inconsistency.

"§ 921. Exemption for State regulation

"The Board shall, by regulation, exempt from the requirements of this title any class of practices involving electronic fund transfers within any State if the Board determines that under the law of that State that class of practices is subject to requirements substantially similar to those imposed by this title, and that there is adequate provision for enforcement.

"§ 922. Reports to Congress by the Board and Attorney General

"Not later than twelve calendar months after the effective date of this title and at one-year intervals thereafter, the Board and the Attorney General shall, respectively, make reports to the Congress concerning the administration of their functions under this title, including such recommendations as the Board and the Attorney General, respectively, deem necessary or appropriate. In addition, each report of the Board shall include its assessment of the extent to which compliance with this title is being achieved, and a summary of the enforcement actions taken by the Board under section 919.

"§ 923. Regulations

"The Board shall prescribe such regulations as may be necessary or appropriate to carry out the provisions of this title.

"§ 924. Effective date

"(a) Except as provided in subsection (b), this title shall take effect upon the expiration of one year after the date of enactment.

"(b) Subsections 909 and 915 of this title shall take effect upon enactment.".

Mr. ANNUNZIO (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Are there amendments to the bill?

AMENDMENT OFFERED BY MR. WYLIE

Mr. WYLIE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WYLIE: Page 11, strike lines 8 through 20 and insert:

"(c) For a consumer account which is scheduled to be debited or credited by a preauthorized electronic fund transfer, the account holder shall promptly be given, directly or indirectly, by the institution, confirmation of the transfer—

(1) by positive notice when the debit or credit is made as scheduled, or

(2) by negative notice when the debit or credit is not made as scheduled, or

(3) with respect to any preauthorized debit, the institution may also elect to provide confirmation of the transfer on the next monthly statement furnished to the account holder, by indicating on such statement either that the debit was completed as authorized or that the debit was not completed as authorized.

The notice given by the institution shall be in accordance with regulations of the Board.

Mr. ANNUNZIO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment may be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. WYLIE. Mr. Chairman, I have discussed this amendment with the chairman of the subcommittee, but I would like to make just a brief explanation for the record as to what it does. It is an amendment which I think will avoid unnecessary paperwork, which is in the spirit of the EFT bill as a whole. It provides for the notice of a preauthorized debit or credit in an EFT operation. It is in keeping with the recommendation of the Electronic Fund Transfer Commission which the gentleman from New Jersey (Mr. MAGUIRE) mentioned a short while ago. It will result in a saving of paperwork. Thereafter it provides for notice when the first preauthorized debit or credit is initiated. It provides for regular notice each periodic billing furnished thereafter unless there is a change, and if there is a change, then there must be notification that something has gone awry with the debt or credit.

I think the gentleman from Illinois (Mr. ANNUNZIO), the chairman of the subcommittee, is willing to accept the amendment.

Mr. ANNUNZIO. If the gentleman will yield, I appreciate my colleague, the gentleman from Ohio (Mr. WYLIE), offering the amendment. I have examined the amendment carefuly. It adds to the quality of the bill, and I accept it on this side.

Mr. WYLIE. I thank the chairman for accepting the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. WYLIE).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROUSSELOT

Mr. ROUSSELOT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROUSSELOT: Page 27, strike out lines 16 through 19 and insert in lieu thereof the following:

§ 916. Non-surcharge provision

"(a) No seller may impose a surcharge on any individual who elects to pay for consumer goods, property, or services by cash, check, or similar means rather than by an electronic fund transfer; but any seller may offer a discount to induce any individual to pay for consumer goods, property, or services by means of an electronic fund transfer, check or cash.

"(b) The Board shall prescribe regulations to require that any discount described in subsection (a) and offered by a seller shall be offered to all prospective buyers and its availability shall be disclosed clearly and conspicuously to all prospective buyers.

"(c) For purposes of this section—

"(1) the term 'discount' means a reduction made from the regular price and does not mean a surcharge; and

"(2) the term 'surcharge' means any means of increasing the regular price to an individual which is not imposed upon individuals paying by means of an electronic fund transfer.

Mr. ANNUNZIO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. The question from California (Mr. ROUSSELOT) is recognized in support of his amendment.

Mr. ROUSSELOT. Mr. Chairman, I will not take the 5 minutes. First of all, I want to take this time to thank the chairman of the subcommittee who has been very diligent, as already previously mentioned, in trying to write fair and equitable legislation in the area of electronic funds transfers. The gentleman from Ohio (Mr. WYLIE) who has worked long and hard to make sure that this is a workable piece of legislation. Both the chairman and the ranking member have made a real effort, as many of us have on the committee, to try to make sure that this will be workable for those who have to use it, that it will not just impose undue paperwork on the financial institution operations.

I want to briefly say that I think this amendment to H.R. 13007 is necessary to give better terminology to what we are trying to accomplish.

Mr. Chairman, there is a discrepancy between what the bill says and what the Banking Committee report states with respect to section 916 of H.R. 13007. I am offering an amendment to rectify that discrepancy to make it absolutely certain that financial institutions and retailers can pass on to consumers the savings to be derived from EFT use.

But first I would like to reiterate some of the remarks I made in the committee's report on this bill. The title of section 916, "Discriminatory Pricing," is misleading and its presence in the bill is misleading. Furthermore, I note that there is no such provision in the Senate version of the bill. Therefore, my amendment changes the title of the section to "Non-surcharge Provision."

We want to insure that EFT grows in a free market environment. If it is cheaper to transact business through EFT we should insure that merchants and financial institutions have the opportunity to pass these savings on to the customer. Moreover, merchants should have the option of offering a discount to encourage EFT use as a marketing tool, regardless of cost.

I want to make it clear that I continue to believe that section 916 is completely unnecessary. The Federal Government should not be in the business of determining the pricing of payment services at all. The Senate bill does not contain this provision, and I hope that the final bill will not contain it either. Nevertheless, as an accommodation to the author of the bill I offer this amendment to clarify its purpose and soften its impact.

Mr. ANNUNZIO. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Illinois.

Mr. ANNUNZIO. I appreciate the gentleman from California's yielding. I appreciate the contribution that he has made to this legislation. I have examined his amendment and discussed this with the minority. It does clarify the language in the bill. I am ready to accept the amendment on this side.

Mr. ROUSSELOT. I thank the gentleman.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to my distinguished colleague from Ohio.

Mr. WYLIE. I, too, have examined the amendment. I think it is clarifying and in the spirit of the legislation as a whole.

Mr. Chairman, I appreciate the gentleman's willingness to be helpful on the bill and for the gentleman's contribution to making it better legislation.

Mr. Chairman, I accept the amendment.

Mr. ROUSSELOT. Mr. Chairman, I thank the gentleman.

Mr. Chairman, I know when I am ahead.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ROUSSELOT).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. VENTO

Mr. VENTO. Mr. Chairman, I offer two amendments.

The Clerk read as follows:

Amendments offered by Mr. VENTO: Page 11, line 7, immediately after "transaction," insert the following:

If such holder elects to proceed with the transaction, the holder shall be notified at the time and place of the transaction that if the holder indicates he or she wants a confirmation of the transaction, the institution shall directly or indirectly furnish the holder with confirmation by positive notice within five days of the time of the transaction.

Page 17, line 16, immediately before "If" insert: (1).

Page 18, immediately after line 5 insert the following:

(2) If an institution elects to provisionally credit a consumer account as provided for in paragraph (1), the institution shall furnish the account holder prior to the credit of funds the following written notice:

NOTICE

Federal law permits this institution to delay completion of its investigation of your alleged error for forty-five days after your error notice if the institution provisionally

credits your consumer account for the amount alleged to be in error, including interest where applicable. During the investigation you shall have full use of the funds provisionally credited. However, if upon the conclusion of the investigation the institution determines that no error occurred, the institution may require you to pay the provisionally credited funds back, with interest. Consequently, you should keep any documentation relating to the alleged error, since you may disagree with a conclusion by the institution that the alleged error did not occur.

Mr. VENTO (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read, printed in the RECORD, and that they be consider en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. VENTO. Mr. Chairman, these are two very simple amendments. They provide, first of all, in the case of a nonfunctioning automated machine that there will be directly or indirectly sent a receipt. When the machine is not issuing a receipt, it would be sent soon after.

The second amendment provides where there is a situation where an institution provides an error resolution method that they can provisionally credit the account. This would provide notice to the consumer that it had been credited provisionally, that he still may be called upon to document the error. It does not shift the burden of proof in terms of error resolution.

Mr. Chairman, I think it is a good addition to the bill in terms of what we intend on this issue.

Mr. ANNUNZIO. Mr. Chairman, will the gentleman yield?

Mr. VENTO. I yield to the gentleman from Illinois.

Mr. ANNUNZIO. Mr. Chairman, I have had an opportunity to examine the amendments and I am ready to accept them on this side as further help in clarifying the legislation.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. VENTO. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I have been able to examine the amendments just a few minutes ago; but based on what the gentleman from Illinois and the gentleman from Minnesota have said about them, at first blush they seem all right. I would want to reserve the opportunity to examine them in greater detail later on if we do go to conference on the bill; but at the moment, I accept the amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Minnesota.

The amendments were agreed to.

AMENDMENTS OFFERED BY MR. BARNARD

Mr. BARNARD. Mr. Chairman, I offer a block of amendments.

The Clerk read as follows:

AMENDMENT OFFERED BY MR. BARNARD

Page 6, line 2 strike the word "transfers" and insert in lieu thereof the terms "transfer machines."

Mr. CHAIRMAN. This is a technical amendment intended to clarify the reference made to examples of electronic fund transfer hardware. Subsection (g) of section 903 defines the types of computer hardware which may be employed by an individual to initiate an electronic fund transfer. In this context, it is inappropriate to include the term "point-of-sale transfers"—a transfer being a type of transaction. What the definition of electronic terminal was intended to encompass were such point-of-sale transactions accomplished by machines. The amendment serves to accomplish that goal.

AMENDMENT OFFERED BY MR. BARNARD

Page 7, line 12 is amended by inserting the following phrase after the term "transfers": "in accordance with subsection (b) and (c)".

Mr. CHAIRMAN. This is a mere technical amendment designed to clarify the timing of the required disclosures in subsection (a) by cross-referencing the two subsections immediately following. Subsections (b) and (c) jointly set forth the rules regarding disclosures for consumer accounts presently assessed by electronic fund systems and, in the future, to be subject to electronic fund transfers. By incorporating subsections (b) and (c) into subsection (a), an institution will be more clearly cognizant of its disclosure obligations.

AMENDMENT OFFERED BY MR. BARNARD

Page 8, line 11, immediately before the word "For", insert the following: "Except for infrequent special transfers performed as a special service,".

Mr. CHAIRMAN. All members are aware of emergency financial services financial institutions provide to their customers. A financial institution may agree to transfer funds under circumstances which could technically be considered an electronic fund transfer subject to the disclosure requirements of this act. For example, suppose an institution receives a telephone call from an account holder whose car has broken down while on an out-of-State trip. The account holder requests a transfer of funds from his savings account to his checking account in order to issue a check for the repairs. The institution is doing the consumer a favor. It is a type of service that institutions have been performing for generations, not a new service needing new consumer protections. The institution should not now be required to give the lengthy disclosures set forth in the act; and as a practical matter, it may not have a readily accessible record to indicate those for whom such favors were performed. Furthermore, to mandate section 904 disclosure in the case of infrequent special transfers is apt to prompt an institution to reassess carefully whether it is prudent to continue its practice of granting such a favor to a non-EFT customer, in light of the new attendant costs of such a favor. The amendment proposed to section 904(b) precludes such a harsh result.

AMENDMENT OFFERED BY MR. BARNARD

Page 8, lines 21 through 23, strike the following phrase, "and prior to initiation of the first electronic fund transfer to such consumer account" and insert in lieu thereof: "or at the time the institution first has knowledge than an electronic funds transfer will be or has been initiated to such consumer account, whichever event occurs earlier.".

Mr. CHAIRMAN. In many situations involving EFT transfers, the institution will not be able to make the required disclosure prior to the first transfer since the customer might have contracted to allow the transfer without the institution's knowledge. One example of such a situation which readily comes to mind is the agreement between an employer and an employee automatically to credit the employee's account with his or her salary each payday.

Under section 904(c) as presently drafted, the only choice an institution without specific knowledge of such an agreement may have is to reject the deposit or be found liable for a violation of the law—a harsh result for the customer who will unexpectedly lose access to funds while the redtape is being cleared up. In such an instance, the earliest an institution should be expected to make the required disclosures is when it has knowledge that the consumer will be using its electronic fund transfer services. The amendment merely incorporates this logic.

AMENDMENT OFFERED BY MR. BARNARD

Page 12, strike subsection (e).

Mr. CHAIRMAN. Subsection (e) would have required a financial institution to notify the consumer the first time a credit account was assessed during a billing cycle in order to complete a transaction. Such a provision essentially would have transformed a credit card into an electronic fund transfer card.

Simply because a consumer chose to pay off the balance of his or her credit account each month rather than choose to allow an amount to remain outstanding on the next month's bill, the provision would have imposed on the credit granting institution an additional notice obligation. It would have altered the entire credit card industry by imposing a totally new and unnecessary requirement based on an arbitrary standard.

Finally, it should be pointed out that whenever credit funds are used, the disclosure requirements of the Truth in Lending Act and the Fair Credit Billing Act cover the transaction.

AMENDMENT OFFERED BY MR. BARNARD

Section 907(b) is amended to read as follows:

"(b)(1) An account holder may by written order to a financial institution stop payment of a preauthorized electronic fund transfer from the holder's account, but the order must be received at such time and in such a manner as to afford the financial institution a reasonable opportunity to act on it prior to any action by the financial institution with respect to the preauthorized electronic fund transfer.

"(2) An oral order is binding upon the financial institution if received within a reasonable itme, but only for 14 calendar days unless confirmed in writing within that period. A written order is effective for only six months unless renewed in writing."

Mr. CHAIRMAN. Electronic fund transfer is simply one form of a broader category of payments regulated by a well established body of uniform national principles contained in the Uniform

Commercial Code (UCC). The issue of how a consumer is to stop payment on an electronic fund transfer transaction should not be treated any differently than § 4–403 of the UCC would treat a stop payment on a check. It is in furtherance of this effort to treat similar transactions similarly that the amendment to section 907(b) is modeled on § 4–403 of the Uniform Commercial Code.

Subsection (b) of section 907 as found in the reported bill would have imposed on institutions an unworkable standard to the extent it may have been interpreted to require acceptance by the institution of all stop payment orders mailed to it up until the very moment of transfer. Such a standard would seemingly have been in disregard of modern day business practice and needs and might have impeded the healthy development of electronic fund transfer. Under that provision even an institution doing its best to remain accountable to its account holders might nonetheless have been held responsible for a stop order mailed, for example, on a day prior to the intended transfer although actually received after the transfer had occurred.

As a practical matter, an institution needs some "lead time" in order to process a stop order. The number of days required may, from institution to institution, vary depending on the internal procedures of each. While 1 day could be sufficient time for an institution to note and effectuate the changed directive, it might take another institution 3 days or perhaps longer because of a far-flung branching system. Thus, it would not be for the consumer's benefit to impose a definite number of days which reflects the accounting procedures of all institutions. Rather, § 4–403 of the Uniform Commercial Code supplies the ideal solution both for the consumer and the institution in its imposition of a "reasonable opportunity test." Indeed, such a standard based upon § 4–403 of the Uniform Commercial Code has the additional advantage of bringing with it more than a decade of accumulated judicial pronouncements in 49 States clarifying the respective duties of consumer and institution alike.

AMENDMENT OFFERED BY MR. BARNARD

Page 22, line 2, strike out "unauthorized".

Explanation: clarifies so that best provision will prevail as was intended.

Page 22, line 9 is amended by inserting the following phrase before the terms "in accordance": "as to the amount of any credit extended".

Explanation: This amendment would clarify the committee's intent that when credit funds are used, consumer liability will be governed by the terms of § 133 of the Truth in Lending Act. The section as now drafted implies that the Truth in Lending Act would govern consumer liability when both credit funds and DDA or savings accounts funds are involved in the same transaction. For example, if a transaction involved a $100 debit to an account, but the consumer had only $50 in his DDA, then credit funds might be used to complete the transaction. This amendment assures that credit funds are covered by Truth in Lending and DDA funds would be covered by the act.

AMENDMENT OFFERED BY MR. BARNARD

Page 28. Section 917(a)(2)(B)(ii) is amended to read as follows:

"(ii) the total recovery under this subparagraph in any class action or series of actions arising out of the same failure to comply by the same person shall not be more than the lesser of $500,000 or 1 per centum of the net worth of the defendant; and".

Page 29, line 21, add the following clause after the term "Board": "or in conformity with any interpretation or approval by an official or employee of the Federal Reserve System duly authorized by the Board to issue such interpretation or approval under such procedures as the Board may prescribe therefore.".

Page 30, immediately after line 3, insert the following:

"(h) Except with respect to section 909 and 910, an institution may not be held liable in any action brought under this section for failure to comply with any requirement of this title, if within 30 days after discovering the failure whether through the institution's own procedures, and prior to the initiation of an action under this section or the receipt of written notice of the failure from the account holder, the institution notifies the account holder of the failure in writing and complies with the requirements of this title, and makes an appropriate adjustment to the account holder's account and pays the account holder any actual damages."

Page 29, line 6, add the following sentence: "Examples of bona fide error include clerical, calculation, computer malfunction and programming and printing errors, but an error of legal judgment with respect to a person's obligations under this title is not a bona fide error."

Mr. CHAIRMAN. All but the last of these amendments are based on analogous provisions in section 915 of the Senate's Fair Fund Transfer Act, S. 3156. The primary reason for these amendments is to assure that financial institutions which are making a good faith effort to comply with the act are not subject to unwarranted civil litigation.

Class Action Recovery—§ 917(a)(2)(B)(ii)

Although the intent behind this section is to subject an institution to a maximum $500,000 recovery per violation, such intent may be circumvented if the same institution is made the defendant in more than one class action involving the same course of conduct. As section 917(a)(2)(B)(ii) is presently worded it permits the "maximum" recovery in each such class action.

The amendment eliminates the ambiguity as to an institution's maximum liability in multiple class actions. Where several class actions are instituted against an institution as a result of the same violation, the amendment makes clear that the institution's maximum aggregate liability could not exceed $500,000 or 1 percent of net worth, whichever is less.

Federal Reserve System Interpretation or Approvals

The Electronic Fund Transfer Act is a highly complex, often purposely ambiguous statute which attempts to embody a technology yet in its infancy. One cannot realistically expect to foresee how it may impact even on varied and intricate electronic fund transfer services presently being offered; and the future is, of course, far more difficult to predict.

This second amendment to section 917 provides an additional defense which would relieve a financial institution of any civil liability. It is an amendment which recognizes that an institution making an effort to comply with the act's provisions by seeking and in good faith relying on Federal Reserve System approval of its actions or an interpretation of a vague provision of the act, should be afforded complete protection from suit. An institution should have a clear reference source to enable it to know what it must do to comply with the act and how to avoid its onerous penalties. The amendment provides this important source and safe harbor.

Voluntary Cures

The rationale behind the addition in the Electronic Fund Transfer Act of this system borrowed from Truth in Lending is that an institution should not be liable for violations of the act which it voluntarily attempts to cure promptly (within 30 days after discovery) and on its own initiative. Its purpose is to encourage and assure compliance and to discourage suits. The provision will stimulate corrective action as to problems uncovered through internal monitoring and compliance control, much to the benefit of the consuming public. Without such a provision, an institution would have little incentive to make public and correct a problem before it was raised by the consumer.

Bona Fide Errors

This last amendment of section 917 sets forth a partial list of the types of transactions which do and do not constitute a bona fide error. It is an important addition both to the institution, enabling it to understand the sort of circumstances under which it remains subject to liability, and to the consumer, in knowing when he or she has an actionable complaint against the institution.

AMENDMENT OFFERED BY MR. BARNARD

Section 923 is amended to read as follows:

"The Board shall prescribe regulations to carry out the purposes of this title. These regulations may contain such classifications, differentiations, or other provisions, and may provide for such adjustments for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of this title, to prevent circumvention or evasion thereof, or to facilitate compliance therewith. In prescribing such regulations, the Board shall take into account, the continuing evolution of the technology in electronic fund transfers."

Mr. CHAIRMAN. This amendment provides the Federal Reserve Board with several important guidelines which are to be utilized by the Board in formulating regulations pursuant to this act. Congress has on two prior occasions with major consumer legislation—the Truth in Lending Act and the Equal Credit Opportunity Act—given virtually identical authority to the Board. In keeping

with the broad powers given the Board under those acts, this provision authorizes the Board to prescribe regulations containing classifications, differentiations or other provisions which the Board deems necessary. Moreover, such regulations should not only attempt to effectuate the purpose of the act, prevent circumvention or evasion and facilitate compliance, but just as importantly, should strive to provide whatever flexibility is needed in order to foster the continuing evolution of electronic fund transfer technology.

Mr. BARNARD (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read, printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BARNARD. Mr. Chairman, the amendments in this series are purely technical amendments which we have reviewed in very careful detail with the majority as well as the minority. They are very much needed, and I think they will improve the bill.

Mr. ANNUNZIO. Mr. Chairman, will the distinguished gentleman from Georgia yield?

Mr. BARNARD. I yield to the gentleman from Illinois.

Mr. ANNUNZIO. Mr. Chairman, I want to express my appreciation to the gentleman from Georgia for his contribution to this legislation. I have examined the amendments which are technical in nature. They further help to clarify the bill and I am ready to accept them on this side.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. BARNARD. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, these amendments have been discussed by the gentleman from Georgia (Mr. BARNARD), the gentleman from Illinois (Mr. ANNUNZIO) and I, and worked out. I think, again, they are clarifying. They clear up some ambiguities which might otherwise arise.

Mr. Chairman, I am happy to accept the amendments.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. BARNARD. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I have looked at these amendments. I appreciate the gentleman from Georgia discussing them with us. They permit us to clarify some points of concern.

One point I am concerned about is this: I know the gentleman's intent is good in terms of section 904(b). I understand these people, with infrequent special transfers, are performing a special service which would exempt that type of transfers from the disclosure provisions of this bill.

I think it should be understood clearly that these are special and unusual transfers. If we are dealing with consumers, it may be the case in these instances, specifically where someone is not familiar with dealing with electronic funds transfer technology, they may have the most difficulty.

But the references I have heard and the examples the gentleman has given me have satisfied me generally, although it is a concern I have.

Mr. Chairman, I thank the gentleman for yielding.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. BARNARD. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, as I understand it, the reference in these amendments is to section 904(b) of the bill?

Mr. BARNARD. The gentlewoman is correct.

Mrs. FENWICK. That paragraph reads as follows:

> For any consumer account to or from which electronic fund transfers are being made and have been made by use of a card or other means of access prior to the date specified in section 924(a) the disclosures required under subsection (a) shall be made not later than . . .

How is the gentleman changing that section?

Mr. BARNARD. Mr. Chairman, what we are doing is making an exception to these infrequent transfers and transfers for a special purpose. As an example, what we are talking about is this: If one had a wire transfer which came about once a year or twice a year, it would not come under the province of this bill.

This is more for the convenience of the customer than it is to make an obligation on the part of the institution.

We have gone over this, and we think this law really applies more to transfers that would be of a regular nature. This would exempt those other types of transfers.

Mrs. FENWICK. How would the extraordinary ones be handled?

Mr. BARNARD. They would, of course, have to be specially authorized by the consumer or by the customer.

Mrs. FENWICK. I see. Mr. Chairman, I thank the gentleman.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. BARNARD. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, these amendments to which the gentlewoman from New Jersey just referred basically eliminate some unnecessary paperwork that could occur?

Mr. BARNARD. The gentleman is correct.

Mr. ROUSSELOT. Mr. Chairman, I compliment the gentleman from Georgia (Mr. BARNARD) for offering these amendments, and I compliment the chairman and the ranking minority member of the committee for accepting them, because they definitely improve the bill.

Mr. BARNARD. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Georgia (Mr. BARNARD).

The amendments were agreed to.

The CHAIRMAN. Are there further amendments to the bill?

If not, under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. PRICE) having assumed the chair, Mr. PANETTA, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee, having had under consideration the bill (H.R. 13007) to amend the Consumer Credit Protection Act to establish rights, remedies, and responsibilities for all participants in the utilization of electronic fund transfer services, pursuant to House Resolution 1278, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 314, nays 2, answered "present" 2, not voting 114 as follows:

Mr. Wampler with Mr. Shuster.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the bill H.R. 13007, just passed by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR ORDERLY SHIPMENT OF OFFICIAL RECORDS AND PAPERS OF MEMBERS OF THE HOUSE OF REPRESENTATIVES

Mr. ANNUNZIO, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–1477), on the resolution (H. Res. 1297) to provide for the orderly shipment of official records and papers of Members of the House of Representatives, which was referred to the House Calendar and ordered to be printed.

CONFERENCE REPORT ON S. 3040, AMTRAK IMPROVEMENT ACT OF 1978

Mr. STAGGERS submitted the following conference report and statement on the Senate bill (S. 3040) to amend the Rail Passenger Service Act to extend the authorization of appropriations for an additional fiscal year, to provide for public consideration and implementation of a rail passenger service study, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95–1478)

The commitee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3040) to amend the Rail Passenger Service Act to extend the authorization of appropriations for an additional fiscal year, to provide for public consideration and implementation of a rail passenger service study, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Amtrak Improvement Act of 1978".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. (a) Section 601(a)(1) of the Rail Passenger Service Act (45 U.S.C. 601(a)(1)) is amended—

(1) in clause (1) thereof (A) by striking out "except for" and all that follows through "sentence" and inserting in lieu thereof "including the payment of the additional operating expenses of the Corporation which result from the operation and maintenance of the Northeast Corridor pursuant to title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 851 et seq.)", (B) by striking out "and" immediately after "1977,", and (C) by inserting ", and not to exceed $600,000,000 for the fiscal year ending September 30, 1979" immediately after "1978";

(2) in clause (2) thereof (A) by striking out "and" immediately after "1977,", and (B) by striking out "1978:" and inserting in lieu thereof "1978, and not to exceed $130,000,000 for the fiscal year ending September 30, 1979, which shall include funds for expenditures for compatible equipment under section 703 (5) of the Railroad Revitalization and Regu-

latory Reform Act of 1976 (45 U.S.C. 853(5)); and";

(3) by striking out clause (3) and redesignating clause (4), and all references thereto, as clause (3); and

(4) in clause (3) thereof, as so redesignated, by inserting ", and not to exceed $25,000,000 for the fiscal year ending September 30, 1979" immediately after "1978".

(b)(1) Section 601(a)(2) of such Act (45 U.S.C. 601(a)(2)) is amended by striking out "subsection (a)(4)" and inserting in lieu thereof "subsection (a)(3)".

(2) Section 602(d) of such Act (45 U.S.C. 602(d)) is amended by striking out "clause (4)" and inserting in lieu thereof "clause (3)".

BUDGET ESTIMATES

SEC. 3. Subsection (b) of section 601 of the Rail Passenger Service Act (45 U.S.C. 601(b)) is repealed.

ROUTE REEXAMINATION

SEC. 4. (a) The Secretary of Transportation (hereinafter in this section referred to as the "Secretary"), in cooperation with the National Railroad Passenger Corporation (hereinafter in this section referred to as the "Corporation"), shall immediately develop preliminary recommendations for a route system for the Corporation which will provide an optimal intercity railroad passenger system, based upon current and future market and population requirements, including where appropriate portions of the Corporation's existing route system. In developing such recommendations, the Secretary shall consider—

(1) any unique characteristics and advantages of rail service as compared to other modes of transportation;

(2) the role that rail passenger service can play in helping meet the Nation's transportation needs while furthering national energy conservation efforts;

(3) the relationship of benefits of given intercity rail passenger services to the costs of providing such services, computing the benefits in passenger per train mile and revenues earned and computing the costs in loss or profit per passenger mile rather than total loss or profit per route;

(4) the transportation needs of areas lacking adequate alternative forms of transportation;

(5) frequency and fare structure alternatives and the impact of such alternatives on ridership, revenues, and expenses of rail passenger service; and

(6) the adequacy of other transportation modes serving the same points to be served by the recommended route system.

(b) The Secretary shall, no later than May 1, 1978, develop and publish the preliminary recommendations described in subsection (a) of this section and submit a copy of such recommendations to the Rail Services Planning Office and to both Houses of the Congress. The Secretary shall at that time also provide copies of the preliminary recommendations to the Corporation, the Office of Rail Public Counsel, the Interstate Commerce Commission, the Secretary of Energy, the Governor, department of transportation, and public utilities commission of each State in which rail passenger service is proposed to be modified, the railroads affected by such recommendations, the labor organizations authorized under the Railway Labor Act to represent railroad employees, and the United States Postal Service. In addition, copies of the preliminary recommendations shall be made available by the Secretary to interested persons at a reasonable cost. Such recommendations shall include—

(1) a recommended route system by end points and principal intermediate points to be served;

(2) quality and type of service recommended for each route, including frequency, speed, and classes of services offered;

(3) ranges of projected operating expenses, ridership, and revenues, by route, including a measure calculated by loss or profit per passenger mile and separated for non-State supported routes and State supported routes;

(4) an estimate of the equipment and facilities necessary to support the recommended system;

(5) a recommendation for coordinating passenger rail service at points on the system with other modes of transportation serving such points; and

(6) based upon the route level projections, an estimate of operating and capital appropriations required to operate the system for fiscal years 1980 through 1984.

(c) During the period beginning May 1, 1978, and ending August 31, 1978, the Rail Services Planning Office shall conduct public hearings on the preliminary recommendations developed by the Secretary under this section. Such public hearings shall be held in such places and at such times as the Office determines will afford the affected States and communities the greatest opportunity to participate. The Office of Rail Public Counsel, to the extent practicable, shall provide the services of attorneys and such other personnel as may be required in order to protect the interests of those communities and users of rail passenger service which the Director of the Office of Rail Public Counsel determines, for whatever reason (such as size or location), might not otherwise be adequately represented in the course of the hearings and evaluations which the Rail Services Planning Office is required to conduct. During such period, in addition to holding public hearings, the Rail Services Planning Office shall invite comment on such recommendations from the Corporation, the Interstate Commerce Commission, the Secretary of Energy, the Governor, department of transportation and public utilities commission of each State in which rail passenger service is proposed to be modified, the railroads affected by such recommendations, the labor organizations authorized under the Railway Labor Act to represent railroad employees, interested citizens groups, and the United States Postal Service.

(d) The Rail Services Planning Office shall, no later than September 30, 1978, submit to the Secretary a summary and analysis of the evidence received in the course of its proceedings conducted under subsection (c) of this section, together with its critique and evaluation of the preliminary recommendations of the Secretary. The Secretary shall thoroughly consider the material submitted by the Office with respect to such recommendations and, based on such consideration (and further evaluations of the Secretary), develop final recommendations for a route system for the Corporation as he deems appropriate. In developing such final recommendations, the Secretary shall also consider the impact of such recommendations upon existing tourism markets and the potential for future tourism in areas to be served by the recommended route system. Such final recommendations shall include a summary of the significant recommendations received, together with the reasons for adopting or not adopting any such recommendation.

(e)(1) The Secretary shall, no later than December 31, 1978, submit the final recommendations designating the basic route system, together with supporting and explanatory material, to both Houses of the Congress and to the Committee on Appropriations and the Committee on Interstate and Foreign Commerce of the House of Representatives and the Committee on Appropriations and the Committee on Commerce, Science, and Transportation of the Senate. The final recommendations shall be deemed approved, and shall take effect, at the end of the first period of 90 calendar days of continuous session of the Congress after such date of submission, unless either the House of Representatives or the Senate adopts a resolution during such period stating that it does not favor such final recommendations.

(2) If either the House of Representatives or the Senate adopts a resolution of disapproval under paragraph (1), the Secretary shall, within 45 days after the date of adoption, determine and resubmit a revised recommendation. Each such revised plan shall be submitted to the Congress for review pursuant to paragraph (1) of this subsection.

(3) For the purposes of this subsection—

(A) continuity of a session of the Congress is broken only by an adjournment sine die; and

(B) the days on which either House is not in session because of an adjournment for more than 3 days to a day certain are excluded in computing the 90-day period.

(f) Notwithstanding any other provision of law, the route system of the Corporation in effect on January 1, 1978, shall not be modified or restructured prior to October 1, 1979, except with respect to those routes initiated by the Corporation subsequent to January 1, 1978, pursuant to section 404(a) of the Rail Passenger Service Act (45 U.S.C. 564(a)). Nothing in this subsection shall be construed by the Corporation as precluding the rerouting of existing rail passenger service, or construed as requiring the Corporation to maintain service provided under an agreement with a State pursuant to section 403(b) of the Rail Passenger Service Act (45 U.S.C. 563(b)) if such State fails to meet its share of the costs of such service or requests discontinuance of such service.

(g) Subject to subsection (f) of this section, immediately upon approval of the final recommendations of the Secretary, the Corporation shall implement the basic route system designated in such recommendations and shall complete such implementation as soon thereafter as possible, but in no event later than 12 months after the date of such approval.

(h)(1) The provisions of section 404(c)(1) of the Rail Passenger Service Act (45 U.S.C. 564(c)(1)), including the criteria and procedures developed under such section, shall not apply to the preliminary or final recommendations developed by the Secretary under this section. After the date of approval of the basic system designated in the final recommendations of the Secretary, any additions, deletions, or modifications in such basic system may be made by the Corporation in accordance with the criteria and procedures developed under such section 404(c)(1).

(2) During the period beginning on the date of enactment of this section, and ending 12 months after the date of approval of the new basic route system designated by the Secretary under this section, the provisions of section 801(a) of the Rail Passenger Service Act (45 U.S.C. 641(a) (including the regulations of the Commission promulgated thereunder) shall not apply to the development or implementation of the new basic system.

(i) Subject to subsection (f) of this section, the basic system designated in the final recommendations of the Secretary shall, after the date upon which such recommendations are approved, supersede any other system or route previously in effect.

RAIL PASSENGER SERVICE REPORT

SEC. 5. Section 703(2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 853(2)) is amended—

(1) by inserting "(A)" immediately after "TRANSPORTATION.—"; and

(2) by adding at the end thereof the following new subparagraph:

"(B) Within one year after the date of the enactment of this subparagraph, the submission by the Secretary to the Congress of a report on the conflict between the needs of commuter rail passenger service and the needs of intercity rail passenger service in the Northeast Corridor and on the allocation of access rights to key Northeast Corridor terminals, especially Pennsylvania Station in New York, New York.".

STUDY OF RELATIONSHIP OF AMTRAK FARE STRUCTURE TO THE INTERCITY BUS INDUSTRY

SEC. 6. The Comptroller General shall, in consultation with the Secretary of Transportation and the Interstate Commerce Commission, conduct a study of the economic relationship of the fare structure of the National Railroad Passenger Corporation to the intercity bus industry. The Comptroller General shall, no later than December 31, 1978, submit a report to the Congress setting forth the results of such study.

HEARINGS ON UNFAIR OR PREDATORY PRACTICES

SEC. 7. Notwithstanding the provisions of section 306 of the Rail Passenger Service Act (45 U.S.C. 546), the Interstate Commerce Commission shall have, upon the application of any aggrieved motor carrier, jurisdiction under any applicable provision of part 1 of the Interstate Commerce Act over any rate, fare, charge, or marketing practice of the National Railroad Passenger Corporation with respect to any route or service which operates at a loss for the purpose of hearing the complaint over an unfair or predatory practice.

NORTHEAST CORRIDOR

SEC. 8. Section 703 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 853) is amended—

(1) in paragraph (1)(A)(i) thereof, by inserting "at most" immediately before "a 3-hour-and-40-minute" and "a 2-hour-and-40-minute", respectively;

(2) in paragraph (1)(B) thereof, by inserting "or other responsible parties" immediately after "(or local or regional transportation authorities)"; and

(3) by adding at the end thereof the following new paragraph:

"(5) COMPATABLE EQUIPMENT.—The Secretary shall develop economical and reliable rolling stock and related equipment designed to be compatible with the track, operating, and marketing characteristics of the Northeast Corridor at and after the completion of the Northeast Corridor improvement project, including the capability to reliably meet the trip times set forth in paragraph (1)(E) of this section in regularly scheduled revenue service in the Northeast Corridor. The Secretary shall consult with the Corporation in the development of such equipment. Before purchasing such equipment with Federal financial assistance, the Corporation shall obtain the Secretary's concurrence that the equipment meets the goals specified in this paragraph. The Corporation shall submit requests for authorization of appropriations for the production of such equipment and shall, together with the Secretary, include equipment planning in the reports required by paragraph (1)(E) of this section.".

EXPENSES OF ELECTRIFICATION CONVERSION

SEC. 9. Section 704(a)(1) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a)(1)) is amended by inserting immediately before the semicolon at the end thereof the following: ", of which not less than $27,000,000 shall be available to finance the cost of the equipment modification and replacement which States (or local or regional transportation authorities) will be required to bear as a result of the electrification conversion system of the Northeast Corridor pursuant to this title".

PURCHASES OF DOMESTIC ARTICLES, MATERIALS, AND SUPPLIES

SEC. 10. Section 305 of the Rail Passenger Service Act (45 U.S.C. 545) is amended by adding at the end thereof the following new subsection:

"(j)(1) Except as provided in paragraph (2) or (3) of this subsection, the Corporation shall purchase only—

"(A) unmanufactured articles, materials, and supplies which have been mined or produced in the United States; and

"(B) manufactured articles, materials, and supplies which have been manufactured in the United States substantially all from articles, materials, and supplies mined, produced, or manufactured, as the case may be, in the United States.

"(2) The Secretary may, upon application of the Corporation, exempt the Corporation from the requirements of paragraph (1) of this subsection with respect to the purchase of particular articles, materials, or supplies, if the Secretary determines that—

"(A) imposing such requirements with respect to such articles, materials, or supplies is inconsistent with the public interest;

"(B) the cost of imposing such requirements with respect to such articles, materials, or supplies is unreasonable; or

"(C) such articles, materials, or supplies or the articles, materials, or supplies from which they are manufactured are not mined, produced, or manufactured, as the case may be, in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality.

"(3) The provisions of this subsection shall not apply—

"(A) in any case in which the cost of the articles, materials, or supplies purchased is less than $1,000,000; or

"(B) in the case of articles, materials, or supplies purchased pursuant to a contract entered into before the date of enactment of this subsection.

"(4) For purposes of this subsection, the term 'United States' means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.".

FOR-PROFIT STATUS OF AMTRAK

SEC. 11. The second sentence of section 301 of the Rail Passenger Service Act (45 U.S.C. 541) is amended by inserting "operated and managed as" immediately before "a for profit corporation".

COMMON STOCK OWNERSHIP

SEC. 12. The Secretary of Transportation shall evaluate the common stock ownership of the National Railroad Passenger Corporation and shall, no later than December 31, 1978, submit a report to the Congress setting forth his recommendations with respect to retention, retirement, or conversion of such common stock. In making such recommendations, the Secretary shall consider the best interests of the United States.

RAILROAD SAFETY SYSTEM PROGRAM

SEC. 13. Title VIII of the Rail Passenger Service Act (45 U.S.C. 641 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 807. RAILROAD SAFETY SYSTEM PROGRAM

"(a) No later than January 1, 1979, the Corporation shall, in consultation with railroad labor organizations, develop and implement a Rail Safety System Program for employees working on property owned by the Corporation. Such program shall be designed to serve as a model for other railroads to use in developing safety programs.

"(b) The Railroad Safety System Program required under this section shall include but not be limited to—

"(1) a periodic analysis of accident data, including primary and secondary causes, if known;

"(2) a periodic evaluation of the activities undertaken under the Program, particularly the specific steps taken in response to accident causes;

"(3) a periodic identification of the expenditures for occupational health and safety activities included in the Program;

"(4) a periodic identification of the reduction of costs, fatalities, and casualties resulting from accident prevention under the Program;

"(5) a periodic identification of direct accident costs, including claims arising out of such accidents; and

"(6) an identification and evaluation of such other information or data as the Corporation considers necessary or appropriate.".

CONVERSION OF RAILROAD TERMINALS

SEC. 14. Paragraphs (2), (3), and (5) of section 4(1) of the Department of Transportation Act (49 U.S.C. 1653(1)) (2), (3), and (5)) are amended by striking out "60 per centum" each place it appears and inserting in lieu thereof "80 per centum".

FACILITY AND SERVICE AGREEMENTS

SEC. 15. The third sentence of section 402 (a) of the Rail Passenger Service Act (45 U.S.C. 562(a)) is amended by inserting "or for the use of tracks and facilities" immediately after "provision of services".

REIMBURSEMENT FOR STAFF SERVICES

SEC. 16. Section 403(b)(1) of the Rail Passenger Service Act (45 U.S.C. 563(b)(1)) is amended by adding at the end thereof the following new sentence: "The State or agency shall be entitled to reimbursement for staff services in an amount equal to 3 per centum of the Corporation's share of operating losses and associated capital costs.".

PETITIONS TO THE INTERSTATE COMMERCE COMMISSION

SEC. 17. Section 403(b) of the Rail Passenger Service Act (45 U.S.C. 563(b)) is amended—

(1) by redesignating paragraphs (2) and (3), and all references thereto, as paragraphs (3) and (4), respectively; and

(2) by inserting immediately after paragraph (1) the following new paragraph:

"(2) Whenever a State, regional, or local agency requests the Corporation to institute service pursuant to this subsection, or to enter into a contract or other agreement or modify an existing contract or agreement relating to rates, fares, charges, scheduling, marketing, or operations of service provided pursuant to this subsection, and the Corporation fails to institute such service or to enter into or modify such contract or agreement, as the case may be, such State, regional, or local agency may petition the Commission for an order directing the Corporation to comply with its request. If the Commission determines, upon receipt of such a petition and after notice and an opportunity for a hearing, that the request which is the subject of such petition is consistent with the public interest and the purposes of this subsection, the Commission may enter an order directing the Corporation to comply with such request or to take such other action as the Commission considers appropriate.".

ADDITIONAL SERVICE

SEC. 18. Section 403 of the Rail Passenger Service Act (45 U.S.C. 563) is amended by adding at the end thereof the following new subsection:

"(d) The Corporation is authorized to operate commuter rail passenger service under an agreement with a State (or local or

regional transportation agency) if such State or agency agrees to reimburse the Corporation for the avoidable cost of operating such commuter rail passenger service. For purposes of this subsection, the term 'commuter rail passenger service' means rail passenger service operated in metropolitan and suburban areas, usually characterized by reduced fare, multiple-ride, and commutation tickets and by morning and evening peak period operations.".

MAIL SERVICE

SEC. 19. The National Railroad Passenger Corporation shall utilize all feasible means, including taking into account the needs of the United States Postal Service in establishing schedules, to attract and service the bulk mail needs of the Postal Service.

EFFECTIVE DATES

SEC. 20. (a) Except as provided in subsection (b) or (c) of this section, the provisions of this Act and the amendments made by this Act shall take effect on the date of enactment of this Act.

(b) The provisions of section 7 of this Act shall take effect on January 1, 1979.

(c) The amendments made by section 9 and section 16 of this Act shall take effect on October 1, 1978.

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3040) to amend the Rail Passenger Service Act to amend the authorizations of appropriations for an additional fiscal year, to provide for public consideration and implementation of a rail passenger service study, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SHORT TITLE

Senate bill

The Senate bill provided that this legislation may be cited as the "National Railroad Passenger Corporation Authorization Act of 1978".

House amendment

The House amendment provided that this legislation may be cited as the "Amtrak Improvement Act of 1978".

Conference substitute

The conference substitute is the same as the House amendment.

AUTHORIZATION OF APPROPRIATIONS

Senate bill

The Senate bill authorized $510 million for fiscal year 1979 for operating expenses; $120 million for fiscal year 1979 for capital expenditures; $25 million for fiscal year 1979 for debt reduction.

House amendment

The House amendment provided $600 million for fiscal year 1979 for operating expenses; $130 million for fiscal year 1979 for capital expenditures; $25 million for fiscal year 1979 for debt reduction.

Conference substitute

The conference substitute is the same as the House amendment.

BUDGET ESTIMATES

Senate bill

No provision.

House amendment

The House amendment amended the Rail Passenger Service Act to repeal subsection (b) of section 601 of such Act, which, in part, provided that "no officer or agency of the United States shall have any authority to require the corporation to submit its legislative recommendations, proposed testimony, or comments on legislation to any officer or agency of the United States for approval, comments, or review, prior to submission of such recommendations, testimony, or comments to the Congress".

Conference substitute

The conference substitute is the same as the House amendment.

ROUTE REEXAMINATION

Senate bill

The Senate bill provided for a reexamination of the Amtrak system by both the Secretary of Transportation, the Rail Services Planning Office, and the Congress. The Secretary was to present to the Congress a preliminary recommendation on May 1, based, in part, upon the adequacy of alternative forms of transportation and the impact of frequency and fare structure alternatives. The Rail Services Planning Office was to conduct public hearings on the preliminary recommendations during the summer of 1978. The Secretary was to submit a final recommendation by December 31, 1978, and the Congress was to be given a 60-day period in which to adopt a resolution of disapproval. If neither the House nor the Senate adopted such a resolution, the Secretary's recommendations would have been deemed approved and would have taken effect at the end of the 60-day period. In the event either House of Congress adopted a resolution of disapproval, the Secretary was to submit revised recommendations which were to be subject to the same congressional review process as the original recommendations.

The route reexamination procedure, as outlined in the Senate bill closely paralleled the procedures set forth in the Regional Rail Reorganization Act of 1973 for development and adoption of the Final System Plan. Under section 208 of the Regional Rail Reorganization Act of 1973, either House of Congress was given the authority to disapprove the plan submitted by the United States Railway Association. The Senate believed that the procedure worked well for the final system plan and incorporated a similar procedure for the Amtrak route reexamination.

During the lengthy process of public hearings, departmental recommendations, and congressional approval of the new route structure, provisions in present law relating to institution of new service were to be suspended. The reason was that the implementation process for the new route system is itself a procedure that becomes a substitute for sections 403 and 404 of the Rail Passenger Service Act. These are the two sections that relate to route and service criteria and procedures. However, the suspension was to be applicable only to the proposed new route structure, not the existing route structure.

The Senate intended that Amtrak immediately begin the process of utilizing its criteria and procedures for making route and service decisions. The authority to make these determinations was given to Amtrak's Board of Directors in the Amtrak Improvement Act of 1975. The route criteria process ranks all of Amtrak's routes, selects the lowest ranking ones for intensive analysis, and provides procedures for discontinuing or changing routes that fail to meet all standards, including the projected effects (versus costs) of possible improvements. Amtrak's criteria used to judge the performance of the routes are based on economic as well as social and environmental factors. While these two latter standards are sometimes unclear as a result of subjective interpretations, Amtrak itself, according to its testimony, considers the criteria to be sufficiently precise to perform their function of grading routes and providing guidance to the Amtrak Board in its decisions on whether or not to retain or change a route or services. The Senate believed that the system could be significantly strengthened by eliminating those trains that represent the worst financial drag; and, when the new fiscal year begins on October 1, 1978, the transition to a somewhat reduced but more efficient passenger train network will be well underway.

House amendment

Subsection (a) of section 4 of the House amendment directed the Secretary of Transportation, in cooperation with Amtrak, immediately to develop preliminary recommendations for an Amtrak route structure which will provide an optimal intercity railroad passenger system, based upon current and future market and population requirements, including where appropriate portions of the existing route structure. In developing these recommendations, the Secretary was required to consider any unique advantages of rail service vis-a-vis other modes of transportation; energy conservation aspects of rail passenger service; the relationship between the benefits and cost of providing such service, computing the costs in loss or profit per passenger mile rather than total loss or profit per route; the transportation needs of areas lacking adequate alternative forms of transportation; and the impact of service frequency alternatives on ridership, revenues and expenses.

Subsection (b) of section 4 of the House amendment required the Secretary to submit the preliminary recommendations to Congress no later than May 1, 1978. Copies were to be submitted to various persons and entities interested in and potentially affected by the recommendations. The preliminary recommendations were to include a recommended route. The recommendations were required to contain an estimate served; quality and type of service for each recommended route; and ranges of projected operating expenses, ridership, and revenues by route. The recommendations also were regulated to contain an estimate of equipment and facilities for the recommended system, a recommendation for coordinating service proposed in the recommendations with that of other transportation modes; and an estimate of operating and capital appropriations required to operate the recommended system for fiscal years 1980 through 1984.

Subsection (c) of section 4 of the House amendment required the Rail Services Planning Office (RSPO) to conduct public hearings on the preliminary recommendations during the period from May 1, 1978 to August 31, 1978. The hearings were to be held in such a manner so as to afford affected States and communities maximum possible participation. RSPO was also required to

invite comments on the recommendations from certain persons and entities interested in and potentially affected by the recommendations.

Subsection (d) of section 4 of the House amendment required RSPO to submit to the Secretary by September 30, 1978, a summary and analysis of the hearings and an evaluation of the preliminary recommendations. The Secretary was required to consider this input in developing final recommendations for an Amtrak route structure. He was also required to consider the impact of these recommendations upon existing and potential tourism markets. The final recommendations were to include a summary of significant recommendations received by the Secretary and reasons for adopting or rejecting each of those recommendations.

Subsection (e)(1) of section 4 of the House amendment required the Secretary to submit the final recommendations with explanatory analyses to both Houses, and certain Committees of Congress, by December 31, 1978. These recommendations were to be effective only if both Houses adopted a resolution of approval. If either House passed a resolution of disapproval, the Secretary was to prepare and submit revised final recommendations for Congressional review in the manner described above.

Subsection (e)(2) of section 4 of the House amendment provided that the Amtrak route system in effect on January 1, 1978 shall not be modified or restructured prior to October 1, 1979. Minor exceptions to this requirement were the addition by Amtrak of routes or services discontinued by other railroads pursuant to section 404(a) of the Rail Passenger Service Act and the rerouting of existing service. In addition, Amtrak was not required to maintain service provided to a State under section 403(b) of the Rail Passenger Service Act if the State failed to pay its share of section 403(b) costs or requests discontinuance of the service.

Subsection (e)(3) of section 4 of the House amendment provided that upon approval of the final recommendations, Amtrak was required to commence implementation of the recommended system and complete implementation as soon as possible.

Subsection (f) of section 4 of the House amendment provided that section 404(c)(1) of the Rail Passenger Service Act and the criteria for route and service additions, modifications, and deletions, developed discontinuances thereunder shall not apply to the preliminary or final recommendations. After the final recommendations were approved by Congress, the route and service criteria were to be employed to alter the new system.

Subsection (g) of section 4 of the House amendment required RSPO, in the course of the conduct of the public hearings, to evaluate alternatives to the existing Amtrak organizational structure and of Amtrak's relationship to the Federal government, including the Office of Management and Budget, the Secretary, and Congress.

Conference substitute

The conference substitute follows the House amendment but contains several important provisions from the Senate bill. The overall outline of the route reexamination is as follows: (a) development of preliminary recommendations by the Department of Transportation; (b) publication and submission to the Congress of the preliminary recommendations; (c) hearings conducted by the Rail Services Planning Office on the preliminary recommendations; (d) submission to the Secretary of the Rail Services Planning Office's recommendations; (e) submission by the Secretary to the Congress of the final recommendations and subsequent approval of those recommendations by the Congress; (f) starting date for modifications or restructuring of the route system; (g) completion date for final implementation; (h) suspension of Discontinuance of Service requirements and ICC Adequacy of Service regulations regarding the final plan; and (i) preemption of the existing route system by the final plan.

The conferees believe that the Secretary of Transportation, in developing his recommendations on the new route system, should examine fare structure alternatives and their impact on ridership, revenues and expenses of Amtrak. There is a serious need on the part of Amtrak, to increase its revenues in order to reverse the rising level of Federal financial support for operations. The conferees are cognizant of the fact that the elasticity of demand for rail passenger service may well vary from route to route, or even season to season, but the conferees strongly feel that Amtrak fares must be altered to reflect, more appropriately, the true cost of providing passenger services.

It is the intention of the conferees, in establishing the route reexamination procedure, to encourage a broad level of public participation in order to focus attention on the rail passenger needs of the public and the costs and benefits associated with rail passenger operations. As a result, the conferees have endorsed the activities of the Office of Rail Public Counsel to provide legal services to communities and users of rail passenger service which might not otherwise be adequately represented during the course of the summer hearings.

In addition to the criteria set forth in both the Senate and House versions for the Secretary to use in developing his recommendations, the conferees wish to point out the importance of tourism and the impact rail passenger service may have on the tourism industry. Many States, particularly in the West, do not exhibit high concentrations of population, but rely heavily on tourism to maintain their economic growth. In areas where alternative modes of transportation are lacking, the relative importance of rail passenger transportation to tourism should be weighed heavily in the Secretary's final recommendations.

The conferees have established a procedure for final approval of the recommended route plan that, while granting adequate time for congressional study and review, will not be overly burdensome and time consuming to the new Congress. The Secretary of Transportation will submit his final recommendations to the Congress by December 31, 1978 and the Congress will be given a period of 90 calendar days of continuous sessions in which to adopt a resolution of disapproval. If neither House of Congress adopts such a resolution, the final recommendations will be considered approved at the end of the 90-day period. In the event either House of Congress adopts a resolution of disapproval, the Secretary will submit a revised recommendation with 45 days which will be subject to the same congressional review process as the original recommendation. This procedure parallels the procedures set forth in the Regional Rail Reorganization Act of 1973 for development and adoption of the Final System Plan. The conferees believe that the procedures worked well for the Final System Plan and as a result, have recommended that a similar procedure be followed for the Amtrak route reexamination.

The conferees, in assessing the merits of an immediate restructuring of the Amtrak route system upon final approval of the Secretary's plan, have agreed that no modifications or restructuring should occur until the start of fiscal year 1980. The conferees believe that the uncertainty over the final date of approval, the costs of transition to the new route system, and the level of public confusion over new routings during the peak spring and summer months support the adoption of a "freeze" on the route system until the new fiscal year. However, the conferees wish to emphasize that the freeze relates only to train routes and not to internal operations or fare changes. The conferees do not wish to preclude or discourage any management decisions that may help to decrease Amtrak's operating deficit. Furthermore, the conferees wish to point out that although the route system is frozen until October 1, 1978, Amtrak management should begin planning for implementation of the new system immediately upon approval of the final recommendations and shall complete such implementation as soon thereafter as possible, but in no event later than 12 months after the date of approval.

Finally, the conference substitute contains two provisions suspending sections 404(c)(1) (Discontinuance of Service) and 801(a) (Adequacy of Service) of the Rail Passenger Service Act for the purposes of implementing the new route system. The conferees believe these requirements, as relating solely to the new route system, would be too burdensome to Amtrak in planning and implementing the new system.

RAIL PASSENGER SERVICE REPORT

Senate bill

No provision.

House amendment

Section 5 of the House amendment amended section 703(2) of the Railroad Revitalization and Regulatory Reform Act of 1976 to require within 1 year, the submission by the Secretary to the Congress of a report on the conflict between the needs of commuter rail passenger service and intercity rail passenger service in the Northeast Corridor and on the allocation of access rights to key Northeast Corridor terminals.

Conference substitute

The conference substitute is the same as the House amendment.

STUDY OF RELATIONSHIP OF AMTRAK FARE STRUCTURE TO THE INTERCITY BUS INDUSTRY

Senate bill

No provision.

House amendment

Section 6 of the House amendment stated that the Comptroller General shall, in consultation with the Secretary of Transportation and the Interstate Commerce Commission, report on the economic relationship of the fare structure of the National Railroad Passenger Corporation to the intercity bus industry no later than December 31, 1978.

Conference substitute

The conference substitute is the same as the House amendment.

HEARINGS ON UNFAIR OR PREDATORY PRACTICES

Senate bill

No provision.

House amendment

Section 7 of the House amendment stated that notwithstanding the provisions of section 306 of the Rail Passenger Service Act, the Interstate Commerce Commission shall have, upon the application of any aggrieved motor carrier, jurisdiction under any applicable provision of Part I of the Interstate Commerce Act over any rate, fare, charge, or marketing practice of the National Railroad Passenger Corporation with respect to any route unfair or service which operates at a loss for the purpose of hearing the complaint over unfair or predatory practices. The ICC's jurisdiction under Part I of the Interstate Commerce Act, for the limited purpose of the conduct of the hearing, is contingent upon the aggrieved motor carrier filing a petition before the Commission. Where appropriate the Commission may consider any such petitions on a consolidated basis.

Conference substitute

The conference substitute is the same as the House amendment.

NORTHEAST CORRIDOR

Senate bill

Section 4 of the Senate bill amended section 703 of the Railroad Revitalization and Regulatory Reform Act (4–R Act) by (a) including "other responsible parties" as eligible for the Federal matching share program for the improvement of nonoperating portions of stations used in intercity rail passenger service, and (b) adding a new subsection that directed the Secretary of Transportation, in consultation with Amtrak, to develop rolling stock and equipment that is compatible with the design of the Northeast Corridor project and directed Amtrak to obtain the Secretary's concurrence before purchasing any such equipment with Federal financial assistance.

House amendment

Section 8 of the House amendment was similar but (a) included a technical clarification providing that the statutory trip time goals were to be construed as maximum goals, and (b) did not require Amtrak to obtain the Secretary's concurrence before purchasing compatible equipment for the Northeast Corridor project.

Conference substitute

The conference substitute follows the House amendment but includes the Senate provision directing Amtrak to obtain the Secretary's concurrence on equipment purchases.

EXPENSES OF ELECTRIFICATION CONVERSION

Senate bill

No provision.

House amendment

Section 9 of the House amendment earmarks not less than $27 million of the funds provided in section 704(a)(1) of the Railroad Revitalization and Regulatory Reform Act of 1976 for the purpose of equipment modification or replacement which will be necessary as a result of the modernization of the Northeast Corridor.

Conference substitute

The conference substitute is the same as the House amendment.

PURCHASES OF DOMESTIC ARTICLES, MATERIALS, AND SUPPLIES

Senate bill

Section 6 of the Senate bill provided that no grant of more than $1 million could be made for the purchase of steel or rolling stock unless substantially all the steel and rolling stock had been manufactured in the United States or unless the Secretary of Transportation determined that such requirement was inconsistent with the public interest, the cost of compliance was unreasonable or the materials could not reasonably be purchased in the United States.

House amendment

Section 10 of the House amendment amended Section 305 of the Rail Passenger Act to provide that all purchases amounting to more than $100,000 of unmanufactured articles, materials and supplies or manufactured articles, materials and supplies must be from the United States unless the Secretary of Transportation determined that such requirement was inconsistent with the public interest, the cost of compliance was unreasonable or the materials could not reasonably be purchased in the United States.

Conference substitute

The conference substitute follows the House amendment but sets the threshold amount at the Senate figure of $1 million.

FOR-PROFIT STATUS OF AMTRAK

Senate bill

No provision.

House amendment

The House amendment changed section 301 of the Rail Passenger Service Act to remove Amtrak's for-profit status but to require that the corporation be "operated and managed as" a for-profit corporation.

Conference substitute

The conference substitute is the same as the House amendment.

COMMON STOCK OWNERSHIP

Senate bill

No provision.

House amendment

Section 12 of the House amendment required the Secretary of Transportation to evaluate the common stock ownership of the National Railroad Passenger Corporation and report to Congress by December 31, 1978, on his recommendation with respect to retention, retirement, or conversion of such stock. In making his recommendation, the Secretary shall consider the best interest of the United States.

Conference substitute

Conference substitute is the same as the House amendment.

RAILROAD SAFETY PROGRAM

Senate bill

No provision.

House amendment

Section 13 of the House amendment directed the corporation to develop and implement a rail safety program following but not limited to specific criteria enumerated in subsection (b) of the section. The House amendment contained a specific authorization of $250,000.

Conference substitute

The conference substitute is the same as the House amendment except for the specific authorization of $250,000. It is the intention of the conferees that the corporation pay for the development and implementation of the Rail Safety System Program out of operating funds. It is anticipated that the development of the program will provide an opportunity for the corporation to pull together, coordinate and upgrade existing safety programs at all of its facilities and in all of its operations so that the program may serve as a model of safety performance for the rest of the industry.

CONVERSION OF RAILROAD TERMINALS

Senate bill

No provision.

House amendment

Section 14 of the House amendment raises the Federal share for projects to convert or modernize railroad terminals from 60 percent to 80 percent.

Conference substitute

The conference substitute is the same as the House amendment.

FACILITY AND SERVICE AGREEMENTS

Senate bill

The Senate bill amended section 402(a) of the Rail Passenger Service Act to provide that compensation for both services and the use of tracks and facilities was to be based on an "avoidable" cost concept. The Senate bill defined avoidable costs as those reasonable and necessary expenses which would be incurred by the railroad in providing service to Amtrak which the railroad could establish it would not incur if such service to Amtrak did not exist. The Senate bill explicitly excluded from avoidable costs fixed common costs, allocation of any common costs which do not vary as a consequence of providing the service return on investment, rent, and any other costs which the carrier cannot establish that it would not have reasonably and necessarily incurred but for the existence of the service. Finally, the Senate bill provided detailed standards for fixing incentive compensation for the provision of services.

House amendment

No provision.

Conference substitute

The conference substitute amends section 402(a) of the Rail Passenger Service Act by directing the ICC, in fixing "just and reasonable" compensation, to include tracks and facilities under the incremental cost concept. The conference substitute changes the law to permit incentives for good quality track and facilities. The conferees do not intend to affect any existing contracts between railroads and Amtrak. Neither do the conferees intend for incentive payments to be made only for improvement in track and facilities. Incremental costs now become the threshold for determining "just and reasonable" compensation should the Commission have to resolve the matter. Furthermore, the conferees expect the Commission and the courts to give this amendment prospective application only.

REIMBURSEMENT FOR STAFF SERVICES

Senate bill

No provision.

House amendment

Section 15 of the House amendment changed section 403(b)(1) of the Rail Passenger Service Act to provide that a State which has entered into an agreement with Amtrak for provision of rail passenger service shall be entitled to reimbursement for staff services in an amount equal to 3 percent of Amtrak's 50 percent share of the operating losses and associated capital costs of such service.

Conference substitute

The conference substitute is the same as House amendment.

PETITIONS TO THE INTERSTATE COMMERCE COMMISSION

Senate bill

No provision.

House amendment

Section 16 of the House amendment changed section 403(b)(1) of the Rail Passenger Service Act to permit a State, regional or local transportation agency whose request to Amtrak to institute service under section 403(b)(1) or to modify any aspects of such service has been refused to petition the Commission for an order directing Amtrak to comply with the request. If the Commission determines, after notice and hearing, that the request is consistent with the public interest and the purposes of section 403(b)(1), it may order Amtrak to comply with the request or to take other appropriate action.

Conference substitute

The conference substitute is the same as the House amendment.

ADDITIONAL SERVICE

Senate bill

No provision.

House amendment

Section 17 of the House amendment added a new section to section 403 of the Rail Passenger Service Act giving Amtrak discretionary authority to enter into contracts with the States or local or regional transportation agencies for the operation of commuter rail passenger service. The section provided that Amtrak should receive reimbursement on an avoidable cost basis taking into account revenues attributable to the provision of such service.

Conference substitute

The conference substitute is the same as the House amendment.

MAIL SERVICE

Senate bill

No provision.

House amendment

Section 19 of the House amendment directed Amtrak to utilize all feasible means, including taking into account the needs of the Postal Service in establishing schedules,

to attract and service the bulk mail needs of the U.S. Postal Service.

Conference substitute

The conference substitute is the same as the House provision.

EFFECTIVE DATES

Senate bill

No provision.

House amendment

Section 18 of the House amendment provided that those sections relating to electrification conversion and staff services would not take effect until October 1, 1978; all other provisions would take effect upon adoption of the bill.

Conference substitute

The conference substitute is the same as the House amendment except that the section relating to ICC hearings on unfair or predatory practices will not take effect until January 1, 1979.

Managers on the Part of the Senate.

PERMISSION FOR COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO FILE REPORT ON H.R. 11979

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce may have until midnight tonight to file a report on the bill, H.R. 11979.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

REQUEST FOR PERMISSION FOR COMMITTEE ON AGRICULTURE TO MEET DURING SESSIONS OF THE HOUSE NEXT WEEK

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may be permitted to meet next week during sessions of the House under the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. BAUMAN. Reserving the right to object, Mr. Speaker, the gentleman from Washington (Mr. FOLEY) knows better than the gentleman from Maryland that if these meetings are for the purpose of marking up the grain reserve bill there are a lot of members of the gentleman's committee opposed to that. I think that at 20 minutes to 3 on a Friday, with 10 Members required for an objection, it is a little bit difficult for the Members to work their will on this matter.

Mr. FOLEY. If the gentleman will yield, Mr. Speaker, I might advise the gentleman that the so-called international grain reserve bill or international wheat emergency reserve legislation has been marked up by the committee, is in a committee print, and is pending as the first order of business on Tuesday for a pro forma final vote on the committee. All of the amendments have been considered on the bill, and it is ready for reporting.

Mr. BAUMAN. Further reserving the right to object, Mr. Speaker, the problem is that under the new rules, 10 Members are required to object, and it is now 20 minutes to 3. There was no notice of the request given beforehand.

Mr. ROUSSELOT. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard. The Chair will state that it takes 10 Members to object. The objectors will have to remain standing.

(Messrs. ROUSSELOT, BAUMAN, GRASSLEY, ASHBROOK, CONABLE, DERWINSKI, CORCORAN of Illinois, DEL CLAWSON, WYLIE, and HAMMERSCHMIDT objected.)

The SPEAKER pro tempore. A sufficient number have objected.

Objection is heard.

PERMISSION FOR COMMITTEE ON AGRICULTURE TO MEET DURING SESSIONS OF THE HOUSE NEXT WEEK

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that, except for consideration of the international grain reserve bill, the Committee on Agriculture may be permitted to meet next week during sessions of the House under the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. ROUSSELOT. Reserving the right to object, Mr. Speaker, why is it necessary to take up all these bills in committee now? We have a tremendously overcrowded legislative schedule for the floor next week.

Why does the gentleman want to deny the members of the Committee on Agriculture the chance to be here and participate in all of these pieces of legislation, just listed by the majority leader?

Mr. FOLEY. If the gentleman will yield, Mr. Speaker, I will tell the gentleman that the committee has several bills pending and awaiting action, which are, in the judgment of the chairman himself, not controversial. If we can have an opportunity to report them out, I think next week is going to conclude most of our committee business.

Mr. ROUSSELOT Further reserving the right to object, could we know what those bills are?

Mr. FOLEY. There are several bills naming various agricultural research stations.

Mr. ROUSSELOT. What is that again?

Mr. FOLEY. Several bills to designate the names of agricultural research stations on behalf of some of our colleagues, past and present. There is legislation to require reporting of foreign land transactions, registration of transactions in agricultural land involving foreign sources.

Mr. ROUSSELOT. Those are the only two bills; is that correct?

Mr. FOLEY. In the category of institutions.

Mr. ROUSSELOT. If it is just those two bills? How important is it to name agricultural stations after our colleagues? Do we really need to have the committee meeting during an already short week? There is an extremely full schedule next week. Is the gentleman aware of the schedule next week?

Mr. FOLEY. I have the schedule in front of me, I will tell the gentleman.

Mr. ROUSSELOT. The gentleman puts an unfortunate demand on members of his own committee when there is such a crowded schedule on the floor. It is difficult enough, as it is, to keep up with what is happening; and today is the deadline of the Committee on Rules to schedule bills.

Mr. FOLEY. Except for emergency situations, the gentleman is correct, unless the legislation should appear on the Suspension Calendar.

Mr. ROUSSELOT. The gentleman is not going to tell me that the naming of agricultural stations after our colleagues is pressing?

Mr. FOLEY. No; I would not say that those are the most important bills. They are, however, the most numerous. The two most significant bills are one which requires registration by foreign sources of ownership in agricultural land.

The gentleman from Iowa (Mr. GRASSLEY), a member of the committee, I believe, considers that a matter of some interest. It is of interest to him and to other Members of agricultural regions. He has been most outspoken about it and considers it important, I think, I will tell the gentleman. It is a significant problem today.

The second issue is the issue involving the agricultural transportation study. Many members of the committee feel very strongly that that is a serious problem in agriculture. Both the gentleman from Montana (Mr. MARLENEE) and the gentleman from Iowa (Mr. GRASSLEY), I think, will support this legislation.

Furthermore, many Members are interested in examining in a comprehensive way the particular problems facing agriculture in these respects.

However, if the gentleman wants to object, that is his prerogative.

Mr. ROUSSELOT. Further reserving the right to object, I have made my point. The gentleman understands it. If there are only those two or three bills, fine.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. BAUMAN. Reserving the right to object, do I understand from the colloquy that just occurred that those are the only bills that the gentleman asked permission for, and specifically the grain reserve bill is excluded?

Mr. FOLEY. If the gentleman will yield, I asked permisison, Mr. Speaker, for the committee to sit next week except for consideration of the grain bill. I do not by the colloquy suggest that that is a complete and exclusive list of the legislation pending before the committee, but if the gentleman from Iowa (Mr. GRASSLEY) has a bill, and others, and if the gentleman wants to exclude other bills except the ones I have named. I

would say there are seven or eight bills that deal with agricultural institutional titles, the bill I mentioned with respect to foreign agriculture registration, the bill I mentioned with respect to transportation study; and other members of the committee have bills that are pending, including members on the gentleman's side, and if the gentleman objects to consideration, I will be glad to take them off the calendar.

Mr. BAUMAN. I thank the gentleman for his clarification.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

PERSONAL EXPLANATION

Mr. AKAKA. Mr. Speaker, on rollcall No. 685, passage of H.R. 13511, Revenue Act of 1978, I was unavoidably detained in my office and I missed the vote on passage. Had I been present, I would have voted for the passage of H.R. 13511.

THE CONTINUING CASE FOR LOWERING THE MARGINAL TAX RATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 5 minutes.

● Mr. KEMP. Mr. Speaker, last evening the House, in a surprisingly partisan vote, rejected a motion to recommit the Revenue Act of 1978, the tax bill, to the Committee on Ways and Means with instructions to report that bill back to the Committee on Ways and Means with instructions to report that bill back immediately to the House with the Kemp-Roth amendment to lower individual income tax rates by about 33 percent over the next 3 years included in its provisions.

But the morning's light has not changed the compelling necessity of enacting the Kemp-Roth legislation. One vote does not a struggle to save the economy make. For the committee's bill, which went on to pass the House, will still mean the American people will pay a staggering $262.5 billion in additional taxes between now and 1983. That is a quarter of a trillion extra tax dollars.

I want to take a look, from a new perspective, on why the case for Kemp-Roth remains so compelling.

THE PROBLEM

In the last decade, the U.S. economy has experienced a combination of problems unique in our history: stagnation and inflation.

The productivity of the economy has fallen steadily since the late 1960's. The value of the U.S. capital stock, as measured by the stock market, is roughly one-third its value (in real, noninflated terms) compared to February 1966. And the purchasing power of the U.S. dollar has fallen by roughly two-thirds in the 1970's.

Conventional economic wisdom has no solution to this malaise. It argues that inflation can only be decreased through austerity. Stagnation can only be overcome by inflation.

Monetary inflation has neutral production and incentive effects when a nation's tax system is proportional. That is, when the income tax is a flat rate, no amount of inflation can increase the real rate of taxation on income. If the rate is 10 percent and the loaf of bread is $1, the tax is 10 cents; in a 10-slice loaf, the baker gives the equivalent of one slice to the government. And if the monetary standard declines to the point where a loaf of bread is $1 million, the tax rate yields $100,000 to the government, also only enough to buy one slice of a 10-slice loaf. When the tax rate is progressive, a decline in the monetary standard automatically increases the number of slices the baker must give to the government out of each transaction. It is this phenomenon that discourages production by eroding incentives to produce.

WHAT IS THE CORRECT PRESCRIPTION?

Because inflation has increased the real rates of taxation on all suppliers of labor and capital—across the entire range of the progressive tax schedules—the solution to the problem of economic stagnation is to adjust real rates of taxation downward. The adjustment must come across the board because inflation has been operating across the board destroying incentives.

Since 1970, the U.S. monetary standard has declined by more than 60 percent. Thus, the U.S. dollar is worth less than 40 cents in 1970 purchasing power, as measured by the Consumer Price Index. To precisely offset the effects of this inflation would involve leaving the rates exactly where they are, but increasing the thresholds at which the marginal tax rates are encountered by 60 percent. For example, the 25-percent bracket is now encountered at $12,000. A correction would mean an upward adjustment of the threshold so the 25-percent bracket is not encountered until income is $19,200. At the top, the 70-percent bracket is now encountered by a married couple filing a joint return at $200,000. Adjustment for inflation would mean the 70-percent bracket would not be encountered until the couple's taxable income was $320,000.

The Kemp-Roth bill makes these adjustment by leaving the thresholds in place but lowering the rates by 10 percent each year over the next 3 years starting on January 1, 1979.

Why? Because moving the rates downward, instead of adjusting the thresholds upward, has a greater effect on increasing incentives to production. The top brackets, from 50 to 70 percent, are eliminated entirely by this reform, leaving the top rate at 50 percent. These high brackets, which yield trivial amounts of revenue to the Government, are nonetheless enormously high barriers to commerce, taking from five to seven slices from our baker's loaf. The Steiger-Hansen capital gains tax rate reduction bill also makes an important adjustment of marginal tax rates, reducing to 25 percent from roughly 50 percent the marginal tax rate on capital gains. This returns the rate to its position of 1969, the year in which the marginal rate on capital gains was doubled. This adjustment still does not take account of the inflation since 1969.

The Kemp-Roth and Steiger-Hansen bills effectively treat the stagnation component of the Nation's economic problem.

CONVENTIONAL CRITICISMS OF KEMP-ROTH

Because the conventional theories do not treat inflation as a special problem in an environment of progressive tax systems, they per force see no need to distinguish between average taxes and marginal tax rates. That is, in a world of stationary prices, a given tax rate has no dynamic effect. A 10-percent tax rate always generates the same revenue at a given nominal income. And a 70-percent tax rate always generates the same revenue at a given nominal income. But obviously there is a dynamic effect: A 70 percent tax rate will produce far more real income when $1 million buys 1 million loaves of bread than when it buys only one loaf. The instrument we use to examine this dynamic effect is the Laffer curve, which applies the law of diminishing returns to tax-rate policy. Once the critics of Kemp-Roth accept the dynamic analysis of the Laffer curve, as Prof. Walter Heller did in his July 12 essay in the Wall Street Journal, they become forced by logic—as we will see—to drift away from their own economic models.

By insisting on looking at averages rather than margins, the critics of Kemp-Roth can ask why West Germany, for example, does so much better than the United States these days when it spends 35 percent of its national income through the Government, and a mere 23 percent flows through Washington, D.C. The answer is that West Germany's marginal tax rates are lower than they are in the United States. This is true not only because the rates themselves are nominally lower (50 percent at the top, no capital-gains tax rate at all), but also because the German monetary authority has been much more restrained in money creation during the 1970's, with individuals not pushed as rapidly into higher tax brackets as they have been in in the United States. The lower rates, by encouraging greater production, increase the amount of revenues available to the Government to spend.

The exact reverse of West Germany's case can be observed in India, which taxes at such extraordinarily high income-tax rates (67 percent at $12,000), that there is only a dribble of revenues available for state spending. Only 9 percent of India's gross national product is spent by the National Government.

AVERAGES AND MARGINS

The Laffer curve is merely an instrument that enables us to think in dynamic, rather than static, terms when we consider the effects of inflation on marginal tax rates. The curve applies to individual economy activity, in which each individual faces a different marginal tax rate. It does not apply to average tax rates, which have no relevance in determining individual eco-

nomic activity. Yet critics of the Laffer curve and of Kemp-Roth, Steiger-Hansen, et cetera, insist on speaking of average taxes, average savings rates, and average incomes.

An individual earns $100,000 of taxable income and pays 30 percent to the Government in the taxable year. His average tax is 30 percent. At $100,000, though, the individual faces a marginal tax rate of 70 percent. If he puts forth $1 more in effort, the government takes not 30 cents, but 70 cents. Which rate has more disincentive effect? The average or the marginal? Through intuition and individual experience, we know our individual economic calculus focuses on the marginal rate of 70 percent when deciding whether or not to put forth the extra $1 of effort.

So, too, do we find the Keynesians questioning the argument that lower Federal income tax rates will so expand production that a temporary fall in Federal revenues, should one occur, will easily be financed through an expansion of savings—

Why, in the face of Laffer's assertions, has "Denison's Law" held true through thick and thin for the past 100 years or so? Edward F. Denison of Brookings has found that U.S. gross private domestic saving has been virtually invariant year-in and year-out in the face of high taxes, low taxes, or virtually no taxes.

This is from the statement of Professor Heller before the Joint Economic Committee of Congress on June 28. In this context, Professor Heller clearly does not understand that average savings rates need not increase at all in order that savings as a whole increase.

Production is a mathematical combination of consumption and savings. That is, everything that is produced is either consumed now or saved for future consumption. If high marginal tax rates are discouragaing production, both consumption and savings are limited thereby. If those unnecessarily high marginal tax rates are eased, thus encouraging greater production, both consumption and savings increase. The pie grows larger, and the slice of the production pie given over to future consumption remains exactly the same as a proportion of the pie. But its absolute size increases. Denison's law holds that the savings rate has been stuck for a century at 16 percent of the total pie. Observe, though, that by increasing the radius of an 8-inch pie to 10 inches, a 25 percent increase, the slice that is 16 percent of the total pie grows from 32 square inches to 50 square inches, a 56-percent increase. Denison's law is meaningless because it is a static tool, not a dynamic one. Denison's law is dead economics.

THE PROHIBITIVE RANGE

As a graphic depiction of the "law of diminishing returns," the Laffer curve simply states an eternal verity. There is a point at which adding an extra straw will break the camel's back. Liberal and conservative Keynesians alike now join in asserting that the point has not been reached in the U.S. economy. Here, again, is Professor Heller:

And even if there was something to the Laffer thesis, who is to say that we are in a high enough tax zone to produce those dire effects of higher rates and delightful effects of lower rates that Laffer postulates? Not William Fellner: "The U.S. is not yet at high enough tax rates to produce anything like the revenue explosion Laffer is predicting . . . where the U.S. economy is along such a curve is completely undocumented, unexplored, and unknown.

The liberal Professor Heller thus relies on the conservative Professor Fellner in denying that the U.S. economy is now in the prohibitive range of the Laffer curve, an idea both these Keynesians accept. If, though, the economy is not in the prohibitive range of this tax curve, Messrs. Heller and Fellner must logically be prepared to argue that economic welfare can be improved by raising tax rates. That is, the camel can carry more straw. Except for the turning point on the curve, after all, tax rates are either unnecessarily high and can be reduced with production gains and no revenue loss. Or, tax rates are unnecessarily low and can be raised to produce revenue gains. Indeed, Professor Heller completed his testimony by recommending a "moderate tax cut of $15 or $20 billion (or even $25 billion if monetary policy tightens a lot) * * *." Again, Professor Heller chooses to speak of "tax cuts" in static, rather than dynamic terms, as if the Treasury would actually lose the $15, $20, or $25 billion in revenues his unspecified tax rate reductions would imply.

Professor Laffer would argue that there would be an absolute revenue loss of those dimensions if the "tax cuts" took the form of rebates, which have no incentive effects on production. But he would further argue the probability that Kemp-Roth, Steiger-Hansen would finance themselves. Indeed, Laffer would expect Steiger-Hansen to finance itself several times over in the first year, and would absolutely not lose the $2 billion in revenues the Treasury calculates by static analysis.

In fact, it is likely that Steiger-Hansen has already financed itself, in the sense that the marketplace since April 7 has reversed its downward trend and become bouyant, expanding production on the mere anticipation of a halving of the capital gains rate. It was on April 7, that Representative STEIGER learned that he had a majority of the House Ways and Means Committee in support of his amendment. In an economy of $2 trillion, with total Federal, State, and local revenues approaching $800 billion annually, it seems reasonable to calculate that at least $2 billion has been added already to Federal, State and local revenues by the economy's reversal due to Steiger-Hansen prospects for success.

Should Steiger-Hansen not succeed in Congress, or be vetoed by the President this fall, economic activity would drop to a lower path. The economists would refer to it as an "inventory recession." The tax base would quickly shrink with several times $2 billion lost to government treasuries.

LAFFERS "UNCERTAINTY"

In his July 13 essay in the Wall Street Journal, Professor Heller quotes Arthur Laffer as having told Newsweek:

There's more than a reasonable probability that I'm wrong."

This was quoted after a floor debate last evening.

This statement must be understood in the context of Laffer's precision as an econometrician. He believes, of course, that there is a very high probability he is right, or he would not risk his reputation in advising the political class on a course of action his academic peers see as unorthodox.

But there is no way for a single mind to know precisely the optimum point on the Laffer curve, which is why there are no numbers on the curve except at the extremes. It is the task of the economist to advise on probabilities to the political class, but the task of the political class to take the risks necessary in groping toward the optimum point on the curve.

In the 1920's, Treasury Secretary Andrew Mellon defended his proposals for sharp tax rate reductions by employing a private sector analogy that rested on the law of diminishing returns. Henry Ford, he said, could produce 1,000 automobiles and charge $1 million each, or he could produce 1 million automobiles and charge $1,000 each. Revenues to Ford Motor Co. would be the same in each instance. Ford, though, is pushed to finding the optimum point on the curve by competition, with the result that he does produce the maximum number of units at the lowest possible price.

The public sector, Mellon continued, has the same range of alternatives in selecting the optimum tax rates, which is the "price" it charges for public goods and services. The public sector, though, has no competition. By its nature, it is monopolistic. There is only one Capitol Hill, only one White House. The political class must find the optimum point on the Curve by internal competition. As in the economic marketplace, tension is between price and volume.

If one political party stresses tax rate reduction and the other stresses increases in the volume of goods and services, we would expect the first party to win elections when the tax rates are in the prohibitive range of the Laffer curve and to lose elections when the tax rates are in the normal range, with the electorate then desiring higher tax rates to finance a higher volume of public goods and services. As an econometrician, Laffer now advises the political class that there is a very high probability tax rates have been inflated into the prohibitive range, and can be reduced with no revenue loss, but there remains more than a reasonable probability he is wrong. Only political competition can make that determination.

IF LAFFER IS WRONG

Professor Heller concludes, in his essay in the Wall Street Journal, that if Laffer is wrong, he may be leading the Republican Party "over the cliff." By the same token, he could as easily conclude that if Laffer is right, he may be leading the Republican Party into a era of political dominance. The political class, though, does not look to a single economic adviser in reckoning a path to dominance, but rather to the electorate itself, for that is where the votes are. If the gen-

eral electorate now believes the tax rates are higher than need be to produce the desired level of goods and services by the Government, it will choose the politician who advocates such price adjustment over the politician who does not. The politician must look not to an economist but to his or her own constituency for such market analysis.

SPENDING CUTS

On the Wall Street Journal editorial page of July 18, Herbert Stein argued "The Real Reasons for a Tax Cut."

This former chairman of President Nixon's Council of Economic Advisers: first, rejects the theory behind the Laffer curve, without saying why; second, supports passage of the Kemp-Roth bill, but suggests phasing in over 4 rather than 3 years; and, third, argues the necessity of concurrent reductions in Federal expenditures, explicitly suggesting that lower tax rates will mean lower revenues will mean more prudence by the political class in expending public funds.

Here, again, is a static analysis of the economy, this time from a conservative Keynesian. But unlike Heller, who believes a "moderate" tax cut of $25 billion (with tight money) will have beneficial effects on the economy, Stein seems to assume to positive effects of a tax cut either through increased demand or increased supply. In this traditional conservative view a tax cut is simply a means of starving the public sector. Indeed, opponents of Kemp-Roth cite Stein's essay as evidence of a "hidden agenda" by conservatives to force a starving of the public section of needed social support programs.

As an adviser to the political class, Stein is simply arguing for a reduction in social spending, a political, not an economic proposal that may or may not find favor with the electorate.

In a dynamic scenario, we would expect sizable reductions in public expenditures for social support programs, but as a natural process that unfolds with economic expansion. In other words, individuals now being supported wholly or partly by the Government "safety net" of welfare payments, food stamps, unemployment benefits, medicaid, and so forth, will be drawn into the expanding private sector. They not only stop drawing resources from the productive economy through tax/spending transfers, they become contributors to the treasuries of Federal, State, and local governments.

There is an implied assumption in the budget forecasts of the Carter administration that nothing can be done to reverse the process by which American citizens are forced to turn to social-support transfers in order to survive. Indeed, the administration appears to make straight-line projections along an upward slope for social spending, with fewer people in the productive sector and more people crammed into the safety net. Thus, spending projections are as static as the revenue projections. The forecasters assume annual rates of inflation in excess of 6 percent in the next 5 years and then calculate an increased revenue flow to the Treasury as a result of an upward shift of the entire work force into higher tax brackets. There is zero allowance for the continuing disincentive effects of this process.

What we should expect to happen to Federal spending as a result of Kemp-Roth, Steiger-Hansen is twofold: An increase in revenues through expansion of the tax/production base. And a reduction in transfer payment expenditures at Federal, State, and local levels, as individuals become ineligible for such payments by virtue of being elevated into more rewarding private sector employment. If only a third of present transfer payments at all levels of Government are reduced thereby, Government outlays shrink by $100 billion per year. If a sixth of transfers are eliminated, outlays fall by $50 billion. If a tenth of transfers are eliminated, the static costs of Kemp-Roth are financed, which, of course, does not include the certain revenue increase over and above Treasury's static assumption of a $98 billion 3-year loss, a figure arrived at by deducting from projected increases in revenues from inflated tax brackets.

These arguments totally refute last night's arguments against Kemp-Roth.●

WHAT'S WRONG WITH WELFARE?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GOLDWATER) is recognized for 5 minutes.

● Mr. GOLDWATER. Mr. Speaker, there is a well known saying that if you give a man a fish, you feed him for a day—if you teach a man to fish, you feed him for life. Obviously, the Government has not followed this philosophy in its policy on welfare programs.

As far back as 10 years ago, Art Naparstek and George Martin, Jr., writing in Current History, said "the thrust of the Government's programs has been to deal with the symptoms of poverty, not its causes." Our policy, they go on to say, "encourage(s) dependency and undermine(s) self-respect."

In analyzing the condition of our welfare programs today, little, if anything, has changed. A recent study conducted by the Joint Center for Urban Studies of MIT and Harvard University shows that the general public's perception of the poor in Amerca is that they are lazy, shiftless, dishonest, prone to illegitimacy and family breakdown, and lack of education. The study also tends to refute the widely held hypothesis that racial prejudice is a major factor behind these popular beliefs.

Professor John Tropman, a Ph. D. in social work at the University of Michigan, has just completed an article in which he discusses these public attitudes toward the poor. According to Tropman, "one reason the poor have been so disliked is that they represent a threat to fundamental values and mores," the work ethic, the sense of "individual responsibility for one's destiny, assumptions central to American culture."

As for the extremely high rate of unemployment among the poor, the lack of sympathy for them seems to be rooted in the belief that the destitute simply do not want to go to work.

Whatever the basis for this perception, the point should certainly be clear to us in Government that the way in which we try to help the poor is worth reevaluation. I can certainly relate to you that the taxpayers in my congressional district resent it when their dollars are handed out to the underprivileged with no beneficial result in the long run. They see it as an example of merely giving a man a fish, instead of teaching him how to catch his own.

I concur. And as a Member of the House I will do what I can to push for an effective welfare reform program. A few weeks ago I told this body of a case in Los Angeles County where a 33-year-old woman claimed to have 48 children, and managed to collect a quarter-million dollars in welfare payments. No doubt this is only one incident of many. But if the Government can take the attitude that public assistance should be a temporary thing—something to help the needy get a start at finding a job, or training for one, then I believe the American people, by and large, will change their perception of those on the bottom rung of society's ladder.●

SOVIET INVASION OF CZECHOSLOVAKIA—A DAY OF SHAME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, on August 21, the people of Czechoslovakia and Americans of Czechoslovakian descent will commemorate the 10th anniversary of the 1968 invasion of Czechoslovakia by the Soviet Union. On this day, about 500,000 men, who were sent by the Soviet totalitarian oppressor, commandeered this peace-loving Czech nation and suppressed all moves toward freedom and liberty, repudiating and negating almost every article in the United Nations Declaration of Human Rights.

This unprovoked act by the Soviet Union serves as a bitter and grotesque reminder to the world that there is no place for belief in human freedom and human dignity in the ideology of the barbaric Soviet authorities running the Kremlin. Today, Soviet brutality and inhumanity still rule in the capitive nation of Czechoslovakia. Therefore, we, as Americans, must be persistent in our continual just support of the Czechoslovak people in their genuine desire for self-determination and freedom from outside domination.

Mr. Speaker, I have cosponsored legislation, House Concurrent Resolution 672, resolving that it is the sense of the Congress that the President should use his influence and leverage to induce the Soviet Union to withdraw all troops occupying Czechoslovakia, and I urge the support of my colleagues in Congress for this bill. The Czechoslovak National Council of America has issued an appeal in commemoration of the sad and disheartening invasion of Czechoslovakia, and a copy of my bill and the appeal follow:

H. CON. RES. 672

Whereas in 1968 Czechoslovakia was a peace-loving country whose government, headed by Alexander Dubcek, enjoyed posi-

tive support from the vast majority of Czechs and Slovaks; and

Whereas the invasion of Czechoslovakia by the military forces of the Soviet Union in 1968 contravened the independence of a sovereign state and denied its peoples the right of self-determination; and

Whereas such an unprovoked intervention was in violation of the United Nations Charter which stipulates that "All Members shall refrain in their international relations from the threat or use of force against the territorial sovereignty or political independence of any state"; and

Whereas the occupation of Czechoslovakia by a fellow member of the United Nations has continued for ten years and alters the European balance of power; and while opponents of such occupation and defenders of human rights are increasingly subjected to harassment, repression, persecution, and incarceration; and

Whereas their continued yearning for freedom has found a new expression in Charter 77, the Human Rights Manifesto which requests of the Government of Czechoslovakia the implementation of the principles of the Final Act as well as adherence to the Czechoslovak Constitution; and

Whereas the signers of Chapter 77 and other champions of human rights in Czechoslovakia continue to oppose and to expose violations of human rights by the Soviet-imposed government of Czechoslovakia: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the President should use his influence and leverage to induce the Soviet Union to withdraw all troops occupying Czechoslovakia and, should such withdrawal not be effected by December, 1978, to—

(1) reevaluate sales of United States commodities and technology to the Soviet Union;

(2) reevaluate all licenses for the export to Warsaw Pact countries who participated in the invasion of all paramilitary and other high technology products, including computers and any other products used in the expansion of industrial development and communications systems;

(3) express support for the people of Czechoslovakia (as they commemorate August 21, 1968, as the "Soviet Day of Shame") in their efforts to achieve the withdrawal of the troops of the Soviet Union from Czechoslovakia;

SEC. 2. It is further the sense of the Congress that the President, acting through the United Nations and other international organizations, should take such additional steps as may be necessary to end as quickly as possible the continuing intervention in Czechoslovakia by the Soviet Union.

CZECHOSLOVAK NATIONAL COUNCIL OF AMERICA

Chicago, Ill., August 21, 1978.

FREEDOM IS INDIVISIBLE

On this sad occasion of the Tenth anniversary of the brutal Soviet-led invasion and occupation of peaceful and freedom-loving Czechoslovakia, we American citizens of Czech, Slovak and Subcarpatho-Ruthenian descent, again remind the entire world of this Soviet violation of key principles of international law incorporated into the Charter of the United Nations:

The brutal Soviet aggression and occupation:

(1) Violated the sovereignty of a member state of the United Nations (Article 2, Section 1);

(2) Was carried out in violation of Article 2, Section 4, which prohibits the use of military force in the relations between individual members of the United Nations;

(4) Was in conflict with Article 2, Section 7, which prohibits outside intervention in matters essentially within the domestic jurisdiction of any state;

(5) Was in conflict with a number of resolutions of the General Assembly of the United Nations, particularly with Resolution 2131 (XXI) adopted at the meeting of December 21, 1965, upon the Soviet Union's own motion, prohibiting any intervention in the domestic affairs of any state and guaranteeing its independence and sovereignity.

The continued Soviet occupation of Czechoslovakia is another crime against the right of a small country to determine its own destiny and aspirations. The invasion was an intervention by the forces of reactionary communism to prevent the Czechs and Slovaks from establishing their own social order that did not endanger anyone and sought to contribute to the building of bridges across the discords of a divided world and to lend aid to a better understanding and cooperation among all nations on the basis of true progress and humanity.

The people of Czechoslovakia have not resigned themselves to these aggressive plans of Moscow. The day of August 21, is being commemorated in Czechoslovakia as a *Day of Soviet Shame* in a mighty and disciplined resistance against Soviet pressure. We are joining our friends in Czechoslovakia in asking the entire civilized world to support the people of Czechoslovakia in their effort to achieve "The withdrawal of Soviet troops from Czechoslovakia." ●

ONCE AGAIN THE ANNUAL CAPTIVE NATIONS WEEK MAKES ITS FUNDAMENTAL POINT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

● Mr. FLOOD. Mr. Speaker, for almost 20 years the annual Captive Nations Week observance has provided us a national forum to reexamine our foreign policy directions. This past 20th observance of the week was no exception. On the contrary, the assemblies, rallies, and events of the week made their fundamental point, namely that a complete policy of human rights will not be attained unless it is posited within the firm and realistic framework of the captive nations ideology, which itself is partly based on the principle of our own American Revolution.

As further points of evidence showing the effectiveness of the week. I commend to the reading of my colleagues the following items: First, the proclamations by Gov. Joseph P. Teasdale of Missouri, Gov. Ella Grasso of Connecticut, Gov. Juan Luis of the Virgin Islands of the United States, and Mayor John E. Reardon of Kansas City, Kans.; second, an article by Stephen S. Rosenfeld in the July 14 Washington Post; and third, two letters of rebuttal to the article, one of which was tersely written by Dr. Lev E. Dobriansky of Georgetown University and chairman of the National Captive Nations Committee:

PROCLAMATION: OFFICE OF THE GOVERNOR, STATE OF MISSOURI

Whereas, the imperialistic policies of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, White Ruthenia, Rumania, East Germany, Bulgaria, Mainland China, Armenia Azerbaijan, Georgia, North Korea, Albania Idel-Ural, Serbia, Crotia, Slovenia, Tibet, Cossackia, Turkestan, North Vietnam, Cuba, and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of people in these conquered nations constitutes a powerful deterrent to any ambitions of communist leaders to initiate a major war; and

Whereas, the freedom-loving peoples of the captive nations look to the United States as the citadel of human freedom and to the people of the United States as leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayers, ceremonies and activities, expressing their sympathy with and support for the just aspirations of captive peoples for freedom and independence:

Now, therefore, I, Joseph P. Teasdale, Governor of the State of Missouri, do hereby proclaim that the week commencing July 16, 1978, be observed as "Captive Nations Week" in Missouri and call upon its citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

OFFICIAL STATEMENT BY THE GOVERNOR: STATE OF CONNECTICUT

For more than 200 years, the citizens of our state and nation have shared a deep devotion to the highest ideals of justice and freedom.

However, many people throughout the world continue to be denied their basic human rights and liberties. In more than 28 countries, social, economic, domestic, political, educational, spiritual and other fundamental liberties are surpressed.

One outstanding organization devoted to promoting a greater public awareness of the plight of these people is the Connecticut Committee for Captive Nations. The dedicated members of the Committee labor diligently to stimulate worldwide support and encouragement for the citizens of these lands.

In recognition of the longing for independence by those men and women who live under oppressive rule, the United States Congress and many of our states annually proclaim Captive Nations Week.

As a tribute by the citizens of our state to the indomitable devotion of those people to liberty and self-determination, I am therefore proud to designate the week of July 16 through 22, 1978 as Capitive Nations Week in Connecticut.

PROCLAMATION BY THE GOVERNOR OF THE VIRGIN ISLANDS

Whereas, the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Serbia, Croatia, Slovenia, Tibet, Cossackia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas, the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human

rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations;

Now, therefore, I, Juan Luis, Governor of the Virgin Islands of the United States, by virtue of the authority vested in me, do hereby proclaim the week of July 16-22, 1978, as Captive Nations Week in the Virgin Islands, and call upon our citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

In witness whereof I have hereunto set my hand and caused the Seal of the Government of the Virgin Islands of the United States to be affixed at Charlotte Amalie, St. Thomas this 14th day of July A.D., 1978.

PROCLAMATION

Whereas, the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czecho-Slovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, George, North Korea, Albania, Idel-Ural, Serbia, Croatia, Slovenia, Tibet, Cossackia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas, the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations:

Now, therefore, I, John E. Reardon, Mayor of the city of Kansas City, Kansas do hereby proclaim the week of July 16-22, 1978, as "Captive Nations Week" in Kansas City, Kansas, and call upon our citizens to join with others in observing this week by offering prayers and dedicating their offorts for the peaceful liberation of oppressed and subjugated peoples all over the world.

THE "CAPTIVE NATIONS" FANTASY

(By Stephen S. Rosenfeld)

Amid the general nastiness pervading Soviet-American relations, there is a readiness in some Washington quarters to make hay out of "Captive Nations Week," coming up next week. The observance treats the communist countries and especially the various Soviet nationality groups as Moscow's captives, and as nations, and calls in effect for the dissolution of the Soviet bloc and the dismemberment of the Soviet Union. To describe it in these true terms is to make plain why Captive Nations Week has never been more than a vehicle of anti-communist and anti-Soviet extremism.

Yet in the current atmosphere a search is on for ways to punish the Kremlin for its political sins, or to convey revulsion without compromising "real" interests like arms control, and the captive-nations idea is a convenient club at hand.

There is something reckless and wrongheaded about the idea, but there is something disarming, too. In the 1960s when many people (including me) were more hopeful about Soviet-American prospects, it was in vogue to dismiss captive nations as an exercise in irredentism and ethnic politics. But that tendency does not have the same force now.

The main reason, I think, is rising awareness of ethnicity. The phenomenon has complex roots and expressions. In its international aspect, it has helped legitimize demands for nationhood on the part of ethnic groups previously held down. It is, after all, quite arbitrary that 30 or 40 tiny ethnic communities of a couple of million or fewer souls should become states while 48 million Ukrainians remain subordinate. If the world can demand nationhood for the 22nd or 23rd Arab group to claim it, whichever the Palestinians are, how can others be denied?

A second reason why the captive-nations concept is not so readily dismissed is the human-rights movement. It has lent respectability to an array of political causes of the right as well as the left, as long as they can somehow claim to assert an individual's or group's "rights."

From the "captive nations" point of view, the Carter administration held high initial promise. It emphasized human rights and generally seemed self-confident and muscular in its approach to Soviet power. Zbigniew Brzezinski had long been on record favoring an activist "bridge building" policy toward East Europe, and viewing the non-Russian Soviet nationalities as the ruling Russian minority's eventual Achilles heel. Early on, the administration pushed for more radio broadcasting in local languages to the Soviet Union and East Europe.

In fact, this promise has not been fulfilled. The human-rights focus has been on individual rights, not nationality rights. The administration has pursued its several predecessors' policy of cultivating East European nationalism with a careful eye to East Europe's judgment of what the traffic with the Soviet Union will bear. There has been no change in the approach, in the limited ways open, to Soviet nationalities. Radio operations go on just as before.

Even in the State Department, the impetus for taming the cold-war element of captive nations is attributed to Brzezinski. The captive-nations people barely got a proclamation out of Carter last year, though the law requires one. In that proclamation and in the new one issued this week, there is only an innocuous appeal for "basic rights."

This is, I would argue, just about right. Politically, the administration will take some heat for its diffidence, although among ethnics themselves only certain subgroups (first-generation emigrants from the Ukraine and Hungary, for instance) seem any longer to care much. The ethnics, traditionally part of the Democratic urban coalition, mostly have other complaints.

Diplomatically, the "captive nations" idea is deeply flawed. To wait for time to etch deeper divisions among Soviet nationalities and impart more self-confidence among East Europeans is one thing. This is happening, more or less, and the United States must puzzle out its long-term consequences.

But to hold out the promise of nationhood to constituent parts of the Soviet Union and to invite East Europe to break completely free of Soviet control is to tempt foolish acts that the United States will inevitably be poorly placed to support. It is thus to heedlessly provoke Soviet power.

At least since the Hungarian uprising, successive administrations have conducted a compromised, halfway policy in respect to the "captive nations," teasing or challenging Soviet power but always within limits. Captive Nations Week indulges the fantasy that the United States need not respect limits. It makes the facile equation that whatever discomfits the Russians benefits us. It is a dream—a dangerous dream.

LETTER TO THE EDITOR,
The Washington Post,
Washington, D.C.

DEAR SIR: Stephen Rosenfeld's article, "The 'Captive Nations' Fantasy" (July 14) is another example of little understanding and great confusion regarding the captive nations idea and Public Law 86-90. Of course, he's not alone in this; in Government the condition is rife. Former President Ford lost an election because of his illusion. The illusions expressed by Rosenfeld, if they continue to be widely nursed, could in time cause us to lose a country as we know it.

Ignoring the heated and supportive verbiage in the article ("anti-Soviet extremism," "fantasy," "dangerous dream," etc.) it is immediately evident, from the viewpoint of substance, that Rosenfeld is badly confused as to concepts and history. Ethnicity and nationality are not synonymous. A Russian in Azerbaijan would be an ethnic and might elect for diverse reasons to become an Azerbaijanian national citizen, not dissimilar from a Chinese coming to our country where we are all ethnics. Even Moscow recognizes Azerbaijan as a nation, not to mention Lithuania, Ukraine, etc. Contrary to Rosenfeld's illusions, none of the compact non-Russian nations in the USSR has to establish its "nationhood." It has it; it even has its nominal republic. What each strives for is its independent statehood which, contrary to the illusions in the article, is not identical with nationhood. In short, the USSR is the last remaining major empire, centered in Russian Moscow, and with the exploitation of these non-Russian resources it is the only real, present threat to our national security.

If an object cannot be accurately defined and analyzed, what can you expect of policy opinions, directions, and decisions? Despite another of Rosenfeld's illusions, East European nationalism extends to the Urals, and non-Russian nationalism in the USSR is a basic reality we must face up to, and all that this implies in terms of Russian economic and political imperialism. If space were permitted, many factual errors and misinterpretations in the article could be elaborated on. Suffice it to say that human rights, as well as poltrade, is old hat for captive nations thought, and we'll assist the Administration in catching up if it is true to its principles and logic; the captive nations context extends well beyond Eastern Europe, and the idea's appeal is scarcely restricted to "ethnics"; and if intelligently and "diplomatically" implemented, the idea would radically transform the global image of the ersatz state known as the USSR. As the evidence well shows, the supreme irony is that Moscow understands this and fears it use; our policy-makers don't fully understand it and thus fear to use it.

Yes, what appears as "fantasy" is the ready product of one's own illusions. Realistic captive nations thought does generate "a dangerous dream," one fit for a dangerous world.

Respectfully,

LEV E. DOBRIANSKY,
Professor, Georgetown University, Chairman, National Captive Nations Committee.

LETTER TO THE EDITOR,
The Washington Post,
Washington, D.C.

DEAR SIR: In his July 14 article on "The 'Captive Nations' Fantasy," Stephen Rosenfeld's views not only distort the historical being of the captive nations but, his con-

clusions as to why they continue to be remembered, ignore reality as well.

Nationhood, which is determined by a permanent population, geographical contiguity, historical background, language, religion, law and distinct customs, exists for the captive nations down to the present. This in and of itself precludes any "promise" of its return. Independent statehood, which allows for a sovereign government with authority and civil rule over its own territory, is what has been lost. The force of nationalism, based on the above and especially applicable to the non-Russiannations and peoples within the Soviet Union, is what Moscow fears the most. Strange that there was never any doubt in questioning the illegitimacy of Nazi Germany, Fascist Italy or Japan, yet there prevails an inordinate fear of dismembering the Soviet Russian Empire by allowing it to pose as a legitimate "country" called the Soviet Union.

Whether they chose to come here for socio-economic reasons or fled revolutions, so-called "ethnics" are no less American than those born and, what Mr. Rosenfeld either refuses or fails to recognize is that, as Americans, they are concerned about their government's policies both domestic and foreign.

What further seems to escape Mr. Rosenfeld is that national rights can hardly be realized while daily injustices prevent the most basic of individual human rights.

If our leaders shy away from moral and political principles be they through proclamations, appeasement, questionable concessions and accommodations or whatever, we, Americans, are free to exercise our right to disagree at any time. Our strength in pursuing "a dangerous dream" was tested a long time ago when Thomas Jefferson swore "upon the alter of God, eternal hostility against every form of tyranny over the mind of man. . . ." ●

Sincerely,

VERA A DOWHAN.

A TRIBUTE TO "TIGER" TEAGUE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. CORNELL) is recognized for 5 minutes.

● Mr. CORNELL. Mr. Speaker, earlier this week this Chamber approved legislation to designate the Veterans' Administration Center in Temple, Tex., as the "Olin E. Teague Veterans' Center." I would like to add my voice to the many Members of this House who have expressed their admiration for our distinguished colleague from Texas, the Honorable OLIN "TIGER" TEAGUE.

The motto of the Veterans' Administration, taken from the words of President Lincoln, commits this Government "to care for him who shall have borne the battle and for his widow and his orphan." The person who has done the most to fulfill this promise has not been a President, however, or an Administrator of the VA, but our friend from Texas, "TIGER" TEAGUE. As a young Congressman, "TIGER" TEAGUE authored the GI bill of rights, which remains the most successful educational scholarship program this Government has ever undertaken. Among the other programs he has conceived and introduced to this House are the war orphans scholarship program, the Vietnam war education program, the VA nursing care program, the serviceman's group life insurance program, and the medical scholarship program.

Most Members of this Chamber would be happy to have one or two major pieces of legislation they have introduced enacted into law. OLIN TEAGUE has been a major force in shaping virtually the complete array of Veterans' Administration programs. Every veteran, indeed every American, owes a great debt to the tireless efforts of "TIGER" TEAGUE.

It is especially appropriate that the VA hospital in Temple be named after our friend and colleague, for "TIGER" spent many months in that hospital recovering from wounds received in World War II. It is truly fitting that this center, which is dedicated to the care of this Nation's veterans, be named after the man who has dedicated his life to serving his country and his fellow veterans.

Mr. Speaker, I hope that this Chamber will long remember the years of hard work, imagination, and dedication that OLIN TEAGUE brought to this Government. He is retiring at the end of this term, thus earning a well-deserved opportunity to devote more time to his family and his private pursuits. I have been honored by the opportunity to serve with "TIGER" on the Veterans' Affairs Committee and know the depths of his commitment to the welfare of the American veteran and his or her survivors. We can do ourselves no greater honor than to acknowledge the contribution of OLIN "TIGER" TEAGUE.●

LET US NOT MUZZLE FREE EXPRESSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FUQUA) is recognized for 5 minutes.

● Mr. FUQUA. Mr. Speaker, I would like to briefly address a situation reported in the press and media the last few days which deeply concerns me.

It involves the smoking dispute among our Nation's leading health officials and the controversy surrounding statements by Dr. Gio Batta Gori, Deputy Director for Cancer Cause and Prevention at the National Cancer Institute.

I certainly do not intend to involve myself or use this platform to argue whether or not smoking limited numbers of certain "less hazardous" cigarettes is "tolerable" from a health standpoint.

My point is much more basic than this. There have been reports that Dr. Gori's position is in jeopardy because he saw fit to make his findings public.

Even the prospect of Dr. Gori losing his livelihood because he gave the American public the benefit of his professional opinion, one I might add that is shared by others, is absolutely ludicrous.

It erodes the very basic cornerstone of freedom, established wisely by our country's founders in the first amendment—the freedom of speech.

To muffle a learned opinion simply because it does not fall in line with your own thinking blatantly violates every principle on which this Nation was founded and stands.

Daily, right here in this very Chamber, we exchange opinions and views which vary greatly at times. It is healthy and it is necessary for a strong democracy.

I submit that the distinguished Secretary of the Department of Health, Education, and Welfare can put his hands over his ears and not listen if he chooses. But let the American people listen and let our learned professionals have the basic right to give us their opinions without fear of reprisals.●

EL PASO CITY PLANNER HAS LEFT HIS MARK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. WHITE) is recognized for 5 minutes.

● Mr. WHITE. Mr. Speaker, my home city of El Paso for the past three decades has enjoyed the distinction of being one of the Nation's fastest developing metropolitan centers. Yet, the city has avoided willy-nilly sprawl; and, indeed, its spectacular growth has been fastidious and controlled. These happy circumstances are due mainly to the excellent activities of Mr. Jonathan R. Cunningham who has been director of planning for the city of El Paso for the past 20 years. Mr. Cunningham is now retiring, and I should like to take note of his brilliant accomplishments for the record, and to thank him in behalf of all of the citizens of El Paso. Monuments to his acumen and his professionalism are plentiful and permanent; and since El Paso has been cited as one of the top ten markets in the country for development potential in the immediate future, the solid groundwork Jon Cunningham has laid for the city will continue to serve us well into the years ahead.●

PROPOSED FEDERAL RESERVE ACT AMENDMENTS OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 5 minutes.

● Mr. REUSS. Mr. Speaker, I am inserting in the RECORD at this point a bill H.R. 13847, amending the Federal Reserve Act, with an explanation that will be useful to Members.

The bill is as follows:

H.R. 13847

A bill to facilitate the implementation of monetary policy and to promote competitive equality among commercial banks

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Federal Reserve Act Amendments of 1978.

REPORTING REQUIREMENTS

SEC. 2. Section 10 of the Federal Reserve Act is amended by adding at the end thereof the following new paragraph:

"The Board may require any depository institution specified in this paragraph to make, at such intervals as the Board may prescribe, such reports of the total amounts of such categories of its liabilities and assets as the Board may determine to be necessary or desirable to enable the Board to discharge its responsibility to monitor and control monetary aggregates. Such reports shall be made (1) directly to the Board in the case of member banks, and (2) to the Board through the (A) Federal Deposit Insurance Corporation in the case of insured State nonmember banks;

(B) National Credit Union Administration in the case of insured credit unions, (C) Federal Home Loan Bank Board in the case of any institution insured by the Federal Savings and Loan Insurance Corporation or which is a member as defined in section 2 of the Federal Home Loan Bank Act, and (D) such State officer or agency as the Board may designate in the case of any other type of bank, savings and loan association, or credit union. The Board shall endeavor to the maximum extent feasible to avoid unnecessary burdens on reporting institutions and the duplication of other reporting requirements, and any data therefrom shall be made readily available to the Board. The Board may classify depository institutions for the purposes of this paragraph, and may impose different requirements on each such class."

RESERVE REQUIREMENTS

SEC. 3. Section 19(b) of the Federal Reserve Act is amended to read as follows:

"(b)(1) For the purposes of this subsection—

"(A) The term 'reservable liabilities' means, in the case of any bank, the amount by which the sum of such bank's deposit liabilities and its net Federal funds and other borrowings which mature 48 hours or less after receipt by such bank exceed its exempted liabilities.

"(B) the term 'exempted liabilities' means, in the case of any bank at any given time, the product of $100,000,000 times the quotient of the nominal gross national product for the calendar year ending not less than 6 nor more than 18 months previously divided by the nominal gross national product for the calendar year 1978, as determined by the Board.

"(C) The terms used in this subsection may be further defined by the Board, consistently with the provisions of this subsection, to such extent as may be necessary to carry out the purposes thereof.

"(2) Any reference in this Act to member banks with respect to any requirement or authority relating to reserves required by this section shall be deemed to apply to all banks which are actually required to maintain reserves under paragraph (4) or (5) of this subsection.

"(3) Any bank shall be subject to reserve requirements if—

"(A) it is neither a savings bank nor a mutual savings bank as defined in sections 3(f) and 3(g) of the Federal Deposit Insurance Act, and

"(B) it is either an insured bank as defined in section 3(h) of the Federal Deposit Insurance Act or a bank which is eligible under section 5 of that Act to make application to become an insured bank.

"(4)(A) Except as provided in subparagraph (B) of this paragraph, all banks subject to reserve requirements shall maintain reserves against their reservable liabilities (in excess of zero) in the ratio of 6.0 per centum, or in such other ratio not greater than 6.5 per centum and not less than 5.5 per centum as the Board may by regulation prescribe solely for the purpose of implementing monetary policy.

"(B) Upon a finding by the Board that extraordinary circumstances require such action, the Board may impose reserve requirements outside the limits otherwise prescribed by subparagraph (A) of this paragraph for a period not exceeding 30 days but which may be extended for further periods not exceeding 30 days by affirmative action by the Board in each instance. The Board shall promptly transmit to the Congress a report of any exercise of its authority under this subparagraph and the reasons for such exercise.

"(5) If the Board determines that such action is necessary to the implementation of monetary policy, then in addition to any reserves required to be maintained pursuant to paragraph (4) of this subsection, any bank subject to reserve requirements shall maintain reserves in such ratios as the Board may prescribe against

"(A) net balances owed by domestic offices of banks in the United States to their directly related foreign offices and to nonrelated foreign banks and

"(B) loans to United States residents made by overseas offices of banks with offices in the United States.

"(6) During any period that a bank is maintaining reserves pursuant to paragraph (4) of this subsection, such bank shall be entitled to all the privileges of membership in the Federal Reserve System except that, if it is not otherwise a member, it may not hold stock in, or vote for any director of, a Federal Reserve bank.

"(7) A nonmember bank which is subject to reserve requirements but whose reservable liabilities do not exceed zero shall be entitled to the same discount and borrowing privileges as member banks during any period that the Federal Deposit Insurance Corporation or the appropriate State supervisory authority certifies to the Federal Reserve bank in whose district such nonmember bank is located that such discount and borrowing privileges are needed in order to enable such bank to function on a safe and sound basis in meeting the needs of the community served by such bank.

AUTHORITY OF STATE BANK SUPERVISORS

SEC. 4. Nothing in this Act or in the amendments made by this Act shall be construed in derogation of the authority of any officer or agency of any State over any institution organized or existing under the laws of such State.

EFFECTIVE DATES

SEC. 5. (a) The amendment made by section 2 of this Act shall take effect on the first day of the sixth calendar month which begins after the date of enactment.

(b) The amendment made by section 3 of this Act shall take effect on July 1, 1979, or such earlier date as may be designated by the Board of Governors of the Federal Reserve System.

Mr. Speaker, the committee has held hearings on proposals dealing with the payment of interest on bank reserves and the problem raised by the Federal Reserve, erosion of membership.

The purpose of our hearings was to develop legislation which would facilitate and improve the conduct of monetary policy, promote competitive equity, and resolve the Federal Reserve System's membership problems, with minimal cost.

Two problems relating to the conduct of monetary policy have been highlighted at our hearings. The first problem concerns the Federal Reserve's inability to obtain accurate up-to-date information on the location and quantity of deposits and cash in the banking system. There was a definite consensus that the Federal Reserve should be able to obtain whatever information it needed to control the money supply from all depository institutions.

The second problem is caused by differences in reserves requirements by class of bank and type of deposit. Requirements now range from zero to 16¼ percent. As the public switches among demand, savings, and time deposits of various maturities, and as deposits are transferred between banks of different sizes and between member and nonmember banks, the average reserve requirement changes. As a result, the amount of deposits which the banking system can create with any given amount of reserves also changes. These unexpected changes can become cumulative and result in long-lasting undesired departures from announced money supply target ranges. The hearings produced a general consensus that a system of more uniform reserve requirements would greatly improve the ability of the Federal Reserve to control the money supply.

Any system of nearly uniform reserve requirements must contain rates which would maintain the viability and competitive equity of smaller banks. This is most sensibly and easily achieved by exempting small banks from reserve requirements. Such banks would, of course, continue to hold vault cash and interbank clearing balances in order to carry on their daily business.

During the hearings, testimony was heard on four proposals before the committee. These were:

First. The first bill, H.R. 13476, introduced at the request of the Federal Reserve, would extend reserve requirements to demand deposits and transactions accounts in all depository institutions. It would also permit the Federal Reserve to collect information relative to monetary control directly from these institutions.

Second. The second bill, H.R. 13477, also introduced at the request of the Federal Reserve, would authorize payment of interest on required reserves. It would limit the total payments to 7 percent of the Federal Reserve Banks' net earnings plus receipts from the sale of services to member banks. This bill was estimated to cost more than $500 million per year.

Third. A third bill, H.R. 12706, introduced by Mr. STANTON and cosponsored by 12 other members, calls for explicit pricing of services and authorizes payment of interset on reserves at a rate of up to the average yield on 3-month Treasury bills during the preceding quarter. It also calls for a study and the impact of permitting member banks to invest some of their reserves in U.S. Treasury securities.

Fourth. A fourth proposal, an amendment to the Stanton bill, contained five provisions: Payment of interest on reserves, but no more than the amount collected from sale of services and earnings from discounts and advances; fixed reserve requirements on a progressive scale, with banks under $10 million in demand deposits exempt from reserve requirements; tying of the discount rate to the average yield on 3-month Treasury bills; authorization for the Fed to collect the information it needs for monetary purposes from all depository institutions through the regulatory agencies; and, transfer of the Fed's $575 million surplus to the Treasury.

While substantial objections were found to all these proposals, persuasive arguments were made that the desired goal of better monetary control, equity among banks, and elimination of an unfair cost of Fed membership could nevertheless be achieved by other methods.

Taking into account views expressed

during the hearings, and considerations suggested by the Secretary of the Treasury in a letter to Chairman REUSS of August 4, 1978, the following simple bill is proposed:

TITLE I

Authorize the Federal Reserve to collect through the appropriate regulatory agencies current liability and asset data from all depository institutions needed for monetary control purposes.

TITLE II

Restructure reserve requirements so that all reserveable liabilities of all commercial banks (demand deposits, time and savings deposit, and overnight bank borrowings) will be subject to a uniform 6 percent reserve requirement, variable up to 6.5 percent and down to 5.5 percent by the Board of Governors for purpose of monetary control only. In extraordinary circumstances, the Board may waive the limits temporarily with an explanation to Congress. The limits also may be waived for certain foreign related deposits. The first $100 million in reserveable liabilities will be exempt for all banks. Federal Reserve membership for State chartered banks, as at present, would continue to be voluntarily; non-member banks subject to the reserve requirement (that is, with more than $100 million in reserveable liabilities) would be given full access to the discount window and Federal Reserve services. Other non-member banks will have access to the discount window upon certification of need by the FDIC or appropriate state bank supervisory authority. As at present, membership for State banks could be obtained by paying in the statutory proportion of their capital, on which they receive 6 percent interest, and would of course receive full membership benefits including the right to vote for Directors of the Federal Reserve banks. The $100 million exemption in reserveable liabilities would be indexed to the previous year's changes in nominal GNP.

Mr. Speaker, the earlier proposal for tying the discount rate to the Treasury bill rate by statute would be eliminated.

Another proposal to turn over $575 million of Fed surplus to the Treasury would be eliminated. Instead, effort would be made outside the bill to permit the orderly transfer of the entire $1 billion plus reserve (which is unnecessary and not required by statute) to the Treasury for general purposes. While this is essentially a bookkeeping item it would have the desirable effect of reducing the national debt and the deficit by that amount.

The question of charging for services would be left to Federal Reserve regulation. House Banking Committee legal staff has concluded that this would not require congressional action. Such action would be required for the payment of interest on reserves.

EFFECTS OF THE PROPOSAL

First. The first $100 million of reservable liabilities will be exempt from reserve requirements for all banks. Thus banks with less than $100 million in reservable liabilities would be totally exempted from reserve requirements, which removes the major cost burden of Fed membership. All but some 1,100 of the Nation's nearly 14,000 banks will be exempt from any Federal reserve requirements.

Some 780 of those 1,100 banks will be subject to reserve requirements are already member banks and hold reserves. That leaves 330 nonmember banks with over $100 million of reservable liabilities that would become subject to reserve requirements. Many of these 330 nonmember banks are foreign banks, which under the International Banking Act of 1978 now nearing legislative completion, would be required to hold reserves anyway, and would, of course, get the same benefits as domestic banks.

Second. Virtually all member banks which would continue to have to hold required reserves would have their reserve requirements substantially reduced. Only banks which now have extremely high proportions of total deposits in savings and time deposits could be adversely affected.

Third. The membership question will be essentially resolved by the revisions in reserve requirements. First, smaller banks would face no real membership burden. Second, since all banks with liabilities over $100 million would have to hold reserves, whether members of the Fed or not, a major incentive for large banks to withdraw from the Fed would be eliminated.

Fourth. A uniform 6 percent requirement on reserveable liabilities in excess of $100 million would improve monetary control. It would minimize the problem that now exists because of the shifting of deposits among demand, savings and time deposits and among banks with differing marginal reserve requirements.

Fifth. The Fed would have unrestricted power to change reserve requirements temporarily in extraordinary circumstances, and would retain discretionary authority to adjust reserve requirements up or down one-half percentage point for purposes of monetary control. These limits are designed to proscribe the Federal Reserve's power to set what are in reality taxes on banks.

Sixth. All banks of comparable size would be treated alike in terms of Federal Reserve requirements, thus providing competitive equity. A commercial bank cannot gain a competitive advantage on the basis of lower reserve requirements by changing from membership to nonmembership status.

Seventh. For large banks, reserve requirements will be reduced on demand deposits and raised on savings and time deposits. Thus they will compete more aggressively for demand deposits and less aggressively for savings and time deposits. As a result, small banks and thrift institution will be able to compete more effectively for savings and time deposits, especially for long maturity CD's. The housing industry should benefit.

Eighth. The discount window would be open to nonmember banks with more than $100 million in reserveable liabilities. This will give assurance of liquidity for the major banks.

Ninth. Nothing in the bill would divest State bank supervisors of jurisdiction or authority. Nonmember banks of over $100 million reservable liabilities, while required to hold reserves, would not have to become members of the Fed and would not be brought under Federal Reserve regulation in any way. (If a State-chartered bank should choose to join the Fed, it would then simply be examined by the Federal Reserve instead of the FDIC; it would still be subject to State regulation, supervision, and examination.)

Tenth. The cost to the Treasury would be far less than any previous proposals. The pretax cost will be under $150 million per year compared to the $705 million involved in the Fed's proposal to cut reserve requirements for larger banks and pay interest on reserves. These cost estimates assume Federal Reserve imposition of $410 million in charges for services, as contained in the Fed's own proposal, and no payment of interest on reserves.

The reduced cost is achieved by requiring all banks with over $100 million to maintain reserves, instead of paying interest on reserves as an inducement to remain in the Fed. Furthermore, payment of interest on reserves would result in most of the dollar outlay going to the biggest banks, which are least likely to withdraw from the Fed anyway.

SUPPORT FOR THESE PRINCIPLES FROM WITNESSES

Federal Reserve access to more data for purposes of monetary control was strongly supported by the Independent Bankers Association, the Federal Deposit Insurance Corporation, the American Bankers' Association and Beryl Sprinkel, executive vice president and economist, Harris Trust & Savings Bank of Chicago.

George A. LeMaistre, Chairman of the Federal Deposit Insurance Corporation, commenting on whether the Fed needs discretionary power to set reserve requirements for purposes of monetary control, said,

What the Federal Reserve does need to conduct monetary policy effectively is information about monetary aggregates.

The American Bankers' Association testified:

The gathering of additional information from non-member institutions, provided the data are needed for monetary policy purposes and that data gathering is done in a way that minimizes the reporting burden placed on those institutions, has our support.

The Independent Bankers Association stated:

To improve the Fed's capability to manage monetary policy it may only be necessary to authorize it to obtain summary statistics on assets and liabilities of all depository institutions as proposed in an amendment to the Stanton bill.

Beryl Sprinkel stated:

It can be demonstrated that the Federal Reserve can regulate the money supply with zero reserve requirements so long as it is able to determine the monetary base.

Restructuring of reserve requirements at a flat rate received strong support.

The FDIC stated:

Estimating the impact on the monetary aggregates of a particular change in reserves becomes more difficult when different banks are subject to different reserve requirements. . . ., a shift of funds among member banks has precisely the same effect of blurring the precision of monetary policy that disturbs the Federal Reserve when nonmember banks are involved.

The ABA testified:

But economists in the banking industry believe that a much greater source of instability is the graduated levels of reserve requirements among banks who are already members of the Fed. Elimination of these

differences would be a significantly greater contribution to monetary stability—and an act of simple fairness to the institutions involved.

Milton Friedman stated in a letter:

Differential requirements simply introduce unnecessary random variations into the relation between total reserves available and the total money supply as a result of shifts of deposits between different banks and different categories of deposits.

Beryl Sprinkel stated:

The "conduct of monetary policy" would be improved by adopting uniform reserve requirements for banks rather than the present system of variable reserve requirements.

Reduction of reserve requirements was strongly supported.

The FDIC stated, in opposing uniform reserve requirements, that:

Equity can be achieved in other ways—such as paying interest on reserves, permitting reserves to be held in the form of marketable securities, or reducing reserve requirements.

The ABA stated:

We believe reduction in reserve requirements should be the preferred method used to alleviate the current membership burden.

Greater access to the discount window also received support.

Chairman LeMaistre of the FDIC suggested "some means * * * to make that service (discount window) available to all banks." He noted that if a bank is in difficulty, a loan is "sometimes necessary" to work out a purchase assumption agreement or merger. He recommended making the discount window open to nonmembers upon certification by the FDIC.

TABLE I.—*Total cost to the Government of a 6-percent Uniform Reserve requirement with the $100 million exemption*

[Dollars in billions]

Current total required reserves (based on Dec. 31, 1977 call data)	$36.9
Required reserves of member banks under the 6-percent plan	26.4
Required reserves of 330 nonmember banks with over $100 million in reservable deposits under the 6-percent plan	2.7
	29.1
Total required reserves under the 6-percent plan	−29.1
Total reserves released under the 6-percent plan	7.8

[Dollars in millions]

Annual earnings on $7.8 billion reserves at 7 percent	$546
Less expected annual receipts from selling services	−410
Total cost	136

ASSASSINATIONS COMMITTEE DENIES WRONGDOING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. STOKES) is recognized for 5 minutes.

● Mr. STOKES. Mr. Speaker, on Monday, August 7, 1978, allegations were made against one of the investigators of the Select Committee on Assassinations by a man in St. Louis.

Following is a statement made to the press in behalf of the Select Committee, on Thursday, August 10, 1978.

The Select Committee will continue further investigation into this matter, and you may be assured that we will draw to the attention of the House the material that develops from this investigation.

STATEMENT OF G. ROBERT BLAKEY

On Monday, August 7, 1978, a man who has been associated with an attorney for the convicted assassin of Dr. Martin Luther King, Jr. held a press conference in which he made several serious allegations concerning the conduct of an investigator for the Select Committee on Assassinations. The man making the charges has given a statement under oath to the Committee, though he has never been an employee of the committee.

Since the integrity of the committee's investigation of the assassination of Dr. King has been questioned, the committee is looking into the allegations. The investigator charged with misdeeds, a law enforcement officer who has a top secret security clearance based on an extensive background examination of his character, has been interviewed, as have other members of the committee staff who may have had information concerning the investigator's conduct.

On the strength of a preliminary investigation, the committee categorically denies each and every allegation of wrongdoing. It states with assurance that no federal, state or local law or any rule of the House or of the committee has been violated by the investigator or by any other member of the committee staff.

The committee will continue to conduct a complete investigation of the allegations. If any indication of wrongdoing is uncovered, prompt and appropriate action will be taken and brought to public attention. The committee is determined that the American people will not be misled by attempts to discredit the committee and its investigation.●

PERSONAL STATEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

● Mr. WEISS. Mr. Speaker, the following is how I would have voted on several rollcall votes had I been present:

Rollcall No. 656, an amendment to H.R. 13635, Department of Defense appropriations, striking the $3 million appropriation for the AVCR–1360 diesel engine. This amendment was defeated by a vote of 269 to 107. I was paired in favor of the amendment and would have voted for the amendment.

Rollcall No. 657, an amendment to H.R. 13635, increasing appropriations for the Army's food research programs by $1 million. This amendment was defeated by a vote of 277 to 103. I would have voted against this amendment.

Rollcall No. 658, an amendment to H.R. 13635, permitting up to 10 percent of the appropriated funds for contracts to be used for payments under contracts in labor surplus areas. This amendment was defeated by a vote of 213 to 165. I would have voted in favor of this amendment.

Rollcall No. 659, an amendment to H.R. 13635, prohibiting use of funds for procurement of vehicles not manufactured in the United States. This amendment was defeated by a vote of 302 to 72. I would have voted against this amendment.

Rollcall No. 660, an amendment to H.R. 13635, striking language establishing a limitation on the competitive rate program for the transportation of household goods. This amendment was passed by a vote of 269 to 96. I was paired in favor of the amendment, and would have voted in favor of it.

Rollcall No. 661, an amendment to H.R. 13635, reducing total appropriations in the bill not required by law by 1 percent. This amendment was defeated by a vote of 222 to 136 with 1 voting "present." I would have voted in favor of this amendment.

Rollcall No. 662, an amendment to H.R. 13635, reducing total appropriations in the bill not required by law by 2 percent. This amendment was defeated by a vote of 252 to 102. I was paired in favor of this amendment and would have voted for it.●

THE TAX CREDIT FIGHT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. SCHEUER) is recognized for 5 minutes.

● Mr. SCHEUER. Mr. Speaker, there has been a great deal more heat than light generated from debate on the Packwood-Moynihan legislation. Yesterday's lead editorial in The Washington Star reflected my deeply held feeling that this legislation is right as rain for our country at this time in our history and offers to all of our parents educational opportunities which many of them have until this point been unfairly denied.

I am sure my colleagues will be impressed with this thoughtful statement.

The editorial follows:

[From the Washington Post, Aug. 10, 1978]

THE TAX CREDIT FIGHT

As the Packwood-Moynihan tuition tax credit bill works its way toward crucial Senate floor action, the quality of the debate steadily deteriorates. What its sponsors view as a measure to promote diversity, choice and fiscal equity in education is denounced as a budget-busting money grab by the rich, or—as *The Washington Post* pronounced the other day—a "radical and ill-considered reversal of longstanding American values . . . a fundamental assault on the public schools," and even a boon for racial segregation.

These conflicting perceptions of the bill cannot be bridged, even allowing for the usual excesses of editorial rhetoric. And indeed the bill clearly raises issues—constitutional, fiscal and educational—of a fundamental sort.

If you think that American education, especially in the lower grades, is always to be a public monopoly; or that "root, hog, or die" must be the iron rule for private religious education; or that the First Congress

erected "an eternal wall of separation between church and state," the case for the tax credits is weak indeed.

Happily, those principles, however fervently urged by secular educational lobbies or editorial writers, are largely subjective. They are nowhere chisled in stone. Still less are they to be found in the Constitution. The Constitution is silent as to how Americans shall elect to educate their children. All it says about religion, apart from banning religious tests for office, is that Congress (and now, by judicial interpretation, the states) may not promote "an establishment" nor interfere with its free exercise.

Set aside the dubious—at times even hysterical—claim that tuition tax credits constitute some sort of foul play against American principles, and what is left? A few practical questions of policy, it seems to us. Would the program injure or strengthen public education? Would it encourage or discourage the proliferation of so-called "segregation academies"? Would it accentuate or arrest racial disparity in education?

It is unthinkable, to us at least, that Congress would seriously contemplate a measure that threatened the basic place of public schools in U.S. education. That primacy is all but universally conceded, and the reasons for it well understood. Rather, the anxieties about the future of public schools, given tuition tax credits, seem to stem from a vast insecurity. The notion, we gather, is that clients of public education are a captive audience, awaiting an incentive to bolt.

Such fears, we faithfully believe, are overwrought. But even if some parents do feel "trapped" in deteriorating and undisciplined public schools (especially in the inner cities), and would welcome an escape hatch, we can attach no other meaning to the ideal of American cultural diversity than that they should have that option. That option is always open to the well-to-do, who usually have mobility to move to the suburbs or the money to pay the steep price of private education, whether or not a fraction of that price may be subtracted from income tax bills—or both.

Prof. James S. Coleman touched on this point in a recent supportive letter to Senator Moynihan. Tax credits, he suggested, "will help give low income people some of the educational opportunity for their children that high income people already have. In a sense," he continued, "it provides an aid to parents to rescue their children from school situations that they find bad; and . . . this is especially the case for black parents who are locked into a given residential situation." Professor Coleman's view has been echoed and endorsed by a number of black scholars, including Thomas Sowell and Walter Williams.

But suppose that a substantial number of public school clients did seize tax credits as an average of "escape." Are the public schools so fragile, so far gone in demoralization and in discipline, as to be incapable of responding? Or would keen competition spur them to reform and to compete? The latter, we firmly believe.

Of course, the nitty-gritty of the matter, politically speaking, is the ageless quarrel over public help for schools of religious affiliation, mainly Roman Catholic. It is notable that every recent Democratic presidential candidate, including Mr. Carter, has given handsome pledges to the Catholic educational community. In an October 1976 letter to the Association of Chief Administrators of Catholic Education, Mr. Carter wrote that he was "firmly committed to finding constitutionally acceptable methods of providing aid to parents whose children attend parochial schools." As governor of Georgia, he said, he had supported "annual grants for students attending non-public colleges" and he was of the view that "we must develop similar supportive programs at the national level for nonpublic elementary and secondary schools if we are to maintain a healthy diversity of educational opportunity." Senator Moynihan himself could hardly have stated the promise more clearly. But as everyone has noticed, Mr. Carter's explicit pledge has gone a-glimmering now that he is faced with an opportunity to make good on it. Why that is so, we can't imagine. But if the president finds it expedient to renege he owes the Catholic educators at least an equivalent legislative alternative.

Of all the attacks on the tuition tax credit proposal, the shabbiest is the insinuation that they are a sugar-coated scheme for promoting racial segregation in the schools. In fact, the main—and the neediest—beneficiaries would be Catholic parochial schools with an old and honorable record of racial equity. And as for the so-called "segregation academies" mushrooming up across the South at the heels of school integration, their students, insofar as racial exclusiveness is their aim, would be ineligible under the tax laws. So much is clearly provided in the latest draft of the bill.

We recognize, again, that there are those who fervently believe that the bill is not in the national interest; that this country is better off with a public monopoly of educational funds. Obviously, keen opposition to the Packwood-Moynihan bill can be squared with that outlook. It cannot, however, be squared with the profession of faith that educational and cultural diversity are what this nation is all about—or should be.

NUCLEAR AND THE ENERGY FREEDOM OF THE WEST

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PRICE. Mr. Speaker, I have, over the past two decades, followed closely what the Soviets have been doing in the nuclear energy field. Their dedication to the use of this energy source to the ultimate degree in the military area is known to all of us. I have also found that the efforts being applied to the development of nuclear energy for civilian purposes is also obviously aimed at attaining a position of technological leadership in the world and, as indicated by the construction program now in progress, at the utilization of this energy source. This effort covers all of the promising concepts of nuclear reactions—the fission reaction, including the breeder concept, and nuclear fusion reactions.

One aspect of the Soviets' civilian nuclear energy program which has interested me is the role perceived in the Soviet Union toward this energy source in an ideological sense and from the standpoint of international politics. In this respect we fortunately have an excellent insight on these matters from an article which was published in the June issue of the "Bulletin of the Atomic Scientists." This article, entitled "Nuclear and the Energy Freedom of the West" was prepared by the internationally renowned Soviet scientist, Prof. A. D. Sakharov. He is probably more generally known at the present time for his designation as a dissident in the Soviet Union. Without dwelling on this aspect of his career at this time, I would like to call the attention of my colleagues to the fact that Professor Sakharov holds a position of preeminence in nuclear sciences as the developer of Soviet nuclear weapons and power reactors. This work of his has involved him in all aspects of nuclear technology. I wanted to mention this point to establish his qualifications in the field of nuclear energy.

I would like to include Professor Sakharov's article in its entirety at the close of my remarks for the benefit of all of my colleagues. A few of the highpoints of his important statement deserve emphasis. Sakharov first reviews the advantages of nuclear energy over oil or coal from the standpoint of safety and environmental impact. He decries the lack of understanding of the antinuclear elements in our own society of these facts. He specifically emphasizes the greater ease of solving the waste problem of nuclear energy compared to fossil-fueled energy sources. He goes on to cover all of the factors that are continually brought up by the anti-nuclear elements in our society—proliferation, nuclear fuel resources, and our modern society's need for energy—and disposes of them from the standpoint of a knowledgeable professional.

Then he goes on concerning the international and ideological aspects of the energy in general and nuclear energy in particular which warrants our special attention. He said:

> Therefore I assert that the development of nuclear technology is one of the necessary conditions for the preservation of the economic and political independence of every country—of those that have already reached a high development stage as well as of those that are just developing. For the countries of Western Europe and Japan, the importance of nuclear technology is particularly great. If the economy of these countries continues to be in any important way dependent on the supply of chemical fuels from the USSR or from countries which are under her influence, the West will find itself under constant threat of the cutting off of these channels. This will result in a humiliating political dependence. In politics, one concession always leads to another and where it will finally lead is hard to foresee.

He then refers to the time when, as he says, he was "one of the boys" in the Soviet Union and had access to the top planning activities in the Soviet Union. He refers to the political interests which exist in the Soviet Union to create and exploit energy shortages in the West. He even mentions the possibility that the campaign in our own society against the development of nuclear energy may be inspired by the U.S.S.R. He admits that he has no reliable facts to substantiate such an effort, but I believe his mentioning of this possibility should be noted by us as a sobering factor when we contemplate our energy dilemma. He then ends his article with the following:

> What is involved here is not just comfort, or preservation of the so-called quality of life, but the much more fundamental problem of economic and political independence, and the preservation of freedom for their children and grandchildren.

I join him in his expression of hope that we will all agree on the proper de-

cision in time and increase our utilization of nuclear energy at a greater rate. The political independence and the preservation of freedom considerations to which he refers as justification for the utilization of nuclear energy mandate this step.

The article follows:

NUCLEAR AND THE ENERGY FREEDOM OF THE WEST

(By A. D. Sakharov)

One often hears on the radio or reads in the press about demonstrations involving thousands of people, about speeches by well or not well-known statesmen, about various campaigns in the Western countries—all directed against the development of nuclear energy production, against construction of nuclear power stations, against breeders, etc. Although I felt rather amazed by this and even somewhat indignant, for a long time I restrained myself from any public statement, especially since, naturally, nothing of this kind takes place in the USSR. Gradually, however, I came to the conclusion that this subject deserves attention and that I have something to say about it.

The basic reason for anti-nuclear feelings among people is probably the fact that they do not have sufficient information about the complex and very specialized problems involved. Due to this lack of information, the natural and legitimate concern of contemporary man for preservation of his environment is misdirected.

It is difficult to explain to a nonspecialist (though it is actually true) that the nuclear reactor of a nuclear power station is nothing like an atomic bomb, that the power station burning coal or oil offers much greater danger and harm to the environment as well as a biological threat to people than does a nuclear station or breeder reactor of the same capacity rating.

Many responsible statesmen of the West, industrial leaders and nuclear scientists have now come to understand (though belatedly) that it is necessary to bring the basic technical facts to the attention of the public. They now understand the need for large-scale scientific and technical propaganda. This is truly very important. Hans Bethe, Nobel laureate in physics, wrote an excellent, well-argued article on "The Necessity of Fission Power," which was published in the Scientific American in January 1976. Bethe is the author of theoretical works on thermonuclear processes in the stars, on quantum electrodynamics and nuclear physics. His works are a part of the history of physics. European readers probably know also the name of the physicist F. Janouch who has repeatedly expressed himself on the same subject.

I am in complete accord with the reasoning of these and many other authoritative writers.

The development of nuclear technology has proceeded with much greater attention on the problems of safety techniques and preservation of the environment than the development of such branches of technology as metallurgy, coke chemistry, mining, chemical industry, coal power stations, modern transportation, chemicalization of agriculture, etc. Therefore, the present situation in nuclear power is relatively good from the point of view of safety and possible effects on the environment. The ways to improve it further are also quite clear. The basic peculiarity that distinguishes nuclear technology from that using chemical fuels is the high concentration and small volume of the dangerous by-products and the small size of the process as a whole. This makes it easier to solve the safety and environmental problems for a nuclear power station than it is for a power station using coal, oil, etc.

At the same time it is obvious that it is necessary to force the pace of development of nuclear technology, since it is the only economically feasible method—available in the next few decades—of replacing the use of oil. (According to most estimates, oil will become both too expensive and scarce by the end of the century due to the exhaustion of convenient deposits and increased extraction costs.) Moreover, it is very important not only to construct "conventional" nuclear power stations working on enriched uranium, in which the rare uranium isotope uranium-235 is used, but also to solve the problem of producing fissionable material from the main uranium isotope and eventually from thorium.

This will make it economically feasible to utilize poor uranium ores, large deposits of which are found in the Earth's crust. Later this will make it possible to utilize thorium ores, the deposits of which are even more abundant. As is well known, fast neutron reactors (breeders) are only one of the possible solutions of this problem. Both their engineering design and the development of safety measures are well advanced. Apparently, in the near future it will become necessary to start building industrial fast-neutron reactors. Naturally, maximum attention to safety measures will be called for.

I have already written about one possible alternative solution to the problem of producing fissionable materials, and I would like to mention it here. (I have also emphasized that I am not the originator of this idea.) I am speaking about a proposal to build a large underground chamber (probably with a hermetically sealed heat-proof, corrugated shell) in which explosions of especially prepared thermonuclear charges of minimal power are caused to occur periodically. The products of such explosions are subsequently withdrawn from the chamber and processed. With charges of this kind, very effective production of fissionable material can be attained by letting the neutrons from the thermonuclear reaction be absorbed by uranium or by thorium. Of course, attractive as this idea is, there are many serious difficulties in its implementation.

One other problem, much discussed in the literature, is the possible theft of fissionable materials from a power station or from a reprocessing plant. The stolen materials could be used to produce a primitive atomic bomb. As far as the possibility of theft is concerned, I think that proper organization and technical security measures will make such a possibility minimal. Besides, one can hardly envy the thief who would dare to steal a fuel rod from a nuclear reactor: most likely he himself will perish and the plutonium contained in one rod will not be sufficient to produce an atomic bomb.

As far as the possibility of producing a "do-it-yourself" atomic bomb is concerned, I am bound by security regulations, as Bethe evidently is. However, like Bethe, I can assure readers that this is a very complex procedure, not easier than, for example, building a "do-it-yourself" space rocket. In addition, one can assume that the individual obtaining a working atomic bomb will be handicapped by the denaturing of plutonium and other fissionable materials with neutron-active additives.

The whole problem of nuclear energy production should be considered from more than just the economic and technical points of view. In the rest of this article, I want to discuss the international and political implications of this problem. When I had already started working on this article, I happened to hear on the radio a broadcast about a book by the English astrophysicist Fred Hoyle. I have not read this book but judging from the broadcast, Fred Hoyle's point of view and his apprehensions are close to mine.

Policy-makers always assume, not without reason, that one of the many factors in determining the political independence of a country, its military and diplomatic strength and its international influence is the level of economic development of a country and its economic independence. This assumption is doubly valid in the case of two world systems opposing each other. But the level of a country's economy is determined by its energy technology: that is, by the utilization of oil, gas and coal at present; of uranium and thorium in the near future; and, perhaps, deuterium and lithium in the more distant future, when the very complex technical problems of controlled thermonuclear synthesis will have been solved.

Therefore I assert that the development of nuclear technology is one of the necessary conditions for the preservation of the economic and political independence of every country—of those that have already reached a high development stage as well as of those that are just developing. For the countries of Western Europe and Japan, the importance of nuclear technology is particularly great. If the economy of these countries continues to be in any important way dependent on the supply of chemical fuels from the USSR or from countries which are under her influence, the West will find itself under constant threat of the cutting off of these channels. This will result in a humiliating political dependence. In politics, one concession always leads to another and where it will finally lead is hard to foresee.

I have already had an opportunity to tell about a statement of an important Soviet official which I heard in 1955 when I still could be considered "one of the boys." He was talking about the reorientation of Soviet policy in the Near East, about the support of Nasser in order to create an oil crisis in Western Europe and thus obtain an effective lever for exerting pressure on her. Now the situation is much more complex and full of nuances. But some parallels undoubtedly exist. There exists a political interest on the part of the USSR in exploiting energy shortages in the West.

Is the present campaign against the development of nuclear power inspired by the USSR (or other countries of Eastern Europe)? I know of no reliable facts supporting this. If this were so, then insignificant and unnoticeable efforts are sufficient substantially to influence the dimensions of this campaign because of widespread anti-nuclear prejudice and lack of understanding of the inevitability of the nuclear era.

I must end this article on the same note that I started it. People must have the opportunity, that is, the knowledge, and the right to consider the mutually connected economic, political and ecological problems involved in the development of nuclear power, as well as the problems involved in alternative ways of economic development. And they must have the opportunity to consider these issues soberly and responsibly, without unfounded emotions and prejudices. What is involved here is not just comfort, or preservation of the so-called quality of life, but the much more fundamental problem of economic and political independence, and the preservation of freedom for their children and grandchildren. I am sure that in the end a proper decision will be reached.●

TUITION TAX CREDITS—A BREAK FOR THE POOR AND MINORITIES

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD.)

● Mr. SEIBERLING. Mr. Speaker, in an article in yesterday's Washington Post, Roy Innis, the national director of the Congress of Racial Equality, makes a very strong argument in behalf of tui-

tion tax credits at the elementary and secondary levels as having "a tremendous potential impact on poor and minority youngsters throughout this country by giving them what they desperately need: options."

Mr. Innis points out that until now the parents of these children have had no choice and no power in deciding where their children would be educated and what the quality of the education would be. He states that tuition tax credits tend to shift the power from those who control, that is the educational establishment, to those they control, that is the parents and kids.

Mr. Innis adds that the schools have often failed poor and black people in the past, but that this legislation will provide a competitive stimulus to the public schools. In his words:

The presence of even the comparatively small number of alternatives, even just the potential of parents' being able to reject a school that is not doing its job, can work great changes in the public schools. Innovation in both public and private education would be stimulated by a tuition tax credit.

Mr. Speaker, the full text of Mr. Innis' article follows these remarks:

A TAX BREAK FOR BETTER EDUCATION

(By Roy Innis)

CORE is an organization that has gone through many battles for educational quality and that today is rooted in major black communities throughout the nation. We believe the passage of tuition tax credit at the elementary and secondary levels will have a tremendous potential impact on poor and minority youngsters throughout this country by giving them what they desperately need: options.

The arguments advanced against tuition tax credits fall into three categories: constitutional, fiscal and philosophical. To those who say, as Sen. Ernest F. Hollings (D-S.C.) did in a Washington Post op-ed column Aug. 7, "The scheme is blatantly unconstitutional. Every Supreme Court decision and all the constitutional scholars agree on that score," we would reply: wrong. Respected constitutional scholars have weighed in on both sides of the issue. Moreover, we are willing to take our chances on the constitutionality of this bill, which has an expedited court hearing provision. We shouldn't forget that there were those who said *Plessy v. Ferguson* was the law of the land and shouldn't be challenged.

Much has been said about the fiscal implications of the bill. Those objections have been met by the Senate Finance Committee, which on Aug. 3 changed the bill to make the cost comparable to the administration's alternative. Those who vote against it are not voting on the basis of cost. They are voting against the revolutionary philosophy that the bill embodies.

And make no mistake. This bill will indeed have a revolutionary effect on millions of poor parents and children in this country. Those are the parents and children who until now have had no choice—and with no choice, no power. What is revolution, after all, but a shift of power? We are proposing that we shift the power from those who controlled (i.e., the educational establishment) to those they controlled (parents and kids).

Now we have come to what the fight is really all about. Black people have had to rely in the past on the public schools of this country to educate our children and enable our people to better their conditions. Those schools have often failed us. They have been sadly wanting not only in the efficacy of their teaching but even in their inability to guarantee the safety of our children. It is for that reason that CORE has established community schools and supports the efforts of parents who seek a better education for their children in private and parochial schools. Those parents who are willing to make an investment in their children's future deserve a credit.

But this bill is not just for the parents who exercise their option. We at CORE have not given up on the public schools; we recognize that whatever legislation is passed, the majority of American children—and the vast majority of minority children—will be educated in public schools. We know we must find a way to make the public schools better, to make them responsive to their constituency.

To us, it is perhaps most important that this legislation would provide a competitive stimulus to the public schools. The presence of even the comparatively small number of alternatives, even just the potential of parents' being able to reject a school that is not doing its job, can work great changes in the public schools, innovation in both public and private education would be stimulated by a tuition tax credit.

This measure, to borrow the words of an earlier time, would empower the people—and that's the question of philosophy. We believe it is time that the laws of this country give more than lip service to freedom of choice and quality education.●

LEAVE OF ABSENCE

(By unanimous consent, leave of absence was granted to:)

Mr. GIAIMO (at the request of Mr. WRIGHT), for today on account of representing the House at the papal funeral.

Mr. RISENHOOVER (at the request of Mr. WRIGHT), after 1 o'clock today through August 17, on account of official business.

Mr. RODINO (at the request of Mr. WRIGHT), for today, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CORCORAN) to revise and extend their remarks and include extraneous material:)

Mr. KEMP, for 5 minutes, today.

Mr. GOLDWATER, for 5 minutes, today.

(The following Members (at the request of Mr. PATTERSON of California) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. FLOOD, for 5 minutes, today.

Mr. CORNELL, for 5 minutes, today.

Mr. FUQUA, for 5 minutes, today.

Mr. WHITE, for 5 minutes, today.

Mr. REUSS, for 5 minutes, today.

Mr. STOKES, for 5 minutes, today.

Mr. WEISS, for 5 minutes, today.

Mr. SCHEUER, for 5 minutes, today.

Mr. LUNDINE, for 30 minutes, on August 14.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. CORCORAN) and to include extraneous matter:)

Mr. SCHULZE.

Mr. ANDERSON of Illinois.

Mr. DERWINSKI.

Mr. EMERY.

Mr. DUNCAN of Tennessee.

Mr. LUJAN.

Mr. DORNAN.

Mr. RHODES.

(The following Members (at the request of Mr. PATTERSON of California) and to include extraneous material:)

Mr. ANDERSON of California in three instances.

Mr. OBEY.

Mr. GONZALEZ in three instances.

Mr. MOTTL.

Mr. FOLEY.

Mr. ROONEY.

Mr. EDGAR.

BILLS PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on August 10, 1978, present to the President, for his approval, bills of the House of the following title:

H.R. 2777. To provide for consumers a further means of minimizing the impact of inflation and economic depression by narrowing the price spread between costs to the producer and the consumer of needed goods, services, facilities, and commodities through the development and funding of specialized credit sources for, and technical assistance to, self-help, not-for-profit cooperatives, and for other purposes; and

H.R. 10787. To authorize appropriations for activities and programs carried out by the Secretary of the Interior through the Bureau of Land Management.

ADJOURNMENT

Mr. PATTERSON of California. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 50 minutes p.m.), under its previous order, the House adjourned until Monday, August 14, 1978, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4765. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sale of certain defense equipment to Israel (transmittal No. 78–70), pursuant to section 813 of Public Law 94–106; to the Committee on Armed Services.

4766. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment to the Republic of China (transmittal No. 78–73), pursuant to section 813 of Public Law 94–106; to the Committee on Armed Services.

4767. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sale of certain defense equipment to Spain (transmittal No. 78–76),

pursuant to section 813 of Public Law 94–106; to the Committee on Armed Services.

4768. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment to Thailand (transmittal No. 78–78), pursuant to section 813 of Public Law 94–106; to the Committee on Armed Services.

4769. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sale of certain defense equipment to Iran (transmittal No. 78–82), pursuant to section 813 of Public Law 94–106; to the Committee on Armed Services.

4770. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment to Korea (transmittal No. 78–86), pursuant to section 813 of Public Law 94–106, to the Committee on Armed Services.

4771. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment to the Republic of China (transmittal No. 78–93), pursuant to section 813 of Public Law 94–106; to the Committee on Armed Services.

4772. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Israel (transmittal No. 78–70), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4773. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Israel (transmittal No. 78–71), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4774. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to the Republic of China (transmittal No. 78–73), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4775. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Pakistan (transmittal No. 78–75), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4776. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Spain (transmittal No. 78–76), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4777. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Korea (transmittal No. 78–77), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4778. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Thailand (transmittal No. 78–78), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4779. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Iran (transmittal No. 78–79), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4780. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Iran (transmittal No. 78–80), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4781. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Iran (transmittal No. 78–82), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4782. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Korea (transmittal No. 78–83), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4783. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Israel (transmittal No. 78–84), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4784. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Israel (transmittal No. 78–85), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4785. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Korea (transmittal No. 78–86), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4786. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to the Republic of China (transmittal No. 78–88), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4787. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Thailand (transmittal No. 78–89), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4788. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Spain (transmittal No. 78–90), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4789. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Iran (transmittal No. 78–92), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4790. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to the Republic of China (transmittal No. 78–93), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4791. A letter from the Administrator, U.S. Environmental Protection Agency, transmitting the first annual report of the Task Force on Environmental Cancer and Heart and Lung Disease, pursuant to section 402 of the Clean Air Act Amendments of 1977 (Public Law 95–95); to the Committee on Interstate and Foreign Commerce.

4792. A letter from the Principal Deputy Under Secretary of Defense (Research and Engineering), transmitting a report on Department of Defense procurement from small and other business firms for October 1977, pursuant to section 10(d) of the Small Business Act, as amended; to the Committee on Small Business.

4793. A letter from the Comptroller General of the United States, transmitting a report on the need for improving the process of removing certain employees from the Federal personnel system (FPCD–78–71, August 10, 1978); jointly, to the Committees on Government Operations, and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ZABLOCKI: Committee on International Relations. H.R. 11942. A bill to restore effective enforcement of the antitrust laws. (Rept. No. 95–1397, Pt. II). Referred to the Committee of the Whole House on the State of the Union.

Mr. MOAKLEY: Committee on Rules. House Resolution 1311. Resolution providing for the consideration of H.R. 11622. A bill to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas, petroleum, petroleum products, and certain other materials, to provide standards with respect to the siting, construction, and operation of liquefied natural gas and liquid petroleum gas facilities, and for other purposes (Rept. No. 95–1476). Referred to the House Calendar.

Mr. THOMPSON: Committee on House Administration. House Resolution 1297. Resolution to provide for the orderly shipment of official records and papers of Members of the House of Representatives (Rept. No. 95–1477). Referred to the House Calendar.

Mr. STAGGERS: Committee of conference. Conference report on S. 3040. (Rept. No. 95–1478). Ordered to be printed.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 13655. A bill to amend the Public Health Service Act to revise and extend the program of assistance under that act for health maintenance organizations; with amendment (Rept. No. 95–1479). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 13650. A bill to authorize the Secretary of Energy to enter into cooperative agreements with certain States respecting residual radioactive material at existing sites, to provide for the regulation of uranium mill tailings under the Atomic Energy Act of 1954, and for other purposes; with amendment (Rept. No. 95–1480, Pt. I). Ordered to be printed.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 13611. A bill to strengthen and improve the early and periodic screening, diagnosis, and treatment program, and for other purposes (Rept. No. 95–1481). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 11979. A bill to amend section 5 of the Department of Transportation Act; relating to local rail service assistance; with amendment (Rept. No. 95–1482). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee on Agriculture. H.R. 12101. A bill to amend the Farmer-to-

Consumer Direct Marketing Act of 1976 for the purposes of directing the Secretary of Agriculture to make grants to assist persons in developing innovative methods of direct marketing and extending the authorization of appropriations of such act, and for other purposes; with amendment (Rept. No. 95-1483). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee on Agriculture. H.R. 13750. A bill to implement the International Sugar Agreement between the United States and foreign countries; to protect the welfare of consumers of sugar and those engaged in the domestic sugar-producing industry; to promote the export trade of the United States; and for other purposes; with amendment (Rept. No. 95-1484, Pt. I). Ordered to be printed.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 11733. A bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, for highway safety, for mass transportation in urban and in rural areas, and for other purposes; with amendment (Rept. No. 95-1485). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. FITHIAN (for himself, Mr. HAMILTON, and Mr. STANGELAND):

H.R. 13834. A bill to suspend the duty on freight cars until the close of June 30, 1982; to the Committee on Ways and Means.

By Mr. FOLEY (for himself, Mr. AMMERMAN, Mr. BALDUS, Mr. BEDELL, Mr. BRECKINRIDGE, Mr. BROWN of California, Mr. GLICKMAN, Mr. HARKIN, Mr. HIGHTOWER, Mr. JENRETTE, Mr. JONES of North Carolina, Mr. NOLAN, Mr. ROSE, Mr. WEAVER, Mr. MCHUGH, and Mr. ZABLOCKI):

H.R. 13835. A bill to authorize the establishment of an international emergency wheat reserve, and for other purposes; jointly, to the Committees on Agriculture and International Relations.

By Mr. HANSEN:

H.R. 13836. A bill to facilitate the implementation of monetary policy and to promote competitive equality among commercial banks; to the Committee on Banking, Finance and Urban Affairs.

By Mr. HUGHES:

H.R. 13837. A bill to amend section 319(a) of the Immigration and Nationality Act to provide that spouses of members of the Armed Forces of the United States need not petition for naturalization in a State in which they have resided for 6 months; to the Committee on the Judiciary.

By Mr. JEFFORDS:

H.R. 13838. A bill to amend the Agricultural Act of 1949 for purposes of providing that milk shall continue to be supported at not less than 80 percent of the parity price for milk until October 1, 1981, and for other purposes; to the Committee on Agriculture.

By Mr. MOAKLEY:

H.R. 13839. A bill to amend the Railroad Retirement Act of 1974 to eliminate the reduction of railroad retirement annuities by amounts payable as social security benefits in cases of persons who had at least 10 years of service, and had attained the age of 65 as of the effective date of such act; to the Committee on Interstate and Foreign Commerce.

By Mr. MOTTL:

H.R. 13840. A bill to authorize the appropriation of the funds necessary to enable the Inspector General, as the supervisory authority in the investigative operations of the Department of Health, Education, and Welfare, to perform his congressionally mandated functions in combating fraud and abuse in programs administered by that Department; to the Committee on Government Operations.

H.R. 13841. A bill to amend part A of title IV of the Social Security Act to provide increased Federal matching of State expenditures for management information systems and fraud control units under the AFDC program; to the Committee on Ways and Means.

H.R. 13842. A bill to amend the Internal Revenue Code of 1954 and the Social Security Act to allow the disclosure of the mailing address of an individual for use in collecting certain unpaid student loans and for use in verifying information given by an applicant for such a student loan, and for other purposes; to the Committee on Ways and Means.

H.R. 13843. A bill to direct the Secretary of Health, Education, and Welfare to more effectively obtain records of deaths for the purpose of preventing fraud and waste in payments under the Social Security Act; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

curity Act to broaden and regularize State and Federal matching of records for purposes of the various welfare programs and certain related programs; jointly, to the Committees on Ways and Means, Interstate and Foreign Commerce.

H.R. 13844. A bill to amend the Social Se-

By Mr. PANETTA (for himself, Mr. RICHMOND, Mr. SYMMS, Mr. NOLAN, Mr. SISK, and Mr. VOLKMER):

H.R. 13845. A bill to amend the Perishable Agricultural Commodities Act; to the Committee on Agriculture.

By Mr. RANGEL (for himself, Mr. BIAGGI, Mr. CLAY, Mr. DOWNEY, Mr. FISH, Mr. GARCIA, Mr. GUYER, Mr. HANLEY, Mr. LUNDINE, Mr. MCEWEN, Mr. MCHUGH, Mr. MADIGAN, Mr. MITCHELL of Maryland, Mr. NOWAK, and Mr. RICHMOND):

H.R. 13846. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income amounts received as prizes in connection with the New York State olympic lottery; to the Committee on Ways and Means.

By Mr. REUSS (for himself, Mr. ST GERMAIN, Mr. MITCHELL of Maryland, Mr. MOORHEAD of Pennsylvania, Mr. MINISH, Mr. ANNUNZIO, Mr. FAUNTROY, Mr. NEAL, Mr. PATTERSON of California, Mr. BLANCHARD, Mr. LAFALCE, Mrs. SPELLMAN, Mr. DERRICK, Mr. HANNAFORD, Mr. LUNDINE, Mr. PATTISON of New York, Mr. CAVANAUGH, Ms. OAKAR, Mr. VENTO, Mr. BARNARD, Mr. WATKINS, and Mr. GARCIA):

H.R. 13847. A bill to facilitate the implementation of monetary policy and to promote competitive equality among commercial banks; to the Committee on Banking, Finance and Urban Affairs.

By Mr. VANIK (for himself and Mr. LEDERER):

H.R. 13848. A bill to carry out the obligations of the United States under the International Sugar Agreement, 1977; to protect the welfare of consumers of sugar; and for other purposes; jointly, to the Committees on Agriculture, and Ways and Means.

By Mr. BEVILL:

H.R. 13849. A bill to protect the confidentiality of the identities of certain employees of the Central Intelligence Agency; jointly, to the Select Committee on Intelligence and the Judiciary.

By Mrs. MEYNER (for herself, Mr. MANN, and Mr. ZEFERETTI):

H. Con. Res. 692. Concurrent resolution requesting the President to convene a White House Conference on Foreign Trade; jointly, to the Committees on International Relations, and Ways and Means.

MEMORIALS

Under clause 4 of rule XXII,

465. The SPEAKER presented a memorial of the Legislature of the State of Texas, relative to a constitutional amendment requiring a balanced annual Federal budget; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

527. By the SPEAKER: Petition of the board of directors, ERAmerica, Washington, D.C., relative to extending the time period for ratification of the equal rights amendment; to the Committee on the Judiciary.

528. Also, petition of the Better Roads and Transportation Council, Denver, Colo., relative to the proposed Surface Transportation Act of 1978; to the Committee on Public Works and Transportation.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 11280

By Mr. FRENZEL:

—On page 292, line 15, strike the word "or".

On page 292, line 16, after the word "Panel;" insert the following: "or (H) the Federal Election Commission;".

H.R. 11280

By Mr. HANNAFORD:

—Page 200, line 13, insert "(a)" after "SEC. 308.".

Page 200, after line 20, insert the following new subsection:

(b)(1) Section 8339 of title 5, United States Code, relating to computation of annuity, is amended by adding at the end thereof the following new subsection:

"(n)(1) An employee or Member who, at the time of retiring—

"(A) if married, notifies the Office of Personnel Management under subsection (j) of this section that he does not desire any spouse surviving him to receive an annuity under section 8341(b) of this title; or

"(B) if unmarried, does not elect a reduced annuity under subsection (k)(1) of this section;

may, during a period of one year beginning on the date of the retirement of such employee or Member, elect a reduced annuity with a survivor annuity under subsection (j) or (k)(1) of this section, as the case may be, if during such period such employee or Member deposits into the Fund the amount specified in paragraph (2) of this subsection.

"(2) The amount to be paid under paragraph (1) of this subsection is an amount equal to the sum of—

"(A) the full amount by which the annuity paid to such employee or Member would have been reduced for the period beginning on the date of his retirement and ending on the date on which he makes an

election under paragraph (1) of this subsection if he had elected at the time of retirement to receive a reduced annuity under subsection (j) or (k)(1) of this section, as the case may be; plus

"(B) interest on such amount at the average annual interest rate earned during such period by securities held by the Fund.

"(3) An election by an employee or Member under paragraph (1) of this subsection voids prospectively any election previously made by such employee or Member under subsection (j) or (k)(1) of this section.

"(4) An annuity which is reduced by reason of an election made under paragraph (1) of this subsection shall be reduced by the same percentage reductions as were in effect at the time of the retirement of the employee or Member whose annuity is so reduced.

"(5) Rights and obligations resulting from the election of any reduced annuity under this subsection shall be the same as those rights and obligations which would have resulted had the employee or Member involved elected such annuity at the time of retiring.".

(2)(A) Section 8339(j) of title 5, United States Code, is amended by adding at the end thereof the following new sentence: "An employee or Member who, at the time of retirement, elects not to receive a reduced annuity under this subsection may, as provided in subsection (n) of this section, later elect to receive such an annuity.".

(B) The first sentence of section 8339(k) of title 5, United States Code, is amended—

(i) by inserting "or as provided in subsection (n) of this section" before ", an unmarried employee"; and

(ii) by inserting after "retired employee or Member" the following: ", except that an election under subsection (n) of this section may be made only with respect to an individual who had an insurable interest in such employee or Member at the time of the retirement of such employee or Member".

(3)(A) Subject to the provisions of subparagraph (B), the amendments made by this subsection shall apply with respect to employees and Members retirng before, on, or after the date of enactment of this Act.

(B)(i) For purposes of applying the provisions of paragraph (1) of section 8339(n) of title 5, United States Code, as added by this subsection, to employees and Members retiring before the date of enactment of this Act—

(I) the period referred to in such paragraph shall be considered to begin on the date of the enactment of this Act; and

(II) the amount referred to in such paragraph shall be computed without regard to the provisions of paragraph (2)(B) of such section 8339(n) respecting interest.

H.R. 11280

By Mr. LEVITAS:

—On page 137, line 12 after "(ii)" insert the following: "the Federal Bureau of Investigation,".

—On page 213, line 5 after "(B)" insert the following: "the Federal Bureau of Investigation,".

—On page 257, line 17 strike out after "through" and insert the following: "(c)(1) and (c)(3) through (g) of ".

—On page 258, line 15 after "Code" and before the parenthesis insert the following: "and section 5108(c)(2) of title 5, United States Code".

—On page 273, line 15 after "(B)" insert the following: "the Federal Bureau of Investigation,".

H.R. 11280

By Mr. FISHER:

—Page 221, line 25, insert 'the preceding sections of" after "purpose of".

Page 221, insert after line 22 the following:

"3137. Annual report by the General Accounting Office

"The General Accounting Office shall submit to each House of the Congress on or before March 1 of each year a report on the Senior Executive Service which shall contain, based on audits and reviews which shall be conducted by the Office during the year covered by the report, an assessment of—

"(1) the extent to which the laws, rules, and regulations governing employment in the Senior Executive Service have been complied with; and

"(2) the effectiveness and soundness of management by senior executives.

Page 220, line 12, insert "by the Office of Personnel Management" after "report".

Page 222, in the matter following line 15, strike out the items relating to sections 3135 and 3136 and insert in lieu thereof the following:

"3135. Biennial report by the Office of Personnel Management.

"3136. Regulations.

"3137. Annual report by the General Accounting Office.".

—Page 225, strike out line 15 and all that follows down through line 24 and insert in lieu thereof the following:

"(c)(1) The Office of Personnel Management shall establish one or more qualifications review boards, as appropriate, the members of which shall be appointed on the basis of their knowledge of public management and other appropriate occupational fields. It is the function of the boards to certify the managerial qualifications of candidates for entry as career appointees into the Senior Executive Service in accordance with regulations prescribed by the Office of Personnel Management. Of the members of each board—

"(A) one-half shall be career appointees; and

"(B) the other half shall be appointed from outside the civil service, not more than half of whom shall be adherents of the same political party.

—Page 272, strike out lines 19 through 24 and insert in lieu thereof the following:

EFFECTIVE DATE; EXPERIMENTAL APPLICATION

SEC. 503. (a) The amendments made in this title shall take effect as provided in this section. Not later than 60 days after the date of the enactment of this title, the Director of the Office of Personnel Management shall prescribe regulations providing for an initial, experimental application of the amendments made by this title. Such regulations shall provide that the merit pay system and the cash award program will apply with respect to positions only in the 3 Executive departments designated by the Director for the initial, experimental applications under section 415 of this Act of the amendments made in sections 401 through 412 of this Act and the provisions of section 413 of this Act.

(b) Within 30 days after the end of each of the first two full fiscal years to which such amendments apply, the Director shall prepare and transmit to each House of the Congress a report on the merit pay system and the cash award program, including an evaluation of their effectiveness and the manner in which they are administered. The second such report shall include proposed regulations which would provide for adjustments which would be appropriate in the event such system or such program does not continue by reason of subsection (c).

(c) The provisions of the regulations under subsection (a) providing for an initial, limited experimental application with respect to the merit pay system and the cash award program shall cease to have effect and the amendments made by this title relating to such system and such program shall have full effect (without regard to the limitations under subsection (a)) beginning on the 90th day of continuous session of Congress following the date on which the second annual report is transmitted to Congress under subsection (b) of this section, unless the Congress before such day adopts a concurrent resolution which states that the Congress does not favor the continuance of such system or such program. If such a resolution is adopted with respect to such system or such program before such date, then the provisions of such regulations and such amendments relating to such system or such program, as the case may be, shall cease to have effect on such 90th day (or, if later, 30 days after the date of the adoption of such resolution).

(d) For purposes of subsection (c), the continuity of a session of Congress shall be considered to be broken only by an adjournment of the Congress sine die, and the days on which either House of the Congress is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in the computation of the 90-day period under such paragraph.

—Page 272, strike out lines 19 through 24 and insert in lieu thereof the following:

EFFECTIVE DATE; EXPERIMENTAL APPLICATION

SEC. 503. (a) The amendments made in this title shall take effect as provided in this section. Not later than 60 days after the date of the enactment of this title, the Director of the Office of Personnel Management shall prescribe regulations providing for an initial, experimental application of the amendments made by this title. Such regulations shall provide that the merit pay system and the cash award program will apply with respect to positions only in 3 Executive departments designated by the Director.

(b) Within 30 days after the end of each of the first two full fiscal years to which such amendments apply, the Director shall prepare and transmit to each House of the Congress a report on the merit pay system and the cash award program, including an evaluation of their effectiveness and the manner in which they are administered. The second such report shall include proposed regulations which would provide for adjustments which would be appropriate in the event such system or such program does not continue by reason of subsection (c).

(c) The provisions of the regulations under subsection (a) providing for an initial, limited experimental application with respect to the merit pay system and the cash award program shall cease to have effect and the amendments made by this title relating to such system and such program shall have full effect (without regard to the limitations under subsection (a)) beginning on the 90th day of continuous session of Congress following the date on which the second annual report is transmitted to Congress under subsection (b) of this section, unless the Congress before such day adopts a concurrent resolution which states that the Congress does not favor the continuance of such system or such program. If such a resolution is adopted with respect to such system or such program before such date, then the provisions of such regulations and such amendments relating to such system or such program, as the case may be, shall cease to have effect on such 90th day (or, if later, 30 days after the date of the adoption of such resolution).

(d) For purposes of subsection (c), the continuity of a session of Congress shall be considered to be broken only by an adjournment of the Congress sine die, and the days on which either House of the Congress is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in the computation of the 90-day period under such paragraph.

EXTENSIONS OF REMARKS

ASSISTANCE FOR SENIOR VETERANS

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Ms. MIKULSKI. Mr. Speaker, today I am introducing a resolution to assist the senior veteran. The veterans who valiantly served the United States during WW I, WW II, and the Korean and Vietnam wars received certain commitments from this country, and I feel that we have now reached a point in time when we must consider a new aspect of that commitment.

When the men were called to fight for the United States during WW II, they had to make many sacrifices. These men, who so bravely served in the Armed Forces, had to leave their jobs and their education in the lurch and their families behind. When they returned from several years involvement in a victorious war, these men found their lives in a state of flux. It was then that the GI bill and veterans preference, besides other benefits, were initiated to help reward these men for their accomplishments, and also more importantly, these benefits were meant to help the men readjust and to make up for lost time.

Now we have reached a new phase. These veterans now have different concerns and priorities. They no longer need to worry about financing their own education or finding a job after finishing school or just finding a first job after being released from the service.

What these men, whose average age is 58, are most concerned about is planning for the future making sure that they will be able to continue to take care of their families if they become ill. A heart attack, a stroke, cancer, or any catastrophic illness can easily deplete a family's hard earned lifetime savings. We must now face the new direction of veterans concerns.

There are currently 26 million WW II vets out of a total veterans' population of 29 million. The Veterans' Administration, within the next 10 years, will have to change its focus to adapt its services to be able to handle the new wave of aging veterans. New needs will have to be satisfied by the Veterans' Administration and new services developed which have not been previously in demand. For that reason, I am introducing legislation which calls for the Veterans' Administration to prepare and to submit to the Veterans' Affairs Committees of both the House and the Senate a plan which specifically details how it will handle the influx of senior veterans. I believe that it is important that this plan should include:

(1) Providing retirement counseling and planning services for senior veterans.

(2) Converting unused acute-care hospital facilities under the jurisdiction of the Administrator to long-term care facilities.

(3) Expanding the number of hospital-based home care units under the jurisdiction of the Administrator.

(4) Expanding and improving long-term care and catastrophic health care programs of the Veterans' Administration.

(5) Establishing new facilities to provide daytime care—in lieu of nursing home care—for senior veterans who are able to live with their families.

(6) Establishing hospice programs for terminally ill senior veterans.

(7) Extending health care services to surviving spouses of veterans.

The Veterans Administration needs to have concrete and dynamic plans to best serve the aging veteran, and I believe that my legislation will assist the Veterans' Administration in better providing for those needs.●

RESOLUTION ON EQUATORIAL GUINEA

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. DORNAN. Mr. Speaker, yesterday and the day before, I called the attention of this House to the brutal murders taking place in the tiny country of Equatorial Guinea. Yesterday, at a luncheon I sponsored for the Roman Catholic Bishop of Equatorial Guinea, Bishop Rafael Nze Abuy, 12 of our distinguished colleagues heard of the terrible atrocities being perpetrated on these poor people by this demoniacal regime. We heard of the intensity of Cuban and Soviet interest in using this cruel government, and in using the strategic location of the nation's island territories.

Today, I am asking every Member of this House who has voiced strong support for the U.S. campaign for human rights, to join with me in cosponsoring this resolution condemning the murder of innocent people in this small African country and in protesting the total elimination of the Catholic faith.

I am asking every Member of this House to stand forth and support whatever efforts can be made, no matter how limited, to stop this slaughter and end this nightmare.

The text of my resolution follows:

H.J. RES. —

Whereas the President-for-Life of Equatorial Guinea, Francisco Macias Nguema, having replaced the government of his country with a brutal personal tyranny, has begun and pursues a campaign of persecution against religion, and genocide against his own people;

Whereas, reliable reports indicate that as many as 50,000 people have died in the persecutions of the Macias government;

Whereas, in addition, Macias has lent his country to the use of other nations whose forces' presence in Equatorial Guinea not only threatens the independence of that nation but also the security of neighboring states and the peace of the world; be it

Resolved, That the Senate and the House of Representatives of the United States abhor and condemn the Macias tyranny;

Further, that they call upon the United States government to use its offices to encourage countries with interests in Equatorial Guinea to employ their influence towards the end of eliminating persecution of religion and genocide in Equatorial Guinea;

Further, that they call upon member nations of the world community to support any and all other measures that may end the persecution of religion and genocide in Equatorial Guinea except measures that could threaten the independence or territorial integrity of the nation.●

WHAT U.S. BUSINESS IS WEARING OVERSEAS TODAY

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. BOB WILSON. Mr. Speaker, as a former advertising man and now a Member of Congress with a great concern for our system of free enterprise, I cannot but help noting the steps we have taken in recent years that ties the hands of our own, uniquely American, private industry. At home and abroad, government seems to delight in placing obstacle after obstacle in the path of business. Competition is always rough, but maybe if government would decide to let a free domestic and international marketplace work, we might even surprise ourselves as the following advertisement by Pullman, Inc. tells us.

I include this in the RECORD as a portion of my remarks:

WHAT U.S. BUSINESS IS WEARING OVERSEAS TODAY

If you think it's easy to do business overseas today, chances are you aren't carrying an American passport.

The whole world of international business has to fight against competition, distance, language, and cultural awkwardness, currency problems and other generalized obstacles to success.

But with an American passport, you also get to struggle against restrictions of your own government. While your counterparts in other countries are encouraged, supported, funded, and actively facilitated by theirs.

Despite it all, the capital-producing creativity of American business has never been equalled by any other system or society on earth.

Pullman's engineering and construction operations, for example, have taken U.S. plant technology to places that you just can't get to from here, with everything from

blueprints to bridges to transportation to financing.

Even with both hands tied behind our backs U.S. business has the strength to prevail.

Cut us loose and who knows what wonders you might see?●

IN TRIBUTE TO GEORGE MAHON

SPEECH OF

HON. CLARENCE E. MILLER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 9, 1978

● Mr. MILLER of Ohio. Mr. Speaker, when the Congress concludes its business this year, it will mark the end of an era that has spanned more than four decades. Representative GEORGE HERMAN MAHON, the dean of the House of Representatives, announced last summer that he will retire with the close of the 2d session of the 95th Congress. He is the dean of the House because he has served the people of Texas here for 44 years. He is the only Congressman the 19th District of west Texas has ever had. Without question, he is one of the best ever to serve in Government.

As a member of the House Appropriations Committee, he has earned my respect and admiration. I have been particularly impressed by his manner and style—as honest as he is lean and intense. He has the uncanny ability to raise a point without raising the roof. He has the style of a minister and the effectiveness of a diplomat. His philosophy of long-standing demands the careful attention of today's Congress: "pay for it, or put it off until we are willing or able to do so."

GEORGE has stood by that philosophy for 44 years, but it has never been more important than now. His service in the House will remain as a monument to governmental integrity and public service responsibility. Always busy, but then, never too busy to listen, to comment, to direct, to advise or assist on a matter of far-reaching importance or an issue of relative insignificance. He will leave his place as nothing less than a great statesman, and a fine gentleman.

The Congress has changed dramatically in four decades. Critical issues have come and subsided. Arguments can be made that changes have been for the better or otherwise. There is one point which cannot be debated: that GEORGE MAHON has served this House, this Nation and the people of his district well. So well, that the Congress, in actuality, will never be the same again. We will not be as rich. We will not be as blessed.

George Will's column in the Washington Post shortly after Mr. MAHON announced his retirement last summer best captures the quality of our distinguished colleague. With your permission, I would like to enter Mr. Will's remarks in the RECORD at this point.

AN UNRETIRING CHAIRMAN HAS DECIDED TO RETIRE

He was born with the century, in 1900, in Mahon, La., but soon his family, 10 strong, moved to Texas. There, mother kept the children's noses in books, including the one read on countless 19th century hearths—"Pilgrim's Progress."

In 1934, West Texans sent George H. Mahon to Congress, where Lyndon Johnson was a staffer. Mahon began wrestling with the nation's budget when Jimmy Carter was wrestling with high school algebra.

Today, after 43 years of service, Mahon is senior to all his colleagues. He is retiring at the end of this term because he would be 80 before the end of another. That is a poor reason for the House, or any other institution, to lose the services of a man whose abilities remain formidable.

Mahon is six-feet-two, erect and lean. He looks as though he was whittled from a fence post by the West Texas wind. His capacious memory is papered, floor to ceiling, with poetry and hymns, which sometimes ring down the fairways when he is golfing.

This morning he poses on the Capitol steps with a small regiment in bright polyester, Texas ladies here to keep an eye on Congress. Returning to his office, he passes a congressman leaving the House floor in shirt sleeves and murmurs disapproval of the slack standards of the age.

He is one of the last links with the New Deal, but his credo as chairman of the House Appropriations Committee has been less Hyde Park than West Texas. "Pay for it or put it off until we are willing or able to do so."

When he was born, there were 26,000 federal workers in Washington. By 1940 there were 166,000, about the number the Department of Health, Education and Welfare employs today. Don't blame Mahon.

Rep. Thomas Reed of Maine, Speaker of the House when Mahon was born, once heard a chaplain pray that Reed would conduct the House according to the will of God without regard to partisan politics. Reed exclaimed, "I never heard a more preposterous prayer addressed to the throne of Grace."

Reed was right. The House is an inherently partisan place. But no man has taken less advantage of large opportunity to abuse power than has Chairman Mahon.

The portraits on the wall of his office include a baleful one of Thaddeus Stevens, the radical Republican of Reconstruction whom the late Stewart Alsop well described as "the most merciless and vindictive politician the United States has produced." No two men who have served on Capitol Hill are less alike than Stevens and Mahon.

His conversation constantly teeters agreeably on the edge of a chuckle. Like the red-and-white check necktie he is wearing with an otherwise subdued ensemble, there is about him an unexpected and, happily, irrepressible impulse to lightness. He has been an ornament to a city with more than its fair share of the pompous, a city that is not about to take G. K. Chesterton's point:

"It is really a natural trend to lapse into taking oneself gravely, because it is the easiest thing to do. . . . For solemnity flows out of men naturally, but laughter is a leap. It is easy to be heavy: hard to be light. Satan fell by force of gravity."

The hall outside his office is full of scaffolding for the workmen whose job is the perpetual one of maintaining the special mellowness of the Capitol's rich interior decorations. The scaffolding, Mahon chuckles, is for hanging miscreants, and there never is enough scaffolding. And a ladder leaning against the wall puts him in mind of a hymn:

"We are climbing Jacob's ladder, Soldiers of the Cross."

Mahon is an American type—an alloy of piety, industriousness, reticence and abstemiousness—that once was as common as, and soon may be as scarce as, the homing pigeon.

As Mahon approaches the yellow leaf (I say approaches: His father, who moved to Texas for his health, lived to be 97), he can take leave of government serene in the knowledge that the government is better than it would have been if he had not come to it, and that he is as good a person as he was when he came.●

THE WHITE HOUSE LOBBY ON VETERANS PREFERENCE

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. TEAGUE. Mr. Speaker, did the administration plant the recent article on veterans preference in the Wall Street Journal?

Mr. Speaker, on July 26, an article appeared in the Wall Street Journal entitled "Congress and the Veterans Lobby," which was reprinted in the July 31 issue of the Washington Star. My question is, was this story planted by the administration? I hasten to say that I have no evidence that it was. My reason for raising this question is because there has crossed my desk in recent days a copy of a letter sent to friends and organizations across the country, on White House stationery, signed by Richard A. Pettigrew, Assistant to the President for Reorganization, urging support for the President's Civil Service Reform Act with its provision to limit or terminate veterans preference in the Federal civil service. Included with this letter, which is dated July 31, 1978, are a number of papers in support of the President's position including a copy of the July 26 Wall Street Journal article, "Congress and the Veterans Lobby." It is unprecedented, to my knowledge, that the White House would be sending out reprints of an article in support of its position. That is why I have raised the question, did the administration, in effect, plant this story in the Wall Street Journal?

Mr. Speaker, on August 4, 1978, I wrote a letter to the Wall Street Journal, in which I strongly disagreed with statements made in the article and in which I pointed out that it appeared that the article was advocating the party line by the administration, to get rid of veterans preference. Today, I have received a letter from the Veterans of Foreign Wars which also relates to this article in the Wall Street Journal. I request, therefore, that a copy of my letter of August 4 to Mr. Alan L. Otten of the Wall Street Journal, and a copy of the letter from the VFW dated July 28, 1978, be made a part of my remarks.

Last, Mr. Speaker, with regard to the administration's efforts to take away veterans preference from the Vietnam veterans, I was shocked to receive a copy of a letter from Mr. Alan K. Campbell, Chairman of the Civil Service Commission to Mr. Max Cleland, Administrator of the Veterans' Administration, in which Mr. Campbell stated that the Commission will certainly need the help of the Veterans' Administration in gaining congressional approval of the veterans preference modifications in the civil service reform bill, as amended, and that

Mr. Campbell would be back in touch with Mr. Cleland about specific ways in which the Veterans' Administration can help the Commission in its efforts to gain congressional approval of the veterans preference modifications. The Veterans' Administration is the spokesman in the administration on all matters and programs relating to veterans and their dependents. Traditionally, the Veterans' Administration has been the advocate of veterans' benefits and has avoided being put in the position of being the adversary. This letter to which I refer, dated July 31, 1978, from Mr. Campbell to Mr. Cleland regrettably indicates that the administration in its efforts to take veterans' preference away from Vietnam veterans, is now using the offices of the Veterans' Administrator to accomplish this purpose.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, D.C., August 4, 1978.

Mr. ALAN L. OTTEN,
The Wall Street Journal, 1025 Connecticut Avenue, NW., Washington, D.C.

DEAR MR. OTTEN: It has always been a favorite subject of political columnists to use unidentified Members of Congress as whipping boys. At the same time once a war is over, they cannot resist the temptation to quickly forget the sacrifice made by those citizens who made an extra contribution in the national interest by serving in the Armed Forces during a period of war.

You have incorporated both of these principles in your article entitled, Congress and the Veterans Lobby, which appeared in the Wall Street Journal on July 26, 1978 and reprinted in the Washington Star on July 31, 1978. As a Member of the Veterans' Affairs Committee of the House for 32 years, and as Chairman for almost 18 years, it was my privilege to work with so-called veterans lobbyists. I have always held that good lobbyists serve a useful purpose in Government. They are specialists in their own areas of references and since a Congressman cannot begin to be an expert in everything that comes before the House, a Congressman must learn as much as possible from a number of reputable and knowledgeable people that are available. The so-called veterans lobbyists I have known, have been educators and advocates of their causes, and have been extremely helpful arriving at decisions on legislation in which they have an interest.

Your article leaves the impression that Congress is caving in on the pension program. I think it is fair to say that I am a fiscal conservative. However, I have never had any aversion to spending tax money when the money is well spent and the need for it is apparent. As Chairman of the Veterans' Affairs Committee, I was at least partially responsible for the expenditure for a great deal of money. I do not regret a penny of it. Our veterans gave everything they had for their country, and deserve in return everything a grateful nation can possibly afford to do to alleviate their problems at a time when they are in greatest need. Even in veterans' affairs, however, reckless or sentimental squandering of tax dollars is not the answer to the problems. The pension bill to which you refer, is expensive, but taken into consideration with our present economy and gross national product, the cost of veterans benefits is much less than it was when we had far fewer veterans several years ago.

My main purpose for writing is to disagree with your views on veterans preference, which appear to be the party line being advocated by the Administration in its efforts to get rid of veterans preference, except for the service-connected disabled. I just can't understand why the Federal Government wants to eliminate 5 point preference for citizens who were drafted to serve in the Armed Forces during one of the most unpopular wars in history. Even more baffling is at the very time the Administration is trying to get rid of veterans preference for persons who served in the Armed Forces, persons who served as volunteers in the Peace Corps, Vista and Action Programs, are made eligible for a non-competitive appointment in the Federal Civil Service by a Presidential Executive Order.

You state that veterans seeking Federal employment use their preference again and again. We are told that there are no statistics on how often a veteran does use his veterans preference.

You state that many veterans use their preference more than once by switching jobs to leave Government jobs and then return. Again, the Civil Service Commission cannot substantiate such a statement with any reliable statistics.

With regard to military careerists, you would throw out the baby with the bath water. To curb veterans preference for military retirees, the Administration is willing to sacrifice veterans preference for the millions of veterans who were drafted for two years—the very veterans which veterans preference is intended to help.

You state women are being hurt by the Veterans Preference Act at entry level jobs for college graduates. The facts don't bear this out. During 1977, for example, new hires included 213,000 females and 163,000 veterans.

There is nothing mandatory in the law requiring that the Federal Government select veterans who may be at the top of a register when the appointing officer does not choose to hire such veteran because of his lack of job qualifications, or for medical, or suitability reasons. You omitted a very important provision of the law which permits an appointing officer to pass over a veteran eligible and select a non-veteran further down the list. Passing over a veteran has been a part of the law since 1923. The appointing officer must file with the Civil Service Commission the reasons why the veteran has been passed over and the reasons approved by the Civil Service Commission. During Fiscal year 1977, we are told that 2,196 veterans were passed over with 1,587 approved by the Civil Service Commission. These statistics put to rest the slanderous taint of your statement that veterans preference gives "the Federal Government something less than the best qualified work force."

You parrot press handouts when you state that preserving veterans preference will hurt Vietnam era veterans. This is a lot of hogwash. The average age of World War II veterans is 60; for Korean veterans, it is 50. There is no reliable information that I have seen which can prove that Vietnam era veterans, whose average age is less than 30 are competing for the same jobs as Korean and World War II veterans. The truth of the matter is that the great majority of World War II veterans are preparing to retire from the Federal Civil Service and the Korean veterans are following closely behind. The ones that will be hurt by a change in the present veterans preference laws, as supported by the Administration in the Schroeder amendment, are the Vietnam era veterans.

Your article made no reference to the recommendations of the veterans organizations, whose members will be most affected by the Congressional approval of the President's recommended restrictions on veterans preference. Perhaps you do not know that both the American Legion and the VFW have more than a half-million members who served during the Vietnam era. Likewise, the Disabled American Veterans and AMVETS have a large percentage of Vietnam era veterans as members. Another veterans organization is the National Association of Concerned Veterans, which speaks exclusively for Vietnam era veterans. All of these veterans organizations are unanimous in their opposition to the Administration's recommendation to eliminate veterans preference. These veterans organizations point out that to curb will be a gross violation of the long held principle that veterans of all wars should have equal benefits for equal service. Most important, they make it crystal clear that the Administration's proposal on veterans preference will not help Vietnam era veterans, but on the other hand, will take away a benefit which veterans of previous wars have been provided.

I have long held that a Member of Congress must examine all sides of an issue and have the courage to face up, on a long range basis, to the real problem rather than accept every short-term solution.

Members of Congress who vote against the Administration's recommendation on veterans preference will not be giving in to powerful veterans lobbyists, but to the contrary, will be voting in the best interests of the nation by continuing to tell our young citizens that our nation is grateful for what they did for our country when they served in the Armed Forces during the Vietnam war.

Sincerely,

OLIN E. TEAGUE,
Member of Congress.

JULY 28, 1978.

EDITORIAL EDITOR,
Wall Street Journal,
22 Courtlandt Street, New York, N.Y.

DEAR SIR: The Veterans of Foreign Wars of the U.S. wishes to thank Alan L. Otten, the author of Congress and the Veterans Lobby, Wall Street Journal, July 26. He credits veterans groups for having the administration "surrendering altogether," making "every politician a bedwetter" and "herd(ing) politicians before them." Mighty heady stuff!

Of course, none of this is true, nor did Mr. Otten prove his "muse." Nor did he prove his charge that veterans groups are actually working against the best interests of the eight million plus veterans of the Vietnam era. Just the opposite!

Mr. Otten above all others should know that the Carter 1979 budget proposals reduced the VA budget from 5.9 percent of total federal budget to 3.8 percent, while at the same time, welfare and other so-called social programs were increased a whopping 22 percent. Look again, Mr. Otten, it isn't the nation's veterans who are getting the attention from Carter or the Congress.

Before getting into the two examples cited by Mr. Otten, the pension program and veterans preference, let me inform you that the V.F.W. has been in the forefront not only in support of all veterans programs, which incidentally benefit Vietnam veterans, too, but also specific programs for these veterans.

We have fought for cost of living increases for the GI Bill—increases the administration did not have the courtesy to ask Congress to fund. Extensions of the limiting dates the educational assistance could be used—far greater than the World War II or Korean veteran had given to him. Higher home loan guarantees. Mobile home loans—never before allowed a veteran. And many, many more benefits newly won for these veterans he says we work against.

Now to the specifics of the two programs he charges that will hurt the Vietnam veteran.

The pension program for veterans is a needs program. That is, a veteran must show an income which qualifies him for help. The present programs are inequitable and provide a pension income far below the national poverty level. The new adjusted plan—devised by the Congress, not veterans orga-

nizations, as he says—will eliminate these injustices and bring a guaranteed income for a single veteran of $4,000. Hardly a monstrous sum as Mr. Otten alleges. True, that it looks large when it is attributed to veterans, but if this group was placed in the welfare category—a designation abhorrent to those who served their country in time or war—the sum would still be the same. Mr. Otten might be interested to learn that over 12,000 Vietnam veterans already are receiving a pension, so this program is not just for the old, needy veteran.

Veterans preference has become an emotional issue with the Carter crowd, shouting how their changes will help the Vietnam veteran and the disabled. Let's get rid of these falsehoods once and for all. Veterans preference in federal and state employment now does just that. The changes proposed will hurt the Vietnam veteran and hurt him badly, and could do the same for the disabled.

If Carter's proposal is adopted, over three million Vietnam veterans will lose their rights the day the law goes into effect. If the compromise proposal moving in the House of Representatives is adopted, only 496,000 will lose, but in 1985, which is the 15th year of eligibility for many Vietnam veterans, over four million will lose the right of preference.

The disabled veteran now has preference over all in hiring, but the Carter proposals contain so many ways to end-run the new laws—50,000 Demonstration Project jobs, 40,000 Special Emphasis jobs, etc., all allowing jumping over disabled veterans—that we see the end of veterans preference.

Truly, the administration's proposals are to do just one thing: appease women and minorities. Yet, minority leaders have testified in favor of keeping the laws as they are so that minorities can get a foot in the door of the federal job market using veterans preference.

Lastly, much has been made of the reduction in force protection allowed a veteran and its proposed limit to just eight years. Picture the fairness of two people side by side. One went to Vietnam and fought for his country in a divisive war, the other entered federal service. The veteran returns and enters the government. After eight years—both of the men equal in job efficiency—the veteran can be fired while the one who did not fight, stays.

Come on Mr. Otten, don't you think you have been hoodwinked by the shouts of the Carter administration rather than the veterans organizations who do, in fact, have the Vietnam veteran at heart? Come visit us at your convenience, we will give you the facts.

Sincerely,

JOHN WASYLIK,
Commander-in-Chief.●

BALANCE OF POWER(S) SERIES BOOK IV—INTRODUCTION—SOVIET DOCTRINES AND INTENTIONS

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, on July 10, 1978, I started inserting into the CONGRESSIONAL RECORD a series of articles on Soviet doctrines and intentions—Book IV of my Balance of Power(s) series. Because differences in assumptions, goals, attitudes, and ethics between the United States and Soviet approaches to national security problems create asymmetries which underlie every element of the balance of power, it is appropriate to raise these neglected questions as this 3-year series concludes.

Today, I would like to outline this series on Soviet doctrines and intentions will be developed according to the following outline:

First. Myths and Realities of Soviet Military Doctrine.

Second. Meaning of Soviet Military Doctrine.

Third. Soviet Strategic Doctrine and Nuclear War.

Fourth. Soviet Approach to Negotiations.

Fifth. Arms Control.

Sixth. Militarization of Soviet Society.

Seventh. Defense Industrialists in the U.S.S.R.

Eighth. National Intelligence and the U.S.S.R.

Ninth. Soviet Assessment of the World Correlation of Forces.

Tenth. Growth of Soviet Military Might.

Eleventh. First Strike Capability in Soviet Military Planning.

Mr. Speaker, it is my hope that by directing attention to these critical issues this series may contribute in some measure to a fuller appreciation of the challenges to be met by the U.S. national defense effort, and how best to proceed. Within the limitations imposed by the constraints of time, this section may be enlarged.●

NO REASON FOR METRIC

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. RUDD. Mr. Speaker, a good article in yesterday's Wall Street Journal questioned the whole rationale behind the effort to change our country's system of measurement to the metric system.

The article noted that there is no reason to change people's lifestyle and cause tremendous dislocations by changing weights and measures, unless some driving force, such as economic necessity, requires it.

This is not the case in the bureaucratic effort to convert to metric.

I would like to include the Wall Street Journal article at this point in the RECORD.

[From the Wall Street Journal, Aug. 9, 1978]

LET METRICS COME TO THE U.S. INCH BY INCH

(By P. J. Wingate)

Progress hasn't exactly been rapid in moving to the metric system. The 17 members of the U.S. Metric Board, created by law in 1975 to assist the United States in going metric, took nearly two years to get themselves appointed and confirmed by the Senate.

The situation brings to mind the case of the young businessman who was transferred by his company to France and took his family along. Shortly after they moved into a small town north of Paris the husband came home to find his wife close to tears.

"I get along fine with the language," she said, "but this damned metric system is driving me wild. Today I went to the butcher shop and asked for a kilometer of ground beef. The butcher told me in perfect English: 'Madam, I think you mean a kilogram. A kilometer is over half a mile and even Burger King doesn't order that much.' I'll be glad when we go back home where I'll know what I'm talking about."

Her husband told her she would get the hang of it all after a while but then he added: "By the time we get home, three years from now, the whole United States may be talking metric."

The young husband may be right but the odds are against him. Metric is moving in the U.S. but very slowly.

Chemists and physicists in the U.S. adopted the metric system in their laboratories before World War I but progress has been slow ever since then. In fact, chemists never did go the whole way. They report their laboratory results in grams, centimeters and the like but when the process moves out into the plant it is still likely to be measured in pounds, feet and other English units. During the past two decades some movement toward metric units in the plant has occurred, mostly because of the driving force resulting from increased foreign sales.

In fact, driving force or lack of it probably will do more than the Metric Board to determine how fast the metric system moves ahead in America. And the Metric Board should keep that in mind. If Americans are engaged in foreign business they will feel a driving force to go metric just as chemists and physicists did a century ago when they found that nearly all scientific papers gave their results in metric units. But purely domestic businessmen will feel no driving force and will resist it. Barbers, for example, will not find many people asking to have their hair cut a millimeter or a centimeter shorter.

Most of us simply see no reason to leave the units we have grown accustomed to, and in some cases even pounds and feet seem too modern to suit us. In the horsebreeding and racing business a horse's height is measured in hands (4 inches) and the distance he runs is furlongs (220 yards). And an Australian or English trainer may measure the horse's weight in stones (14 lbs.). The trainer's weight, too. Sailors measure the depth of water under their vessel in fathoms (6 ft.) while out on the ocean the ship's speed is measured in knots.

A knot is one nautical mile per hour and a nautical mile is 1.152 U.S. miles. But, of course, an international nautical mile is only 1.151 U.S. miles, all of which gives some idea of why sailors are likely to keep on talking about knots instead of either kilometers or miles per hour.

Furthermore, while no one has yet found a way to add a cubit (18 inches) to his natural height, going all the way back to biblical days, the cubit has not yet vanished entirely from the English language. Nor have the jot and the tittle. These two units of measure may have been a more precise value in St. Matthew's day (see Chapter 5, verse 18 of the King James Bible), but most people still know they are very small—about the size of an iota. Winston Churchill used them and so does Jimmy Carter.

It is true that the firkin (of butter, for example) has just about gone the way of the cubit but a rasher (of bacon) is still hanging in there giving color to the language and helping to date historical novels. The are, as a unit of area, has also vanished but its big brother, the hectare (100 ares or about 2.47 acres) is still much loved by lawyers and others dedicated to precedent and the past.

These units have little or no reason for holding on but they do until some real driving force pushes them out. So the pound, the foot and the degree Fahrenheit are likely also to stick around until real forces, such as foreign sales, drive them out.

Is there much reason to have signs give the distance between American cities in kilometers instead of miles? Will it increase the understanding of most Americans to say

Baltimore is 64.5 kilometers from Washington instead of 40 miles?

Visitors from foreign lands may like it better, but few nationalities hesitate when they must choose between inconveniencing themselves or visitors. And will it help to have the weatherman give us the barometric pressure in kilopascals rather than inches of mercury? Most of us have the devil of a time figuring out what inches of mercury mean.

Finally, how long will it take for the public to grow accustomed to having the beauty queen's measurements given in centimeters instead of inches? Will it help if 36–22–32 is converted to 91–55–81? Hardly.

In fact, if Scarlett O'Hara's measurements had been reported as 91–55–81, Rhett Butler might have given his most famous line early in the book instead of waiting until near the end to say: "Frankly, my dear, I don't give a damn."

Go slowly, Metric Board, and let the natural forces of the marketplace set the tempo of the march to metric.●

HOW VOLUNTARY IS THE U.S. METRIC CONVERSION PLAN?

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. CRANE. Mr. Speaker, a few weeks ago when the House was considering H.R. 13467, the second supplemental appropriations bill, I proposed an amendment to delete the $275,000 earmarked for the U.S. Metric Board. The debate on my amendment indicated that there is considerable confusion over the role of Government in promoting a shift to the metric system. Section 3 of the Metric Convrseion Act of 1975 states that the "policy of the United States shall be to * * * establish a United States Metric Board to coordinate the voluntary conversion to the metric system." Since any move toward the metric system is to be voluntary, a costly Government entity is simply unnecessary. It makes little sense to spend taxpayer money to persuade, convince, or coerce taxpayers to "voluntarily" convert to metrics. If such a conversion is to take place at all, it should come naturally, as demanded by the marketplace, not in response to pressure from a Government agency.

The Wall Street Journal recently contained an article questioning the role of a Government agency as a driving force behind "voluntary" conversion. Because this article relates directly to an issue we debated a few weeks ago, I include it at this point:

LET METRICS COME TO THE U.S. INCH BY INCH

(By P. J. Wingate)

Progress hasn't exactly been rapid in moving to the metric system. The 17 members of the U.S. Metric Board, created by law in 1975 to assist the United States in going metric, took nearly two years to get themselves appointed and confirmed by the Senate.

The situation brings to mind the case of the young businessman who was transferred by his company to France and took his family along. Shortly after they moved into a small town north of Paris the husband came home to find his wife close to tears.

"I get along fine with the language," she said "but this damned metric system is driving me wild. Today I went to the butcher shop and asked for a kilometer of ground beef. The butcher told me in perfect English: 'Madam, I think you mean a kilogram. A kilometer is over half a mile and even Burger King doesn't order that much.' I'll be glad when we go back home where I'll know what I'm talking about."

Her husband told her she would get the hang of it all after a while but then he added: "By the time we get home, three years from now, the whole United States may be talking metric."

The young husband may be right but the odds are against him. Metric is moving in the U.S. but very slowly.

Chemists and physicists in the U.S. adopted the metric system in their laboratories before World War I but progress has been slow ever since then. In fact, chemists never did go the whole way. They report their laboratory results in grams, centimeters and the like but when the process moves out into the plant it is still likely to be measured in pounds, feet and other English units. During the past two decades some movement toward metric units in the plant has occurred, mostly because of the driving force resulting from increased foreign sales.

In fact, driving force or lack of it probably will do more than the Metric Board to determine how fast the metric system moves ahead in America. And the Metric Board should keep that in mind. If Americans are engaged in foreign business they will feel a driving force to get metric just as chemists and physicists did a century ago when they found that nearly all scientific papers gave their results in metric units. But purely domestic businessmen will feel no driving force and will resist it. Barbers, for example, will not find many people asking to have their hair cut a millimeter or a centimeter shorter.

Most of us simply see no reason to leave the units we have grown accustomed to, and in some cases even pounds and feet seem too modern to suit us. In the horse-breeding and racing business a horse's height is measured in hands (4 inches) and the distance he runs is furlongs (220 yards). And an Australian or English trainer may measure the horse's weight in stones (14 lbs.). The trainer's weight, too. Sailors measure the depth of water under their vessel in fathoms (6 ft.) while out on the ocean the ship's speed is measured in knots.

A knot is one nautical mile per hour and a nautical mile is 1.152 U.S. miles. But, of course, an international nautical mile is only 1.151 U.S. miles, all of which gives some idea of why sailors are likely to keep on talking about knots instead of either kilometers or miles per hour.

Furthermore, while no one has yet found a way to add a cubit (18 inches) to his natural height, going all the way back to biblical days, the cubit has not yet vanished entirely from the English language. Nor have the jot and the tittle. These two units of measure may have been a more precise value in St. Matthew's day (see Chapter 5, verse 18 of the King James Bible), but most people still know they are very small—about the size of an iota. Winston Churchill used them and so does Jimmy Carter.

It is true that the firkin (of butter, for example) has just about gone the way of the cubit but a rasher (of bacon) is still hanging in there giving color to the language and helping to date historical novels. The are, as a unit of area, has also vanished but its big brother, the hectare (100 acres or about 2.47 acres) is still much loved by lawyers and others dedicated to precedent and the past.

These units have little or no reason for holding on but they do until some real driving force pushes them out. So the pound, the foot and the degree Fahrenheit are likely also to stick around until real forces, such as foreign sales, drive them out.

Is there much reason to have signs give the distance between American cities in kilometers instead of miles? Will it increase the understanding of most Americans to say Baltimore is 64.5 kilometers from Washington instead of 40 miles?

Visitors from foreign lands may like it better, but few nationalities hesitate when they must choose between inconveniencing themselves or visitors. And will it help to have the weatherman give us the barometric pressure in kilopascals rather than inches of mercury? Most of us have the devil of a time figuring out what inches of mercury mean.

Finally, how long will it take for the public to grow accustomed to having the beauty queen's measurements given in centimeters instead of inches? Will it help if 36–22–32 is converted to 91–55–81? Hardly.

In fact, if Scarlett O'Hara's measurements had been reported as 91–54–81, Rhett Butler might have given his most famous line early in the book instead of waiting until near the end to say: "Frankly, my dear, I don't give a damn."

Go slowly, Metric Board, and let the natural forces of the marketplace set the tempo of the march to metric.

Mr. Speaker, to eliminate any confusion over the Government's role in metric conversion, I have introduced H.R. 13451. This legislation abolishes the unnecessary Metric Board and permits the Department of Commerce to carry on whatever coordination may be needed for voluntary conversion to metric units.●

BART LANIER STAFFORD III, A MOST SINGULAR PERSON

HON. RICHARD C. WHITE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. WHITE. Mr. Speaker, I am submitting for the RECORD a selection of three short poems by Bart Lanier Stafford III, of El Paso, who I am proud to claim as a constituent. I submit these works not for their literary quality, which is considerable, but because of the incisive social commentary they represent, commentary which I believe can be beneficial to my colleagues. Mr. Stafford's accomplishments—including three graduate degrees—are, I think, especially noteworthy considering that he has been terribly physically handicapped since near infancy by cerebral palsy. He is now a member of the staff of the University of Texas at El Paso from where his wondrous and prolific writings flow. A sample:

I must confess to a prejudice against the people who are presently my chronological peers. They tend to desire to protect the status quo which they believe is beneficial to them as secure individuals, not caring about the position of other people so long as nothing in their lives happens to be altered. I admit to being a political innocent. I automatically ally myself with the young people who blow the winds of change across our land. I respond to the enthusiasm, the activity, the dynamism of our Nation's youth on almost every issue that might arise. As a deeply emotional person, I respond positively to the drive and the need for change that young people have in such abundance.

We might take heed of this observation by Mr. Stafford, and we might benefit from the messages contained in the

following three poems taken from his two published books:

ATTICA PRISON GRIEVANCE

(By Bart Lanier Stafford III, "An Obscured Radiance")

I never use toilet paper
in pink, green, blue or
white flowered abundance
(some of it even perfumed!)

that I do not remember
that the Attica prisoners
were issued one roll a month,

and that this was one of
the grievances for which
men were willing to die.

THE CELEBRANT

(By Bart Lanier Stafford III, "An Obscured Radiance")

He was a huge, loud
and very cheerful man
who operated the collator
in our agency's pressroom.

There were twenty-four bins
for paper and he had to rush
to keep them full and flowing,
the machine clattering angrily.

He would shout old songs
over the clanging racket
to relieve the tedium
and keep himself going.

People would enter our room
and hear collator, multilith
and mimeograph, but mostly they'd
hear his voice booming away.

"When them saints they all come marching home"

He was our magic talisman,
our special mascot; if he
could make it past the boredom,
there was hope for each of us.

He sang at Mary's wedding,
loaned money for Tom's teeth,
gave blood to my daughter,
was almost a part of our team.

Yet when birthdays came around,
or retirement parties, he didn't
celebrate them with us because
it was 1943 and he was Black.

THE VIEW FROM HUDSPETH HALL, UNIVERSITY OF TEXAS AT EL PASO

(By Bart Lanier Stafford III, Too Many Sparrows)

From my office window
I can see across
the gulley that was
the raging Rio Grande.

The tiny shacks dangle
from the jaws of poverty,
doors bravely pink or blue
to warm them with color.

The people just over
our border are cold now,
they steal, beg, shrug
thin bodies in despair.

A good day comes when small
kids are too hungry to cry,
or a young grandmother finds
a wooden box for firewood.

And a neighbor without
a name or a work card
steals a skinny fowl
so two shacks can eat.

Each day passes somehow, while
waiting, scheming, surviving;
soon winter will slink away
and they'll all be much older.

I know all of this from my
window's safety, however
the border is so wide
that I can do nothing.

I can barely see the kids
scrabbling on rocky hillocks,
I cannot hear their hungry cries
and am unable to feel their despair.

My sterile checks to charities
would not reach these people;
they have no street addresses,
are registered with no agencies.

And so, feeling completely impotent,
I squat here in my steam-heated office
eating my breakfast Danish and coffee,
just another fat Anglo getting fatter.●

AIRLINE USE OF TICKET TAX FOR NOISE REDUCTION: THE NATIONAL PRESS REACTS

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. DELANEY. Mr. Speaker, as the controversy over the so-called Airport and Aircraft Noise Reduction Act and the Noisy Aircraft Revenue and Credit Act continues to mount, I thought my colleagues would be interested in the reaction from the national press.

Today I enter in the RECORD editorials from three greatly respected publications, the Washington Post, the New York Times, and Business Week. All of the editorials express grave doubts over the wisdom of allowing airlines to use a funding mechanism established by the Federal Government to hide the cost of compliance with FAA regulations from the consumer. It is my hope after reading these editorials my colleagues will join me in the effort to defeat title III of H.R. 8729 and prevent the substitution of the Ways and Means bill (H.R. 11986) for that title. For further information on this legislation I refer my colleagues to my remarks in the CONGRESSIONAL RECORD of August 4, page 24546.

The editorials follow:

[From the Washington Post, Feb. 23, 1978]

THE HIGH COST OF QUIET

According to the airline industry, the cost of compliance with the 1985 federal noise standards will be $5 billion to $8 billion. The airlines, understandably, are worried about it. Given their other capital needs in the next decade and their unstable profits, they aren't sure they can raise all the money they will need. But that, it seems to us, is an insufficient reason for Congress to create a unique tax fund that would pay part of the bill.

The idea, now getting serious consideration on Capitol Hill, is that part of the money raised by the taxes on air tickets and cargo should be handed to the airlines to buy new, quieter engines for old airplanes. It is a nice idea—if you happen to own an airline. Ticket prices won't go up. The money you get from the treasury won't be taxable. And maybe as much as a quarter of the costs imposed by those new noise standards would be met painlessly.

It is also a nice idea for the politicians who feel the pressure to help industry meet new federal standards; the subsidy will be almost hidden. Thus, the idea was endorsed along the way by both the Ford and Carter administrations, as well as the airline industry, and approved by a subcommittee of the House. There is even an indication that enactment into law of the proposal is the key to prying an airline deregulation bill out of the House. This is something the Carter administration fervently wants.

Nevertheless, the idea is a bad one. It would set a precedent for using federal taxes to raise money to help industry comply with federal laws. If a federal tax on airline tickets is to be used to help the airlines with their noise problem, why not one on utility bills to help the power companies with their smoke problems? Or one on gasoline to help automobile owners re-fit old cars to eliminate exhaust emissions? The possibilities are endless.

There are already enough well-established ways for government to help industries and individuals in need of special aid without creating a new one. If the airlines really must have the $1.25 billion this proposal would give them over the next five years, Congress can provide it through direct appropriations. That would be the straightforward way to do it.

But since the central part of the proposal is a finding that the Airport Trust Fund doesn't need all the revenue raised by the 8 percent tax on tickets and the 5 percent tax on cargo, a better solution would be to reduce those taxes. The airlines could then raise their base fares by the same amount without increasing ticket prices. That would raise the same amount of money for paying the cost of quiet. The distribution of it among airlines wouldn't be the same, but that is the problem of individual airlines. It is a lesser problem than the one posed by creating a new mechanism for using federal taxes to help private industry.

[From Business Week, Aug. 14, 1978]

PAYING THE COST OF QUIET

Hard cases make bad law, say the lawyers. And misplaced sympathy is likely to make cases look a lot harder than they really are. Over a year ago, the Transportation Dept. agreed that the U.S. airlines, then in weak financial shape, would need federal help to meet their 1985 deadline for noise abatement measures. Transportation Secretary Brock Adams endorsed a bill introduced by Representative Glenn M. Anderson (D–Calif.) that would, in effect, divert one-quarter of the revenue from the 8 percent passenger ticket tax to the airlines to use for replacement, re-engineering, and retrofitting of noisy equipment.

Today the airlines are flying high, with record earnings and growing traffic. The Civil Aeronautics Board has given them wide latitude in setting fares. So far they have used it mainly to build revenues with promotional fares, but, if they needed to cover increased costs, they could apply for higher rates. And yet the Transportation Dept. is still backing federal help in meeting the noise abatement standards.

Revenues from the ticket tax are supposed to finance airport improvements to promote safety. Passing the Anderson bill would limit the funds available for this high-priority purpose. It is true that government spending on the airports has been lagging, but there is no indication that it is not needed.

Moreover, the airlines today have no stronger claim to help than industries that must meet air and water pollution standards. If the carriers are allowed to buck part of the cost back to the government, why should chemical manufacturers or oil refiners pay all the bills themselves?

One way or another, the cost of taking the noise out of aircraft—like the cost of all government environmental programs—must come out of the consumers' pockets. But the cost should not be disguised as part of a tax that is intended for something else.

[From the Washington Post, Aug. 8, 1978]

THIS YEAR'S TREASURY AIR RAID

Among the leading contenders for the Great Treasury Raid Award of 1978 is the airplane noise reduction bill now working its way through Congress. Through a unique

back-door device, the bill would divert about $3 billion from the Treasury to the airlines during the next five years. The diversion would be fairly painless; no new taxes, no direct appropriations, no increase in federal spending. The airlines would collect the $3 billion as part of taxes that already exist but, instead of sending the money to Washington, they would spend it themselves on quieter airplanes and airplane engines.

It's a clever idea—if you happen to own an airline and need the money to meet federal noise standards or if you happen to be a member of Congress and want to give the airlines a helping hand. But it is nevertheless a bad idea. Anyway you analyze the proposal it is the imposition of a federal tax for the sole purpose of helping an industry to comply with federal law. Once that precedent is set, the possibilities are endless for similar taxes to help other industries meet air- water- and noise-pollution standards.

The idea works like this: The airlines would continue to collect an 8 percent tax on domestic tickets and a 5 percent tax on domestic air freight. They would also collect an increased departure tax on passengers leaving the country. But unlike other tax money, which goes to the government, this would be different. Each airline could keep up to 25 percent of the ticket tax, 40 percent of the freight tax and all of the increased departure tax as long as it was spending that much money on new and less noisy equipment.

The key congressional committees that have approved this scheme had to make two decisions before they even considered it. The first was that the current level of taxes generate more revenue that ought to be spent on airports and air-safety programs; all of the money raised by these taxes is now earmarked exclusively for those programs. The other is that the airlines need a substantial amount of federal aid in the next few years. Both decisions may be logical, but they certainly do not compel this disingenuous result.

There are more straightforward ways of accomplishing the same thing. Congress, could, for instance, keep the existing tax rates and appropriate funds directly to each airline. Or it could cut the taxes and let the airlines raise their fares. But if it did the former, voters might not like the idea of a profitable airline's getting, say, $250 milion a year from the Treasury. If it did the latter, the $3 billion would not be tax exempt. It is not surprising, therefore, that the airlines and their many friends on Capitol Hill find the scheme attractive. But it is lamentable that both houses of Congress seem about to fall for it.

[From the New York Times, August 9, 1978]

AIRLINE SOUND AND FURY

A few months ago it appeared that the quid pro quo for airline deregulation legislation would be Federal money to help the airlines meet new aircraft noise standards. Only by supporting noise control subsidies could the Administration muster the votes in the House to open air routes to new competitors and allow carriers to set their own fares. Congressional ardor for noise control funds has, however, cooled somewhat with reports of fat airline profits, and the deregulation effort is now apparently strong enough to stand on its own.

That is welcome. Airline deregulation is a fine first step towards reducing the inflationary role of government in private markets. The connection between deregulation and noise control has always been political, not logical. It is now up to the House to look hard at the dubious case for noise control subsidies. The subsidy program now contemplated would have very little impact on the airlines' ability to finance quiet aircraft. But it would set an unfortunate precedent for other industries to look first to the Federal Government for cash to clean up pollution.

The key provision of the House plan would divert a quarter of the revenues from the current 8 percent domestic ticket tax now going to the airport construction trust fund and use it to pay for quieter aircraft engines. No additional tax would be needed to make up the revenue loss to the trust fund; it now runs a substantial surplus. The airlines say they must have the Federal money because their bill for the new equipment will be enormous in coming years, and their ability to raise private capital will be limited by their large existing debts and poor profit record.

Some critics of the proposals dispute the industry's claims, citing its fine profits in recent months. But there is really no need to decide here who is right, since the program is unlikely to change airline finances for better or worse. Industry opinion notwithstanding, the competitive market in which the airlines operate would prevent them from using the subsidy to increase total revenues. It might temporarily increase revenues. But competition among the carriers—competition informally encouraged by the Government, and soon to be required by law—should ensure that passengers get the tax money back. Any excess profits will be returned in the form of somewhat lower fares than could otherwise be expected.

The subsidy, then, is no subsidy at all: The effect would be virtually the same if the ticket tax were simply reduced from 8 percent to 6 percent and competition continued to determine ticket prices. That, ironically, is just what alternative legislation proposed by Congressman Charles Vanik—and bitterly opposed by the airlines—would do.

Since it wouldn't really change anything, cynics argue that Congress might as well make the airlines happy by approving the bill. But this route has its dangers. The program generates the appearance, if not the reality, of a Government bailout for one industry's special environmental program. And, as such, it could pave the way psychologically for special pleadings by other industries. The aircraft noise subsidy program is, in itself, neither good nor bad: It is meaningless. Competition among the carriers should nullify its economic impact. But that is certainly not sufficient reason to commit the Federal Government symbolically to a policy of cleaning up other peoples' messes.●

H.R. 7308, THE FOREIGN INTELLIGENCE SURVEILLANCE ACT

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. SIKES. Mr. Speaker, a surprising amount of pressure has been brought on Congress in support of H.R. 7308 for a Foreign Intelligence Surveillance Act. Supporting it are Admiral Turner, the Director of Central Intelligence; Mr. Webster, the Director of the Federal Bureau of Investigation; and Admiral Inman, the Director of the National Security Agency. It has strong support within Congress. It is somewhat puzzling that so much pressure should be generated for a bill which beyond question weakens America's intelligence gathering capabilities. The objective of the bill is very simple. It sets up a special court that would take from the the President the power to use electronic means to gather, in the United States, foreign intelligence information vital to our foreign policy and security interests. This Presidential prerogative, based on sound constitutional principles, would be transferred to a newly established "Special Court." An individual judge of this court would then be in a position to authorize—or refuse to authorize—foreign intelligence electronic surveillance. This is wrong. Among other faults, it esablishes a new, unnecessary layer of officialdom.

Certainly, it cannot be denied that electronic surveillance in the national security area can be abused—if unregulated. However, it is not the appropriate response to mandate a judicial warrant for such activities where directed against foreign powers and their agents. A better, more reasoned approach would set strict guildelines mandating written authorization from the most senior members of the executive branch, and it would establish meaningful congressional oversight.

This subject needs sensitive treatment, for we are dealing with important intelligence and counterintelligence activities which are vital to our foreign policy and security interests. The unprecedented injection of the courts is unnecessary and unwise, and it could very well unduly burden the legitimate activities of our intelligence agencies.

Under the guise of reform, this bill is an overreaction. In our zeal in today's world to overregulate, we create a new agency. This runs counter to the oft-stated claim that we seek less regulations in Government. Under the special court procedure, it should be obvious that there could be over abuse just as readily if not more readily than the abuses that are charged today. Beyond question, the new procedure would further weaken intelligence gathering processes. They have already been seriously damaged by the drive to reveal every phase of intelligence operations in our country, to open all of our secrets to the press, and to make it more difficult for foreign nations tc cooperate with the United States for fear that their own intelligence gathering operations would be compromised.

Surely it would be seen that the new system involving a special court establishes a confused and more complicated procedure.

There is no precedent for establishing such a court as set forth in H.R. 7308. Under the bill, foreign powers—that is, embassies, trade mission, consulates, et cetra—and foreign agents—including foreign officials, espionage personnel, et cetera—could not be subjected to electronic surveillance—even TV surveillance—without first applying to the special court and securing a judicial warrant.

There is no other country which requires such judicial intervention before engaging in national security electronic surveillance.

I cannot see that a bill which mandates a judicial warrant is needed in order to adequately protect the Attorney General and intelligence agents from criminal and civil liability. Would not any statute which sets strict standards

and which explicitly protects anyone operating in good faith and in compliance with the statute afford equal protections?

In summary, as I understand the bill: It solves no known problems and corrects no known abuses; diminishes the effectiveness of intelligence; creates substantial new security hazards; does not establish new safeguards for the rights of Americans; injects the judiciary into foreign intelligence in a manner inconsistent with the Constitution as interpreted by the judiciary for over 100 years; establishes a special court which is probably unconstitutional and; requires a judicial warrant be based on a criminal standard when the purpose is to collect foreign intelligence.●

BALANCE(S) OF POWER SERIES BOOK II (E)—TECHNOLOGY AND RESEARCH

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, today's selection focuses on an area where the United States has traditionally enjoyed a competitive edge with the Soviet Union, and where we can least afford to fall behind: defense research and development and the technology base in general. Since a Soviet technological breakthrough has the potential to drastically change not only the military balance, but the strategic balance as well, congressional support for U.S. efforts to maintain the best possible technology base must remain a high priority.

The following article, while dated, outlines accurately the research and development strengths and weaknesses of the United States and the Soviet Union, suggesting the future dangers which U.S. technology must be preparing now to defend against. The conditions outlined continue to require our attention.

This article, first appearing in Aerospace Perspective, March 1976, is a summary of a Department of Defense report to the 94th Congress.

[Aerospace Perspective, March 1976]

SOVIET TECHNOLOGY SURGING

(Among the prominent issues in the election year primaries is the status of our national defense, particularly as it compares with that of the Soviet Union. The breadth of national considerations and voter interests limits the degree of attention political candidates can devote to this vital subject. As a result, campaign discussions provide only minimal information as to the U.S. posture in defense technology. Recently, the Department of Defense submitted to Congress a thorough and impressive document detailing Soviet technological gains and the U.S. research and development initiatives required to counter the Soviet challenge. Its importance merits widest dissemination and we have summarized its content for the benefit of our readers.)

For more than a quarter of a century, the United States has enjoyed technological superiority over the Soviet Union. The American people have tended to lean on this technological edge in their attitudes toward defense. They have placidly accepted the budget-induced, widening U.S. deficit in numbers of deployed weapons systems. After all, does not the superior performance of American weaponry more than offset the great Soviet quantative advantage?

It does, up to a point. But what if the Soviets were to gain the upper hand in quality while they continued to widen the numbers gap? That horrendous prospect is a clear possibility for the not very distant future. Take it from the man best positioned to know: Dr. Malcolm R. Currie, Director of Defense Research and Engineering, who says flatly that "the Soviet Union can achieve dominance in deployed military technology in the 1980s."

Soviet technology is surging, Dr. Currie told Congress, thanks to a broad, steady program of research and development over the past decade. The program has been characterized by sustained heavy investment in both manpower and facilities. In terms of monetary outlay, Soviet military R&D funding reached the U.S. level at least five years ago and has been growing consistently at a greater rate. Of particular concern is the fact that the Soviet program has "matured." One of its weaknesses for many years was a cautious, incremental approach to R&D, an acceptance of small gains in capability because of reluctance to risk giant steps that might not pay off. This has changed; there is now more innovative effort, greater willingness to take risks in order to gain really significant advances.

U.S. EDGE REDUCED

A decade of determined effort on the part of the USSR has sharply reduced the United States' technological edge. Dr. Currie sums it this way:

"The United States continues to hold a technological lead over the Soviet Union in most areas critical to our national security. But that lead has been diminishing. In some important areas it is gone; the Soviets are ahead."

In addition to the qualitative aspect of technology advance, the USSR has made new strides in producibility. The Soviets have built a very large, high-technology production capacity which greatly exceeds that of the United States and they are deploying large numbers of new and improved weapons at a rate that the U.S. cannot match.

That, in brief, is the current picture, or what Dr. Currie calls the "snapshot" view. But, he says, since technology balance is dynamic, *"trends* are more important than a static snapshot at a point in time. Our ability to perceive trends and our ability to assess and project properly their underlying significance are fundamental to our future security and, indeed, to our survival. The decisions we make now, based on these perceptions and assessments, will determine our relative posture in the world in the 1980s."

"MIXED COMMITMENT" DRAWBACK

The Pentagon's R&D boss doesn't like the look of the trends. He compares the U.S. and Soviet programs of technology advancement this way:

The United States defense R&D effort, traditionally innovative, continues to produce very high quality products. It is efficient because of competition and incentives basic to the U.S. system and it profits to great degree from its close ties with an equally strong civil R&D program. A major drawback is "mixed commitment," with sometimes uncertain long-range goals and often inefficient funding of projects.

Soviet handicaps include some bureaucratic inertia and a relatively weak civil R&D program that does not provide input to the military technology effort to the degree that U.S. defense benefits from civil research. These hindrances are more than counterbalanced by the continuity of the Soviet effort, the heavy commitment of first-rate scientists and engineers and a large and growing investment. All measurable indices of activity are at record levels—and still mounting. An enormous advantage accrues to the Soviets because American R&D is conducted for the most part in the open, with few secrets. Thus, says Dr. Currie, "We provide clear 'footprints' for them with which they can work to equal us swiftly in areas where we still hold the lead."

RELATIVE DECLINE

The U.S. program is by no means stagnant. In terms of output, it continues to show solid gains, with an impressive number of significant 'milestone' achievements. There has been steady improvement in R&D management and the U.S. is getting a better return per dollar invested. Congressional understanding and support in recent years has halted the R&D decline of the last decade.

Yet, on a *relative* basis, the United States *is* declining, like a runner who runs a good race but finds himself being overtaken by a less talented competitor with greater determination and commitment. In summary appraisal of overall balance and the direction in which it is heading, Dr. Currie makes this statement:

"The trends with respect to the Soviet Union are especially sobering and portray a potentially grave situation in the mid-1980s. Given an extrapolation of current trends, and without appropriate action on our part, it is my judgment that on balance—and including a combination of quality and quantity—the Soviet Union can achieve domination in deployed military technology in the 1980s. . . .

"In our highly complex society our vulnerabilities can be great. The possibilities of surprise are numerous and staggering. The consequences of surprise could be disastrous."

The DDR&E director is not saying that the Soviets *will* take over technological leadership, only that it *can* happen, if we let it. In his words:

"I want to make it clear that this statement is not a prediction. It becomes so only if we do not act appropriately. Neither is it a cry for increased spending willy-nilly. Rather it is a sober assessment of current trends—trends which are not immutable if we maintain an appropriately strong program of our own with a sense of long-range commitment."

RESPONSE TO THE SOVIET CHALLENGE

What constitutes "appropriate action" to ward off the threat of Soviet dominance in military technology?

In his posture statement to the Congress detailing the Fiscal Year 1977 Department of Defense budget request for Research, Development, Test and Evaluation, Dr. Currie spelled out the answers.

First, a continuing high level of investment in defense R&D, coupled with stronger efforts to get the greatest possible output from the investment. The Department of Defense is asking for just under $11 billion for RDT&E, a funding level which Dr. Currie says "provides strengthening at a point in our history when strengthening is required." The $11 billion figure is the highest ever, which is not particularly meaningful since everything from automobiles to shoelaces are at highest-ever price levels. It is lower by a full billion dollars than what Dr. Currie considers a "fully justifiable" request. In fact, Dr. Currie suggests, the budget plan might prove unduly conservative. But, given further improvement in resources management, the figure is adequate.

Appropriate action does not involve sweeping changes in the U.S. R&D program. Although Dr. Currie admits that "we have consistently underestimated the progress of our competitors," the surprises in the latest evaluation of the Soviet lie in the rate of gain in certain areas rather than the general direction of USSR technological advance. Generally speaking, the FY 1977 U.S. program in-

cludes continuance of major projects initiated in earlier years, introduction of certain new projects to full-scale development, and exploration of a wide range of new concepts, "options" for the future. The program is extremely broad and cannot be fully detailed here, but selected examples of major projects provide a general view of the American research and development counterthrust.

STRATEGIC PROGRAMS

"It is by no means clear that the Soviet Union regards nuclear war as unthinkable," says Dr. Currie. "There is strong evidence to the contrary, that the Soviets do not accept the premise of mutual suicide." The growing offensive capability of the USSR may open the door for "potential blackmail." Thus, to maintain deterrence, the U.S. must upgrade its own offensive capability.

The USSR is deploying larger numbers of more accurate ICBMs with increasing destructive yield. This poses a double threat: first, an imbalance, in the Soviets' favor, of total ICBM yield, and second, the prospect of decreased survivability of the U.S. ICBM force.

The immediate countermeasure is to improve, to the greatest degree possible, the capability of the Minutemen III land-based ballistic missile force. This involves a program of silo "hardening" for better survivability, together with developmental work to increase warhead yield and accuracy.

But the relatively small Minuteman is limited in "throw-weight" and, even with improvements, its survivability is uncertain in light of anticipated further gains in Soviet destructive power. So DOD will continue work on a new missile system, tentatively designated M–X. This ICBM will be considerably larger than Minuteman, though "small" by Soviet standards. M–X's greater throw-weight would permit deployment of many high-yield, more accurate re-entry vehicles, and the weapon would have far greater survivability than Minuteman, whether housed in existing silos or in a new "alternative basing mode."

NEEDLES IN THE HAYSTACK

The U.S. force of sea-launched ballistic missiles is currently considered virtually invulnerable. Submarine-based and deployed over millions of square miles of ocean, the SLBMs cannot be destroyed because they cannot be found; they are literally "needles in the haystack."

But DOD is acutely aware of the Soviets' growing anti-submarine warfare capability and concerned that advances in detection systems may make it possible to find needles in the haystack. The countermeasures, to borrow Dr. Currie's words, is to "keep the same number of needles but to enlarge the haystack." Haystack enlargement is possible by introducing to operational service the Trident system now in development. Trident includes a new missile and a new submarine. The greater range of the missile—some 4,000 nautical miles—enormously expands the operating envelope of the submarines, as does the higher "quiet speed" of the sub itself. The Trident system is slated for initial operational use in 1979.

[1] Transition quarter, reflecting Government change in fiscal year dating.

Note: Breakdown of defense R.D.T. & E. shows heavy emphasis on tactical research and development, with fiscal year 1977 funding request for greater than any other mission area. In lower chart, comparison of fiscal year 1977 and previous years funding shows increasing emphasis on Navy effort to counter a very strong Soviet push in oceanic warfare.

Maximum deterrence demands continued dependence on the third element of the U.S. "Triad" of strategic offensive systems—the manned bomber force. The current bomber force is adequate against the current level of Soviet defenses, but again, USSR technology is advancing in this area, too. The time is approaching when Soviet air defense sophistication will outmode existing bombers. To maintain its three-sided retaliatory capability the U.S. needs a manned aircraft of greater performance to penetrate tomorrow's defenses.

CRUISE MISSILE BONUS

Companion to the manned bomber is the air-breathing cruise missile. Where the bomber attacks "tough," well-defended targets, the cruise missile offers high success probability in strikes against targets not defended by high-quality surface-to-air missiles, objectives which constitute the vast majority of the target list. The cruise missile provides a bonus to manned bomber penetrability through the "dilution and decoy effect" presented by hundreds of air vehicles operating in the air defense network. DOD is developing two versions of the cruise missile: the Air Launched Cruise Missile, fired from B–52s or B–1s, and the Sea Launched Cruise Missile, designed for launch from the standard submarine torpedo tube. The airframes are different, but costs are substantially reduced because the weapons employ essentially identical guidance, propulsion and warhead systems, the costliest elements.

In the area of strategic defense, the DOD program contemplates continuing efforts in ballistic missile defense. Although the Safeguard antiballistic missile system is being deactivated, DOD will explore a variety of options for the future, insurance "against the Soviets achieving a technological lead that might encourage their abrogation of the ABM Treaty." DOD is also developing, and planning deployment of, a number of types of advanced radars for warning of ballistic missile or bomber attack.

In space research, DOD's principal effort is planning for the operational advent—in 1980—of the Space Shuttle. A big part of the effort involves modifying existing military space payloads and designing new ones for Shuttle compatibility. Since these payloads will have to be boosted to higher altitudes after initial orbital insertion by the Shuttle, DOD is working on an interim Upper Stage, a lowcost gap-filling system to be used until NASA's more elaborate Space Tub becomes available for high altitude orbit positioning.

A DOD space project of particular importance is NavStar, a multiple satellite system which will broadcast information that will allow properly equipped users to fix automatically, with high precision, their positions and velocity anywhere in the world. NavStar offers great enhancement of capability in such operations as missile delivery, blind bombing, navigation, artillery fire, troop movement and rendezvous. Its special attraction is that it eliminates the need for installing positioning equipment on foreign soil, currently a distinct disadvantage to the U.S. in global operations. Described by Dr. Currie as "one of the most important and far-reaching programs in the Department of Defense," NavStar is slated for limited operational status in the early 1980s and service use of a fully operational, 24-satellite system in the mid-1980s.

TACTICAL PROGRAMS

The high costs of strategic weapon systems—Trident and B–1, for example—might lead one to believe that the budgetary focus of defense R&D is in the strategic area. It is not. Actually, the FY 1977 budget plan contemplates spending 22 percent of the total on strategic programs and 40 percent on tactical programs. For good reason.

Tactical warfare techniques are undergoing a major transformation due to technology advances and there is pressing need for modernization of U.S. and NATO general purpose forces. In terms of weapon quality, the U.S. still holds a lead in some areas—such as tactical airpower and guided ordnance—but the USSR is ahead in several important categories—artillery, ocean surveillance, battlefield mobility, air defense and tactical cruise missiles. In sheer numbers, the Soviets and their Warsaw Pact allies are overwhelmingly superior.

This great numerical advantage influences the direction of the U.S. research and development effort. As the U.S. qualitative lead wanes, it becomes more important to deploy weapons in large numbers. Thus, "affordability" becomes a critical factor in development planning. The thrust is toward less sophisticated, hence less costly, weapons systems capable of deployment in quantity within budget limitations.

The prime examples are the Air Force F-16 and the Navy F-18, "affordable" air superiority fighters to complement the more sophisticated F-15 and F-14 in what DOD calls a high/low mix." The capability of these will be bolstered by development of advanced air-to-air missiles.

AIR DEFENSE MEASURES

The Soviet/Pact nations have built an extremely dense system of air defense, featuring great numbers of high quality, radar and infrared-guided missiles and guns. This dic-

tates a major R&D countereffort to develop "defense suppression" systems, without which losses of NATO strike aircraft would be unacceptably high. Among a broad variety of projects in this category are threat warning systems, self-protection jammers carried by attack aircraft to negate enemy radars, and missiles that home on ground radars.

A particularly important tactical R&D effort is a program to improve the command and control function by means of an airborne command post equipped with a complex of supersophisticated radar and communications gear. Dr. Currie calls this development a "force level multiplier," meaning that it permits maximum utilization of available forces, hence offsets to a degree NATO's numerical inferiority. The principal project is AWACS (Airborne Warning and Control System), a modified jet transport whose electronic equipment integrates the functions of battlefield surveillance, warning, target finding and battle management.

In the area of land combat, NATO forces in Europe are confronted by an enormous mass of highly mobile armor and artillery. There is little chance of matching the Pact nations tank for tank, so DOD is aiming at service introduction of a number of high-quality anti-armor systems. An important project is the A-10 Close Air Support Aircraft, which offers long loiter time in the target area, high survivability and very accurate weapons delivery. Equipped with a new type of cannon, Maverick missiles and Rockeye bombs, the A-10 "has an armor killing capability unmatched by any other aircraft in the inventory." Other airborne developments include the Advanced Attack Helicopter, in flight test status, and the laser-directed *Hellfire* missile. Major ground-based developments include the XM-1 Main Battle Tank, designed to couple exceptional firepower and survivability with affordable cost, and the Cannon-Launched Guided Projectile, a significant anti-armor weapon which has the same "kill probability" against a tank as 2500 rounds of conventional artillery.

Reliable and accurate location of targets will be achieved by new target-finding battlefield radars, by remotely-monitored sensors, by unmanned Remotely Piloted Vehicles and by an Advanced Scout Helicopter. The latter, a major new start, is being designed to overcome deficiencies in existing scout helicopters, such as inability to operate at night and high vulnerability to enemy defenses.

SAM-D SYSTEM

As a countermeasure to enormous—and still increasing—numbers of Pact attack aircraft, the field armies need an entirely new family of air defense weapons. The principal project is SAM-D, which will provide a new plateau of capability; it will be far more lethal than existing weapons, will have greater survivability and will have the ability to engage multiple targets simultaneously. SAM-D's missiles operate in the medium-to-high-altitude range; for shorter-range use, DOD is adopting the French/German Roland and is working on a new shoulder-fired, infrared-guided missile system called Stinger.

OCEAN CONTROL PROGRAMS

Says Dr. Currie "The Soviet threat (in naval warfare) provides an increasingly severe challenge that threatens technology obsolescence of our naval forces in all tactical warfare areas unless we pursue vigorous force improvement and develop new capabilities." He details these features of the Soviet build-up:

A large tactical submarine force, being upgraded by replacement of older diesel subs with nuclear submarines;

A large force of long-range land-based naval aircraft, also being upgraded by introduction of new aircraft types:

A surface fleet which is evolving from a homeland defense force to new global capability through the addition of aircraft carriers and other ships with increased endurance; and

A world-wide surface surveillance and command/control capability for coordinated employment of naval forces.

ANTISUBMARINE SYSTEMS

To counter the growing number of Soviet subs, DOD is placing strong emphasis on development of new antisubmarine systems and is "on the threshold" of a vastly improved capability. The developmental thrust includes improvements to existing patrol aircraft, backed by an exploratory program called VPX, aimed at a completely new patrol plane for use in the mid-1980's. A major project is *LAMPS III*, an effort to expand the antisubmarine reach of surface ships by the use of on-board helicopters. Also in development are a broad variety of sonobuoys, sensors and signal processors to upgrade the submarine detection capability and new weapons—such as advanced torpedos and mines—to neutralize the threat.

Like the land armies, the U.S. fleet needs a better air defense system and work is under way to produce it. Fleet defense is accomplished by a combination of area defense systems, which operate against attacking aircraft and missiles at some distance from the fleet, and self defense systems, which protect the individual ship at distances of less than 10 miles. For area defense, the Navy has the high-performance F-14 aircraft, to be complemented by the earlier-mentioned F-18 in development. The missile component of the area defense mission is the highly sophisticated *Aegis*, a fully-integrated detection-to-kill system which has reached test status. For self defense, a key development is *Phalanx*, a low-cost, high-rate-of-fire 20 millimeter gun system effective against the majority of Soviet missiles. Since *Aegis* and *Phalanx* are some distance down the road, DOD is also working on programs designed to provide substantial gains in effectiveness to existing fleet defense equipment.

Offensively, development is under way on a tactical variant of the Sea Launched Cruise Missile, which will be available in the 1980s. A nearer-term offensive weapon is the *Harpoon* missile, the answer to a long-felt need for an all-weather anti-ship weapon for use by air, sub and surface forces. *Harpoon* is approaching operational status.

TECHNOLOGY BASE PROGRAMS

In addition to the foregoing examples of hardware developments, DOD is conducting an extremely broad program of basic and applied research which is of critical importance because it is the source of tomorrow's defense capability. Called the Technology Base, it represents some 20 percent of the total Research, Development, Test and Evaluation program. Dr. Currie describes its significance:

"Relative to potential adversaries, our population is limited and our cost of supporting military personnel is high. I believe we must, therefore, base our military posture primarily on technical leadership rather than on numerical superiority. With numerical inferiority in both personnel and equipment, we must have superior training and performance. We thus stake our national security on maintaining technical superiority. We must retain this superiority through continued investment in our Technology Base."

Technology Base programs, or longer-range R&D, are divided into three groupings. First, there are those advanced explorations conducted only by DOD; examples include armaments, high performance aircraft, new types of ships, sensors, electronic warfare systems and methods to defend against chemical and biological warfare. Next, there is technology-building in areas where the DOD effort is part of a broader national program; jet engines, materials, electronics in general and environmental sciences, to name a few fields of endeavor. Finally, DOD explores such general fields as medicine, energy conservation and environmental quality, but because of differing needs addresses parts of the research spectrum not being covered by other agencies. The DOD Technology Base effort provides a great degree of spin-off value to the nation's commercial manufacture. One of many examples was a $2 million 1958 investigation of ultra-compact electronics which has mushroomed into a billion-dollar-a-year electronic calculator and digital watch industries.

In earlier years, the Technology Base program was badly eroded by inflation and inadequate funding; the net level of effort was reduced by 40 percent between 1967 and 1975. The trend was reversed with a substantial money increase in FY 1976 and the new budget plan contemplates a further increase, to more than $1.7 billion in FY 1977 and to almost $2 billion the following year.

MANAGEMENT STRATEGY

If the U.S. is to maintain its technological lead, effective management of R&D is as important as the performance of the end product. The basic strategy approach recognizes that R&D is constrained by resource limitations, therefore DOD must make tough selection decisions rather than attempt to pursue all of the attractive research and development opportunities available. Says Dr. Currie:

"The basic rationale is to create an initial range of technological options without investing too heavily in any of them, retain a choice between competing options to the point where further development involves major commitments, manage the surviving program within well-defined limits, and review the need for each program at every selection point."

He lists several points of management emphasis, among them:

Stimulating utmost competition throughout the R&D process;

Avoiding proliferation, eliminating duplication by requiring joint-Service programs whenever possible and by establishing joint U.S./NATO programs;

Working toward improved DOD–contractor environment to encourage broad industrial base capable of meeting defense technology needs. "We recognize that American industry cannot respond with more effective systems if it is saddled with overapplication of specifications and standards, excessive management burdens or excessive requirements on small contractors."

Managing total cost. A key element is DOD's relatively new "Design to Cost" philosophy, which does two things: it makes cost a design factor equal in importance to performance and schedules, and it establishes specific costs goals which must be met by tradeoffs in performance and schedules. Design to Cost is paying off. "Managers at every level investigate and weigh the effects of every decision on their cost thresholds. Designers, who have been encouraged to push for higher performance for the past quarter-century, are now undergoing a 'cultural revolution' to make cost an equal partner with performance. In sum, it appears that our Design to Cost policy is establishing the discipline necessary to manage cost as successfully as we have managed performance."

MANAGEMENT FLEXIBILITY AND EMPLOYEE RIGHTS

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. FORD of Michigan. Mr. Speaker, the House is scheduled to consider the President's civil service reform bill on Friday. I have supported the adminis-

tration's efforts to bring more accountability to the management of Government programs through the creation of a senior executive service and by streamlining the appeals process for grievances. In order to maintain a fair balance, however, between these increased management prerogatives and flexibility and the legitimate rights of Federal employees, a progressive labor-management program is essential.

In view of this need to achieve a balanced bill and at the urging of the administration, Congressman CLAY, as the chairman of the Subcommittee on Civil Service, and Congressman SOLARZ, as a member of the full committee, joined me in an effort to arrive at a compromise labor-management section to this bill. Title VII of the committee print, which I strongly supported, was the result of those efforts with assistance of the committee's Democratic caucus and would have insured a proper balance between the competing interests of management flexibility and employee rights. While we made major concessions in the committee print, there was only insignificant movement by the administration from its initial proposal.

The Udall compromise amendments that passed in committee, while modifying title VII even further, are still a step, although a modest one forward in providing protections for legitimate employee rights. Any further cutbacks in title VII, however, would seriously threaten our efforts to achieve this equilibrium.

There are indications, though, that there may be efforts to further erode title VII on the floor, particularly the provisions regarding the scope of issues that are bargainable or the substitution of the codification of the Executive order for title VII.

Collective bargaining is not new to the Federal Government. Under Executive orders, 58 percent of the workforce has been organized into exclusive bargaining units, and agreements have been negotiated covering 89 percent of those organized. Though the Civil Service Commission tells us that the Federal labor movement can be traced back to the 19th century, the modern era began in 1962, when Executive Order 10988 was issued. Since that time, there have been several changes in the order. However, the basic thrust and intent remains the same. The system as it now exists still contains the inherent shortcomings that come from being created, governed, and administered by management alone. To continue to tinker with the Executive order system is to delay the obvious: What is now needed in the Federal Government is a labor-relations program based upon legislation.

I have been quite frankly surprised with the rhetoric and hysteria that has accompanied consideration of title VII. It is not a radical departure from the present system, but is a small, incremental step forward.

As the sponsor of H.R. 1589, the Federal Employees Labor Relations Act of 1977, which provided for the negotiation of pay and fringe benefits; the negotiation of all agency regulations; and automatic agencyship; and a limited right to strike, based on Canadian law—all of which, I might emphasize, have been deleted from title VII—I can assure Members that the expansion in the scope of bargaining in title VII has been a very modest, incremental step that comes nowhere near the scope of bargaining that most States permit for public employees or that we permit for postal workers.

In fact, this incremental approach was followed by President Ford in 1975, when he amended the Executive order governing Federal labor-management relations to permit negotiation of agency regulations, unless a compelling need existed. Under this amendment an agency could not take an item, that is otherwise negotiable, off the bargaining table by simply issuing a regulation, unless there was a compelling need to do so. However, higher level agencies, such as the Civil Service Commission—the Office of Personnel Management under this bill—can now issue regulations that remove the ability of agencies to bargain over items, even if they wish to do so. The Udall compromise simply takes the "compelling need" test, and moves it upstairs, applying it to Government-wide regulations of the Office of Personnel Management. Even if there is no "compelling need" for that regulation, the regulation still stands. All title VII does is to say—if the subject matter of the regulation is otherwise negotiable, labor and management must sit down and talk about it in good faith. They need not necessarily agree.

Much of the criticism directed at the Federal Government concerns the size and unmanageability of the executive branch. This situation is merely aggravated by the existence of a centralized monolithic personnel body imposing uniform standards that cut across every level and location in the Federal Government. Such a system fails to take into account the divergent working conditions and needs of different agencies and offices around the Nation. The "compelling need" test in title VII would, in no way, hamper the ability of these agencies to issue necessary Government-wide regulations. It would insure, however, that employees would not be deprived of their legitimate right to bargain over the terms and conditions of their employment, except where a genuine need to so exists. Local managers and the democratically elected employee representatives would then be given the flexibility to engage in open discussions and to attack their problems at the local level—when it is appropriate to do so—with greater logic and efficiency than the present system allows. This, in turn, helps to promote better government for all citizens.

Even if there is no "compelling need" for a regulation, the item may not be subject to negotiation because it has been excluded by the statutory management rights clause of title VII. Title VII's management rights clause still bars a wide range of subjects from the negotiation process. Management would retain the right to determine the mission, budget, internal security, or personnel necessary to conduct its work; to direct its employees; to assign work, to contract out or take actions necessary in the event of national emergencies. And I might further point out no matters that are governed by statute—such as pay, money-related fringe benefits, retirement, and so forth—could be altered by a negotiated agreement.

Statutory management rights clauses are totally alien to the private sector. They are part of the negotiation process. And I suspect that in the Federal sector that management rights clauses even stronger than this statutory one may be negotiated—particularly since Federal unions do not have the bargaining strength at the negotiation table of threatening a "withholding of employment."

For over 16 years now, Federal public employee organizations have shown themselves to be responsible parties in the Federal Government's labor-management program. Even President Ford recognized the maturing of employee organizations, when he amended the Executive order in 1975. The bill reported by the committee also recognizes the progress we have made in labor-management relations in the Federal sector. A close and dispassionate reading of title VII should indicate that it is only a modest, but we feel vitally important, step forward.

I ask my colleagues to support the progressive but responsible approach the committee has developed in title VII, and to reject any weakening amendments or attempts to substitute the Executive order.●

CONGRESSMAN ELLIOTT LEVITAS EXHIBITS COURAGE IN OPPOSING SUPPLEMENTAL FISCAL ASSISTANCE BILL

HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. FOUNTAIN. Mr. Speaker, I want to bring to the attention of the House an editorial which appeared last Sunday in the Atlanta Journal/Constitution praising our colleague ELLIOTT LEVITAS. The editorial commended Congressman LEVITAS for his courage in offering the successful motion in our Intergovernmental Relations and Human Resources Subcommittee to defer consideration of the President's supplemental fiscal assistance proposal.

As stated in the editorial, "Representative LEVITAS is not opposed to helping the cities. But he is opposed to poorly written legislation."

The editorial continues:

> And so ELLIOTT LEVITAS had the courage of his conviction. He proposed to the House subcommittee that action on the urban aid package be postponed indefinitely—which virtually guarantees the bill's demise.
>
> It took courage for a Georgia Congressman to buck the Carter administration on a key piece of legislation.

That recognition of ELLIOTT LEVITAS is well deserved.

The administration sent up a poorly conceived and unneeded bill which the subcommittee wisely rejected. The sub-

committee action demonstrates courage on the part of all seven of its members who voted against the bill. It represents a triumph of principle and commonsense over heavy political pressures, with the taxpayers the winners.

The defects of the proposed supplementary fiscal assistance program are so fundamental that the bill is beyond salvage. Far from being a program to aid distressed communities, it would allocate money to fully 70 percent of the Nation's local governments. The quirks in the allocation formula result in its favoring wealthy communities over poorer ones.

How the program would operate in the Washington metropolitan area is instructive. The District government is treated as the third most distressed city among the country's 100 largest municipalities, and would receive a per capita payment of $14.29. Among the 100 largest cities, only Newark and New York would receive larger per capita amounts. On the other hand, no other large city or any county in the Washington area would receive a penny. However, payments would be made to such wealthy places as Chevy Chase Village, Chevy Chase Town, and Somerset. It would be difficult to devise a more irrational formula.

This legislation would surely encourage local governments to become permanently dependent on the Federal budget for such basic local services as police and fire protection and trash collection.

The local perception of need is a very flexible one when the Federal Government stands ready to hand out money. Last week, for example, I received a mailgram from the mayor of Jacksonville, Fla., which read: "Needless to say, these funds are most urgently needed and important to Jacksonville." This is the same city for which large advertisements were recently placed in the Wall Street Journal announcing its "property taxes are among the lowest in the Nation and they've been going down * * * There is no State or local income tax. And independent research shows the cost of living for an executive is $10,000 a year lower here than in New York."

There is no justification for another general revenue sharing program when we already have one providing almost $7 billion a year in assistance. This is especially true at this time when the Federal Government has an astronomical national debt, a huge budget deficit, and when inflation is the most critical domestic problem facing all of us. Moreover, it is not widely known that the existing general revenue sharing program targets money more effectively to the large central cities than the administration's proposal.

I believe there is need for a carefully designed program to help the relatively limited number of local governments that are genuinely distressed as a result of long-term economic decline and we plan to give this matter early attention next year. However, this cannot be accomplished by formulas using unemployment or growth rates regardless of what those programs are called.

The editorial referred to follows:

[From the Journal/Constitution, Aug. 6, 1978]

COURAGE

If there were awards for political courage we believe a prime recipient would be Rep. Elliott Levitas of Georgia's 4th Congressional District.

Much is made of the fact, and understandably so, that at long last we have a Georgian serving as president. And it follows that he should expect the support of the Georgia congressional delegation.

That doesn't mean that Georgia's senators and representatives must always vote for whatever the Carter administration recommends to Congress—and not all do by any means.

But Rep. Levitas has gone beyond simply voting against a Carter-backed measure. He has had the temerity to make the motion which had the effect of shunting one of the Carter administration's pet pieces of legislation into limbo.

It is a $2 billion urban aid bill. Under its provisions Atlanta would receive $2.5 million—and hard-pressed New York City would receive $140 million.

Rep. Levitas is not opposed to helping the cities. But he is opposed to poorly written legislation. That is one target he fires at with regularity. He pointed out that the urban aid legislative package was "a very poor piece of legislation." Nor did he stop there. He said he tried to get the White House and the Treasury Department to get together with House members to put together an acceptable bill. His efforts were ignored.

And so Elliott Levitas had the courage of his convictions. He proposed to the House subcommittee that action on the urban aid package be postponed indefinitely—which virtually guarantees the bill's demise.

It took courage for a Georgia congressman to buck the Carter administration on a key piece of legislation. It took courage for a congressman from metropolitan Atlanta to ring the death knell on legislation which would have benefited Atlanta.

We're grateful that Elliott Levitas has that kind of courage.●

MONROE VETERAN WITH LEUKEMIA WINS BENEFITS

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. CARTER. Mr. Speaker, on Aug. 4, I inserted into the RECORD a newspaper article about the approval of service-connected compensation by the Veterans' Administration for Mr. Donald Coe, of Tompkinsville, Ky.

You will recall that Mr. Coe was my constituent who contracted hairy cell leukemia as a result of his exposure to nuclear tests while in the Army in 1957. After 1½ years, the VA has acknowledged that his disease resulted from his exposure to the radiation at that time.

The Louisville Courier-Journal also carried a story on that day about the decision by the Board of Veterans Appeals, and I wish to submit this article for the RECORD as well.

MONROE VETERAN WITH LEUKEMIA WINS BENEFITS

(By Ed Ryan)

WASHINGTON.—Donald E. Coe is no longer a bitter man.

While watching his sons chop wood on his remote Monroe County farm yesterday, he received word that he had won his long fight with the Veterans Administration.

It was announced in Washington that a VA appeals board had ruled that Coe's leukemia is the result of radiation from atomic-bomb blasts he watched as a soldier 21 years ago.

Coe, his wife and seven children are now eligible for full service-related disability benefits.

A year ago, the VA rejected the claims of Coe, who was given only six months to live at the time.

"I was bitter then," Coe acknowledged in a telephone interview from his farmhouse in the Turkey Neck Bend section of Monroe County.

"But who wouldn't have been, the way they (VA) were handling it. I got kind of angry. . . . But I'm not bitter now."

A VA representative from Louisville will come today to Coe's home to explain what the new benefits will mean.

It is estimated that the 45-year-old Coe will be eligible for at least triple the $209 a month he now receives from the VA for nonservice-connected total disability.

More important, according to VA officials in Washington, his wife and children will be eligible for medical and educational payments from the government.

Jess Brown, national appeals officer of the Disabled American Veterans, said that each of Coe's children, who range in age from 2 to 20, can receive as much as $300 per month for college or postsecondary vocational training.

With the exception of Coe and his family, the person probably most gratified by the VA action was U.S. Rep. Tim Lee Carter, the Republican from Tompkinsville.

"I am deeply pleased," said Carter, a physician who has persistently argued with the Veterans Administration over the merits of Coe's medical case.

"Now Mr. Coe knows that if he dies his wife and children will receive the benefits they deserve," Carter said.

Carter went to the White House last year to seek the assistance of presidential aides in the case. Accompanying him was Paul Cooper, a former Idaho GI with leukemia who watched the same atomic-bombs tests in the Nevada desert in 1957.

Cooper, who died earlier this year, had won his benefits from the Board of Veterans Appeal after a long fight that was similar to Coe's.

In congressional hearings earlier this year, the Pentagon said it was beginning to gather lists of the men who observed atomic tests and to study their medical histories for signs of radiation.

Counting experiments in the Pacific Ocean in the 1940s, Pentagon officials said anywhere from 58,000 to 177,000 men may have been exposed to radiation.

(The men were involved in an effort to determine whether infantry troops could be useful in a limited nuclear war.)

Brown, the official from the Disabled American Veterans, said yesterday that Coe's victory wouldn't necessarily mean that other former soldiers who took part in the atomic tests are eligible for benefits because of radiation.

The VA probably will examine the claims on a case-by-case basis, he said.

Coe was besieged yesterday by congratulatory calls and reporters.

"NBC is out on the front porch," Coe said while being interviewed on the telephone. "I'm happy. I felt all the time it would be approved."

For two months last winter, Coe was in and out of Vanderbilt Hospital receiving treatment for his cancer.

When his spleen was removed, his weight went from 205 to 165 pounds.

On several occasions, Rep. Carter scheduled Coe as a key witness in the congressional hearings on the atomic tests. But, because of the severity of his illness, Coe couldn't make it.

There was even a plan to bring Coe to the hearings on a stretcher, after Coe insisted that he should show up to testify.

But the early-morning fog and rain was so bad that day at the Nashville airport that Coe's charter airplane couldn't get off the ground.

His health has improved recently.

"I feel very well, but my neck bothers me, and my eyes bother me, and I tire awfully easy," he explained yesterday.

One good sign is that his appetite is back, and his weight has returned to a normal 205 pounds.

The Coe household has been tense in the last few days, knowing that the VA appeals board was about ready to hand down a decision.

Up until this week, Coe had a motto—"No word is good word."

"But my wife finally called the VA yesterday (Wednesday) and they told her we would be notified in the mail," he said. "That didn't sound good. I knew if it was approved somebody would call me."

They called Donald Coe yesterday with the good news.●

"THE ROAD TO PROSPERITY"—PART XVIII—WHAT THE PEOPLE ARE WRITING

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. STEIGER. Mr. Speaker, ever since June 26, the day on which President Carter called a news conference and attacked the Investment Incentive Act, I have received literally thousands of letters of encouragement from private citizens of modest means. To publish each of the personal tax examples that people have described would take up a regular issue of the CONGRESSIONAL RECORD. To offer an idea of what people are writing, I've chosen a handful of letters at random, and I'm grateful to the writers for permitting me to share them here.

SMITHTOWN, N.Y.,
August 1, 1978.

DEAR CONGRESSMAN STEIGER: Let me give you my recent experience with the capital gains tax, as one example of how it can hit the middle income.

My 1976 taxable income was $20,218 of which $14,132 was a capital gain—realized from the sale of 5 acres I've held for over 20 years. My tax for that year was $4,772 per Form 1040, Schedule D.

If I had had no capital gain my tax would have been $432. The tax on the capital gain alone was $4340.

Recently I received a notice from IRS that I owed $619.80 minimum tax on the capital gain ($14,132—$10,000) x 15 percent.

I had not been aware that I was liable for any tax on capital gain other than that per Schedule D. The minimum tax prior to 1976 applied to a taxable gain of $30,000 and over.

The Schedule D (1976) made no reference to the possibility of additional tax under the minimum tax.

My taxable gain tax became $4340+$619.80, a total of $4,960, a tax rate of 35 percent.

I paid the additional tax and a penalty of $39, with some reluctance. I am age 78, my wife 77. Our income (taxable) is from pension, and some investment income.

I feel the minimum tax should not apply to a person whose taxable income less the capital gain is no more than $_____.

Yours respectfully,

(Name on file).

LAGUNA HILLS, CALIF.,
July 2, 1978.

Hon. WILLIAM A. STEIGER,
House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE STEIGER: An enormous amount of money must be "locked in" by the present high capital gains tax, which could be released by a more reasonable tax, thus providing "venture capital" for business.

President Carter's assertion that lower capital gains taxes would benefit only rich people is sheer demagoguery. On numerous occasions during The Great Depression, I took capital gains when my income was no more than $2,000 to $2,500 from my writing.

After thirty years as an author, I became a paraplegic as a result of an accident, and for the past twenty-one years, I have been confined to a wheelchair.

I needed a reasonable tax on my capital gains when, deeply in debt, I became paralyzed. And now, like countless elderly citizens, I need a 25% capital gains tax. Unfortunately, I must now pay so much more that I can't sell stocks that now have a flat record of earnings to go into more active growth stocks.

Sincerely,

JOHN SCOTT DOUGLAS.

COLORADO SPRINGS,
July 5, 1978.

DEAR MR. STEIGER: I am not a millionaire! I am an old lady 78 years of age, who taught school for twenty years at a beginning salary of $120 per month. I denied myself many things to save enough money for my old age. I invested these savings in some stocks that have paid good dividends and because of inflation have increased in value. Now, when I need to use some of these profits, and I sell my stocks which I have held from 20 to 40 years, I have to pay a high capital gains tax. It just isn't fair to the small investor.

I hope you can do something about this. It should be a diminishing capital gains rate according to the time a stock is held.

I hope you can do something about this. It is *not* only the rich people who have investments.

Thank you,

LUCILE MILLER.

TOMAH, WIS., *June 27, 1978.*

Hon. WILLIAM A. STEIGER,
Congressman,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN STEIGER: You are to be commended on your proposal to cut capital gains taxes to pre-1969 levels.

For what it's worth, I have a classic personal example to give you.

In 1959, I acquired a farm near my home in Southern Wisconsin with what was then my life savings of $2,500 and borrowed the balance of the purchase price. Since then my job has taken me away from the area and my Mother now also lives in Tomah. I no longer have an interest in that area and would like to sell the property.

Due to career advancement and inflation, I am in a substantially higher tax bracket than when I purchased the property. Of course the property has increased in value over 19 years, but when I consider what the taxes would be if I sold the property, I cannot justify disposing of it. At present, I receive about $2,000 a year income from the property which is offset by taxes and interest, so from a tax standpoint this investment is revenue neutral. However, conservative reinvestment of the net proceeds from the sale of this property under lower capital gains rates would provide $2,500 of annual tax revenue to say nothing of future taxes on capital gains from rollover of investments.

I am in the middle income brackets and not one of the "fat cats" referred to by your opposition. A reduction in capital gains taxes will help people in the middle income brackets who are paying substantially higher income and social security taxes due to the effects of inflation on their wages and standard of living.

My letter has been lengthy, however, I hope this example will help to point out this problem with the present tax structure which you are attempting to correct.

Sincerely,

HARRY W. WELLENKOTTER.

ISSAQUAH, WASH.

DEAR REPRESENTATIVE STEIGER: One of the local radio stations has a call-in time for comments on public issues. The day after the President's June 26 news conference everyone who called was disagreeing with the President about the capital gains tax.

My case is a good example. After my husband died I invested in a large house and yard. I have been looking at places in California because both my daughters live there. I haven't had enough income to pay income tax for several years. Now that I am a senior citizen, I would rather go into a mobile home retirement community than to take care of a big house and yard, but if I sell my house at an inflated price, instead of having the profit to use for the inflated monthly space rent in a mobile home park, I would have to pay too much of the profit in taxes.

So apparently I can't afford to move to California to be near my daughters, because of the high capital gains tax.

Yours truly,

MRS. G. F. ALCORN.

NEW ORLEANS, LA., *July 14, 1978.*

Hon. WILLIAM STEIGER,
Representative from Wisconsin,
Washington, D.C.

DEAR MR. STEIGER: I have read about your proposals for a better deal for the public on Capital Gains, whereas Mr. Carter says 80% of the Capital Gains tax savings go to one-half of 1% of the American taxpayers who make over $100,000.00 per year. Thus, I must suffer because he wants to take some money from some multi-millionaires.

Mr. Carter is very badly misinformed on this subject.

I am submitting some facts to you with the hope that the submission to you can substantiate your position. I also want to show you how we have already been gouged on advalorem taxes.

I happen to be 83 years of age. I have been working for the last 68 years. This is my last year for earned income. Hereafter, I must sustain myself principally from the income I can obtain from my savings in a life of frugality.

I have never inherited any money and my earned income has never exceeded $15,000 in any one calendar year. My first pay check was from the Southern Pacific Railroad at the rate of $20 per month, in 1910.

I served a comparatively short period in World War I and not long after I received my Honorable Discharge in 1918, I was married on a salary of $2,000 per year.

I will give you just one illustration involving two pieces of land. On March 11, 1952, I acquired Plot 34 of Delacroix Plantation for $1,300. On April 28, 1952, I acquired Plot 26 of the same plantation for $1,300 out of my savings.

At that time, there was a standing prin-

ciple of city assessments that there would not be any change made in the initial assessment unless you either sold the property or made some improvements. The initial assessment on Plot 34 was $460. On Plot 26 it was $480. Total $940. In 1963, 11 years later, the assessment on Plot 34 continued at $460. but Plot 26 was raised from $480. to $900. (there were no improvements). From 1964 to 1966, it continued the same as 1963.

By 1978, the plot assessments had gone from a total of $940 to $9500, and the millage had approximately doubled—making the increase in advalorem taxes about 20 times what they were.

I have been forced to sell, and now what appeared to be a profit will melt into significance if Mr. Carter has his way. I hope you can do something for the large number of people who have frugally anticipated their incapacity and tried to prepare for it, only to discover that the President will make a grab for a higher tax bracket strictly on an individual's life savings.

I hope you can do something for us.

Sincerely yours,

RENE A. STIEGLER.

MONKTON, MD., *July 1, 1978.*

DEAR CONGRESSMAN STEIGER: I am by no means a millionaire. As a retired individual on pension, I try to augment same by a modest investment in securities. The dividends or interest doesn't even keep up with inflation, so the only way to make any profit is judiciously (we hope) buying and selling, the capital gains being the real object. With the squeeze on capital gains, that source too is drying up. Keep up the good work! To bash a few millionaires the President is willing to hurt a lot of small people too.

Very respectfully,

KEMP TOLLEY.

SAN DIEGO, CALIF., *July 9, 1978.*

Hon. WILLIAM A. STEIGER,
House Office Building,
Washington, D.C.

DEAR MR. STEIGER: I strongly support your bill to reduce the capital gains tax.

It is absurd for the administration to state that elimination or reduction of the capital gains tax would only benefit the rich. Perhaps my example can prove the point.

I am a retiree living on the capital gains from a small building I sold in 1969. Unfortunately, ever since then I have had to use not only the interest from the gain on the building but also the principal in order to have enough money to live on. Formerly, those dollars could buy a modest amount of living expenses. Today they cannot. I am being paid back in dollars which buy less and less and yet I am forced to pay a high capital gains tax. The "benefit" of my gain has long disappeared because of inflation. In 1983, the proceeds from that sale will be gone. As a consequence, I have had to take risks through small purchases of stocks to try to build up a modest amount of capital to take the place of the money which will be gone. If I am fortunate enough to make a capital gain, it, in turn, is illusory. It is eroded by inflation and an excessive capital gains tax.

Many of us on fixed incomes have no alternative but to live on capital gains and investments. We—in the lower tax brackets—desperately need help.

It is not logical nor is it fair to lump both rich and not-rich in the same package when discussing the pros and cons of reducing the capital gains tax.

Sincerely yours,

LUCILLE MOSES.

PEORIA, ILL.,
July 10, 1978.

DEAR REPRESENTATIVE STEIGER: I appreciate the effort you are making to cut capital gains taxes. I do not agree that the cut would benefit only the wealthy. I am a senior citizen who bought a scattering of inexpensive stocks some twenty or thirty years ago hoping to have a little nest egg on retirement to help off-set inflaton. Realizing how our money has depreciated and then to pay 50% tax on top of it is just too much to take. I believe the number of years investments are held should count for something.

Sincerely,

MRS. ROBERT BRANHAM.

PHOENIX, ARIZ.,
July 13, 1978.

Representative WILLIAM A. STEIGER,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. STEIGER: I wish to write you and tell you of my support regarding your Bill to roll back the taxation on realized long term capital gains. I am a middle income taxpayer who has been hurt.

In 1977 we sold our home in Anchorage, Alaska and moved to Phoenix, Arizona. We made $4,456 on the sale of our home in Anchorage. We had to pay long term capital gain on $2,228. Thus, my total income tax came to $3,480.31. However, the investment capital, I made on my home, which had been taxed long ago, was taxed again. By the way my income is only in the mid-twenties. The $3,480.31 is too much for a family of five to pay as income tax, I feel. I also resent President Carter calling your Bill just for the rich, since I had to pay on my equity, which does not seem fair.

Thank you for your interest and consideration.

Sincerely yours,

MARVIN G. WEBER.

MENLO PARK, CALIF.,
July 8, 1978.

Hon. WILLIAM STEIGER,
Representative, Wisconsin,
Washington, D.C.

DEAR SIR: The President has stated that the passage of the above amendment would be of benefit to millionaires only. I do not agree with the President. If this amendment were to pass, I believe the great benefit would be to persons, who are in circumstances similar to mine.

I am a widow in my seventies who is locked into a fixed income. The rate of inflation and the loss of the purchasing power of the dollar frightens me. I have no means whereby to keep up with inflation nor to increase my fixed income. Money deposited in banks and saving and loans earn interest well below the inflation rate. Where do I invest my capital so as to increase my income to adjust to the ever increasing cost of living?

I believe that if I could invest, sell and make a profit on my capital gains without the penalty of paying a large capital gains tax, I would have the opportunity or at least the choice to increase my capital rather than sit by and watch the daily deflation of my dollar.

I urge you to continue to work toward the passage of your amendment.

Very truly,

MRS. HAROLD HJELM.

MILWAUKEE, WIS.,
July 17, 1978.

Representative STEIGER,
House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE STEIGER: As a teacher employed by the Milwaukee Board of Education, I am pleased with your efforts to pass the Steiger Amendment. The average small investor may now be hopeful that his typically meager savings will at least keep pace with inflation instead of losing much of their value.

American goods must compete in world markets with goods from other countries which have little or no capital gains tax. Formerly one-third of the capitalization of corporations was borrowed and two-thirds was from the corporations' own funds. Now two-thirds of the capitalization is borrowed and only one-third is from corporation funds. Interest is being raised because the government borrows many billions in competition with the private sector. This reduces industry's ability to raise funds desperately needed to update obsolete equipment. The United States formerly had the most modern equipment of any industrial country. Now West Germany and Japan have much more efficient equipment.

Unless U.S. industry is given tax relief it risks bankruptcy in any attempt to replace obsolete equipment. Unless capital gains taxes are reduced to pre-1969 levels and double taxation of dividends are eliminated the average investor cannot afford to risk his savings for the expansion and updating of industry.

In case it is impossible to enact the Steiger Amendment surely it is not too much to hope that corporations will be allowed to deduct dividend payments and be given a reduced corporate tax rate with accelerated depreciation allowance. This should increase employment and give the government more income. It would also increase the government's income from capital gains taxes by increasing sales of securities now locked in by the confiscatory capital gains tax.

Yours very truly,

MARY JANE GOLDSMITH.

DEAR CONGRESSMAN STEIGER: As a low income, semi-retired, senior citizen and home owner, I heartily applaud your efforts to force a reduction in Capital Gains taxes My support for this action stems not entirely from my desire to see drastic reductions in all types of taxes (thus forcing significant cut-backs in government waste and spending), but largely because I feel that Capital Gains taxes are nearly as unjust and inequitable as Property Taxes and Inheritance Taxes.

I know from experience, that most homeowners change homes several times during their lifetime; moving upward in early life to meet the needs of growing families and improved social status; then in later life, when the family has left the nest and when income drops and/or becomes fixed, the need arises for a retrenchment and dad and mom either want less home to maintain, or are forced by soaring property taxes, to move back down the scale or cease being homeowners completely. Government caused inflation keeps pushing real estate prices upwards, thus bringing a capital gain to the seller, but this capital gain as measured against the inflated cost of living, and when measured against upkeep, interest on indebtedness, loss of interest on the paid off portion of the debt, and the soaring costs of home maintenance, is usually an illusory mirage.

Individuals, particularly those with more conservative backgrounds, are inclined to buy and sell small properties as a means of augmenting their incomes. I have known many individuals who, like myself, have from time to time purchased run down properties, fixed them up and resold them for a profit. These people were not wealthy, they were not big corporations or industrial complexes.

There are far more dollars put into private pockets (and into general circulation) of low and middle income families in this manner, than through increasing investment credits or cutting corporate income taxes. And believe me, I strongly support both these latter incentives to industrial expansion.

Capital Gains profits have always been, and still are, the poor man's only opportunity to feel like a capitalist.

MERLE D. GOW.

JACKSONVILLE, FLA.

An Open Letter to President Carter:

DEAR SIR: You might not read this letter because I am just a plain citizen who nevertheless believes that someone can emerge

from deep poverty and achieve a good life under the free enterprise system.

Your news conference made reference to the fortunate few who own securities and other property.

In 1929 my father died when I was 12 years old with no resources and a mother to support.

I tried hard but couldn't make it without seeking the help of our town fathers. They offered me 50¢ per hour for cutting railroad ties with a crosscut saw. We survived the thirties somehow.

Four years of Navy during World War II made it possible for me to attend college at age 29 and graduate at age 32. Wall Street beckoned and I started a career in the most hazardous and volatile of industries. At age 35 I bought my first car and at age 42 my first home for our family.

Every spare dollar of savings went for common stock. Congress passed laws that would enable me to pay a maximum tax of 25% on any profit from the sale of my home or securities.

My government has deceived me by changing the laws on which I planned my life. Now my President condemns me as a citizen with too many advantages.

Mr. President, is it wrong for a poor man to become less so?

Sincerely,

JOSEPH A. LETTMAN.●

POPE PAUL VI

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 7, 1978

● Mr. VENTO. Mr. Speaker, the death of Pope Paul VI left the world stunned and with a numbing feeling of loss. Catholics and non-Catholics alike admired and respected this humble, sensitive, courageous and idealistic leader.

There is much for which Pope Paul will be remembered. During his reign, the liturgy of the Catholic Church was dramatically changed to expand its understanding and acceptance by all Catholics.

Pope Paul was a scholar and a connoisseur of theology, and he had a reputation for being receptive to new ideas. He internationalized the Vatican hierarchy so that representatives from other countries could share in vital church decisions. He also brought in many young priests to open the Vatican to fresh thoughts and concepts.

The world heard the Pope make impassioned pleas for peace and social justice, and it was from a genuine concern for the lives of all people that he strove to reach those people and churches that had for so long been outside the realm of Vatican cordiality or exchange.

Pope Paul traveled the world and increased communications with other churches, atheists and Communists. He was the first Pope in modern times to leave Europe and his visit to the United States in 1965 is still a memorable event for American Catholics.

Pope Paul ruled the church during a difficult, confusing time. Many of his decisions were extremely controversial, yet he stood firm and strong in spite of critical reactions from large groups of Catholics. He was determined to maintain the vitality and strength of the church in times of great stress.

Perhaps the best tribute to the man can be seen in the worldwide reaction to his death, although it is not surprising that Communist and non-Communist countries alike should share in the mourning. During his years as Pope, a host of world leaders, including key Communist officials, visited the Vatican. The Pope's overtures to the Communists are considered the main reason the church was able to settle the 18-year-old controversy about Cardinal Mindszenty and gain other concessions from the Communist world.

For Catholics, Pope Paul's death is a personal loss. For non-Catholics, his death also leaves a feeling of emptiness and genuine sorrow. There is no question that he had great impact on both the religious and the secular life around him. The world has lost a compassionate leader and friend.

I would like to commend to my colleagues this statement by Archbishop Jean Jadot, apostolic delegate in the United States:

STATEMENT OF THE APOSTOLIC DELEGATE FOLLOWING THE ANNOUNCEMENT OF THE DEATH OF POPE PAUL VI, AUGUST 6, 1978

Paul VI was above all a man of faith. It is not possible to understand his life, much less his pontificate, without realizing that he was a person governed by a threefold faith: faith in Jesus Christ, faith in the Church, faith in man.

For Paul VI Christ is living and operating in our midst: as the way, the truth and the life for everyone.

He also believed in the Church: the religious society that constitutes the Catholic Church is the instrument which Christ uses to enlighten and vivify the world.

He believed in the human person. Created in the image of God, each member of the human family of whatever culture, race, sex, personal conviction or social condition is worthy of the greatest respect and able to improve.

It is in this threefold faith that one is able to appreciate the constant concerns of Paul VI for doctrinal truth, for authentic prayer, for unity, for justice and peace, for dialogue, for courage and for hope against all hope.

Looking back in time, history will discover the moral greatness, the astonishing wisdom and the profound humanity of a man of God sharing with all his heart the joys, the pains, the hopes and the frustrations of his time.●

BALANCE(S) OF POWER SERIES BOOK III (D)—THE HORN OF AFRICA

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, in continuing consideration of the shifting balance of power worldwide, I am introducing today a recent analysis of the situation in one of the most rapidly changing regions of military confrontation: the Horn of Africa.

Because the alinement of forces in the Horn has proved so volatile, and because the relative strengths of the forces in the area have been so greatly influenced by the role of Soviet and proxy forces, an accounting of the balance at any point in time is less significant than an analysis of the dynamics.

As the following article shows, the dynamics of the Horn situation reflect very largely the involvement of the Soviet Union. Entitled "Soviet Thrust Into the Horn of Africa: The Next Targets," this article by Peter Vanneman and Martin James presents a clear picture of Soviet purpose and strategy in its Horn activities. It is in this context that military developments in the region must be understood.

The article first appeared in Strategic Review, spring 1978.

The massive intrusion by the Soviet Union into the Horn of Africa represents the more prominent of two new Soviet foreign policy salients, one in the Middle East and the other in Africa. The immediate targets are two countries that are central to America's dwindling policy assets in the Indian Ocean-Persian Gulf region: Saudi Arabia, the world's largest producer of petroleum, and Kenya, the last pro-Western state on the eastern coast of Africa.

As the Saudi Arabian Foreign Minister, Prince Saud bin Faisal, expressed it: "The fact is that we have thousands of foreign troops present in Ethiopia. It is without a doubt a threat to the security and stability of the entire continent of Africa and the Middle East." Having witnessed the steady Soviet-sponsored military build-up in South Yemen to the south and Iraq to the north, the Saudis are all the more acutely sensitive to Soviet initiatives in the Horn. Saudi interest in the purchase of sophisticated military equipment (including F–15 fighter planes) from the United States should be viewed in the context of these security concerns, rather than in an Arab-Israeli framework.

The short-term Soviet objectives on the Horn are: to escalate pressures against Saudi Arabia by acquiring naval and air facilities as Massawa and Assab on the Red Sea; to put pressure on Kenya, particularly with respect to impeding Western access to the port of Mombassa, the only major port now open to U.S. naval vessels on the east coast of Africa; to gain a strategic position whence to be able to threaten the interruption of shipping lanes vital to Europe and Japan; to enhance the Soviet Union's global prestige by engineering another military victory for one of its allies; and to legitimize its African activities by ostensibly defending the sacred African principle of national territorial integrity. In this light, the much-heralded loss by the Soviet Union of its military facilities at Berbera in Somalia appears less significant than has generally been supposed. Indeed, it is entirely possible that Soviet personnel might ultimately reappear in Somalia; it is noteworthy that the latter did not sever diplomatic relations with Moscow even while fighting against the Soviets in Ethiopia.

The intervention on the Horn reflects another carefully orchestrated and sophisticated use of military power, designed to maximize the USSR's global influence and ameliorate her mushrooming internal economic difficulties. After successfully sponsoring a proxy war in Angola,[4] the Soviet Union explicitly signaled her intent to employ that new instrument of her foreign policy elsewhere by including a specific provision on "wars of national liberation" in the new "Brezhnev" Constitution.[5] No other constitution in the world commits its people to such a specific foreign policy goal. The unprecedented tours across Africa and the Middle East by the

Footnotes at end of article.

Soviet and Cuban Presidents in the spring of 1977 gave ample notice that these regions would be the next arenas of "national liberation war:" [6]

Proxy war is an adjunct to Soviet economic policy. It is designed to supplement and complement efforts to bolster the Soviet Union's sagging economy. Indeed, economic considerations seem to dominate Soviet activities in Africa and the Middle East. Reviewing the first comprehensive Soviet book on Soviet-African relations, the government newspaper Izvestia remarked: "Quite unexpectedly, most of the book is devoted to questions of economic cooperation. . . ." [7]

Soviet support of Ethiopia conforms to a fundamental tenet of the USSR's foreign policy: the Brezhnev Doctrine, which proclaims the unilateral right to defend beleaguered "socialist" regimes.[8] Somali troops invaded Marxist Ethiopia's Ogaden region in July 1977 in support of insurgents there. When Somalia—then apparently a Soviet client—ignored Moscow's diplomatic pressures for a withdrawal of the forces, the Soviets initiated a massive military build-up to bolster the unstable Ethiopian regime. Over a period of months this escalated into a major military confrontation—a new and successful test of the utility of proxy war in the advancement of Soviet foreign policy aims.

STRATEGIC ACCESS AND DENIAL: THE SAUDI TARGET

The collapse of the monarchy and its replacement by a pro-Soviet regime in Saudi Arabia, the world's largest producer of petroleum, would dramatically shift what the Soviets characterize as the "global correlation of forces." Access to resources is increasingly important in world politics, even for the supposedly well-endowed USSR, as some studies on Soviet oil reserves suggest. Thus, most Soviet activities in the Red Sea area are aimed, at least in part and perhaps even primarily, at undermining the stability of the Saudi Government and constraining its influence.[9]

Soviet naval and air facilities at Massawa and Assab in Ethiopia would be more valuable than those "lost" at the much touted base at Berbera in Somalia. The Ethiopian facilities are within easy reach of the main Saudi port at Jidda and the multi-billion dollar industrial complex now being constructed at Yenbo on the Red Sea. Thus, they are perfectly positioned for support of efforts to destabilize Saudi Arabia and harass vital oil shipping lanes to Europe and Japan.

Soviet intentions often are mirrored in articulated Soviet "fears." An example came in an Izvestia commentary, shortly after the Somali invasion: "The Horn of Africa . . . has been assigned no small role in the plans for turning the Red Sea into an Arab Lake. The nationalism of the feudal masters is directed against the revolution in Ethiopia." This language clearly invokes the Brezhnev Doctrine, which would serve to vindicate Soviet pressure on Saudi Arabia in the guise of defending "socialist" Ethiopia. As the then Soviet President Podgorny put it, "I would like to touch on the question of the situation in the Red Sea region. Recent events indicate that imperialists, using certain Arab countries, Saudi Arabia above all, are trying to establish their controls there. . . ."

The USSR's most faithful ally in the Arab world, South Yemen, lies on Saudi Arabia's southern border. The Soviet Union has poured large quantities of tanks, heavy artillery, advanced aircraft and armored trucks into that country. Hundreds of East Germans are setting up communications and internal security systems. Cubans have helped train Yemeni soldiers, and three thousand Cubans transited the country en route to Ethiopia. In addition, three thousand Yemeni troops were reportedly fighting alongside the Ethiopians.

The use of South Yemen, with its magnificent port at Aden, as a staging area for the massive Soviet-Cuban intervention in Ethiopia bodes ominously for Saudi Arabia. Not long ago the Soviets, operating from South Yemen, instigated an insurrection in another monarchy on the Arabian peninsula, the Sultanate of Oman.

SOVIET RESOURCE STRATEGY

Soviet global strategy is increasingly guided by concern for access to raw materials. Not only is the Soviet Union constantly improving its capacity to deny Western and Chinese access to strategic raw materials, but it obviously has plans for its own use of these raw materials. Such plans were reflected in the joint communique on the occasion of a visit by Ethiopian leaders to Moscow in May 1977: "Recognizing the insistent need to restructure international economic relations . . . the two sides will strive to expand . . . exploitation of natural resources . . . to build economic cooperation on a long term basis."

The Soviet Union has proven itself adept at acquiring and reselling raw materials (including oil) at a profit in order to earn hard currency to purchase technology. It has skillfully employed the most capitalistic devices toward these ends. There are Soviet banks throughout Europe, Asia and the Middle East. Soviet multinational corporations which sell and ship oil and other raw materials are multiplying. The use of military power is carefully meshed with Soviet foreign economic policy.

Thus, commenting on American efforts to bolster the Somali regime, Pravda betrayed the Soviets' own concern for access to energy sources and raw materials when it noted: "Somalia's strategic location is at the entrance to the Red Sea, on the petroleum sea lanes that are vitally important to the West. In addition, Somalia is the site of the world's largest uranium mines. . . ."

The global energy and raw material shortages have emboldened the Soviet Union to embark on more aggressive and higher-risk foreign adventures because the potential benefits are so substantial. The large-scale Soviet intrusion into the Horn may reflect Moscow's fears of domestic economic dislocation as well as competition with the West. American strategic analysts should entertain the possibility that Soviet anxieties about a crisis in the Soviet economy fanned by rising energy and raw materials costs may animate aggressiveness even more than the motive of strategic denial to the West. In short, strategic access is perhaps a more dangerous new motivation in Soviet foreign policy than strategic denial. The two, of course, are usually concomitant goals.

THE ERITREAN CRISIS

The oldest insurgency in Africa is ravaging Eritrea, the northeastern province of Ethiopia on the Red Sea, which hosts the important ports of Assab and Massawa. Since the Eritrean terrain is superbly suited to guerrilla warfare, suppressing the insurgency would involve an extended operation—one that could truly assume the dimensions of a Soviet-Cuban Vietnam. At least 25,000 Cuban forces, and probably many more, would be required to pacify Eritrea. The best estimates put the Cuban presence in all of Ethiopia at 17,000—although it should be pointed out that similar calculations in Angola proved too low. It is doubtful that the Cuban regime could sustain internal political support for two demanding counterinsurgency operations in Africa simultaneously—the second being the continuing campaign in Angola against Jonas Savimbi's UNITA (National Union for the Total Independence of Angola).

Nevertheless, several factors militate against an abrupt Cuban withdrawal from Ethiopia. The Ethiopians clearly intend to terminate the Eritrean rebellion, which threatens their only access to the Red Sea at Massawa and Assab. Moreover, the Ethiopian regime considers Eritrea the source and homeland of ancient Ethiopian civilization, despite the fact that it was attached to former Emperor Haile Selassie's empire in 1952 and not fully and legally incorporated until 1962. The Ethiopian leader, Colonel Mengistu, articulated these historic links: "Eritrea has always been an integral part of Ethiopia, so much so that the Northern region has been one of the cradles of Ethiopian history and culture. . . . Ethiopia has always been a Red Sea state, except for a brief period, when colonialists controlled the region . . . the very name Eritrea is a colonial creation."

The Soviet Union quite clearly intends to support Ethiopian initiatives in Eritrea. *Pravda* explicitly proclaimed that Eritrean secession would amount to a "victory for imperialism." The Soviets seek to protect their access to the ports of Massawa and Assab as part of the long-range strategy of undermining Saudi Arabia, which is supporting the Eritrean insurgents. Soviet gunboats, and possibly Cuban aircraft, defended the ports against an insurgent assault early in 1978. Cuba is more reluctant than the Soviet Union to become involved in quelling a rebellion which Cuba had explicitly endorsed until recently. Both external powers risk becoming bogged down in a long, drawn-out counterinsurgency far from their borders with all the costs entailed, including the pejorative symbolism involved in so-called revolutionary states suppressing a rebellion.

What is likely in Eritrea is a political solution based upon a deal with one or more of the disparate liberation fronts and leading to some form of Eritrean autonomy. This would relieve the Cubans and the Soviets of the onus of suppressing a revolution—and indeed, might cast them in a favorable image. The transfer of Cuban, Russian and Ethiopian forces from the Ogaden to Eritrea is clearly intended as a signal for some elements of the insurgents to settle for a form of autonomy.

* * * have identified with Ethiopia. It is not difficult to imagine an arrangement between these elements and the forces of the Eritrean Popular Liberation Front (EPLF), backed by Soviet, Cuban and Ethiopian power (see table). The EPLF is quite dynamic and popular, with strong support among the youth, Christians and Muslims alike. It is also strong in the cities, which would be easiest to pacify.

The Soviets, of course, are past masters at creating federal constitutional facades that guarantee a paper autonomy: their own constitution grants the Soviet republics the right to secede. New troop arrivals in Eritrea will focus primarily on defense of the ports and the provincial capital of Asmara while negotiations procede—although decisive military action cannot be ruled out if the insurgents refuse to negotiate. The rapid escalation of the Cuban presence suggests that this option is still open.

The Soviets are in a position gradually to strangle the flow of weapons to the rebels by pressuring Iraq, Syria and South Yemen, the chief sources of weapons. American inaction in the area plus the presence of Soviet warships in the Red Sea could rapidly lead to the drying up of Saudi support. It is perhaps symbolic that the Arab Foreign Ministers Conference in March 1978 promised military aid to non-Arab Somalia, but not to the Eritreans.

THE CUBAN PROXY

In a proxy war the armed forces of one nation serve the interests of another nation. These forces may also serve the separate interests of the proxy as well as those of the

Footnotes at end of article.

principal sponsoring power. The principal power is the sponsor in the sense that its material support makes the venture possible, and its clear disapproval would seriously deter the proxy from embarking on the venture. The proxy force is not a surrogate force—that is, it is not a substitute for the sponsor's power. The sponsor delegates certain responsibilities to the proxy and retains others for its own forces.

While Soviet and Cuban interests generally coincided in Angola, it is the USSR's interests that predominated in Ethiopia. Compared with their respective levels in Angola, there were more Soviet military personnel and fewer Cubans present in Ethiopia during the Ogaden War. The estimated Soviet military presence in Ethiopia was 1,500 as compared with 450 in Angola; the Cubans in Ethiopia numbered 17,000, as contrasted with 23,000 in Angola.

Frequently the interests of the proxy and the sponsor tend to diverge, and this may well be the case in Eritrea. While *Pravda* warned that secession would be a victory for imperialism, the Cuban leadership clearly has been divided over the use of its troops in Eritrea. While the Cubans have been reluctant to suppress the oldest liberation struggle on the African continent—one with which they have long-standing contacts—major Soviet policy concerns have been focused on the two Eritrean ports of Assab and Massawa. To some extent this reflects the natural disparity between a global superpower and a minor power.

Cuban troops in Eritrea largely performed defensive chores at Asmara, Massawa and Assab in the early stages of the Ethiopian intervention—they staged this presumably in order to preserve Cuba's mediating role. Castro's image as the proponent of national liberation would be severely damaged if his troops were blatantly to suppress Eritrean insurgents. Nevertheless, the escalation of the Cuban presence from 11,000 to 17,000 in a few months suggested pressure on the Eritreans to reach a political accommodation with Ethiopia. Even if the Cubans do not intervene offensively (and the line between offensive and defensive operations is rather subtle in such complex scenarios) their increased presence releases Ethiopian troops for the task, while buttressing the unstable regime in Addis Ababa—a role for which the Cubans' experience in Angola is directly relevant.

It should be stressed again that the Cubans are not mere puppets of the Soviet Union, notwithstanding the extraordinary coordination and orchestration of the military tactics of the two powers. Cuba probably would have intervened in Angola even without Soviet support, though perhaps on a lesser scale.

Moreover, the evidence suggests that the Soviets encouraged the partly abortive invasion of Zaire in order to undermine Cuban influence in Angola. While the Soviet Union remained ostensibly neutral in the attempted coup in Angola in the spring of 1977, the Cubans crushed it. Although Soviet influence in the Cuban economy is enormous, Castro retains a trump card—rapprochement with the United States. Castro's idealism will tend to restrain Cuba in Eritrea, despite Soviet pressure and the militancy of Raul Castro's faction. Eritrea will further delineate the Soviet-Cuban proxy relationship, which clearly is not completely symmetrical.

THE AFRICAN TARGET: NEUTRALIZING KENYA

By helping to fend against Somali irredentism in the Ogaden, the Soviet Union began a process of ingratiating itself with the most pro-Western African state between the Horn and the Cape. Somalia has consistently claimed areas of the Northern Frontier District (NFD) of Kenya, and in the 1960s Somali "Shifta" guerrillas staged bloody raids in the area. One of the five stars in the Somali flag represents this region.

As a result, Kenya provided logistical support for Ethiopia and her Russian and Cuban allies by allowing arms to be shipped through her excellent port at Mombasa. The Kenyan government also renewed a mutual security pact with the new Marxist regime in Ethiopia (originally concluded with the monarchy of Emperor Haile Selassie). Moreover, Kenya went so far as to offer forces to fight with the Russians, Cubans and Ethiopians to repel the Somali army in the Ogaden. Finally, Kenya gave indications of turning to the Soviets for arms, since its military forces are among the weakest in Africa, and the cost of arming could seriously undermine Kenya's economic prosperity.

The new rapport between Kenya and Ethiopia was reflected in the fact that Kenya was one of the few African countries publicly to support Ethiopia in the Ogaden war. After the war, in a reversal of roles, Ethiopia pledged military support for Kenya under their mutual defense pact, thus leaving open the possibility of Soviet-Cuban involvement in the defense of Kenya's Northern Frontier District.

Kenya is one of the most stable states in sub-Saharan black Africa, but is facing troubled times. The stabilizing presence of its founding father, the elderly Jomo Kenyatta, may soon disappear. A recent election was called off when it became evident that the ruling party might suffer significant losses. The Soviets have long-standing contacts with Kenyatta's persistent opponent, Oginga Odinga, and Soviet influence along Kenya's borders—in Uganda, Tanzania and now Ethiopia—is substantial.

The new Soviet Constitution (Article 29) guarantees the "inviolability of borders" and "territorial integrity of states." In Ethiopia the USSR demonstrated its intention and capacity to defend those principles. Kenya faces the same threat from Somalia. American impotence in Angola and on the Horn must give pause to those leaning on U.S. support—and Kenya is the most important black African state in that category.

Since African national boundaries were drawn by colonial powers without regard to geographic or ethnographic considerations, irredentism threatens every nation. To guard against this ever-present threat of national disintegration through border disputes, the Organization of Africa Unity's charter enshrined the principle of inviolability of borders. One should not underestimate the symbolic importance in African eyes of the use of Soviet power to defend successfully the territorial integrity of an African nation.

In attempting to mitigate Soviet influence in Somalia after the conclusion of the Ogaden war, the United States confronts the dilemma of arming Somalia at the expense of its relations with Kenya. Kenya broke diplomatic relations with Iran when the latter offered to arm Somalia to bolster Somali resistance to the USSR. On the other hand, the evidence indicates that Somalia will succumb again to a Soviet embrace unless U.S. initiatives are substantial. The Soviet Union could then revive its dream of an anti-Saudi confederation in the Red Sea region.

Kenya is the linchpin of Western support on the east coast of Africa. Even her "neutralization" (like Tanzania's) would profoundly affect the East-West balance of power in Africa, much as a pro-Soviet regime in Saudi Arabia would shift the global balance. The Soviets, in short, are playing for high stakes on the Horn of Africa—stakes that are shared, in one measure or another, but with different perspectives and priorities, by their Cuban proxy.

ERITREAN INSURGENTS

ELF [1]

Estimated strength: 20,000–25,000.
International support: Syria, Saudi Arabia,
Religion: Muslim.
Ideology: Conservative.
Leader: Ahmed Nasser.

EPLF [2]

Estimated strength: 20,000–25,000.
International support: South Yemen, Soviet Union,[4] Iraq.
Religion: 50 percent Christian, 50 percent Muslim.
Ideology: Marxist, Pan Arab.
Leader: Isias Aferwerki, R. M. Nur.

ELF–PLF [3]

Estimated strength: 5,000–6,000.
International support: Saudi Arabia, Iraq, Gulf States.
Religion: 50 percent Christian, 50 percent Muslim.
Ideology: Marxist.
Leader: O. S. Sabbe.

FOOTNOTES

[1] Eritrean Liberation Front—founded in Cairo by politicians who lost their jobs when Ethiopia absorbed Eritrea in 1962.

[2] Eritrean Popular Liberation Front—most active among civilians and youth.

[3] Eritrean Liberation Front-People's Liberation Front—strong propaganda arm; weak military arm.

[4] Always indirect, Soviet aid has dwindled during the Ogaden war.

FOREIGN EXCHANGE STUDENTS

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 10, 1978

● Mr. CARTER. Mr. Speaker, each year many foreign students come to this country to attend school, and many of our own students go abroad to learn in other countries. This cultural and educational experience can provide benefits that last long after the formal education has ended.

A particularly good example of this was reflected in a letter my wife, Kathleen, received from a former student at a small school in the district I represent. Manoutchehr Ardalan, counselor at the Embassy of Iran here in Washington, has shared some of his observations and recollections of his time at Oneida Baptist Institute as its first foreign student.

I wish to allow the other members of this body to read this letter as well so that they might see firsthand the kind of positive, mutual influence that can be obtained from such educational experience.

IMPERIAL EMBASSY OF IRAN,
Washington, D.C., July 26, 1978.

Mrs. TIM LEE CARTER,
c/o Office of Congressman T. L. Carter, U.S. House of Representatives, 2161 Rayburn House Office Building, Washington, D.C.

DEAR MRS. CARTER: It has been a real pleasure associating with you and Congressman Carter for the past several years. Your genuine hospitality and friendship is characteristic of some of the most outstanding features of Americans everywhere.

I personally take special gratification from your expressions of kindness as it revives very fond memories of the four years I spent in a little known, private Baptist boarding high school in your great state.

In other words, the airline industry, in 1953. I was the first foreign national to have ever enrolled there. My father at that time was the Permanent Representative of Iran at the U.N. Although I felt somewhat strange and separated from my parents, the friendship and guidance I received from Mr. and Mrs. Sparks (the President of the high school at that time) removed any apprehensions

that I might have had as a young 13 year old. I was quickly integrated into the school's program and established an endearing relationship with all my classmates.

I was later to become a roommate to another student by the name of Barkley Moore. We roomed together for nearly two years. Barkley, who is now President of Oneida Baptist Institute, was a prolific reader, a fastidious worker and with the dedicated sense of zeal and purpose consistent with high Christian ideals and ethics of the school. His friendship was a source of encouragement and inspiration to me. I am happy to say that perhaps I may have influenced his thinking to some extent, since he later joined the Peace Corps and went to Iran to serve in exemplary fashion for nearly 5 years.

I graduated from high school with the highest grades of my senior class, and my entrance to school helped pave the way for more foreign nationals, including scores of my own countrymen to follow.

I had the opportunity to travel at great length throughout Kentucky, both as an assistant to softball and basketball teams and whenever I went to Lexington en route to visit my parents in New York. There were many features of life in this remote area that left me with an enduring impression. Among my memories are: the hardwork and dedication of local inhabitants, their faith and hope for a better life, their decency and openness.

It is true that the overwhelming number of people were at that time (1953–57) out of touch with the mainstream of national and international events. For the most part they had no notion of Iran or its unique history and cultural legacy to the world. They could not differentiate between Iranian and Arab, but they readily accepted me into their ranks and learned to appreciate the ideas and attitudes that I represent. I have since returned to my alma mater and have witnessed first hand the enormous transformation and expansion that the school has undergone in the past 20 years. Where at one time I was the only foreign national, today from what I gather, there are over 40 foreign students, in a school of 200–300. This in itself is an important indication of sophistication and broadening of people's perspective in this area.

Perhaps in this way, Americans and Iranians at a grass root level can learn more about each other everyday and strengthen the many ties of amity that have existed between our two countries since the turn of the century.

As a last note, I should only like to say that Barkley Moore has been instrumental in the past several years in introducing into this rural area a sense of achievement and purpose in keeping with the awesome responsibilities that the United States faces as a member of the international community.

I hope that this will give you some idea of my fond memories and experiences in Kentucky.

Sincerely,

MANOUTCHEHR ARDALAN,
Counselor.●

POPE PAUL VI

HON. FRED B. ROONEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. ROONEY. Mr. Speaker, I wish to join with my colleagues, my constituents and people throughout the world in expressing a deep sense of loss occasioned by the death of Pope Paul VI. As the College of Cardinals prepares to choose the 263d leader of the Roman Catholic Church, I feel that now is an appropriate time to reflect on the impact of Pope Paul VI, not only on the Roman Catholic Church but also on the world at large.

During the 15 years that this frail and gentle man was Pope, he lived and displayed a quality of humaneness that well served his church, as its leader, and the world, as a spokesman of conscience. As the most traveled Pope in history, he spread to six continents the ecumenical spirit between all faiths as well as serving as an influential voice on issues covering the spectrum of social and economic concerns of the world.

He was as ardent a spokesman for the poor, hungry, and oppressed of the world as he was in stating what he believed to be the dogma of his church. He attempted to open the doors of communication between churches of all beliefs and nations of all political persuasions.

As the successor to the innovative Pope John, Pope Paul carried on the work begun by Vatican I and II. While the changes that resulted from the Vatican Councils created dissent, Pope Paul at all times guided his church with a calmness born of an unflagging belief in its teachings.

While we mourn his passing, we should temper our feelings of sorrow with the knowledge that while Pope Paul VI is no longer among us, the qualities he displayed during his years as Pope will be remembered always.●

DEPARTMENT OF COMMERCE UNFAIR TO MAINE'S ATLANTIC GROUNDFISHING

HON. DAVID F. EMERY

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. EMERY. Mr. Speaker, recent cod closures for the Gulf of Maine which began midnight August 5 and future closures to begin midnight August 15 through 1978 are having severe economic ramifications on groundfishermen in the State of Maine. These actions by the Department of Commerce compel me to speak out and protest against a situation which will be felt by Maine fishermen long after the fishery reopens.

Current regulations allow bottom trawlers to equip themselves with a net mesh size less than 5⅛ inches and harvest up to 1-percent cod by weight in the total catch. Gill netters, on the other hand, have no flexibility to regear. What the regulations fail to mention, however, is that a fisherman has no way of knowing what percent of his total catch in the net is cod, yet when he brings it in to see, he is not allowed to discard the excess. One way or the other, he is usually in violation of the law.

The effect of the recent regulations is to completely shut down the Atlantic groundfishery. Unless the New England Regional Fishery Management Council and the Department of Commerce can work together to resolve this very volatile situation, numerous fishermen will be forced to declare bankruptcy and lose their vessels.

I propose that the council and the Department of Commerce work together and devise an interim plan which will allow for uniform regulations while specific, long-term objectives are being drawn up for a final management plan for Atlantic groundfish.

Unless the council and the Commerce Department devise a workable plan for the Maine groundfish industry, it will collapse because of Federal regulations which, up until 2 years ago, did not even exist. What the foreigners could not accomplish in two decades, the U.S. Government was able to achieve in merely 2 years.●

RHODESIA

HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Friday, August 11, 1978

● Mr. HARRY F. BYRD, JR. Mr. President, William Randolph Hearst, Jr., editor-in-chief, the Hearst Newspapers, queried at some length British Foreign Secretary David Owen as to his government's position in regard to Rhodesia.

In his signed column in the Hearst Newspapers of Sunday, August 6, Mr. Hearst expressed the conviction that the United States "and the British have continued to weaken Rhodesia militarily and economically while Soviet Russia, Cuba and East Germany have built up the guerilla forces."

The Senator from Virginia feels that Mr. Hearst is totally correct in this assessment.

Mr. Hearst also asserted that the British and American Governments "are paving the way for eventual establishment of an anti-Western black dictatorship in Rhodesia."

Here again, I completely agree.

I insert in the Extension of Remarks Mr. Hearst's Editor's Report "Rhodesia: Sacrificial Lamb."

The report follows:

[From the Hearst Newspapers, Aug. 6, 1978]

RHODESIA: SACRIFICIAL LAMB

(By William Randolph Hearst Jr.)

LONDON.—The tragedy that is looming in Rhodesia seems starkly evident here in London.

Talks with British Foreign Secretary David Owen and, among others, Lord Home, former Conservative British prime minister, strengthened my conviction that only a bold reversal of present Anglo-American policy will avert a terrible catastrophe in the southern African state, where a black and white coalition government is striving to arrange for gradual transfer of power to the black majority.

My main purpose in coming back to London at the conclusion of a brief visit to European capitals was to try to find out from the British foreign secretary why he, with the support of our Cy Vance, was so determined to impose the two terrorist leaders of the so-called Patriotic Front on the set-

tlement which Rhodesian Prime Minister Ian Smith reached with the country's three moderate black leaders, reportedly representing 85 per cent of the country's voters.

The refusal of the American and British governments to support the interim settlement is threatening its collapse. It is leading to an intensification of civil war and encouraging the Soviet and Cuban-backed terrorist leaders, Joshua Nkomo and Robert Mugabe, to assume they can seize power and establish a black dictatorship in Rhodesia.

These views of mine were not unknown to Dr. Owen, since his information director, Mr. Hamilton Whyte, said he had given my reports on Rhodesia to him. Nevertheless, the young, attractive former doctor, who is married to an American girl, graciously received me along with Joe Kingsbury Smith, and Seymour Freidin, our London correspondent, in the historic room of British foreign secretaries at the Foreign Office. He seemed less tense and somewhat more flexible about the Rhodesian situation than when we had met with him in the House of Commons in May of last year.

I reminded him right off that I felt his government and the Carter administration had failed to keep the promise his prime minister, James Callaghan, and then Secretary of State Henry Kissinger had given Mr. Smith in 1976. The promise was that if Smith reached an agreement with black leaders for the transfer of power to black majority rule, the United States and Britain would support it and lift the economic sanctions presently imposed against Rhodesia. Why, I asked, have the British and American governments reneged on that pledge.

Dr. Owen pointed out he was not foreign secretary at the time but he understood Mr. Smith was not prepared to concede that during the transition period there should be a transfer of law and order authority to a neutral figure, or to the black majority. Mr. Smith has maintained that law and order should remain under control of the black and white transition government.

"The crucial issue was always law and order, and that issue has bedevilled agreement," the foreign secretary said.

Referring to the insistence of Nkomo and Mugabe that their guerrillas must be incorporated in the Rhodesian security forces during the transition period, Dr. Owen continued:

"You have to understand the feeling inside black Africa, where power is usually gauged by who controls the army and police forces. They haven't the same traditions we of a civilized and decentralized control."

When asked if incorporating the guerrilla forces into the security forces wouldn't place Nkomo and Mugabe in a position to seize power, the foreign secretary said it would have to be done in a way which would leave the balance of power in neutral hands. "Nobody denies this is one of the most difficult issues we face."

Britain, he added, has proposed that one of its distinguished field marshals, Lord Carver, should be resident commissioner during the transition period with control over law and order. He said he and Secretary of State Vance had succeeded in persuading the Patriotic Front leaders to agree that control of law and order should be reserved for the resident commissioner.

However, Nkomo and Mugabe refuse to accept the settlement Prime Minister Smith reached with the moderate black leaders. They want a new settlement in which they would play the dominant role and Mr. Smith representing the 200,000 whites would not participate.

The American and British governments have proposed bringing Nkomo and Mugabe together with Prime Minister Smith and the moderate black leaders in an all-party conference. The purpose would be to achieve a compromise agreement based on establishment of an executive council that would include the two terrorist leaders. This council that would draft a new constitution providing for black majority rule. It would also organize elections under the supervision of a British resident commissioner responsible for law and order. Both the Patriotic Front and the Salisbury coalition government have set conditions for attending such a conference which are unacceptable to the other side.

Dr. Owen thought there was still "a chance" of getting a compromise agreement at an all-party conference. "The worse the situation becomes in Rhodesia, the more people are beginning to look back to the Anglo-American plan," he said. "But every week that goes by will make it harder to get the Anglo-American plan implemented.

"I see the precipice yawning. The Salisbury government is losing control 30 to 40 miles outside the capital. As that society gets closer and closer to the precipice, we may be getting closer to a settlement. But as you get closer to the precipice, the dangers get greater."

The foreign secretary said it would have been "the height of folly" for the United States and Britain to support the Salisbury settlement because "we would have backed something we knew would not have won the acceptance of the people."

When I pointed out we were told in Salisbury by the moderate black leaders as well as Prime Minister Smith that Nkomo and Mugabe wouldn't get more than 15 percent of the vote in free elections, Dr. Owen replied: "We were all told that."

Asked what indications there were that the Salisbury leaders did not represent the majority of the black and white population, he said: "You get them from the extent to which the fighters (guerrillas) are supported by the people in the villages. If the security forces were dealing with a totally supportive population, I think you would have seen a reduction in the level of violence."

This struck me as rather naive. The experience in Vietnam showed that virtually defenseless peasants are not going to resist well-armed guerrilla forces. The test of whether the majority of blacks in Rhodesia support the Salisbury settlement would come in free elections. That Nkomo and Mugabe have rejected the Salisbury government's invitation to participate in such elections is a clear indication they lack popular support.

Dr. Owen recalled that he refused to condemn the Salisbury settlement when the UN Security Council voted to do so. "People forget that now," he added. "I don't take any joy in his (situation). I have not knocked the internal settlement. I've said very little. I've given it as good a chance as I could have done."

With all due respect to the foreign secretary, I don't agree. If the British and American governments had lifted sanctions against Rhodesia, then the settlement would have had a good chance of succeeding. Prime Minister Smith and the moderate black leaders were confident Nkomo would have joined the settlement if it had been supported by Washington and London Instead, we and the British have continued to weaken Rhodesia militarily and economically while Soviet Russia, Cuba and East Germany have built up the guerrilla forces.

I told Dr. Owen the Soviets don't hesitate to take sides in Africa, but we seem to be afraid to do so. He said it wasn't a question of taking sides, but a question of "a fair solution." I can't believe he really thinks it's a "fair solution" to wreck the settlement that would establish a pro-western, multiracial, black majority rule political system in Rhodesia that could prove a model for racial power-sharing in South Africa. But he said just that.

Joe will give you a fuller report in tomorrow's News American on what else the foreign secretary had to say, but I can tell you now that after listening to him patiently explain the British and American governments' position, it only served to reinforce my sad conclusion that he and Cy Vance are paving the way for eventual establishment of an anti-western black dictatorship in Rhodesia. Not that they alone are to blame. The policy they are pursuing has the approval of President Carter and Prime Minister Callaghan, and of course, Andy Young.

It is an unrealistic policy based on the hope of a solution that would bring the power-hungry, Moscow-oriented terrorist leaders into a new settlement with the moderate blacks for black rule that, while excluding the white minority from any effective voice, would expect them to remain in Rhodesia without any protection of their interests.

In my opinion, the moderate blacks won't go for it because they know they would eventually be liquidated by Nkomo and Mugabe. The whites won't go for it because they would either be massacred or driven out.

The truth of the matter is that Carter and Callaghan, and their foreign secretaries, are willing to sacrifice Rhodesia in order to curry favor with Africa's black rulers. The latter are opposed to any protection for white minority interests and want not majority rule in Rhodesia but the same type of black dictatorship they have imposed on their own countries.

The fear in the White House and Whitehall is that if we don't sacrifice Rhodesia, black Africa will align itself with Russia. This anxiety appears unjustified in view of the anti-Soviet sentiment that dominated the recent Organization of African Unity summit meeting in Nairobi, where the Soviets were told by Guinea-Conakry President Ahmed Sekou Toure, one of the founders of African radicalism, that "Africa is not about to throw off one colonial yoke for another."

Instead of banking on the brink of chaos to bring a settlement that will undoubtedly lead to a black dictatorship in Rhodesia, the American and British governments should honor their countries' pledges to support Ian Smith's agreement with the moderate blacks.

As Lord Home said to us: "The situation was tackled wrongly by both our governments. We ought to have had a political presence with the provisional government in Salisbury from the start—helping to guide them. The emphasis has been put by both our governments on helping the Patriotic Front leaders rather than helping the other people. It's very late now."

It is very late, and I have little hope that sanity will prevail unless Congress assumes the sensible leadership that President Carter and Prime Minister Callaghan lack in respect to Rhodesia.●

VALIANT NEW MEXICANS ATTEMPT BALLOON CROSSING OF ATLANTIC

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. LUJAN. Mr. Speaker, I rise on this occasion to inform my colleagues of an attempt by man to conquer the challenge of nature.

Three men from my home of Albu-

querque, N. Mex., Ben Abruzzo, Maxie Anderson, and Larry Newman will be lifting off from Presque Isle, Maine at any moment in a giant balloon in their second effort to cross the Atlantic in a lighter-than-air craft.

Their first attempt was thwarted by Mother Nature in much the same way two Britishers were foiled less than 2 weeks ago. However, this time my friends are getting an assist that they lacked last time up.

I refer to the hot air which this speech should add to their present supply and which might be that little extra something that will carry them to their goal.

Since this august body so often has an oversupply of that same stuff which is used to lift balloons, I would ask that my colleagues join me in wishing this daring threesome good luck, good wishes, and Godspeed.●

WHILE ANGELS WEEP

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. DORNAN. Mr. Speaker, for years it has been intellectually fashionable to attribute horrible crimes to a mental disorder in the criminal. Hitler, Himmler, Mao, Stalin, and Nero were often depicted as the victims of some kind of dreadful psychosis.

This is an easy answer. But I wonder if it does not reflect a deep urge to believe in a prevalent myth—the natural goodness of human nature. I suppose it is more easy for us to absorb the idea that some psychopathology is at work in the commission of unspeakable crimes against humanity, than it is to accept the idea that there is a moral weakness in the very constitution of humanity itself. It is hard, in other words, to accept the idea of sin. We thought we had dismissed the idea of sin long, long ago. But the reality of man's inhumanity to man keeps returning to haunt us. And the simple charge that all the criminals are merely sick is a hypothesis approaching the lightness of air.

Mr. Speaker, the very name of the country, "Cambodia," is enough to make angels weep. There are few instances in the world where "madness," if that is what it is, reigns supreme. There are certainly few repressions in the history of this world that approach the ruthlessness of the war carried on by the Cambodian Communists against every vestige of civilization.

Religion and the family, two of the primary pillars of civilization itself, have been the objects of a concerted attack by Khmer Rouge ruffians. Wages, property, commerce of any sort is declared illegal; and the most cruel reprisals are visited upon a helpless people who deviate, the slightest, from the regime's stark regimentation.

The most authoritative work on this subject has been undertaken by John Barron and Anthony Paul. I wish to commend their latest piece on the subject, appearing in the most recent issue of "Reader's Digest," to my colleagues:

CAMBODIA: THE KILLING GOES ON

(By John Barron and Anthony Paul)

(Note. Eighteen months ago, authors Barron and Paul shocked the world with the first in-depth report on communist atrocities in Cambodia (see "Murder of a Gentle Land," The Reader's Digest, February '77). Today, despite the desperate efforts of red leaders—who call themselves *Angka Loeu* (Organization on High)—to conceal their crimes, the tragedy of Cambodia continues to unfold.

(Since the communist takeover in April 1975, at least 90,000 Cambodian civilians have fled their homeland, bringing eyewitness testimony to the West. And in recent months, additional information has become available through the growing number of Khmer Rouge (communist) soldiers who have deserted their masters in fear and revulsion. What follows is an updated report on an almost unimaginable horror—the systematic genocide inflicted by a dictatorship upon its own people.)

Rightly or wrongly, the prisoners were suspected of having conspired against the communist rulers of Cambodia. Rounded up and trussed like animals, they were herded last July into the Security Center at Siem Reap in northwest Cambodia. Khmer Rouge soldiers then wired their thighs and genitals to army field generators, and turned on the power. As the captives writhed in agony, many lost control of their bowels and stood, trembling, in their own waste.

Leam Lis, 17, a trusted communist messenger, witnessed the torture, and shortly afterward drove the Khmer Rouge's chief executioner to the extermination grounds off Highway 6, 50 kilometers to the east. Leam watched as a procession of ten trucks delivered about 300 of the doomed men from the Security Center.

"Four large pits had been dug by a bulldozer," recalls Leam. "The bound and blindfolded prisoners were dragged to the edge of the pits, and hit with heavy hoes or thick bamboo sticks. There were shouts of pain, and moaning. Blood ran from their nostrils and mouths as the hoes crushed the back of the heads. Some were not yet dead when the bulldozer pushed earth over them."

TYRANNY AND TERROR

Leam's account, which he gave to us in a Thai refugee camp early this year, is not an isolated, atypical report. Rather, it is consistent with a growing body of testimony showing that Cambodia remains a caldron of tyranny and terror unequaled in modern times.

Within the last year, the Khmer Rouge have further exposed their savage character by committing similar atrocities against their Vietnamese and Thai neighbors. Their barbarity has appalled even the Vietnamese communists, themselves no strangers to terror tactics. Last January, following Cambodian raids on Vietnamese villages, the communist government of Vietnam stated: "They beheaded, disemboweled and cut out the livers of Vietnamese women and children, burned down houses, looted property and tore babies into pieces." [1]

On January 28, 1977, Cambodian forces crossed into Thailand at night and slaughtered inhabitants of three villages. Declared the Thai government: "Khmer Rouge soldiers fired their guns at the innocent Thai villagers and burned all houses to the ground. These murderers did not only gun down everybody in sight, including helpless women; they also disfigured the bodies and slashed the throats of children and babies."

To corroborate their charges, both the Vietnamese and Thai governments displayed grisly photographs of slashed and multilated corpses. The Cambodian government did not trouble to deny the massacre. Rather, it made the preposterous claim that the three Thai villages were in fact part of Cambodia, and added that it was merely "arranging its own internal affairs."

WASTELANDS

Immediately after their conquest of Cambodia, the communists banished every man, woman and child from the cities. Some four million people were driven into the countryside. Today, the cities are desolate, decaying wastelands. The capital, Phnom Penh, which had contained three million people, now holds no more than 15,000. There are no shops, and in the side streets people grow vegetables and raise rabbits and chickens. There is no mail, no telegraph, no train service.

Throughout the country, modern medicine has all but disappeared. Medical care consists mainly of herbal medicines administered by poorly trained cadres. Although the epidemics of cholera, malaria and dysentry that decimated the population in 1975 and 1976 appear to have subsided, refugees say people still are dying of these diseases in large numbers.

Cambodia has been transformed into one vast forced-labor camp, with the surviving population regimented into rural villages or new communes carved out of the bush and jungle.[2] A few factories have been restored to operation, and there is some cottage industry. But the vast majority of Cambodian men, women and children toil in the fields 7 days a week, 12 to 14 hours a day. Generally, the only surcease occurs when villagers are given a day off to watch executions.

"Reasons for Death." *Angka Loeu* relentlessly continues to eradicate all institutions and vestiges of previous Cambodian society. The reading of anything foreign is punishable by death. People are forbidden to travel, and communication is mainly by *Angka* messengers. Money, wages, commerce—all have been abolished. Everyone dresses alike in black trousers and black shirts issued by *Angka Loeu*.

For many centuries, the fundamental institutions of Cambodian society were religion and family. No longer. Before the takeover, at least 90 percent of all Cambodians were Buddhists. The communists have destroyed most temples, or converted them to state use. Monks have been pressed into the labor force, and some have been slain.

Last summer, Som Suchat, a 41-year-old laborer, saw a monk wander into the village of Kok Mon wearing his long saffron-yellow robe. "The man was about 30. When the Khmer Rouge demanded that he take off his robe, he refused. He said he wanted to find happiness by his own path. I heard the Khmer Rouge tell him, 'We'll help you find happiness.' They tied his hands and cut off his head with a machete."

To weaken the family, the communists segregate husbands, wives and children into separate work groups. Children spend more time undergoing indoctrination by *Angka*

[1] In response to Cambodian attacks, several Vietnamese divisions, supported by aircraft, heavy artillery and tanks, plunged into Cambodia in September and December of 1977. They inflicted heavy casualties on Khmer Rouge troops, and the fighting continues.

[2] Authorities calculate that the population of Cambodia at the end of the war in 1975 was approximately seven million. No one can know precisely how many people died as a result of the great forced march from the cities, subsequent famine and epidemics, massacres and executions. On the basis of our previous research, we estimated that, between April 1975 and January 1977, at least 1.2 million perished. Later research persuades us that, if we erred, it was on the low side.

mentors than they do with their parents, and both boys and girls are subject to military conscription as early as age 14. Everyone must eat in communal dining halls. And no one may marry without prior approval of *Angka Loeu*. Reports Phin Sin, a former deputy commander in the 116th Khmer Rouge Division: "Flirtation, love affairs, adultery—all are reasons for execution."

Angka Loeu divides the population into Old People and New People. The Old People are those who resided in communist territory before Phnom Penh fell; New People are those banished from the cities. While all are subject to the same Draconian discipline, *Angka Loeu* tends to be less vengeful toward the Old People.

Sik Non, a young accountant, was one of some 800 Phnom Penh exiles assigned to live with about 400 Old People in the village of Trapeang Chor. His experiences are representative of contemporary village life:

"The villagers were awakened at 5:30 a.m. and labored until their first meal of rice soup at 11 a.m. They continued from 12:30 p.m. to 5 p.m., when they again were fed rice soup. On moonlit nights they labored from 6 p.m. to 10 p.m.

"If you pretended to be sick, you were scolded. After a second scolding, the person would just disappear. The Khmer Rouge would say, 'He's been sent to Angka Loeu.' I saw no one killed. But did see bones and putrefying bodies whenever I went into the jungle looking for wood for the blacksmith's forge.

"By last August we were getting half to three fourths a can of rice soup a day, and up to 700 people had died of hunger and disease. I could see the village vanishing before my eyes.

"Since we had nothing to lose, 28 of us decided to run away. We spent 14 days in the jungle, walking along a mountain range and avoiding towns or villages. South of Battambang, a Khmer Rouge squad found us and opened fire. The group scattered. After hiding in the jungle for some hours, I came back to find 25 bodies—including my wife's."

"LIKE A NIGHTMARE"

After the fall of Phnom Penh, the cowed and enfeebled population at first offered no resistance to its new masters. But in time, Angka Loeu policies and their deathly results provoked rage within the ranks of the communists themselves. By 1976, plots against the Phnom Penh dictatorship were being discussed by Khmer Rouge leaders in the northern provinces.

In May of that year, the Chong Kal district chief, Comrade No, spoke passionately to an assembly of some 35 chiefs of villages, communes and other districts of Oddar Meanchey Province. "We must overthrow the rulers," he declared. "For Cambodia's sake, we must fight these people."

Among those listening was Chek Pek, the 34-year-old chief of Choeung Tien village. Long a communist supporter, Chek was dismayed and disgusted by the ravages wrought on his people. He knew that many had gone to their deaths at the Samrong Security Center, presided over by a mad executioner, Comrade Da, who sometimes ate the livers of his victims.

Comrade No, Chek and the other chiefs planned formation of clandestine forces to attack Phnom Penh in the spring of 1977. The chief of adjoining Siem Reap Province, Comrade Soth, joined the conspiracy. It ultimately spread to include Khmer Rouge commanders and Angka Loeu administrators in the provinces stretching from Battambang in the northwest to Kompong Chom near Phnom Penh itself. For a time it seemed possible that disaffected communists might actually rid Cambodia of Angka Loeu.

However, by January 1977 Angka Loeu had begun to unravel the plot. The next month it instigated a ferocious wave of purges. Many provincial leaders and Khmer Rouge officers were arrested. Comrade Soth and his wife and children were helicoptered to the capital, where all reportedly were bludgeoned to death. His deputy, Comrade Hean and two other conspirators were drenched with gasoline and burned alive.

Angka Loeu turned its fury upon civilians as well. While in the Kompong Nong infirmary last September, Prak Ling Horn, 23, witnessed a small portion of the purge:

"In the afternoon, Old People were told to move from one ward to another. That night, kerosene lamps were lighted in the ward the Old People left. Some 20 persons remained there. About midnight, a Khmer Rouge squad with lengths of heavy bamboo and water pipe moved through the ward bludgeoning everyone to death. No one escaped."

Finally, the world has begun to awaken and to decry the horror of Cambodia. Last April in Oslo, all major Norwegian political parties sponsored an international inquiry into the continuing genocide. As the hearing began, U.S. President Jimmy Carter declared the Cambodian government "the worst violator of human rights in the world today." The Canadian parliament unanimously expressed its outrage, and called upon all nations to protest the slaughter.

At the Oslo meeting, Cambodian refugees from all walks of life gave poignant eyewitness accounts of terrible agony, torture and murder. The noted French journalist Jean Lacouture, who as late as 1976 was an ardent supporter of the Cambodian communists, stood before the hearing to confess he had been wrong. He charged that the Cambodian revolution has been "dishonored by a frenzied practice based on depraved principles . . . a murder-delirium."

The mood of the hearing was summed up by a simple Cambodian village schoolteacher, Chou Try:

"Can you close your eyes? Can you let these things go on until our race disappears? I cannot believe this of you!" ●

PANAMA CANAL: SOVIET NEWSPAPER PRAVDA SEES CLOSER RELATIONS BETWEEN U.S.S.R. AND PANAMA

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. FLOOD. Mr. Speaker, on numerous occasions in addresses to this body of the Congress, I have stressed that in its consideration of the Panama Canal question the transcendent issue involved is not between the United States and Panama but between the United States and the U.S.S.R. This fact was emphasized in my remarks on July 26 entitled "Panama Urges United States to Give Up Guantanamo Naval Base" (CONGRESSIONAL RECORD, July 26, 1978, p. 22[illegible]).

It is, I believe, quite significant that the Panamanian chief negotiator for the recently ratified new Panama Canal treaties was Romulo Escobar Bethancourt, a dedicated Marxist. The Spanish language press of Panama now reports he is a member of the Panamanian advisory team in connection with planning Panama's implementation of those treaties.

The latest news about the Panama-Moscow relationship is an AP dispatch from Moscow published in a six line news story tucked away on page C6 of the August 9, 1978 Washington Post, which announced that Pravda, a Communist daily newspaper, praised Panama for developing "warmer relations" with the U.S.S.R. and other Communist countries.

The indicated news dispatch follows as part of my remarks:

PRAVDA SEES CLOSER TIES WITH PANAMA

MOSCOW.—The communist daily newspaper Pravda praised Panama yesterday for taking steps to develop warmer relations with the Soviet Union and other communist countries.●

A NEW SHIP JOINS THE FLEET

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. PATTERSON of California. Mr. Speaker, on Saturday, July 29, I was privileged to attend, along with our colleague GLENN M. ANDERSON, the launching and christening of the U.S.S. *Wadsworth*. This new ship, a fast frigate designated FFG–9, will soon be able to take its place with the other ships of our U.S. Navy that are so essential if we are to retain our freedom. Ship christenings are always events that, by their very nature, inspire a sense of pride and patriotism—and, in fact, send a tingling down one's spine. At a launching, the main speaker, in his remarks, should set the stage for events that follow with a short, appropriate, and inspirational message. And it was just such a message that our colleague GLENN ANDERSON of California delivered at the launching of the *Wadsworth*. I thought his remarks so appropriate that I would like to share them with you and the other Members.

The remarks follow:

LAUNCHING AND CHRISTENING OF THE WADSWORTH (FFG–9)

(By GLENN M. ANDERSON)

Thank you, Captain Kaune, Admiral St. George, Admiral Otth, Congressman and Mrs. Jerry Patterson, Mrs. Roberts, Mrs. Peacher, Ladies and Gentlemen:

It is indeed a pleasure for Mrs. Anderson and me to be here with you today. I am delighted to have been asked to participate in the launching of the U.S.S. *Wadsworth*. The addition of this ship to the U.S. Navy is visible evidence that, despite the claims of some, we are not abandoning our Navy and relegating it to second or third class status. The Congress is determined to prevent that. Our Navy MUST be the best afloat—and it must remain so. For only by being the best can we be assured that our nation and our allies will remain free in today's troubled world.

For in this world—with global spheres of influence and areas of potential conflict, and with the growing importance of the seas both as a means of transportation and a source of resources—the importance of a strong, vigorous Navy is obvious. For seldom before have we faced as pressing a need for a fighting force that combines effectiveness, speed, and the ability to be ready for action almost anywhere in the world as we do today.

The *Wadsworth* and her eight sister ships to be constructed here at Todd Shipyard will play an important role in maintaining our naval readiness in the years ahead. Equipped with the latest weaponry, fire control, and navigational systems, when commissioned and operational the power of this fighting ship will be much greater than her relatively compact size would indicate.

With a weight of approximately 2,500 tons and a length of 450 feet, her sophisticated equipment will permit achieving maximum combat capability with a minimum number of crew. The *Wadsworth* and the other ships in her class will be a welcome symbol of our strength as a nation on the high seas.

Our Naval vessels have been among the most important embodiments of American strength throughout our more than 200 years of history. The name of this ship is especially fitting, since it is one with a long tradition of excellence in the United States Navy. It carries the name shared by two destroyers which played important roles in previous years.

The first U.S.S. *Wadsworth* was the flagship of the first division of American destroyers to arrive at the British Isles during World War I, and which gave a greatly needed sense of encouragement to our embattled allies.

The second *Wadsworth* saw extensive combat during the great conflagration of World War II, earning six battle stars and the Presidential Unit Citation.

These ships carried on the high tradition begun by Commodore Alexander Scammel Wadsworth, whose name will continue to be commemorated by the ship we are launching today. During the War of 1812, he received a silver medal for heroism as second lieutenant of that famous fighting ship, the U.S.S. *Constitution*—Old Ironsides. He was also promoted for gallantry as the first lieutenant of the frigate *Adams* as our nation re-established its sovereignty on the high seas.

Later, Commodore Wadsworth commanded the Pacific Squadron of the U.S. Navy, and was also Inspector of Ordnance.

Mrs. Patricia P. Roberts, the great-great-great-granddaughter of Commodore Wadsworth, is here today to serve as the sponsor of this ship, which is named after her famous ancestor. And I understand that her mother, Mrs. Rebecca Peacher, is also present.

The construction of the *Wadsworth*, and the other ships of her class here at Todd Shipyard is another tradition I am pleased to see continue. It is indicative of the high regard in which this yard, its skilled shipyard workers, and its efficient engineering and management team are held by the Department of the Navy.

Historically, the Los Angeles-Long Beach Harbor area has played an important role in our nation's defense. As we launch the *Wadsworth* today, we see that role continue—as we help to revitalize our nations first line of defense, the U.S. Navy!

Thus, as we christen this ship today, we see reflected in her the tradition of the U.S. Navy; the pride in workmanship and skill of the men and women who built her; and a ship benefitting the illustrious name it will bear so proudly as it joins our fleet.

Wadsworth is a name that, in past conflicts, has justly inspired pride. For Commodore Alexander Scammel Wadsworth, and the two ships named after him, all proved their excellence and mettle in the crucible armed conflict.

Let us hope that this latest *Wadsworth* will serve our nation as well in times of peace as her namesakes did in war. And that she sails the seas as a symbol of not only our strength but of our determination to remain free.

Thank you.●

REHABILITATION IS GOOD BUSINESS

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. BRADEMAS. Mr. Speaker, 3 months ago the House of Representatives passed legislation which would continue the 58-year-old vocational rehabilitation program which trains disabled persons for employment.

I refer to the Comprehensive Rehabilitation Services Amendments of 1978, which the House passed on May 16. This legislation, H.R. 12467, would reauthorize the Rehabilitation Act of 1973. This act is scheduled to expire in 6 weeks.

The Comprehensive Rehabilitation Services amendments would assist the vocational rehabilitation program in realizing its important goal of preparing handicapped individuals for employment.

Let me just point out that the bill would establish three employment programs.

The first of these would be a community service employment program under which handicapped individuals would be assisted in taking the difficult steps from dependence to employment in the private sector.

The second is an expanded project with industries program under which industries would be encouraged to train and employ handicapped individuals.

Third, these provide for a business opportunities program under which Federal loans and other assistance could be made available to assist handicapped individuals in establishing their own businesses.

Mr. Speaker, these three features would substantially strengthen the existing partnership between vocational rehabilitation and private industry.

I would illustrate this point further by commending to the reading of my colleagues an excellent article which appeared in the New York Times on August 6, 1978. The article, which describes the experience of the Minnesota Mining and Manufacturing Co. in training and employing disabled persons, makes vividly clear that rehabilitation is good business.

The article follows:

[From the New York Times, Aug. 6, 1978]

REHABILITATION IS GOOD BUSINESS

(By Michael W. Fedo)

ST. PAUL.—Two years ago, Robert Schroeder, a shipping clerk at the Minnesota Mining and Manufacturing Company here, strained his back on a warehouse loading dock. Doctors said the injury would prevent him from returing to the job he'd held for 19 years, but the company's rehabilitation counselor enrolled him at a business college. Today Mr. Schroeder is a raw materials analyst at 3–M, earning more than he did as a warehouseman.

Hundreds of ill or disabled 3-M employees are working instead of collecting disability benefits, the result of "in-house retraining," a rehabilitation concept pioneered by the company that is taking hold in corporate boardrooms across the country.

Paul Ashton, who directs 3-M's program, says it was started six years ago because 3-M felt it owed a responsibility to its workers—and because rehabilitation is good business. "Finding, hiring and training a person for a particular job can run into several thousand dollars," Mr. Ashton said. "When illness, injury or emotional problems prevent that person from performing a job, the company can lose its investment. And paying insurance costs to a disabled employee instead of paying a salary to a productive one, is a further drain."

The company, which has 40,000 employees, estimates it saved $300,000 in Workmen's Compensation payments in the first 18 months of the program, which is voluntary.

By keeping Mr. Schroeder on the payroll, for example, 3-M figures it made a solid investment. It spent $45,000 on his retraining and rehabilitation and saved $100,000 in total insurance liability.

Susan Alt, editor of Business Insurance magazine, says there is another reason why companies are looking to in-house retraining: mandatory rehabilitation laws. Three states—California, Georgia and Hawaii—recently passed legislation requiring companies to pay for such programs and others are studying the question. So interest in the 3-M experience is high. Last year 3-M ran a newspaper ad offering to help other corporations develop their own programs. More than 500 responded.

OTHER COMPANIES

Some companies had actually started earlier. The Control Data Corporation began in-house rehabilitation in 1976. John Moe, manager of employee assistance, says the program has saved nearly $200,000 a year.

And Paul Scher, corporation manager of handicapped programs at Sears, Roebuck & Company, says, "While our programs have not reached the sophistication of 3-M's, we're active on the East and West Coasts. Even if it costs $30,000 to rehabilitate a worker over a few years, the company is still money ahead in the long run."

A disabled Sears employee is entitled to two-thirds salary until he's 65 years old. "If we have a worker injured or take ill at age 40," he said, "and that person was earning $12,000 a year, he will receive $8,000 a year for 25 years. If you replace that worker with a less experienced worker at $10,000, you're paying $18,000 for a service that used to cost just $12,000."

Employee rehabilitation began at Burlington Northern Inc. in 1976, just in time for Del Ocker, a B.N. painter, who hurt his back in a truck accident the year before. He was told he'd have to leave the job he'd held for 10 years.

The railroad sent Mr. Ocker to data processing school and he is now a programmer for the company. "It gave me a lift to know the railroad cared about me," he said. "After my surgery, they were right there to assure me I wasn't abandoned."

REHABILITATION COMMITTEE

"What we try to do," Mr. Ashton said, "is to get the handicapped employee mentally, psychologically and temperamentally prepared to resume the job and his or her daily living routine."

When Sandy Hanson, a salary analyst at 3–M, was thrown from a horse and suffered a broken back on Christmas Day, 1976, Mr. Ashton was at the hospital when she came out of surgery, and said the company was holding her job for her.

A paraplegic as a result of the accident, Miss Hanson could still do her job, but adjustments had to be made. She was taught to drive her car with hand controls.

A bathroom situated near her office was renovated to accommodate her wheelchair and her desk was placed on blocks so she could work from the chair.

3-M has set up a rehabilitation committee that consists of representatives from all departments concerned with employee services including employment, personnel research, insurance and employee relations.

The committee is trained to better understand the problems of the handicapped. For example, it recently heard lectures by an authority on multiple sclerosis and a representative of the State Services for the Blind.

Largely through efforts by the committee, classes in sign language are being offered to supervisors who must communicate with employees who are hard-of-hearing.

The committee also gives local physicians tours of 3-M facilities so they will understand what specific jobs require.

"A while back a woman whose finger was amputated stayed out of work for 18 months," Mr. Ashton said. "But when her doctor actually saw the type of work she'd be doing, he said if he had known, she could have returned a year before."

DRAMATIC SAVINGS

The savings resulting from rehabilitation can be dramatic. According to Mr. Ashton, if a 30-year-old 3-M employee became disab ed and took benefits instead of returning to work, the cost to the company would be about $150,000 until that person reached age 65. "And that's money we're paying to someone who is no longer producing income for the company.

"Companies are paying high insurance premiums because they have people sitting at home who can work. If we don't reach them in time—that is, soon after they've been injured or taken sick—they develop what I like to call pensionitis. It becomes easy for them to sit around and collect. They begin to doubt that they can fill any position."

In many cases retrained employees wind up with better jobs than they previously held. Mr. Schroeder, for instance, says his new position at 3-M "has a real future for me."

And Frank Kostohris, who used to work in the film manufacturing plant until he hurt his back, now works as a fork-truck operator. "I like the new job better," he said.

Others have had to take lower-paying positions. "It's a blow to have to tell someone who may have been making $8 an hour that he now only qualifies to take a job paying $5 or $6," said Mr. Ashton. "But the benefits a disabled employee might get are obviously going to be far less than he would receive if he worked—even at a lower-paying job."

While most corporations with rehabilitation programs concentrate on job-connected injuries, 3-M deals with all injuries and illnesses. Victims of multiple sclerosis, for example, presently work as phone operators, sales representatives and maintenance engineers at the company.

JOBS RESTRUCTURED

"As the disease—whatever it may be—progresses, and their jobs beocme too difficult, we try to move them where they'll be more comfortable," Mr. Ashton said.

Labor unions acknowledge that internal vocational rehabilitation contributes significantly to employee morale, and they have been cooperating with management's efforts to keep disabled workers on the job. However, a few union business agents have intimated that companies are trying to deny people benefits in order to save money. In response, Mr. Scher says: "It's best for the employee, but even so vocational rehabilitation is not a charity—it's a business."

Still, there is an element of altruism that surfaces when counselors deal with those who suffer debilitating, even terminal illnesses.

"We're not only interested in putting people into new jobs or new careers," said Mr. Ashton, "but in helping them through the current moment, no matter how short-lived that moment is."●

LIFE IN CAMBODIA DURING 1975 AND 1976

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, I would like to place in the RECORD the following documents describing life in Cambodia during 1975 and 1976:

DECEMBER 19, 1975.

LIFE IN CAMBODIA

(Extracts from a cabled report from the American Embassy in Bangkok)

(The names of the refugees who provided this account and the name of their village have been excised to protect the identity of family members or friends still in Cambodia.)

Two Catholic Relief Service (CRS) employees from Phnom Penh have arrived in Thailand, after working first in an area south of that city and then in the Sisophon area in the far northwest. A description of their life and observations follows:

The Embassy debriefed December 11 two Cambodian CRS employees who had recently managed to flee their country into Ta Phraya, Thailand. Previously serving as special forces soldiers in South Viet-Nam prior to working for CRS in 1974–75, the two were well-known and trusted employees of CRS. Their observations about their experiences since the fall of Phnom Penh are the best we have heard in recent months. Until their flight to Thailand in mid-November, they were successful in hiding the fact that they worked for an American organization.

The Fall of Phnom Penh. There was confusion for the first two days after the fall. One employee, P— S—, was sent in the direction of Kompong Speu to the southwest on April 19 by Khmer Communist (KC) female soldiers, but the road became so congested that the rear half of the exodus was separated and sent in other directions. P— S— observed when passing the Russian Hospital April 20 that large numbers of non-ambulatory patients were lying on the ground outside the hospital; they told him they were removed to facilitate a general clean-up of that building.

Resettlement. Both subjects ended up in an area south of the capital working in the rice fields. They lived in K— village (Kandal Province) along the Bassac River.

Story of a Liberated Village. Villagers who had lived permanently in K— told the two that the village was never actually under Government of the Khmer Pepublic (GKR) control. They claimed that from 1970 through 1972 the North Vietnamese Army (NVA) controlled it. Throughout that period there was sporadic but violent conflict between the NVA and the Khieu Samphan faction of Khmer Communists (KC) also operating in the area, over the fact that fully armed NVA forced the KC with only 20 weapons per 100 men to lead assaults against GKR army positions, with the NVA following behind. In 1972 the NVA departed the area, relinquishing control to the KC. According to one farmer, the NVA left hidden arms caches disguised as Chinese tombs for use in the event of a return to the area. The KC forced the farmers to dig up some of them uncovering AK-47's and SKS rifles.

K—: Civilians. The new arrivals seem to have been integrated into the existing population of K— village. Married couples who had been in the zone before April 21 were allowed to remain together, whereas new arrivals were strictly separated by sex both in the fields and at night. Sexual relations or talk of marriage were punished by public execution, the two claimed. As justification, the KC said that everyone must devote himself to strengthening the economy before thinking of raising a family. No one was permitted to leave his house or barracks after 6:00 p.m. without obtaining permission. K— said the death rate among children was extremely high; on the worst day thirty died, primarily of malaria and were buried in a common grave. With a general shortage of food, stealing food was punished by public execution, usually done by rifle or pistol.

K—: Military. In the fields there was one male guard to every ten male workers and one female per ten female workers. The KC wore black pajamas and performed some work. They were men and women of all ages, armed usually with M-1 and M-2 carbines. As refugees from other parts of Cambodia have also reported, the two saw some KC wearing green uniforms. They carried AK-47's or possible sub-machine guns. None ever worked in the fields. P—S— suggested that they may have been an elite combat reaction force for use against pockets of resistance or village uprisings.

Transfer of Population. On September 14 fifty families from K— village joined others from nearby villages to travel to C— in five ferry boats carrying 500 people each. Passing by the Phnom Penh docks the following day, they saw no boats, only one truck being loaded from a warehouse with what looked like bridge repair materials. (Another Embassy here spoke with a Vietnamese refugee who had piloted a boatload of rice to Phnom Penh in early October; he reported there was no sign of life in the capital city until, after a three-hour wait, an official came to yell at them to unload the rice themselves and depart.) After arriving in C— on September 17, the people were trucked to Pursat in Molotova-type six-wheeled vehicles with Chinese characters stamped into the metal. From there, they moved on September 19 in a 23-car train to Sisophon. A KC guard travelled on top of each of these passenger-carrying freight cars, and a Cambodian drove the train. Finally, the group moved to an area on Highway 6 north of N— village, sleeping along the road until other workers had finished building a work camp. While waiting along the road, they observed a convoy transporting rice, refugees, and green-uniformed soldiers travelling in GMC trucks toward Siem Reap on September 23 or 24.

The Work Camp. The KC soon put the people to work to build dikes and irrigation ditches, as well as to work on the highway. The KC aim was to produce a dry-season rice crop in the area, something which apparently had not been done there previously. The two Cambodians reported that people in the area were astonished by the idea but were afraid to tell the KC. They said that much of Sisophon District was still flooded when they left in November (this flooding perhaps encouraging the KC to think they could produce a dry-season rice crop), which meant that there would be no wet-season rice crop to harvest now in those areas. In this work camp, fraternization with members of the opposite sex was also forbidden. Food was obtained primarily by foraging for it in the forest.

NOVEMBER 1, 1976.

LIFE IN SISOPHON DISTRICT OF NORTHWESTERN CAMBODIAN

(Excerpts from an Airgram report by an Officer of the American Embassy at Bangkok)

(The identification of the refugee and his village have been excised to protect family and friends remaining in Cambodia.)

SUMMARY

Following is the story of the newest refugee arrivals in the camp at Aranyaprathet, including a report of reduced cultivation of rice land in their area of northwestern Cambodia—traditionally the country's rice bowl.

INTRODUCTION

Twenty-six thin Cambodian males arrived as refugees in Aranyaprathet approximately one week ago from the village of R——— in Sisophon district of Battambang province. One of them, C———, described life there for the visiting Administrator of the Department of State's Bureau of Security and Consular Affairs, Leonard Walentynowicz, and the reporting officer

ORGANIZATION

R——— is one of a group of adjacent villages long organized as a commune. When the Khmer Communists unveiled their concept of "cooperatives" after the takeover, the commune was divided into ten of them. On August 15, 1976, the ten cooperatives became two, each comprising 700 families. KC troop strength for the commune has varied between 30 and 50, and administration has been largely in military hands, although there are several KC civilian officials, none of them local people, assigned to the commune, as well.

RICE PRODUCTION

Rainfall this year has been somewhat less than normal and will have an impact upon the area's rice harvest at the end of the year, C——— predicted. More important, however, will be the fact that less land is being cultivated in 1976 than in 1975 due to general weakness of the population owing to malnutrition (the food shortage is particularly severe at the present time) and debilitating disease, for which there is no medicine. Asked to estimate the decrease in the number of rice fields cultivated this year as opposed to last in the R——— area, C——— suggested fifty per cent.

EXECUTIONS

"Every once in a while", clarified to mean about once a month, a few people from R——— were executed, C——— claimed. Victims were former soldiers, civil servants, and other "educated" persons, killed when their identities were discovered. The last execution occurred in early September. The victim was described as a nice, former soldier in his fifties, of whose background the KC had just learned. He, like others before him, was taken out of the village quietly at night and clubbed to death a short distance away.

ESCAPE

C——— said there was evidence that the KC had just been able to identify a number of persons in R——— and that there were indications that they were slated for execution immediately. (Another source claimed that KC friends or relatives had tipped off those persons.) Thus, he, 24 former soldiers, and the teenaged son of one, fled the village and came to Thailand. They left their dependents in R——— because they thought, should they meet the KC en route, it was better that they die themselves rather than risk the lives of their families, as well. They had no such problem, fortunately. (In Aranyaprathet immigration jail—a cage near a restaurant—are two Cambodians who arrived in Thailand October 25 and were charged with illegal entry. They started out in a group of 40, were ambushed, and said they were the only ones who escaped.) They crossed high water in places.

Asked whether the group of 26 was not concerned about their families in R———, C—— said he assumed the KC would be true to form as in the past and not harm them. The usual practice, which he expected to see carried out this time, as well, was for the KC to move the remaining family members out of the village into another area. Asked who would till the fields if too many persons fled, he replied that the KC claim not to care, that those who flee are rubbish and the country is well rid of them. They also spread the word that Cambodians are killed when they arrive in Thailand, but this does not deter people from trying to leave.●

VOTING RECORD

HON. THOMAS S. FOLEY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. FOLEY. Mr. Speaker, I hereby submit a compilation of my voting record for the first half of the month of July of the 2d session of the 95th Congress.

451. H.J. Res. 13. National Grandparents Day. Lehman, D-Fla., motion to suspend the rules and pass the joint resolution to request the president to designate the first Sunday in September after Labor Day in 1978 as National Grandparents Day. Motion agreed to 362–8; July 10, 1978. Yes.

452. H.J. Res. 1007. Asian/Pacific American Heritage Week. Lehman, D-Fla., motion to suspend the rules and pass the joint resolution to request the president to designate a week in the first 10 days of May 1979 to be designated Asian/Pacific American Heritage Week to commemorate the contributions and accomplishments of the two million Americans of Asian and Pacific descent. Motion agreed to 360–6; July 10, 1978. Yes.

453. H.J. Res. 773. National Port Week. Lehman, D-Fla., motion to suspend the rules and pass the joint resolution to request the president to designate the week of Sept. 17, 1978, as National Port Week to recognize the economic and national security importance of the nation's ports. Motion agreed to 363–11; July 11, 1978. Yes.

454. H.R. 13087. Substitute Treasury Checks. Mitchell, D-Md., motion to suspend the rules and pass the bill to authorize the Treasury secretary, at his discretion, to issue substitute checks for stolen or lost Social Security checks without indemnification by the recipient. Motion agreed to 375–0; July 10, 1978. Yes.

455. H.R. 12106. Transportation Safety Board. Anderson, D-Calif., motion to suspend the rules and pass the bill to extend the National Transportation Safety Board for one year with an authorization of $16.4 million for the board's operations in fiscal 1979. Motion agreed to 340–32; July 10, 1978. Yes.

456. H.R. 12536. National Parks Additions. Thompson, D-N.J., amendments, en bloc, to delete a provision in the bill to authorize the Interior Department secretary to acquire all lands within the present boundary of the Delaware Water Gap National Recreation Area in Pennsylvania and New York for the wild and scenic rivers system and for recreational purposes. Rejected 110–275; July 10, 1978. No.

457. H.J. Res. 1024. Agriculture Supplemental Appropriations, Fiscal 1978. Passage of the joint resolution to appropriate $57,145,000 for staff salaries for the Agricultural Stabilization and Conservation Service and to increase transfer authority from the Commodity Credit Corporation fund to ASCS by $23,391,000, for fiscal 1978. Passed 340–48; July 11, 1978. Yes.

458. H.R. 11827. Strip Mining. Roncalio, D-Wyo., motion to suspend the rules and pass the bill to amend the 1977 Surface Mining Control and Reclamation Act to authorize an additional $25 million each in fiscal 1979–80 for Interior Department inspections of mines and assistance to small operators. Motion agreed to 323–74; July 11, 1978. Yes.

459. HR 12536. National Parks Additions. Baucus, D-Mont., amendment to delete a provision in the bill to designate 927,550 acres in Glacier National Park in Montana as wilderness. Adopted 216–181: July 11, 1978. Yes.

460. HR 12536. National Parks Additions. Symms, D-Idaho, amendment to provide for the exclusion of 4,400 acres of the Blue Jacket Mine area in Idaho from the Hells Canyon Recreation Area. Rejected 147–249: July 11, 1978. Yes.

461. HR 12536. National Parks Additions. Oberstar, D-Minn., amendment to provide for a master development plan, to be submitted to Congress one year after enactment of the bill, for inclusion of segments of the Upper Mississippi River in Minnesota in the Wild and Scenic Rivers system. Adopted 205–192: July 11, 1978. No.

462. HR 12536. National Parks Additions. Oberstar, D-Minn., amendment to delete the provision in the bill to amend the Wild and Scenic Rivers Act deleting the limitation on acquisition authority of the St. Croix River in Minnesota and Wisconsin. Rejected 175–218: July 11, 1978. No.

463. HR 12536. National Parks Additions. Passage of the bill to authorize $1.25 billion in fiscal 1979–83 for establishment of new areas and additions in the national park, national trails, wild and scenic rivers and wilderness systems. Passed 341–61: 237–28, July 12, 1978. Yes.

464. S Con Res 95. Soviet Dissident Trials. Zablocki, D-Wis., motion to table the Ashbrook, R-Ohio, motion to appeal the ruling of the chair sustaining a point of order against a motion to commit the resolution to the International Relations Committee with instructions to report it back with an amendment stating that it was the sense of Congress that U.S. representatives to the strategic arms limitation talks with the Soviet Union be recalled to show U.S. commitment to human rights principles. Motion agreed to 277–120: July 12, 1978. Yes.

465. S Con Res 95. Soviet Dissident Trials. Adoption of the concurrent resolution urging the Soviet Union and its leadership "to seek a humanitarian resolution" to the "deplorable" trials of Anatoly Shcharansky, Viktoras Petkus and Aleksandr Ilyich Ginzburg, who defended the principles of the Helsinki agreement in the Soviet Union. Adopted 380–10: July 12, 1978. Yes.

466. H Con Res 599. Uranium Export to India. Adoption of the resolution to disapprove the president's approval of the export of low-enriched uranium to India. Rejected 181–227: July 12, 1978. No.

467. HR 15. Elementary and Secondary Education. Quie, R-Minn., amendment to allow local education agencies, as well as states, to qualify for special matching federal grants if they had their own compensatory education programs. Rejected 150–240: July 12, 1978. Yes.

468. HR 15. Elementary and Secondary Education. Edwards, R-Okla., amendment to count two-thirds instead of 100 percent of the children in each state from families receiving Aid to Families with Dependent Children payments in excess of the poverty level, for the purposes of determining state compensatory education allocations. Rejected 175–212: July 12, 1978. No.

469. H Res 1267. Andrew Young Impeachment. Wright, D-Texas, motion to table the

McDonald, D-Ga., resolution to impeach U.S. Ambassador to the United Nations Andrew Young. Motion agreed to 293–82: July 13, 1978. Announced yes.

470. HR 15. Elementary and Secondary Education. Kildee, D-Mich., substitute amendment, to the Holt, R-Md., amendment, to prohibit duplication by community education programs of services offered by other government agencies unless the commissioner of education determined that collaboration existed between the education agency and the other government agencies. Adopted 197–195: July 13, 1978. Yes.

471. HR 15. Elementary and Secondary Education. Ashbrook, R-Ohio, substitute for the bill to distribute funds authorized by the bill in block grants to states. Rejected 79–290: July 13, 1978. No.

472. HR 15. Elementary and Secondary Education. Passage of the bill to extend the Elementary and Secondary Education Act of 1965 for five years, through fiscal 1983. Passed 350–20: July 13, 1978. Yes.

473. H.R. 10929. Defense Procurement Authorization. Price, D-Ill., motion to close to the public the conference committee meetings on the bill to authorize fiscal 1979 funds for Defense Department weapons procurement and military research and development when classified national security items were being discussed, as authorized under House rules, but to allow the attendance of members of Congress at all meetings. Motion agreed to 312–5; July 14, 1978. Yes.

474. HR 12163. Energy Department Authorization. Flower, D-Ala., amendment to reduce funding for the Clinch River nuclear breeder reactor project by $150 million, to limit work on that project to completion of studies and tests and to require a study of advanced breeder reactor technologies to be prepared by March 1, 1981. Rejected 142–187: July 14, 1978. No.

475. HR 12163. Energy Department Authorization. Flowers, D-Ala., amendment to add $75 million for initial construction costs for a facility to demonstrate the SRC–II process of producing liquid boiler fuels from coal. Adopted 165–132: July 14, 1978. Yes.

476. HR 12028. Veterans' Home Loan Program. Robert, D-Texas, motion to suspend the rules and pass the bill to amend the U.S. Code to increase to $30,000 grants for specially adapted housing for certain disabled veterans, to $25,000 for VA loan guarantees, and to permit Vietnam-era veterans with 90 days of service to qualify for VA home loan programs. Motion agreed to 373–0: July 17, 1978. Yes.

477. HR 12232. Unemployment Compensation Amendments. Corman, D-Calif., motion to suspend the rules and pass the bill to amend the 1976 Unemployment Amendments to: 1) pay members of the National Commission on Unemployment Compensation who were not full-time federal employees; 2) extend for one year, to May 31, 1981, the effective date of the provision that unemployment compensation benefits be reduced by the amount of retirement benefits received; and 3) extend for two years the exemption for farm employers of the payment of employment taxes for seasonal alien agricultural workers. Motion agreed to 300–81: July 17, 1978. Yes.

478. HR 12380. Extended Unemployment Benefits. Corman, D-Calif., motion to suspend the rules and pass the bill to limit to two years beyond the regular unemployment period the time within which an individual may receive extended unemployment benefits under the 1970 Federal Extended Unemployment Compensation Act. Motion agreed to 381–4: July 17, 1978. Yes.

479. HR 10848. Supplemental Security Income Benefits. Corman, D-Calif., motion to suspend the rules and pass the bill to allow persons whose SSI payments were discontinued because they became employed to be considered disabled and immediately receive SSI benefits for three months, pending a review by the Social Security Administration, if they had received SSI benefits within the previous five years. Motion agreed to 351–32: July 17, 1978. Yes.

480. HR 12163. Energy Department Authorization. Fish, R-N.Y., motion to recommit the bill to the Science and Technology Committee with instructions to report the bill back to the House with an amendment containing language called for in the rejected Flowers, D-Ala., amendment. Motion rejected 157–238: July 17, 1978. No.

481. HR 12163. Energy Department Authorization. Passage of the bill to authorize $4 billion in fiscal 1979 for research and development programs and activities of the Energy Department. Passed 325–67: July 17, 1978. Yes.

482. HR 1609. Coal Slurry Pipelines. Adoption of the rule providing for House floor consideration of the bill to encourage construction of coal slurry pipelines. Adopted 376–7: July 17, 1978. Yes.

483. HR 1609. Coal Slurry Pipelines. Udall, D-Ariz., motion that the House resolve itself into the Committee of the Whole for consideration of the bill to promote development of coal slurry pipelines. Motion agreed to 344–23: July 17, 1978. Yes.

484. H J Res 738. Native American Religious Freedom. Johnson, R-Colo., demand for a second on the Udall, D-Ariz., motion to suspend the rules and pass the joint resolution to express the sense of Congress that the president direct the federal agencies to re-evaluate existing laws and regulations that prevented native Americans from practicing their traditional religions. Second ordered 396–2: July 18, 1978. Yes.

485. H.R. 12443. Immigration Policy Revision. Eilberg, D-Pa., motion to suspend the rules and pass the bill to amend the Immigration and Nationality Act to provide a single world-wide ceiling on immigration into the United States and to establish a Select Commission on Immigration and Refugee Policy to study U.S. immigration policies. Motion agreed to 396–20: July 18, 1978. Yes.

486. HR 12508. Immigration of Adopted Children. Eilberg, D-Pa., motion to suspend the rules and pass the bill to amend the Immigration and Nationality Act to raise the limit for immigration preference on the number of children that could be adopted by a single family, and to liberalize immigration and naturalization requirements for children of parents applying for U.S. citizenship. Motion agreed to 413–0: July 18, 1978. Yes.

487. HR 12252. Payment to States' Veterans Cemeteries. Roberts, D-Texas, motion to suspend the rules and pass the bill to pay state and local governments $150 to cover the expenses of burying any veteran in a veterans' cemetery operated by a state or local government. Motion agreed to 407–9: July 18, 1978. Yes.

488. HR 12011. Hospital Care for Veterans in U.S. Territories. Roberts, D-Texas, motion to suspend the rules and pass the bill to extend indefinitely the authority of the Veterans Administration to contract with private hospitals for medical care of veterans in Alaska, Hawaii and U.S.-controlled territories. Motion agreed to 415–0: July 18, 1978. Yes.

489. HR 11891. Disabled Veterans' Medical Aid. Roberts, D–Texas, motion to suspend the rules and pass the bill to establish higher benefits payments for home health care for disabled veterans requiring constant medical attention. Motion agreed to 418–0: July 18, 1978. Yes.

490. HR 6075. Pregnancy Disability. Hawkins, D–Cal., motion to suspend the rules and pass the bill to prohibit employment discrimination based on pregnancy. Motion agreed to 376–43: July 18, 1978. Yes.

491. HJ Res. 738. Native American Religious Freedom. Udall, D-Ariz., motion to suspend the rules and pass the joint resolution to express the sense of Congress that the president direct the federal agencies concerned to re-evaluate existing laws and regulations that prevented native Americans from practicing their traditional religions by denying them access to sacred lands, instruments or ceremonial practices. Passed 337–81: July 18, 1978. No.

492. HR 1609. Coal Slurry Pipelines. Passage of the bill to promote development of coal slurry pipelines. Rejected 161–246; July 19, 1978. No.

493. HR 11983 Federal Election Commission-Public Financing. Sisk, D-Calif., motion to order the previous question on the adoption of the rule providing for House floor consideration of the fiscal 1979 authorization bill for the Federal Election Commission. Motion agreed to 213–196: July 19, 1978. No.

494. HR 11983. Federal Election Commission. Passage of the bill to authorize $8.6 million for the Federal Election Commission for fiscal year 1979, with the stipulation that none of the money could be used to fund random audits of candidates for the House and Senate. Passed 366–37: July 19, 1978. Yes.

495. HR 13385. Debt Limit Increase. Adoption of the rule providing for House floor consideration of the bill to provide for a temporary increase in the public debt ceiling. Adopted 303–98: July 19, 1978. Yes.

496. HR 13385. Debt Limit Increase. Vanik, D-Ohio, amendment to reduce the temporary increase in the public debt ceiling by $16 billion, to $798 billion from $814 billion. Adopted 363–37; July 19, 1978. Yes.

497. HR 13385. Temporary Debt Limit. Passage of the bill to increase the temporary public debt limit to $798 billion through March 31, 1979. Passed 205–202; July 19, 1978. Yes.

498. HR 11504. Agricultural Credit. Richmond, D-N.Y., motion to order the previous question on the Symms, R-Idaho, motion to recommit to a House-Senate conference committee the conference report on the bill to revise existing farm credit programs, to create an economic emergency loan program for farmers and ranchers and to extend the Emergency Livestock Credit Act through Sept. 13, 1979. Motion agreed to 282–105; July 19, 1978. Yes.

499. HR 11504. Agricultural Credit. Adoption of the conference report on the bill to revise existing farm credit programs, to create an economic emergency loan program for farmers and ranchers and to extend the Emergency Livestock Credit Act through Sept. 30, 1979. Adopted 362–28; July 19, 1978. Yes.

529. HR 7577. Economic Opportunity Act Amendments. Passage of the bill to extend the Economic Opportunity Act of 1964 for three years, through fiscal 1981, and to make changes in various anti-poverty programs covered under the act. Passed 346–38; July 26, 1978. Yes.

530. S Con Res 98. Congressional Adjournment. Adoption of the concurrent resolution to allow Congress to continue meeting beyond the mandatory adjournment date of July 31 provided for in the 1946 Legislative Reorganization Act as amended. Adopted 302–44; July 27, 1978. Yes.●

ARE AIRLINE EARNINGS SUFFICIENT TO MEET MANDATED REPLACEMENT OF THREE-FOURTHS OF PRESENT FLEET FOR PUBLIC BENEFIT?

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. ANDERSON of California. Mr. Speaker, the Airport and Aircraft Noise Reduction Act, H.R. 8729, has recently been disparaged by a few people because it attempts to insure the solution to an environmental problem related to this almost totally Government-regulated industry. It would do this in several ways. One of these, title III, focuses on use of existing user taxes for a temporary period to insure by means of incentives that existing aircraft noise rules are maintained. Beyond this. it is intent also to encourage replacement with equipment providing more noise reduction than required and with equipment substantially more energy efficient—not otherwise required. Some feel that because the airlines are now reporting profits it is unthinkable that these incentives be provided to achieve these public purposes.

A recent paper prepared by the Air Transport Association, whose president, Paul Ignatius, is a highly respected former public official, may be useful to some Members concerning the background of the noise rules and the profit situation of the airlines. The paper follows:

BACKGROUND

In 1969, the Federal Aviation Administration promulgated a rule known as Part 36 which became a part of the Airworthiness Certification Rules for U.S. airplanes. The effect of this rule was that all airplanes newly designed and type-certificated were required to meet the noise standards established in the rule.

In 1973, the FAA promulgated an amendment to Part 36 directing that all two or three engine jet aircraft manufactured in the U.S. after December 1, 1973, and all four engine jet aircraft manufactured in the U.S. after December 31, 1974, were required to meet Part 36 noise requirements, even though the aircraft had been type-certificated prior to the enactment of Part 36. In essence, these rules to reduce aircraft noise were developed in the same manners as were rules to control emissions from automobiles. They were written to effect aircraft built or purchased in the future. Purposefully, they were not intended to effect aircraft previously certificated by the Federal Government and in operation by U.S. airlines.

However, in 1976, the FAA promulgated an amendment to Part 91 of the Federal Aviation Regulations. This rule provided that no person shall operate an aircraft in the United States after 1984 that does not meet the standards provided for new aircraft in Part 36. This provision effectively applies—retroactively—Part 36 to aircraft which were not originally covered by the rule. This is causing an impact on the airlines similar to that of a rule requiring all existing automobiles to be retrofitted with emission controls.

Thus, the airlines are in a unique position because they are faced with the requirement to retrofit or replace aircraft which were previously approved by the FAA to meet all Federal standards. This treatment is different than the treatment accorded all other transportation modes. For example, in 1966 the Environmental Protection Agency determined that it would not require railroad locomotives to be retrofitted for noise reduction because, among other reasons, that would be too expensive for the railroads to undertake.

AIRLINE EARNINGS ARE INADEQUATE TO MEET FUTURE CAPITAL NEEDS

Do recent traffic and earnings indicate ability of the airlines to finance normal growth and replacement plus $7 billion in retroactive noise abatement costs? The answer clearly is "No." Any other conclusion represents only a short term perspective.

Airlines are reporting significant increases in traffic and profits. In the first half of 1978, industry earnings are anticipated to total about $500 million—a record profit of any first half in the industry's history.

FINANCIAL RECORD IS SUBSTANDARD

Despite recent record earnings, the industry's financial performance continues to be inadequate to meet normal capital needs. The additional capital burden imposed by the retroactive FAA noise regulations requires a special financing system to partially meet the added costs.

The airline industry financial performance is substantially poorer than the average for U.S. industry. For example, airline profit margin (net profit as a percent of sales) was only 3.8 per cent in 1977 and 2.6 per cent in 1976, compared with 5.2 per cent and 5.3 per cent respectively for all U.S. industry—about half as good as the rest of U.S. industry.

In fact, in terms of profit margin, the current "record earnings" of the airlines do not represent historical improvements. Between 1966 and 1975 airline earnings never equalled the $428 million earned in 1966 when the profit margin was 7.4 per cent.

Over the most recent nine year period, 1969–1977, the airline industry profit margin was only 1.5 per cent. Recent five year comparisons of (1) return on capital, (2) return on equality and (3) profit margins show the airlines well below the average for U.S. industry.

Financial performance—5-year average [1]

	Return on equity	Return on capital	Profit margin [2]
U.S. industry	12.9	9.7	4.5
Air transportation industry	7.9	4.3	2.0

[1] 1973–1976 plus latest 12 months for 1977.
[2] 1974–1977, using latest 12 months.

Over the years, airlines have generally paid low dividends to their stockholders. For example, in 1977, airline dividends as a percentage of earnings amounted to 10 percent whereas the average dividend paid out by all U.S. industries was over one third of their earnings.

Past financial performance is a major consideration in assessing ability to obtain capital. However, future financial prospects could even be more important.

FUTURE EARNINGS ARE CLOUDED

What about the future? A downturn in airline earnings in 1979 is forecast by a majority of financial analysts. Yet a prime determinant of airline financial health is the condition of the economy as a whole. The airlines are peculiarly susceptible to national economic trends. This is especially true in the volatile discretionary portion of the industry's market—the vacation travelers, who are currently most likely to take advantage of discount fares, and who comprise the major portion of the record traffic growth experiences in recent months. The consensus of 39 business forecasting economists is that real GNP growth will slow down during the latter part of 1978, and that 1979 will be characterized by lower growth rates than 1978.

Consequently the airline industry is in a tenuous position. Buoyed by a combination of new low-fare services and a relatively good economy, traffic has grown during the first half of 1978 at an inordinately high rate, although yields (revenue per passenger mile) have understandably declined as the percentage of discount passengers has increased. At the same time, the airlines have significantly increased load factors, aircraft utilization, and aircraft seating capacities, to or near the all time highs in jet history.

PRODUCTIVITY IMPROVEMENT EXHAUSTED

In other words, the airline industry, in achieving these record operating performance levels, has nearly exhausted potentials for further increases in productivity on existing fleets. At the same time, it faces significant cost increases. At the new peak operating performance levels, even a small drop in the very high traffic growth would eliminate any profit gains achieved through recent productivity improvements. For example, in the first quarter of 1978 traffic was up 13.8 percent over 1977's first quarter. If, however, traffic had only grown 10.6 percent, the record operating profit for the first quarter would have resulted in an operating loss.

In view of the anticipated softening of the economy for 1979, the minimum options for further productivity improvement from present airline fleets, the high increases in costs of airline goods and services, and the high traffic growth required to offset those cost increases, 1979 airline earnings are expected to fall below the 1978 level.

CAPITAL REQUIREMENTS HIGH

The basic capital requirements for the airlines to accommodate minimum anticipated growth and to replace less efficient, aging aircraft are projected to total $22 billion through 1984. The $5 billion in aircraft currently on order (which includes all orders through July, 1978) leaves $17 billion in orders still to be placed for delivery before 1985. If the $7 billion in capital needed to accomplish the most cost-effective retrofit/replacement program to meet the retroactive provisions of the FAA noise regulations are added to the basic needs, capital requirements jump to $29 billion through 1984.

The relatively poor airline historical financial performance combined with the concern for improved earnings in the future already have kept airline orders for new equipment well below the minimum projected requirements. Particularly noteworthy is the fact that the projections of the basic need for $22 billion, without the added requirements for noise retrofit, are based on very conservative assumptions. These include a normal traffic growth of 6 percent per year,* a 60 percent average system passenger load factor, maximum CAB standard seating, an 18-year aircraft service life before retirement, and an annual increase of 6 percent for inflation in the cost of aircraft.

If a 9 percent annual traffic growth and a 9 percent annual aircraft inflation factor were assumed, the $22 billion basic need increases sharply to $35 billion (or $42 billion with the noise regulation requirements).

Thus, it is evident that an immense capital formation task confronts the airline industry regardless of the recent record profits in absolute dollars. Compliance with the retroactive provisions of FAA noise rules will add a substantial burden to the already difficult problem of meeting minimum capital requirements.●

*As compared to the 10.6 percent required for a breakeven first quarter 1978.

TVA MAY BE SOFTENING POSITION IN SNAIL DARTER-DAM DISPUTE

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. DUNCAN of Tennessee. Mr. Speaker, yesterday at a joint news conference, the Tennessee Valley Authority and the Department of the Interior released their joint report, "Alternatives for Completing the Tellico Project." It is notable, in light of the Endangered Species Act-Tellico controversy, that the report indicates that because of the success of snail darter transplants from the Little Tennessee River to the Hiwassee River, the endangered species issue may not be the one which ultimately controls the final decision as to how the Tellico project is completed.

House subcommittee hearings on possible amendment of the Endangered Species Act are imminent, and sometime in the near future, there will be floor consideration of the reauthorization of the Endangered Species Act. Since the Tellico issue has played, and will continue to play, an important role in these proceedings. I would like to encourage my colleagues to read the TVA-Interior report. In the meantime, I would recommend to my colleagues the following article from this morning's Washington Post which summarizes yesterday's press conference and the joint report:

[From the Washington Post, August 11, 1978]

TVA MAY BE SOFTENING POSITION IN SNAIL-DARTER-DAM DISPUTE

(By Bill Richards)

In an unusual reversal of roles, the little snail darter was pronounced a species on the rebound by federal officials yesterday while its nemesis, the giant Tellico Dam, may be facing extinction.

Until recently the rare three-inch perch lived only in the shadow of the nearly completed $120 million federal dam on the Little Tennessee River. Conservationists warned that when the Tellico was finished and the river was closed off the snail darter would be no more. In June the U.S. Supreme Court ruled the Tennessee Valley Authority had to stop work on the dam to save the snail darter and its singular habitat.

But yesterday the TVA and the Interior Department jointly announced the snail darter—with a little nudge from the government—seems to have found a new home. In 1976, when the Tellico Dam controversy was reaching a shrill stage, federal experts moved 710 snail darters to the Hiwassee River, some 18 miles from the dam site.

TVA Chairman S. David Freeman said yesterday that samplings of the transplanted snail darters indicate they are flourishing in the Hiwassee with up to 3,700 fish now in the river.

That was the good news, Freeman told reporters at a news conference. The bad news is that silting and other construction problems have sharply cut the remaining snail darters at the dam site to only about 500. In fact, Freeman conceded, by the time a decision is made by TVA on what to do with Tellico there may not be any snail darters left there to worry about.

In a 113-page report on the future of the project by the two federal agencies there were indications that the TVA, which has lobbied strongly for permission to complete the dam, may be softening its position.

The report, released yesterday, listed three major choices for the future of the dam, which is more than 90 percent complete. They were:

Completing the project as originally planned with protection for the snail darter accomplished by moving the rest of the fish to a new breeding area. The fish are covered by the 1973 federal Endangered Species Act, which was the basis for the Supreme Court's decision to halt work on Tellico.

Leaving the existing dam unfinished and building a separate new dam and reservoir on a tributary of the Little Tennessee River. This option was rejected in the study as too costly and without benefit.

Development of the river and surrounding land at the Tellico site without closing the dam except in a flood emergency, with a second alternative of removing the earthen portion of the dam and letting the river return to its natural course.

Freeman declined yesterday to say which option he would favor. The TVA chairman, who was appointed last year, said the TVA board would probably make a recommendation to Congress and the president on the dam's future after the remaining two board members are appointed.

Freeman and Assistant Interior Department Secretary Robert L. Herbst said yesterday that rising land values at the dam site would insure that any decision would probably end up as profitable. The cost of completing the dam to recently enacted "superflood" standards would be slightly less than leaving it incomplete and taking the riverside development option, the officials said.

But Freeman noted that the no-dam option would mean more local jobs and only a relatively small increase of one tenth of a percent in TVA's fuel bill. The giant power authority would lose no generating capacity if the dam is not built, he said, and several valuable archeological and historical sites would be preserved.

The final decision on the dam, said Freeman, "is as much a question of values as cold hard fact." ●

CARTER ADMINISTRATION'S RATINGS

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. RHODES. Mr. Speaker, I note that the Carter administration has become rather petulant about its sinking ratings in the public opinion polls of the land. They have even released a list of alleged accomplishments and expressed puzzlement over their continued descent from grace.

During the 19 months since Mr. Carter took office, he has given away the Panama Canal, disrupted 75 years of progress in utilizing our water resources, embarked on a unilateral nuclear fuel ban, destroyed détente, brought us 11.4 percent inflation, made the dollar the doormat of world currencies, muddied up settlement chances in the Middle East, levied the largest tax increase in history on America's working men and women, muffed the energy challenge, run up $50 billion in budget deficits, increased Federal employment, and left the landscape littered with the shards of countless broken promises.

The double-cross has become the identifying symbol of the Carter administration. The American people realize the truth of the old saying, "Fool me once, shame on you—fool me twice, shame on me." Their rating of the administration's performance indicates they do not intend to be fooled again.●

DISTINGUISHED SERVICE BY THE U.S. ARMY RESERVE'S 356TH CIVIL AFFAIRS 11TH BRIGADE

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. BINGHAM. Mr. Speaker, with the deactivation of the 356th Civil Affairs Brigade, U.S. Army Reserve of the Bronx at the end of this month, I would like to commend the brigade's officers and enlisted personnel for over 25 years of faithful and outstanding service rendered to the Bronx, the city and its peripheral communities.

The 356th Civil Affairs Brigade, under the command of Col. Ralph A. Torino, has maintained a continuing record of involvement in and contribution to various aspects of community life and affairs. Its personnel have expertise in the handling of disasters—in supervision; restoration and emergency replacement of public facilities including communication, transportation, water, gas, electricity, and waste disposal; and in restoration of Government stability. In past years brigade personnel have increased their skills in municipal administration through studies at New York University; worked directly with city agencies in setting up policies and guidelines in the event of disaster; assisted with community medical examinations; and participated in the initial steps of the Bronx river restoration program.

Going further afield geographically, the brigade rendered assistance to the city of Scranton, Pa., in 1973 when it was confronted with hurricane disaster and conducted studies in six counties in South Carolina which might be faced with a similar situation. It developed civil disaster and emergency preparedness projects in many upstate counties of New York and this very year conducted surveys to identify hazardous materials transported into and through Westchester County, on the very borders of our borough, defining the nature and potential magnitude of hazards associated with such materials. They also conducted a resources survey in 38 towns and villages of Westchester County and the city of Rye, N.Y., compiling information concerning equipment and supplies which could be utilized in the event of emergency.

In recognition of the contribution made by the Army's civil affairs units, and as a special tribute to the 356th Civil Affairs Brigade which will retire its unit flag and colors into history on August

31, the mayor of the city of New York has proclaimed August 13 as Army Civil Affairs Day. I congratulate the men and women of the 356th on the fine job they have done. Many of them will be assigned to other Reserve units, but with the Reserve or not I know all will continue to serve not only their communities but their city, state and country—and they deserve our thanks and appreciation.●

TUITION TAX CREDIT: A COSTLY ASSAULT

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. STOKES. Mr. Speaker, tuition tax credit has been one of the most controversial issues before the House during the current session of Congress. On many occasions, I have registered my strong opposition to this imprudent legislation. I firmly believe, Mr. Speaker, that it would undermine the principle of public education in this Nation. Passage of this legislation would promote a two-caste system—public schools for the poor and private schools for the moderately affluent and rich.

In this regard, Mr. Speaker, I submit to you an article which appeared in yesterday's Washington Post which was written by our distinguished colleague in the Senate, ERNEST F. HOLLINGS. He has given a concise and intuitive commentary on the corrosive effects of tuition tax credit. In addition, I would also like to bring your attention to the Post editorial which concurs with Senator HOLLINGS' assessment.

The articles follow:

TUITION TAX CREDIT: A COSTLY ASSAULT ON OUR "BEST INVESTMENT"

(By Ernest F. Hollings)

This week in the Senate, public education runs head on into the tuition tax credit plan. That proposal would turn our education on its head, benefit the few at the expense of the many, proliferate substandard segregation academies, add to the federal deficit, violate the First Amendment and destroy the diversity and genius of our public schools.

Tax credits for private elementary and secondary education are proposed with the assumption that government has an equal duty to both public and private schools. Let us be clear at the outset that the duty is not equal. The government's duty to the public is to provide public schools. Its duty to private or church schools is to leave them alone. Packwood-Moynihan proposes that the duty to leave the private schools alone be inverted to the duty to support them.

Federal assistance to public education is targeted, special-purpose aid such as aid to the needy and handicapped, compensatory education, guidance and testing. The average federal subsidy to the public-school student is $128. The private-school is allowed to participate in that targeted aid, too, and the average per-pupil expenditure is $40. Ninety-eight percent of the Catholic schools participate in one or more of these federal aid programs. But now we are being asked to reverse course by providing an additional $250 for the private-school student—double that of the public-school child—and making it general assistance to boot, a windfall for private institutions rather than a helping hand for a deserving child. For Congress to authorize general aid for the private school while prohibiting it to the public would be horrendous.

As predicted, parochial school enrollment diminished between 1965 and 1975. Costs were not the major reason. The loss was due to the lowering birth rate, the migration of Catholics to the suburbs and the abandonment of the inner-city schools, both public and private. It is a sad fact, but both have suffered; it is not because the public has pushed the parochial out. Now the drop-off has bottomed out, with a slight increase in parochial enrollment and a boom in private "protest schools." Nearly one of every five private schools is such a "protest school."

Packwood-Moynihan is not tax relief for Middle America. Only 3½ percent of families would be eligible for the tax credit at the elementary and secondary level. The proposal would benefit 4½ million private-school students at the expense of 44½ million public-school children. Because private-school students are predominantly upper and middle class, those families with the greatest ability to pay would reap the benefits. The million would take a $250 credit for sending his son to Exeter, while families whose incomes are below $15,000 would receive only 17 percent of the benefits paid out.

Equal educational opportunity, mandated for public schools, is not required of the private—which are selective and generally choose the brightest, the advantaged, those without discipline problems and those fleeing from inner-city, integrated schools. The public school, by contrast, must take all comers. Additionally, it must abide by laws and court decisions that private institutions can ignore. The public school is bound by both law and conscience to reach out to every child as a matter of birthright. That is what public education is all about.

Far from being cost-containing, the tuition tax credit is budget-busting. The Congressional Budget Office estimates that just three years after the revised plan took effect, the elementary and secondary credit would cost $1.1 billion. If tuitions were raised, or if more children attended private schools, the cost would soar. Meanwhile, the American people would not sit idly by while their representatives opened the Treasury gates to private education at the expense of the public school. They, too, would demand an equal amount of general assistance for the public schools, and within five years that would mean an annual cost of at least $10 billion.

The scheme is blatantly unconstitutional. Every Supreme Court decision and all the constitutional scholars agree on that score. But more than that, it is undesirable. Americans since Thomas Jefferson have always insisted on the separation of church and state. People realize that with general aid would come general control, and it would not be long before prayer were prohibited in the parochial school as it is today in the public school.

In a recent nationwide Roper survey, 64 percent of the American people opposed the tuition tax credit for private and parochial elementary and secondary eduaction. Interestingly, only 43 percent of the Catholics surveyed favored it—while 48 percent of them were opposed.

As parent, citizen and officeholder, I am convinced that public education is the best investment a nation can make. It develops a diversity, a competitiveness, and a competence nowhere else available. Our public schools are run by 16,000 local school boards. Those who pose the straw man of a public-education monopoly have not breathed the diversity and vitality of 107,272 public schools.

TUITION TAX CREDITS

Bad in principle from the beginning, the tuition tax credit bill is now about to come to the Senate floor by an appropriately dubious route. The single thing to be said for last week's maneuvers is that they have drawn attention to the bill's defects. Those defects are numerous, profound and far beyond the remedy of any routine amendment or fiddling with wording.

Sen. Ernest F. Hollings (D-S.C.) puts the issues accurately in the article that we print today on the opposite page. The bill proposes giving federal aid to anybody who pays tuition, with the amount of aid based not on families' need but on the size of the tuition. That's unacceptable, but, as far as college students go, it's a secondary matter. The central danger in this bill is the unrestricted federal aid that it would extend, for the first time, to every kind of private elementary and secondary school.

This legislation would let people deduct part of any tuition payment from their federal income taxes. The federal government would, in this fashion, pay part of every tuition bill. The device is known as a tax subsidy. The Senate Finance Committee, that haven for every kind of special pleading, reported a bill last winter but never took it to the floor. It was waiting for the House, which passed a similar bill in June. Under that version, the U.S. Treasury would by 1980 pay, through tax credits, one fourth of every student's tuition up to $250 in colleges and $100 for schools. The cost would be $1.1 billion a year.

What about people with incomes so meager that they pay little or no tax, and have no use for a credit? The House, to meet that objection, wrote in a refund clause giving cash to anyone whose tax is smaller than the credit. The cost is small; the importance of the refund was that, when the bill got to the Senate, it was required to go to the Appropriations and Budget committee as well as to its warm friends in the Finance Committee.

On Tuesday, the Appropriations Committee voted a negative report—a recommendation to the Senate to kill the bill. On Wednesday, the Budget Committee voted a negative report, citing not only the bill's cost but also its radical and ill-considered reversal of long-standing American values. On Thursday, the Finance Committee hastily reported out a substitute bill, dropping the refund clause to avoid the other committees. That is the bill that will come to the floor—perhaps today. The new bill evades the other committees' jurisdiction, but it does nothing to meet their objection to it.

Since President Carter has said that he will veto this bill, some senators have apparently concluded that it offers a free ride—an opportunity to please some of their constituents, while relying on Mr. Carter to save them from the consequences. That's too easy. This bill is a fundamental assault on the public schools. Any vote for it in the Senate is a threat to the public school system. Regardless of the bill's outcome, the people who support it can properly be held accountable for their votes in precisely those terms.●

INFLUENZA CONFEREES AGREE ON VALUE OF IMMUNIZATION PROGRAM

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. OBEY. Mr. Speaker, because of the interest of many of the Members in the proposed influenza immunization

program, I have included the following summary of the most recent Conference on Influenza held at Secretary Califano's request on July 26, 1978.

The material follows:

INSTITUTE OF MEDICINE,
NATIONAL ACADEMY OF SCIENCES,
Washington, D.C., July 28, 1978.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary, Department of Health, Education, and Welfare, Washington, D.C.

DEAR MR. SECRETARY: We are writing to report to you concerning the Conference on Influenza held at your request on July 26, 1978. Our summary of that meeting is attached and contains the specific conclusions and recommendations of the group as we perceived them; a more detailed report of the meeting will be forthcoming within the next two weeks.

Several comments may be in order concerning both the process and the product of the Conference. First, the group that assembled included a very broad representation of the many groups concerned with immunization and public health, both from the professional and the public sectors. The format of the meeting offered full opportunity for discussion and the expression of dissenting opinions. While numerous points of view were expressed concerning some details of the issues at hand, it became evident during the meeting that dissent on the major issues of influenza vaccine safety, efficacy, and adequacy of testing was restricted to a very small group of persons. Efforts were made to offer that group a full opportunity for expression of views. This is pertinent in that, after this public debate and discussion, the consensus we report to you was nearly unanimous among the broadly constituted group of participants.

The major conclusions of the Conference can be readily summarized: adequate data have been carefully gathered, assessed, and utilized to develop expert recommendations by the Advisory Committee on Immunization Practices (ACIP) of the U.S. Public Health Service. These were reviewed for the Conference, and complete data concerning safety and efficacy of inactivated influenza vaccines over the past many years were presented. Both the process and the conclusions of the ACIP deliberations were considered to be appropriate. A major conclusion of the Conference was that the ACIP recommendations concerning the dose and formulation of influenza vaccine and the indications for its use in 1978–79 merited approval by the Department of Health, Education, and Welfare. Furthermore, there was general support for the concept of influenza immunization policy which has been developed in the series of technical and public meetings that have been held in 1977 and 1978.

In your second broad charge to the Conference you asked that the concerns voiced recently in the press and in Congress concerning influenza vaccine and the Government's participation in influenza immunization programs be addressed specifically. In our opinion this second charge was equally well met by the group. Each of the various topics of concern was examined in some depth, after considerable review the evidence clearly indicated that, the previous recommendations were sound. These points are discussed in the accompanying summary of the Conference and will also be dealt with in the final report.

In regard to the possibility of mounting a program this season, it was clear that most State and local health departments would like to do so: and a significant number would participate even if funds were not available until late September. However, except for California and possibly one or two others, it is unlikely that any health department sponsored programs will occur in the absence of some Federal support. Furthermore, without Federal assistance any increased influenza vaccination effort would likely divert resources from the childhood immunization initiative. The issue of legal liability and compensation for injury was of considerable concern, but in the judgment of many public health representatives it should not preclude initiating public influenza immunization activities. This is not to say that a general solution to the problem is not urgently desired. There was a clearly evident wish to see better coverage for persons who are not now able to secure vaccine for financial reasons. There was also much enthusiasm for the incorporation of influenza vaccination into the regular, ongoing preventive medicine effort as opposed to crash programs.

There is no doubt that further research, both basic and applied, is desirable and some important areas are outlined in the Conference summary. However, it is important to recognize that much has been and is being achieved. For instance, we know more about the charactiristics of the virus, the epidemiology of the disease, and how to more accurately predict effectiveness without human trials. In addition, antiviral substances are being tested that may prove to have practical application.

We conclude that the public influenza meeting of July 26 provided a forum both for open discussion of issues of concern to the public and for review and confirmation of the advice of numerous expert advisory panels, particularly the recommendations of the January 30, 1978 influenza conference and the ACIP.

With these comments we respectfully submit the enclosed Chairperson's Summary.

FREDERICK C. ROBBINS, M.D.,
Chairperson.
JUNE E. OSBORN, M.D.,
Vice Chairperson.

CHAIRPERSONS' SUMMARY

In his charge to the Conference on Influenza at the Hubert H. Humphrey Building on Wednesday, July 26, 1978, Secretary Joseph A. Califano, Jr. asked eleven specific questions. The following comments summarize the conclusions and viewpoints of the approximately 100 conference participants and attendees with respect to those questions:

1. Should the list of high-risk population groups for whom flu shots have been recommended be revised in any way?

The majority of participants clearly favored continuing the recommendation for annual influenza immunization of high-risk persons as they are now defined by the Public Health Service Advisory Committee on Immunization Practices (ACIP). A few of those present would propose wider use of vaccine in order to reduce morbidity as well as mortality, and one private citizen raised objection to using any influenza vaccine. With respect to immunizing elderly persons, it was agreed that additional information about the degree of risk from influenza for elderly individuals without evident chronic illness would be useful but that available data indicate age alone to be a sufficient risk factor to support the validity of current recommendations.

2. Based on current information, are the recommendations of the Advisory Committee on Immunization Practices on dosages and on the detailed use of flu vaccine appropriate?

It was the consensus of the participants that the ACIP recommendations on dosage and detailed use were appropriate. (See response to Question 5 for additional details.)

3. Based on our current information, does comparison of benefits and risks still support the recommendations of the January 30 conference?

The data bearing on benefit and risks of influenza vaccines were again reviewed. The risk of death from influenza is clearly several hundred times more likely than death attributable to the vaccine. The precise ratio will vary somewhat since such factors as age and health of the individual and prevalence of influenza will differ. The evidence presented at this conference, however, reinforces the conclusion reached in January that the benefits of the vaccine greatly outweigh the risks. It may be noted that there is an international as well as national consensus in this matter.

4. How extensive an effort can State and local health departments mount in immunizing high-risk individuals against the flu without funding from the Federal government?

A survey conducted July 19-21, 1978 of the 63 existing Federal immunization project grantees (all State and territorial and some large local health departments) revealed that 48 intend to apply for an influenza grant if funds become available by late August; 42 would apply if funds did not become available until late September (these 42 include approximately 73 percent of the Nation's high-risk population). The effect of delaying Federal support could be seen in that it was anticipated in April that approximately 8 million additional high-risk individuals might be immunized in the first year of the Federally-supported program, whereas this survey indicated that if funds became available in late August, approximately 4.7 million individuals might receive vaccine in the public sector this fall. If funds did not become available until late September, that number would be reduced to approximately 3.6 million. The importance of Federal support in achieving even this level of protection is underlined by the fact that only 678,000 doses were estimated in this survey to be administered by these agencies if there is no Federal support.

5. Have our clinical trials provided an adequate sample to test the vaccine and to determine whether it is safe and effective?

The approximately 2000 subjects enrolled in the clinical trials is adequate. These are, in fact, the largest clinical trials conducted, with the exception of those in 1976. It was noted that in addition, extensive information exists from numerous studies of influenza vaccine conducted during the past 30 years. The amount of documentation sought annually is influenced by such matters as the degree of similarity of the contemporary vaccine to the previous year's vaccine and the need for clinical confirmation of new laboratory test technology. This past spring it was anticipated that the occurrence of A/USSR influenza in vaccine study populations might well invalidate the results of some trials. Consequently, the number of subjects targeted for was increased in early planning. However, subsequent experience showed that vaccine populations largely escaped infection with A/USSR influenza, and it became possible to obtain statistically valid results with fewer volunteers. The vaccine dosages selected by the ACIP induced significant leve's of antibody in more than 60 to 90 percent of the participants. Side reactions with these dosages were not statistically more frequent than those observed in control subjects who received a saline placebo. Less data were available on children between 3–12 years of age; and since additional results for this age group are expected shortly, the ACIP plans to review the additional information before finalizing its recommendations for this younger age group.

6. What are the risks of vaccine compared with its potential benefits for the high-risk groups such as chronically ill children and the elderly?

Based upon the clinical trial data, the immediate side effects of 1978–79 influenza

vaccine are expected to be mild and infrequent in persons of any age group or health status. The only known, serious reactions observed with influenza vaccines have been the rare instances (1 in 100,000) of Guillain-Barré Syndrome and the even rarer anaphylactic type allergic reactions. There is no basis for assuming that either of these occurs more frequently in the chronically ill or the elderly. In fact, observations during 1976–77 demonstrated that the frequency of Guillain-Barré Syndrome after vaccination for persons 65 years of age and older was similar to that seen in younger adults and similar in those receiving monovalent and bivalent vaccines. Thus, the benefit-to-risk ratio is even higher for these groups than the general population since they are at no greater risk of reactions but at greater risk of death from influenza.

Recent claims in the press and in Congressional debate to the effect that influenza vaccine causes neurologic disturbances other than Guillain-Barré Syndrome and "hypersensitivity" resulting in an accentuation of the severity of influenza were discussed. No evidence was found to support the contention that such adverse effects occur.

7. Based on what we know now, is the conclusion of the last conference that influenza will almost certainly appear—although to an unknown extent—still valid?

At the time of the January 30 conference, the United States was having substantial influenza with associated excess mortality due to H3N2 influenza A viruses (A/Victoria and A/Texas). Just before that conference was convened, the first identification of A/USSR(H1N1) influenza virus in the United States was made. Subsequently there were numerous epidemics due to the A/USSR virus, largely in colleges and institutions and affecting almost exclusively the population less than age 25 years. In all, 46 States had at least one isolation of H1N1 virus, and all 50 States had H3N2 viruses identified. Influenza B virus was isolated from a much smaller number of States. The conference participants agreed that the experiences of the past coupled with those of the most recent year indicate that there almost certainly will be influenza in the 1978–79 influenza season. Furthermore, all three strains (H3N2, H1N1, and B) have been identified in the southern hemisphere in the past 4 months—from past experience, commonly a good indicator of which virus will be seen in the next season in northern hemisphere countries. In the coming year, appearance of one or more of these three strains is likely; however, the extent of spread cannot be predicted with confidence.

8. Is present flu vaccine inherently defective because the mechanism by which it seeks to protect is not suitable for combating flu viruses?

It has been repeatedly demonstrated that inactivated influenza vaccine administered by injection *is* effective in protecting most vaccinees against disease caused by influenza strains similar to those incorporated in the vaccine. Since the early 1940's there have been 23 well-controlled clinical trials in the United States designed to assess vaccine effectiveness. Of these, 21 demonstrated protection against influenza in 70 to 90 percent of vaccine recipients. Thus, existing data point overwhelmingly to efficacy of influenza vaccine for the majority of its recipients.

Two concerns recently raised in Congress and in the press were discussed: One was that influenza vaccine had never prevented an epidemic (with the inference that it was, therefore, ineffective in general). The point was made that, in order to prevent an epidemic, a large proportion of the population at risk would need to be immunized in advance of exposure to influenza. This level of immunization has never been achieved in large population groups, and thus the question of whether an epidemic could be prevented is somewhat moot. However, the regular use of influenza vaccine by the military has provided experience on a smaller scale which strongly suggests that epidemics *could* be prevented were the vaccine deployed for that purpose. The other concern dealt with the claim that the epidemics of A/USSR influenza at the Naval and Air Force Academies this past spring were evidence of vaccine failure. It was pointed out by conference participants that no such conclusion could be reached since vaccines used at the Academies (prior to the epidemic) did not contain the A/USSR viral antigen.

With respect to questions on alternative influenza vaccines, some scientists theorize that it may be possible to develop live influenza vaccines that are superior to the inactivated vaccines. This is in an area of active research. However, it was noted that there is no convincing evidence that the live influenza vaccines currently used in a few countries are safer or more effective than the inactivated vaccines used in the United States and most other nations.

9. Should flu vaccine be administered as a monovalent or trivalent vaccine?

Evidence from previous and current clinical trials indicates that there is no increase in the rate of side effects from a vaccine containing two or three virus strains as compared with a monovalent vaccine containing a comparable amount of viral antigen. Indeed, the current clinical trials indicated that the side effects observed in those who received the trivalent vaccine were no different from those observed in individuals who received the saline placebo. Since up to three strains may appear in this country during the coming season, the best individual protection will be afforded by the trivalent vaccine.

10. Will flu immunization programs divert resources from the childhood immunization effort?

Conference participants, particularly those from the public health sector, agreed that, depending on the timing, level, and stability of Federal support and the expectations for short-term achievements, the delay in making Federal funds available would make it essentially impossible to achieve the original influenza immunization target without diversion of resources from other activities, most notably the childhood immunization effort. It was concluded, however, that providing Federal funds to achieve less ambitious goals, even if not until late September, could still allow for an increase in the public provision of influenza vaccine and not significantly divert efforts from childhood immunization efforts.

11. Should further research be undertaken in any area? Although much is already known about influenza viruses, influenza vaccines, our knowledge is far from complete. Basic research on the virus and on mechanisms of immunity needs to continue as does research such as that of improving vaccines, extending an understanding of the epidemiology of various influenza risk factors, and evaluating the effectiveness of antiviral agents. Research into improving the mechanism of surveillance of influenza disease and of vaccine use and exploring alternative vaccine delivery systems should be strengthened. The need for supporting continued research, however, should not impede use of the now-available, effective means of reducing severe impact of influenza through immunization.

In conclusion, influenza is a disease which inevitably occurs almost every year in this country and which regularly does have serious consequences for individuals and society. A safe and effective vaccine exists which, with modification of the formula when there are changes in prevalent viruses, can be expected to reduce the serious complications and death associated with influenza. The conference participants agreed that influenza vaccine should be used and that the Federal government should take steps to develop and support a national influenza program to permit more high-risk individuals to receive a known effective preventative which heretofore has essentially only been available to those who can afford it.

THERE IS NEWS FOR ANDY YOUNG IN AFRICA'S REFUGEE COUNT

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. DERWINSKI. Mr. Speaker, Leo Cherne serves as chairman of the International Rescue Committee. I wish to insert an excerpt from his article appearing in the July -August issue of the News American which was reprinted in the Chicago Tribune of August 8.

It is my understanding that as a former Member of Congress, Ambassador Andy Young religiously reads the CONGRESSIONAL RECORD, and I hope that this article will catch his attention:

THERE'S NEWS FOR ANDY YOUNG IN AFRICA'S REFUGEE COUNT

(By Leo Cherne)

When people separate themselves from their roots, leave their homelands, and risk death in the process, we have a gauge more accurate than any other with which to measure the desperation of people and the completeness with which human beings are denied the basic freedoms in the countries from which they flee.

The number of refugees is increasing. The International Rescue Committee is at this moment assisting Czechs who flee to Austria, Soviet Jews at urgent need in Europe, Chinese who are trying to reach the safety of Hong Kong, Ugandans who seek protection in Kenya, Angolans on the edge of starvation in Zaire, the Vietnamese—only some of whom have been permitted to land in Thailand and Malaysia and some as far as Australia. There is an unending and not decreasing number of the wretched who vote with their feet in this continuous tragic plebiscite. . . .

The single most serious criticism I would make of the Carter administration's human rights record thus far is that it has been infinitely more harsh in its application against our allies than our adversaries. Allies rarely threaten us with the possibility of war and aggression, and rarely seek to impose their philosophic models upon us. We risk little retaliation in being outraged by their human rights failures. But our adversaries, especially the Soviet Union and Cuba, are precisely those nations which threaten peace and with whom we seek some protection against the dangers of the escalating arms race and their further encroachment into the world around them.

The human rights thrust of the Carter administration is concentrated on Africa to a greater extent than on any other area. Freedom House . . . classifies all nations in the world according to uniformly and critically applied criteria. In this year's classification of the 50 nations of Africa, there are four nations which are regarded as free

and which honor civil, political, and economic rights. They deserve special mention: Djibouti, Gambia, Botswana, Mauritius. There are 16 nations which are classified as partly free, and there are 30 which by all of the criteria are classified as not free. In short, the state of human rights in Africa is a tragic one.

Among those 50 nations are two [white] supremacist nations, South Africa and Rhodesia. . . . If one were to judge from the public statements made by our ambassadors to the United Nations, one would assume that South Africa and Rhodesia are imbedded in a continent which is otherwise meticulous in its observance of the rights of the blacks who are the citizens and inhabitants of their own wholly independent sovereign countries. . . .

What I am about to report is not in mitigation of the indefensible policies of racism and apartheid in South Africa and Rhodesia, but the blunt fact remains that more than 97 per cent of the [African] victims of cruel violations of human rights who are in flight have fled black tyranny!

There are some 2,600 who are identified as having fled from South Africa. There are two estimates of the numbers who have fled Rhodesia or Zimbabwe. I'll take the higher one, 72,000. These stand in contrast to the more than 150,000 who have been compelled to flee Burundi; 145,000 from Equatorial Guinea; nearly a million who have fled Ethiopia; almost 200,000 who have fled Rwanda [and that's more than half of the total population of that country].

There are 260,000 who have fled Zaire. Angola alone has produced more than one million black refugees. Last spring Angola's President Neto said quite flatly, "We aren't a bourgeois democracy; from now on the dictatorship will be a little more strong." I heard no protest. Several months later Mozambique's President Machel was more frank: "The experiences of the Chinese people are regarded by us as sources of knowledge on how to liquidate the abrasive forces in the service of imperialism." I heard no protest.

As for Andy Young, his nearly total myopia to the sheer nonexistence of rights for millions of blacks who live in black countries leaves me bewildered. Even more bewildered than I was when he assured us that Cuban troops in Angola were making a contribution to the stability of that country. The million blacks who have fled Angola are, I'm afraid, not the beneficiaries of that stability.●

A COMMON HERITAGE PHILOSOPHY FOR THE LAW OF THE SEA

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. EDGAR. Mr. Speaker, today I am introducing H. Res. 1312, the Common Heritage Fund Sense resolution. The major objective of this resolution is to put the House on record as favoring the establishment of a "Common Heritage Fund" as part of the Law of the Sea Treaty now under negotiation in the United Nations Conference on the Law of the Sea. As you know, that giant conference is well into its 5th year. Immediately ahead is a 4-week—August 21 to September 15—working session in New York City.

The purpose of the proposed Common Heritage Fund would be to insure that a significant portion of the trillions of dollars of ocean mineral wealth, both offshore and in the deep ocean, is regarded as "the common heritage of mankind" and used "to assist developing nations, to fight pollution and to assist in some measure the work of the United Nations, especially in the area of peacekeeping."

For those who have followed the Law of the Sea Conference, the phrase "common heritage of mankind" is a familiar one. However, its precise meaning has been in dispute for more than 10 years, since Ambassador Arvid Pardo of Malta used the phrase in his historic address to the United Nations General Assembly on November 1, 1967. But there is, I think, broad agreement that the phrase "common heritage" implies that the new law of the sea must in some way reflect and improve upon the traditional view that, except for a narrow territorial sea, the oceans and their resources are either "common property" or "no one's property."

A central question in the Conference is: "Where does the common heritage begin?" Does it begin just beyond a 3-mile territorial sea? Or a 12-mile territorial sea? Or does it begin 200 miles out? Or even further out? This is an absolutely basic question because in dollar value, the overwhelming proportion of exploitable ocean mineral wealth is within 200 miles of shore. Indeed, the value of that "within 200" mineral wealth is estimated to be $30 trillion.

The conventional answer to my question is that the principle of the common heritage does not begin to apply until at least 200 miles from shore. That is the position taken in the treaty text now before the Conference, the informal composite negotiating text (ICNT). The practical result of that treaty will be to give the coastal States—and especially a fortunate few among them—all of that immense off-shore wealth. It is not surprising that Dr. Pardo has characterized the resource zone provided for in the treaty as a "monumental grab for riches, unprecedented in world history." With it, he has said, "the rich get richer, the poor remain poor and the landlocked countries which, with few exceptions, are the poorest of the poor, become poorer."

The dimensions of this great "sea grab" are becoming ever more clear. A recent study examines "who gets what" as a result of the 200-mile exclusive economic zone (EEZ) provided for in the treaty. This study shows that of some 25 million square nautical miles of EEZ awarded by the treaty, more than half, that is, 53 percent, will go to 10 nations, 6 of them already very rich. Third World states are beginning to see that in its present form, the EEZ hurts the Third World much more than it helps.

Mr. Speaker, I do not believe that the Members of this House should remain silent about this great sea grab, the arbitrary exclusion of the real ocean wealth from the common heritage. I realize that the administration believes, and many learned commentators believe, that it is too late to stop that grab, and that it is too late to revive the common heritage and give substance to it. Perhaps it is too late. But I think we should try, for the issues at stake are momentous issues.

A real common heritage would not only be worthwhile in its own terms, but it might also do much to revive the faltering Conference. For while some delegates say it is too late to restore the common heritage, another view is beginning to be heard in the Conference. That view holds that unless the great sea grab is reversed, the Conference will remain deadlocked. This view holds that the steady erosion of the common heritage is making the Conference more radical, more ideological. It is making the Third World less willing to compromise on such important issues as the nature and powers of the International Seabed Authority and the sharing of the living resource off coastal states with neighboring landlocked developing states. This alternative view finds great merit in the bold and imaginative Common Heritage Fund proposal which the delegation of Nepal introduced at the spring session of the Law of the Sea Conference in Geneva.

Mr. Speaker, the resolution I am introducing would provide for some sharing of the mineral wealth within 200 miles of shore, that is, some sharing of that wealth with the international community. In a word, it would state that there is a common heritage dimension to that offshore wealth and a common heritage claim on some portion of it.

I believe that a thorough discussion of this resolution would make a major contribution to clarifying some of the great issues before the Law of the Sea Conference, issues which are of immense importance to mankind. And I think that would be a very healthy thing.

I am sure that I speak for many Members of the House when I say that in my view the issues before that Conference urgently need clarification. It is my impression that many of those issues are being discussed in a language so technical that most Members, including myself, find it very hard to follow the discussion, much less take part in it. Yet what is at stake in that Conference is the fate of the oceans and with it, as Thor Heyerdahl reminds us, the fate of mankind.

It is for this reason that I would urge that this resolution go directly to the House International Relations Committee and that that committee hold hearings on it. Those hearings could be and should be the occasion for a broad-ranging inquiry into U.S. ocean policy and how it relates to our ideals and objectives as a Nation. All too often congressional action involving the oceans begins in specialized committees and takes the form of very specialized legislation, for example, on fishing limits, on deep sea mining, on tanker catastrophes. The House International Relations Committee and the Senate Foreign Relations Committee are forced to comment on finished products of other committees which, capable as they are, necessarily look at ocean policy from rather specialized points of view.

Mr. Speaker, it may well be that a bolder and more imaginative approach to the ocean problem will yield similar results but on a much larger stage, that is, the world as a whole. For if the nations of the world can work together to save the oceans and to use their resources to build development and peace, the world will have taken a giant step forward.

It may be that the Common Heritage Fund suggested in this resolution will help achieve these high purposes. In my view, it is at least worth a close look.●

LET'S CLEAN UP HEW FRAUD

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. MOTTL. Mr. Speaker, waste, abuse, mismanagement, and outright fraud are responsible for the Department of Health, Education, and Welfare losing somewhere between $6.4 billion and $7.4 billion of American taxpayers' money in 1977.

This figure, recently acknowledged by the Department's inspector general Thomas Morris, exceeds the 1975 total of Federal taxes paid by individuals in each State of the Union—except four: New York, Texas, California, and Illinois.

Such a report should have ignited public outrage and generated widespread media attention, but it did not. The public reaction was subdued. Congress immediate emotional response was that of perturbation—but it was short-lived. In a lack-of-confidence vote last June, the House effected an across-the-board reduction in funds for HEW. We accepted two amendments, one by Representative ROBERT MICHEL and the other by Representative CLARENCE MILLER; together they cut $1.397 billion from the amount recommended by the House Appropriations Committee for HEW in fiscal year 1979.

Ideally, this reduction should incite Department officials into cracking down in the worst problem areas in HEW. However, because no real directives are set forth in these floor amendments, I fear that Department officials will take the easy way out and demand sizable spending reductions in all programs rather than pick out those programs most flagrantly wasteful and poorly-run and correct these deficiencies.

This across-the-board cut could seriously jeoprdize those very necessary and valuable social welfare programs so many of us have fought hard to enact and consistently worked to improve.

Therefore, I offer you all an alternative. Today, I am introducing a legislative package, comprised of five bills, which are devised to get down to the real nitty-gritty of the matter. These five bills should effectively curb the most wasteful, abusive and fraudulent practices in HEW and its adjunct programs.

According to the Inspector General, the biggest losses can be attributed to errors and faulty management systems. My legislative proposals seek to correct these deficient management practices and systems which permit and actually encourage the fraud, abuse, and waste responsible for HEW losing so much of American taxpayers' hard-earned dollars. I surmise that $1.2 billion dollars will be saved if my five bills are enacted into law.

Four of my five bills effect tighter front-end controls over eligibility and claims payment procedures as well as demand higher standards of integrity on the part of all concerned.

The first bill provides higher Federal matching of State expenditures for management information systems and fraud control units under the Aid to Families with Defendent Children (AFDC) program. Current law provides for substantially increased Federal Matching Funds for Medicaid Management Information Systems and for funding of State Medicaid Fraud Control Units. These two provisions have proven to be positive incentives to improving the integrity and management of the medicaid program. Although the basic AFDC program is one of the principal means of obtaining medicaid eligibility, similar incentives do not exist for State administration of AFDC. Therefore, by providing for increased Federal matching of State expenditures for antifraud efforts, I hope to improve the integrity and administration of the AFDC program.

My second bill amends the Social Security Act to broaden and standardize State and Federal matching of records for the various welfare programs and certain related programs. As a condition of eligibility for Federal matching funds for AFDC and medicaid, each State will have to annually match its welfare rolls against all relevant State and Federal records. A partial listing of relevant records includes: Federal, State, and local government employment records—including military personnel—wage reports of private employers; and benefit records under the social security, supplemental security income (SSI) and railroad retirement programs. The bill also will require the HEW Inspector General, on a regular basis, to match all civilian and military payrolls against the individual State and master lists of welfare recipients, general assistance recipients, and food stamp recipients.

The third bill will authorize the Secretary of HEW to obtain records of recent deaths in order to prevent illegal payments made to doctors, hospitals, and nursing home administrators, and social security workers on behalf of the deceased. The existing practice of asking funeral directors to report deaths to the Social Security Administration is inadequate and unreliable. Inspector General Thomas Morris, before a Senate Governmental Affairs Subcommittee on July 20, remarked that he was denied access to the only Federal register of deaths, that is kept by the National Center for Health Statistics, because of a law requiring confidentiality. The Privacy Act forbids a Federal agency from making available to any person or to another agency an item on file about an individual without the individual's consent except in special circumstances. The exceptions include disclosure of a record "for a routine use," defined as "for a purpose which is compatible with the purpose for which it was collected." My bill would give the Secretary of HEW—through the Office of the Inspector General—the legal authority to establish an effective means of obtaining records of deaths in order to prevent illegal social security payments.

The fourth bill will enable the Commissioner of Education, (and officials of participating educational institutions), to verify a candidate's eligibility for a loan and to collect on these defaulted loans. The bill amends the Internal Revenue Code to: First, allow the disclosure of information from Federal tax returns to the Secretary of HEW for verification of the information provided by applicants for Guaranteed Student Loans or National Direct Student Loans; second, allow the Secretary of HEW to disclose such information to higher educational institutions and lenders participating in these programs; third, allow the disclosure of the Commissioner of Education of the mailing addresses provided on the tax returns of individuals who have defaulted on Federal student loans; and, fourth, allow the Commissioner to disclose, upon written request, those addresses to institutions of higher education and lenders for the purpose of locating such defaulters. In case the address provided on Federal tax returns is no longer valid, my bill would also permit disclosure of the mailing address of any individual who has defaulted on his loan for whom a record is kept under the provisions of the Social Security Act.

Many contend, and I agree, that medical professionals—doctors, practitioners, technicians, and nursing home and hospital administrators—are responsible for a good deal of the loss of funds in HEW. Requiring unnecessary surgery and hospital stays; billing for multiple services rendered to relatives accompanying the patient; billing for services more extensive than those actually provided; directing patients to particular pharmacies; and billing for services not rendered are among the most common of those fraudulent practices perpetrated. These problems can be dealt with effectively by the legislation we passed last fall — the "Medicare-Medicaid Anti-Fraud and Abuse Amendments"—now Public Law 95–142. This law strengthens sanctions for program violations, expands information disclosure requirements, institutes administrative reform, and improves the Professional Standards Review Organization program. Passage of this measure was a wise move.

However, it seems the Office of the Inspector General and other closely tied investigative offices in HEW are in need of additional manpower so as to effectively carry out their investigative duties. At first, the Office of the Inspector General's staff allocation was sufficient—its efforts to combat fraud and abuse were remarkably fruitful. But as the Office became increasingly visible, it began to receive referrals from outside sources. With the passage of Public Law 95–142, the Medicare-Medicaid Anti-Fraud and Abuse Amendments the Office's responsibilities further grew so that now, the present staff is unable to surmount the extreme backlog in existing cases.

The effectiveness of the Office's investigative activities is dependent upon timely attention being given to its total workload. But these cases cannot be attended to without additional manpower resources. Therefore, in my fifth and final bill, I provide for the authorization of funds necessary for the Inspector General to perform existing congressionally mandated functions for combating waste, fraud, and abuse—as well as those proposals for meeting similar objectives which are currently under consideration in the Congress and which, if enacted, would require adequate funding to be truly effective.

The American people know the Government has a job to do, but they want it done well—with as little waste as possible and with the maximum result. My legislative package should effectively eliminate a great deal of fat in HEW programs.

I urge each and every one of you to take a careful look at these bills and join me as cosponsors. Should you have any questions, I urge you to contact Glenn Davidson, of my staff.●

TRIBUTE TO POPE PAUL VI—BLESSED ARE THE PEACEMAKERS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. BIAGGI. Mr. Speaker, the Roman Catholic community was plunged into mourning with the sudden death of Pope Paul VI this past Sunday. His death ends one of the most important of the papal reigns in the 20th century Catholic Church history.

Giovanni Battista Montini was a tireless and lifelong servant of God, a man whose quest for peace became his universal trademark. Pope Paul was elected the spiritual leader of the world's 683 million Roman Catholics in 1963. He followed the beloved Pope John XXIII who had begun to make many changes in the Catholic Church structure. Many referred to the 1960's as an era of revolution in the church. Pope Paul was a reluctant leader—someone who preferred evolutionary changes to revolutionary ones. Nonetheless he provided expert and compassionate leadership and the church emerged from the 1960's and entered the 1970's stronger and more unified.

Paul saw his main mission as Pope to champion the cause of world peace. He pursued this goal in a tireless fashion and in ways unknown to his predecessors. He left the Vatican to travel to world capitals. He made a historic visit to the United States the highlight of which was an emotional address to the United Nations in which he pleaded to the world community "Never again war. War never again." He traveled to the Holy Land, and sought to mediate peace in Vietnam. He met with world leaders in the Vatican to again convey the message of peace.

Pope Paul had difficult times in his own church. The early 1970's proved to be turbulent ones for the Catholic Church. Thousands of priests were leaving the order. Much of the problem was caused by demands for change. Paul sought to blend the modern with the traditional. He abolished church rules which were obsolete or overly arbitrary but defended others such as celibacy for priests.

His most controversial position was that in defense of human life. His classic encyclical humanae vitae rejected artificial birth control. His position was difficult for many Catholics to understand but for many other Catholics it was a demonstration of Pope Paul's consummate commitment to preserving strong moral values in the world. While many disagreed with the Pope ideologically or philosophically over the years no one doubted the sincerity or intensity of his commitment.

Pope Paul had an overriding sense of concern for the poor, the oppressed of the world. His love for his fellow man knew no bounds. His desire to improve the quality of life was endless.

I was especially interested to learn of the Pope's deep concern about the conditions of political prisoners in jails in Northern Ireland. At the Pope's direct request, Archbishop Dr. Tomas O'Fiaich, Catholic Primate for Ireland, spent an entire day in the Long Kesh prison and his findings were most disturbing. I recounted them in an earlier Extension of Remarks this week.

Pope Paul was a leading advocate of peace in an unsettled world. His quest for peace and dignity for all men was insatiable but tragically not realized in his lifetime. We can only try to pursue this course in his memory. The world truly mourns the loss of a true leader, Pope Paul VI.●

"COME BACK, WE NEED YOU" REFLECTIONS OF SAMUEL D. FOSTER ON WASHINGTON THE MAN AND OUR GOVERNMENT TODAY

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. SCHULZE. Mr. Speaker, it gives me great pleasure today to bring to the attention of my colleagues a speech given by one of my constituents, Samuel D. Foster, of Wayne, Pa., who is the past-president of the Philadelphia-Continental Chapter of the Pennsylvania Society of the Sons of the American Revolution. The speech provides us with some interesting and thought-provoking insights into how our first President would perceive the bureaucratic maze we call the Federal Government today.

The article follows:

"COME BACK, WE NEED YOU"

(By Samuel D. Foster)

It is best to speak of George Washington as that great man who was created from his vast experience. It was as President of the United States that he became that complete man who best warrants our attention and praise.

Washington was a man of principle, a man of strong inward character. Thomas Jefferson described him in these words, "His integrity was the most pure, his justice the most flexible I have ever known. He was indeed a wise, a good and a great man."

We know that Washington was a person who practiced and believed in private capitalism. He wanted independence for both the nation and the individual citizen. He desired that the people be masters of the state and not that the state be masters of the people.

Through the intervening years, our government has become strangely altered. That philosophy with its objective, "to secure the blessings of Liberty," is amended as if to declare the dependence of all citizens upon government.

Our compatriot, the senior senator of Pennsylvania, Richard S. Schweiker has said, "I am becoming increasingly suspicious of the Federal government's ability to solve the nation's problems."

These are the problems largely generated because government has stretched its grasp as well as its ability. By legislation it has attempted to remake the American culture, a culture that was sound and certain of success because it was the direct growth of living experience. These new problems of government have been caused by the enforced theories of opportunists who believe that they can dictate morals. economics and the personal attitudes of others.

Changes are now taking place that George Washington could not have supported.

The Bill of Rights reads: "Congress shall make no law respecting the establishment of religion." I cannot imagine Washington or the other signers of the Constitution ever declaring that this should prohibit prayer in schools or limit religious practice.

Today we are being conditioned to laws that intend to protect us from the hazards of modern life. There are literally no facets of health, housing, education or business activity into which government has not directed its regulations. Encroachment spreads under the demand that it became more "responsive."

We ask, "Where does the Constitution give such powers to the national government?" In reply we are told, "under the clause General Welfare." As such it is expanded into an Alice in Wonderland clause that means whatever anyone wants it to mean. If constitutional law can thus be made to suit the occasion or fashion, then no part of our Constitution can remain sure.

Bureaucracy can and does publish regulations by its own authority with police compulsion to back them. It has become government within a government. Our national government has become so complex that no one understands it. To this tangle came the supplicants who expect results beyond the ability of the government. Congress tries to help but in turn becomes disoriented by perplexing demands and further entangled in programs of short-sighted expediency.

George Washington looked upon the rights of citizens as being extended and codified by the Constitution. He knew well that all governments are fundamentally organized force and coercion. He desired freedom and liberty for all citizens believing that true freedom is the absence of coercion.

The real depostism against which Washington warned has been hatched. Today Congress and the President are enmeshed between two contradictory ideals or philosophies of rule. The one under which our people have thrived and grown great is that of individual freedom and private enterprise.

The second philosophy is that of authoritarian government. This ideal is the plan of dictators with regulation of the very lives of the citizens. There is a serious trend in that direction under which those difficulties not solved by persuasion are solved by coercion.

There are many doors now open through which the tides of regulation and autocracy already pour. If this is to be the way the citizens will no longer have to shoulder the responsibilities for our fate. As George Orwell has suggested the solution will be: Big Brother will solve all of the problems.

We are all admirers of George Washington and the principles of government for which he stood. If I could I would send an urgent message to him.

"Mr. President, your plan of government worked exceedingly well. Your honesty and belief in a proud and nationalistic country carried us to worldwide strength and influence. Your warning against foreign entanglements has been proven to be right many times over. Your confidence that the individual could solve his own problems was on the mark.

"We are willing to admit that much tinkering has been done in an effort to improve on your work. However it appears that much which was done and with the best of intentions has produced the worst results. Some now in power seem ready to say: Goodbye George Washington, while we rush toward our own evolved tyranny.

"Mr. President, your skillful hand and those of your fellow patriots once brought success against terrible odds. Again we need that wisdom and guidance.

"I entreat, George Washington, come back—we need you." ●

POPE PAUL VI

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 11, 1978

● Mr. BROWN of California. Mr. Speaker, the death of Pope Paul VI has generated numerous tributes and analyses of this world leader, and Catholics and non-Catholics alike have been reminded of his life and actions while he was Pope. There is little I can add to the thousands of words already spoken, except to repeat the thoughts of others.

One unusual tribute to Pope Paul was recently brought to my attention, however, which I believe deserves wider circulation. More than a month before Pope Paul VI died, Colman McCarthy, of the Washington Post, wrote of his accomplishments, and especially his leadership in addressing two of the major ills facing our global community, the worldwide arms race and the maldistribution of wealth in the world. It is for these contributions that non-Catholics especially remember Pope Paul, as expressions of the fundamental values of Christianity.

Mr. Speaker, I place this editorial in the RECORD at this time.

[From the Washington Post, June 26, 1978]

POPE PAUL, CHAMPION OF THE CHURCH—AND THE PEOPLE

(By Colman McCarthy)

The Vatican, adept at pageantry, might have marked this month's 15th anniversary of Pope Paul's election by the kind of jubilant celebration that Italians relish and saints bless. But neither the citizens of Rome—still grieving the Moro tragedy—nor Peter's successor are in a mood for gaiety. Paul VI, who said last autumn "I see the end of my life approaching," is 80, frail and said to be failing. For the man who pledged 15 years ago to become "a pilgrim pope," the final pilgrimmage quietly dominates the thoughts of Paul and those close to him. Only in his usual weekly audience did the pope note his anniversary.

After his death, Pope Paul will earn the respectful tributes always given newly departed leaders. But even while he lives, it can be argued that Paul is likely to be regarded in history as one of the four or five greatest of Rome's 263 popes.

I have had that view for much of Paul's reign, but most of those with whom I share it say that I am being no more than the loyal Catholic. That may be, but I am loyal to a number of traditions, people and ideas that do nothing but disappoint me. With Paul, the disappointments have been few. For 15 years, he has been giving a stirring example of what all leaders dream but few achieve: growth in office.

He came to power as a retiring intellectual but instead of settling in behind the Vatican's walls and mysteries, as most popes have done, he became a world traveler to 16 countries on six continents. He had a close friendship with Pius XII, a rigid anti-communist, but, as pope, Paul has created a running dialogue with Marxists from Rome to the Kremlin. As archbishop of Milan, he supported strong papal authority. But as pope, he has reformed the Curia—the church's bureaucracy—and summoned five synods to get the advice of his brother bishops. A prayerful and spiritual man, he also has taken the church into economics, social justice and disarmament through such encyclicals as "Populorum Progressio" and "Mense Maio."

Imperceptibly, these shiftings created a style of evenness that is more the mark of the successful politican of the world than a spiritual leader. In fact, or at least it seems evident now, Paul was seizing an initiative that few of his predecessors ever saw as their proper role: seeking to help not merely the church but also *omnes gentes*, all people.

His thinking was expressed in an interview he gave after his dramatic address to the United States in 1964 in which he cried out, "No more war!": "I quoted St. Paul in my talk but I did not have to evangelize. The talk I gave was situated on another plane—if I dare say so, the plane of Socrates. I was looking for what was reasonable and just, equitable and salutary, what every responsible man ought to think. If I evangelized, it was to preach that Gospel virtually contained with the Gospel, which is the Gospel of reason and justice."

That philosophy might have been better received if Paul had not stumbled into one needless blunder—"Humanae Vitae," his 1968 encyclical banning artificial contraception. Outside the church, it raised the same kind of scorn that greeted Rome's 1870 pronouncement on papal infallibility. Among Catholicism's 600 million members, it rived the church as though a new schism had come. Actually, the schismatics this time were loyal—though questioning—bishops, theologians and laymen. They won popular support by shifting the argument away from birth control to the question of individual conscience versus obedience to Paul. Conscience won.

The fight need never have happened. Birth control is not an issue of changless doctrine; the Vatican first spoke of it only in 1931. The next pope may well offer a view that "evolves" from Paul's. But the bitterness of the battle changed Paul into a brooding man who became even more of a contrast to his predecessor, bubbly Pope John. It also changed the public's view of Paul—from the open-minded scholar whose views of peace and social justice were buoyantly liberal and humane to a cleric hunkered down to defend a silly cause while society, and much of his own church, passed him by.

The tactical error of one encyclical should not keep history from a kindly judgment on Paul. Two issues dominate the 20th century: the arms race and the distribution of wealth. On both of these, he has been singularly strong. He has been the conscience of the global anti-war movement and the moral voice for defending the poor against the rich, two roles that no other world leader has had the daring—or freedom of action—to embrace in the same intense and selfless way. ●

SENATE—*Monday, August 14, 1978*

(Legislative day of Wednesday, May 17, 1978)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. KANEASTER HODGES, JR., a Senator from the State of Arkansas.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O magnify the Lord with me, and let us exalt His name together.—Psalms 34:3

Almighty and eternal God, hidden from sight but vivid in experience, Thou art great and greatly to be praised. Thou art our Creator, Redeemer, and Judge. Help us to stay close to Thee this day, for we know not what it may bring forth.

Give us grace to debate without pugnacity, to contend without being contentious, to be firm in honest convictions while charitable with our colleagues, and always to demean ourselves according to the heritage of free men in this lofty deliberative forum. Inspire, direct, and control the movement of our minds and mouths to the glory of Thy name and for the welfare of this Nation.

We pray in the Great Redeemer's name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 14, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable KANEASTER HODGES, JR., a Senator from the State of Arkansas, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. HODGES thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the previous order, the acting majority leader, the Senator from New York, is recognized.

THE JOURNAL

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MOYNIHAN. I thank the Chair.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the previous order, the acting minority leader, the Senator from Alaska, is recognized.

Mr. STEVENS. Mr. President, I ask unanimous consent that Charles Ewald, of my staff, be granted the privileges of the floor today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TUITION TAX CREDITS

Mr. STEVENS. Mr. President, I would hope that Members of the Senate will give serious consideration to the debate that is going on now on the Tuition Tax Credit Act of 1978. For myself, I see this bill as it has been reported by the Finance Committee as part of the overall tax reduction package for this Congress. It seems to me that if the tax reductions that we are to place into effect are to be meaningful for a broad spectrum of our populace, this is one of the bills which must have firm support.

The Roth-Kemp proposal, in my opinion, ought to dovetail with this, the Goldwater amendment, and the other proposals that are before us to spread the effect of tax relief for our citizens as widely as possible.

There are people who are not affected as much by income tax reduction as they might be affected by the property tax relief, as proposed by Senator GOLDWATER, or the tuition tax credit, as proposed by Senators MOYNIHAN and PACKWOOD. I believe that the American public may soon arrive at the day where they genuinely hate taxes. I do not think any of us like them. The day when the American public expresses an outright hate for taxes will be a day when the governments of our democracy will be under great strain.

I would hope that the Members of the Senate will listen to this debate and that we will be able to wind up this bill as soon as possible and send it to conference where the will of the Congress with regard to tuition tax relief can be put into effect.

We have no further request for time on my side. Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. Does the acting majority leader yield back his time?

Mr. MOYNIHAN. I yield back the majority leader's time.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Virginia (Mr. HARRY F. BYRD, JR.) is recognized for not to exceed 15 minutes.

MILITARY ATTRITION: A TOTAL LOSS TO THE TAXPAYER

Mr. HARRY F. BYRD, JR. Mr. President, the Senate Armed Services Committee for 2 years has been conducting a review of the All Volunteer Force—including its successes, its problems, and its prospects.

As a member of the committee, I have followed this matter closely and have become convinced that the All Volunteer Force has serious—if not insurmountable—problems.

One of the most serious of these problems is attrition—that is, the failure of individuals to fulfill their commitment of service.

This is a problem that is only now beginning to be adequately recognized.

It is not generally known that more than 40 percent of those individuals joining our armed services now fail to complete their first term of duty.

At current rates, out of every 100 individuals joining the Armed Forces, 40 leave the service before their obligated period of service is completed. The rates for the individual services range from 37 percent for the Air Force to 42 percent for the Army.

Losses of this magnitude are extremely disruptive and expensive.

Each of these individuals had to be recruited—at an estimated average cost of $1,250—and each had to be transported, trained, housed, clothed, fed, and paid.

The total dollar cost to the taxpayer of recruiting, training, and maintaining each of these individuals up to the end of the training period is variously estimated at from $4,300 for the Marine Corps to a high of over $11,700 for the Navy.

If you multiply this cost by the amount of attrition in any 1 year, you have a huge sum.

In fiscal year 1977, for instance, the total attrition for all services was 130,400. Thus the dollar cost of attrition in that year alone was somewhere between $560 million and $1.5 billion.

If you split the extremes, the loss comes to roughly $1 billion.

That is the amount of money wasted by attrition. It buys no defense capability; and it represents a total loss to the taxpayer.

On dollar cost alone this is a disturbing matter.

But it is made even more disturbing by two other factors.

First, the vast majority of those who leave the service before their term is completed are discharged because of failure to meet minimum performance or behavior standards.

Of the 130,000 individuals who left the service in fiscal year 1977 prior to completing their first term, over 97,000 left for failure to meet minimum behavior or perfomance standards. That means that more than 75 percent of attrition was caused by poor performance of one kind or another.

The remaining 33,000—or 25 percent—of attrition was caused by such factors as medical problems, hardship, death, and other causes.

Desertion and absenteeism have been major factors in this attrition. In 1977, for example, the Navy's desertion rate reached an all-time high of 31.6 desertions per 1,000 individuals, totaling 14,539 desertions in fiscal year 1977 alone. At the same time, the Navy's absentee rate was at a near-record rate of 76.9 per thousand individuals. Both these rates are considerably higher than those encountered even at the height of the Vietnam war.

The Marine Corps and the Army have also experienced high rates of desertion and other offenses with the All Volunteer Force, although Army rates have recently improved considerably.

Even more disturbing than the high rate of disciplinary problem, however, is the fact that the majority of those individuals who leave the service for failure to meet minimum performance or behavior standards can and do qualify for veterans benefits. An individual becomes eligible for such benefits after serving 6 months and 1 day.

Among those benefits are disability compensation, hospitalization, nursing home care, alcohol and drug treatment, outpatient medical and dental care, vocational rehabilitation, home loans, educational assistance, and burial expenses.

The attrition problem has been exacerbated by a certain laxness on the part of the Armed Forces and also by the ready availability of veteran's benefits even for those whose performance is less than satisfactory.

For instance, the Navy, until recently, was permitting individuals to avoid deployments or arduous duties by allowing substandard performers to receive minor punishments and then providing them with new duty assignments. To quote recent Navy testimony before the Senate Armed Services Committee this year:

A recognized problem in the Navy is that

substandard performance and behavior has often had its roots in an individual's desire to avoid deployments, arduous duty, to effect a change of duty station or to avoid other service obligations or family separation.

The Navy, in fact, was providing a certain incentive for substandard behavior.

Even worse, in recent years the Navy has actually been providing an incentive for desertion. This may be part of the reason for the Navy's soaring desertion rates.

Under current policy, the Navy does not charge most deserters with desertion. Instead, they are charged with a lesser offense and, in most cases, discharged from the Navy with a general discharge—under honorable conditions.

In effect what this policy does is say to the sailor who wants to get out of the Navy: "Go over the hill, desert! Stay away a few months and then turn yourself in. The Navy will let you out of the service and give you a discharge which qualifies you for veteran's benefits. Uncle Sam will reward your desertion by sending you to college."

Statistics tend to confirm the view that Navy treatment of deserters has actually been an incentive to desert. Ninety-five percent of Navy deserters eventually are returned to Navy control and subsequently discharged. On the other hand, the Marine Corps, which deals more strictly with deserters, has experienced only an 18-percent rate of return of deserters.

The other services have also provided incentives for substandard performance by rewarding misbehavior with an early departure from the service and either an honorable discharge or a general discharge—under honorable conditions—both of which qualify an individual for handsome rewards via veterans benefits.

These problems have contributed greatly to the unacceptably high rates of attrition which our Armed Forces have experienced in recent years. It is time that the Defense Department and the individual services take strong action.

We cannot continue to waste our tax funds and we cannot afford to permit high rates of indiscipline in our Armed Forces.

These problems are only beginning to be addressed by the armed services and by the Defense Department and some corrective actions are being initiated. The Navy, for instance, has, since December 1977, returned all deserters to duty at the command from which they deserted and this is done at the deserter's own expense.

The Defense Department has initiated programs to reduce the rate of attrition, but the problem is by no means solved. It continues to be a costly and corrosive problem.

The leadership of the Department of Defense and the leadership of each of the services have been put on notice that improvements must be forthcoming.

It is essential that corrective steps be taken.

At a minimum, recruiting procedures must be tightened to screen out more substandard performers, and practices within the services which reward failure to meet standards must be abolished.

Mr. President, how much time do I have remaining?

The ACTING PRESIDENT pro tempore. The Senator has 5 minutes remaining.

Mr. HARRY F. BYRD, JR. I yield back the remainder of that time.

Mr. MOYNIHAN. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TUITION TAX RELIEF ACT OF 1978

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of H.R. 12050, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (H.R. 12050) to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

The Senate resumed consideration of the bill.

Mr. MOYNIHAN. Mr. President, this commences the second day of debate on the Tuition Tax Relief Act of 1978.

I should like to begin today's debate by referring to the opening statement made by our revered senior colleague, ABRAHAM RIBICOFF, the senior sponsor of this legislation. He opened the debate with a long and eloquent advocacy and defense of the proposal on Friday morning, August 11. In the course of that statement, he referred to his own role in the history of this matter; as the first Democratic Secretary of Health, Education, and Welfare, it was he who first dealt with this complex of issues on behalf of President Kennedy. I referred to them as the triad of issues that confronted the Nation in the early 1960's.

We were faced with the extraordinary persistence of racial segregation in some parts of the Nation despite the direct assertion by the Supreme Court this was illegal and unconstitutional. We have experienced intense difficulty in establishing a system of what was originally simply known as Federal aid to education—meaning Federal aid to elementary and secondary schools. The establishment of such a system has been made more challenging in the final analysis by the justifiable insistence on the part of many of us, and on the part of those involved with the nonpublic sector in education, that it, too, share, to some degree, in the benefits of any program to be enacted. This insistence was grounded in a justifiable fear—a fear that if the program began without such participation, it would work to the significant detriment of the competitiveness, if you will, the attractiveness and certainly the viability of the nonpublic sector.

Mr. President, it should be noted that, in fact, the sharp decline in the nonpublic sector of education began with the advent of this Federal aid. When Federal aid began to flow in the mid-1960's the sectors which received no part of this aid began to decline.

Now, I remarked that Senator RIBICOFF had been extraordinarily successful in addressing the first two of these matters at a national level, but that we had still not resolved the third. It is now time to confront the matter directly. Yet, as and now we do, indeed, come to the subject de novo, if you will, on the floor of the Senate. This, I believe, is the first debate in the history of the Senate on such an issue, the first debate to raise issues of constitutional meaning, intent, and history in the context of such an issue.

As I observed on Friday—and I would like to repeat the observation this morning—we indeed come to this subject for the first time on the floor of the Senate, but we do not come without a sense of history. We arrived at this point with a history of profound commitment to this issue—of promises made, of undertakings begun, by individuals and by parties.

But I believe I would not be mistaken if I said that these commitments, these undertakings, go back furthest in my own party, the Democratic Party. Indeed, the inability to agree on the matter first appeared in my party.

The record of the other party, of the Republican Party, is perhaps more recently established. But there, the record is very much more explicit, as I think it may be readily seen.

The acting minority leader spoke on the floor this morning of the very considerable preponderance of support of the Members on his side of the aisle for this measure. It is very clear to me that were it within the power of the Republican Members of the Senate to approve or disapprove, to enact or fail to enact this measure, it would be enacted. It would be a very direct and immediate response.

The distinguished majority leader said yesterday in a television interview that, as the debate continues, it is too close to make any accurate or confident prediction as to the final outcome at this point. The fact that the matter is not resolved reflects entirely the unsettled opinion on the Democratic side of the Chamber. Thus, it seems that the issue will be resolved largely in terms of the degree to which my party supports or does not support this measure.

Mr. President, I wish to state something that is not an easy thing to state—that, if the members of my party either support or do not support this measure, they will have either kept or failed to keep the clear commitments of the Democratic Party over the past 15 years in this matter.

I do not mean to suggest that any individual Senator in this Chamber is in any way bound. Certainly not. I know of no Senator who is not free to make any choice he will. And I know of no Senator who is obliged to make a particular choice because of any past associations.

It is the responsibility of the Senate and of the individual Senator to make an informed, free choice, in the light of current knowledge and prudent judgment. But that does not free us of our history here.

Our history is one of having promised the American people repeatedly at election time that we would do this, if successful in our quest for office. Our history as a party contains the same, repeated promise.

It was precisely with that history in mind that the senior Senator from Connecticut—a man who is without equal in the respect which he commands in this Chamber, and who is unique in the experience which he brings to this Chamber—said on the floor Friday, August 11:

I do not know whether this bill will pass or fail, but I predict that what has been stated here today in the United States Senate will come to fruition. There is no question that if this bill does not pass, it will become one of the key issues in the 1980 presidential campaign, and rightfully so. My feeling is that what has been started on this floor today will allow no evasion, that the condition and the platforms of both major parties will tell the American people where they stand on this issue clearly and precisely, so that the work that is being done here is most important.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I am happy to yield to my brother in this enterprise.

Mr. PACKWOOD. Mr. President, the Senator from New York is exactly right.

While we have had good debate, and will continue to have good debate, on this subject, it is a political issue, and it will be a political issue.

Give or take a vote or two, about two-thirds of the Republican Senators will support the inclusion of primary and secondary schools. My guess is, on the count I have, that as to higher education, 80 percent to 90 percent of the Republicans will support the inclusion.

There is also no question in my mind that Republican platforms henceforth, if it was not clearly understood in the past, specifically will indicate that we do favor tuition tax credits for primary and secondary private schools, be they sectarian or otherwise.

I know that the debate will continue in the vein of last Friday, which was a good, intellectual debate, but no one should misunderstand that this issue fits very well the Republican philosophy of diversity, decentralization, pluralism, individualism, the right of parents to choose schools for their children, the right of individuals to choose their own schools if they are paying their way, and not have the Government discriminate against them simply because they choose a private school.

Mr. MOYNIHAN. I thank the Senator from Oregon. With ever-so-slightly conflicting emotions, I must acknowledge the preciseness with which he has described our situation in this Chamber today.

Members of his party will support this measure. His party has committed itself to these approaches and to keeping this commitment.

The question I ask the President is, "Will my party keep its commitments?"

Mr. President, in that spirit, and in the spirit of Senator RIBICOFF's statement of Friday, I should like to address four questions to my fellow Democrats. I do so not out of a concern, not for the "integrity" of my party, for that would be too strong a term.

Commitments can be made and then not kept with no failing of integrity, if there is a genuine change in perceptions. This is a part of political life, as well it should be.

Rather, I speak of my party's credibility, of my party's honor. Is the word "credibility" so overused as to have completely lost meaning? I do not know. But certainly the perception of straightforward and honest dealing in a manner of large consequence is an issue here.

And in some measure, the honor—yes, the honor—of this party, the oldest organized political party, is involved. So, too, is its sense of the future.

We do not so lack in divisive issues. Our agenda is not so short of complex and intractable problems. Yet it seems to me that we should not take lightly the warning of Senator RIBICOFF that this has the potential of becoming one of the central political issues of the next presidential campaign. In fact, it could be resolved now, in toto, simply by adopting these measures before us and leaving it to the executive branch to administer, and to the judicial branch to adjudicate, such other issues as cannot be resolved here on the floor.

We have before us the opportunity to bring a measure of social peace to this country, the opportunity to right what many perceive as an ancient wrong, the opportunity to respond to the respectful petition of a large segment of this Nation, which presents its proposal in the most elemental form of a petition of right. It asks simply to be heard in court—not an extraordinary request in our political tradition. It would indeed be extraordinary, however, if the request for the petition to be heard were summarily denied.

Therefore, Mr. President, I present four questions for Democrats which I hope my party will address in the course of this debate.

First—curiously not mentioned in our debate on Friday—is this: Do we truly think that the House of Representatives, with its heavy Democratic majority, was wrong, indeed passed an unconstitutional measure, when, on June 1, 1978, it approved legislation providing tuition tax credits at the elementary and secondary school level? Is it understood that it is this very bill, H.R. 12050, in the form reported by the Finance Committee, which is now before the Senate?

I have a second question for Democrats: Are we to think that Senator ABRAHAM RIBICOFF, the first Democratic Secretary of Health, Education and Welfare, was wrong—in the sense that he proposed an unconstitutional measure—when he first proposed tuition tax credits in 1963, or when he said on August 11, "We can only discover if this is a constitutional form of aid to parents who pay nonpublic school tuition if we try"?

Mr. President, a third question for Democrats: Are we to think that Senator Hubert H. Humphrey and Senator GEORGE MCGOVERN were wrong—in the sense that they proposed an unconstitutional measure—when, in the course of their presidential campaigns, each specifically pledged his support for tuition tax credits for elementary and secondary schools?

Finally, Mr. President, a fourth question for Democrats: Are we to understand that the Democratic Party was wrong—in the sense that it proposed an unconstitutional measure—in 1972 and in 1976, when its platform twice committed itself to aid of this form for children in nonpublic schools?

Let me be clear that in neither case was there a specific reference to tuition tax credits as such, but—at least in 1976, when I drafted this plank—it was tuition tax credits that were principally in the minds of the authors of the platform.

I think it is fairly clear that the same notion emerged from the 1972 platform, which read:

The next Democratic administration should channel financial aid by a constitutional formula to children in nonpublic schools.

This was the platform. The candidate of our party at that time, in an address in Chicago, Ill., in September 1972, spoke specifically of tuition tax credits.

Surely there is no reason to think the platform was at variance with the true party commitment. The platform was drafted with Senator MCGOVERN's knowledge, and principally by his supporters. And the previous candidate, then vice president Humphrey had also proposed tuition tax credits. Thus, our long-standing commitment here is surely no secret. During the election season we have made the maximum effort to advertise it.

Mr. President, it seems to me, then, that we face a moment of truth here. I cannot imagine that our party would very readily face the American people in 2 years' time and repeat these promises, perhaps as if they comprised an anatomical ritual that exorcises some anxiety or fulfills some ideological commitment, but ultimately were never to be realized in the free world.

Our honor is at issue here. If we are against this, let us say so. And if we are not to be seen as trifling with our honor, why do we not face the very facts that Seantor RIBICOFF faced on Friday when he spoke, directly and respectfully, for

example, to the constitutional question which properly engages the concerns of the Senate? These are the words of Senator RIBICOFF. He said:

> There is one more issue concerning the elementary and secondary portion of this legislation which must be addressed—the constitutional question. If I thought that this bill clearly failed the tests used by the Supreme Court in striking down aid programs designed by the States, I would not support it. I am not interested in dramatic but futile gestures. However, our Supreme Court has never ruled on a Federal law in this area. The Congress does have the right to pass laws about which there exists a constitutional question. The Supreme Court does not issue advisory opinions; it only rules on actual controversies. We can only discover if this is a constitutional form of aid to parents who pay nonpublic school tuition if we try.

Mr. President, I will conclude for the moment my discussion of the difficulties this matter presents for my party and of the difficulties it will present if we do not respond as I hope we shall respond. One of the matters that has been disappointing here has been the attitude of the Department of Health, Education, and Welfare and of the administration. One should not make distinctions that are not real in seeking to brand as unconstitutional a measure which clearly does not deserve any such final judgment, a measure which clearly was contemplated as constitutional and proposed as a party measure during election seasons.

It was the Senator from Oregon who made this point most explicitly. I must confess to have engaged in what I hope will be seen as an effort at candor and openness when I responded on this floor to the question of whether the Attorney General had held that this legislation was unconstitutional. I said, yes, that was the case, not meaning to quibble.

The Senator from Oregon came forward immediately to correct me. He is too kind, too much of a gentleman, to have suggested he was actualy correcting me. But it was he, not I, who stated the fact. The answer is no. There is no opinion of the Attorney General holding that this legislation is unconstitutional.

Quite the contrary. The Secretary of HEW, a man who certainly is a Democrat, was around in Washington when Senator RIBICOFF was around and knows the commitments we made. He knows them pretty well. He also knows that when he sought an opinion from the Attorney General, he deliberately distorted the content of our legislation, and asked the Attorney General to rule upon a caricature of it. He presented the Attorney General a proposition against which he was the most partisan attorney.

The Office of Legal Counsel is, in the sense I have described, the lawyer to the Attorney General. He gives the Attorney General opinions and arguments to bolster his case, and the Attorney General's case in this instance was that of the administration. And the Secretary of HEW asked a question carefully designed to produce the answer he received, and altogether ignoring the exceptional efforts made by the drafters of this legislation to respond to the three-part, or Nyquist test.

The Attorney General asked an opinion: Would this measure be constitutional if it consisted only of tuition tax credits for elementary and secondary schools?

Now, one does not wish to impute bad faith, and there is no such imputation here, but was that a supportive act? Was that a quest for knowledge? Was that the act of someone trying to resolve a question and fulfill a commitment of his party, or was it, as I fear—indeed, as I feel—unseemly?

Mr. PACKWOOD. Mr. President, will the Senator yield so that I may respond?

Mr. MOYNIHAN. I am happy to yield to the Senator from Oregon.

Mr. PACKWOOD. One of the acknowledged experts in this field and one upon whom we will rely from time to time is Philip Kurland. Of course, Philip Kurland wrote on exactly the question to the Senator from New York on March 29 as follows:

> DEAR SENATOR MOYNIHAN: I write in response to your request for my opinion on the views of the Department of Justice regarding the constitutionality of your tuition tax credit bill. Let me say at the outset that this Attorney General, like his predecessors, is sometimes wrong but never in doubt.

Mr. MOYNIHAN. That is wonderful irony. This Attorney General, like his predecessors, is sometimes wrong but never in doubt, an institutional quality of attorneys general.

Mr. PACKWOOD. Of all attorneys general.

Mr. MOYNIHAN. Of all attorneys general.

Mr. PACKWOOD. Just as all Treasury Departments are almost uniformly opposed to any kind of exemption that will give more money to taxpayers that the Treasury might not get. It does not matter if they are Republican or Democrat. They have the same view about it. Mr. Kurland's letter goes on to say:

> You should take the Attorney General's opinion for what it is: a partisan expression of opinion on behalf of a client. Lawyers are frequently asked to make out the best case that they can to support a client's position. And the Attorney General's opinion is exactly that kind of document in support of the position of Messrs. Carter and Califano.

Mr. MOYNIHAN. That is precisely what Professor Kurland said, and I think it would be helpful to point out that Philip B. Kurland is one of the most distinguished constitutional scholars in this Nation. He is, of course, professor of law at the University of Chicago.

Mr. PACKWOOD. Mr. President, at this juncture it might be worthwhile to read his credentials in the record.

Mr. MOYNIHAN. I think that will be worthwhile.

Mr. PACKWOOD. Philip Kurland, professor of law University of Chicago Law School; graduate of University of Pennsylvania, Harvard Law School, Ph. D. University of Notre Dame; law clerk to Judge Jerome N. Frank; law clerk to Supreme Court Justice Felix Frankfurter, 1945–46; chief counsel, Subcommittee on Separation of Powers, U.S. Senate Judiciary Committee, 1967–77; consultant, U.S. Department of Justice, 1976; Guggenheim Fellow, 1950–51, 1954–55; and author of:

Religion and the Law;

The Supreme Court and the Constitution, 1965;

The Great Charter, Felix Frankfurter on the Supreme Court, '70;

Politics, the Constitution and the Warren Court, 1970;

Mr. Justice Frankfurter and the Constitution, 1971;

Landmark Briefs and Arguments of the Supreme Court of the United States, which took him 3 years to publish, 88 volumes, 1975–1978; Watergate and the Constitution, 1978; and the editor of the Supreme Court Review, 1960.

Mr. MOYNIHAN. Precisely, and the author in 1961 of a study of the ruling by the Supreme Court on the religion clauses of the first amendment, in which he wrote:

> Anyone suggesting that the answer as a matter of constitutional law is clear one way or the other is either deluding or deluded.

And that is why, Mr. President, it was painful to see the Secretary of HEW put this biased and crudely deformed question to the Attorney General and get a predictable answer, an answer which carries no convictions.

What has been the result but to suggest artifice and evasion and the posture of either deluding or being deluded? With regard to the influence of that decision, of that advisory opinion, on the position of the administration, let me note that the Committee on Finance held hearings on this measure in January and the Department of Health, Education, and Welfare, and the Treasury both stated their opposition then. The memorandum of Secretary Califano to President Carter in opposition was made public at about that time.

The Committee on Finance acted in February, approving the measure by a 14-to-1 vote. The Attorney General's opinion was handed down on March 7.

The mildest thing I would say is that it has been disappointing, and it does call into question the quality of commitments made by the Democratic Party in this area, and it does seem to me to add an urgency and a cogency to the opportunity we have here to put this issue behind us. Indeed, it is an opportunity to act upon a petition of rights by saying a commonly perceived constitutional wrong can be righted by the court in direct response to this legislation.

If it should turn out that there was no wrong, then it will be settled that there was a right, and that, too, will be a satisfactory resolution of this profoundly tormenting and protracted problem.

Mr. PACKWOOD. The Senator has been very frank on this. Let us be brutally frank. Apart from a few people, including Senator HODGES, the present occupant of the chair, who is one who has some constitutional doubts about it, which I hope we can settle, and I hope

we can do it with the Senator from South Carolina (Mr. HOLLINGS), the Department of Health, Education, and Welfare would be opposed to this bill if there was no question but that it was constitutional. It would not matter if every one of those State court decisions had been supported by the Supreme Court in terms of constitutionality, they would come and testify against this legislation. They are using the argument of constitutionality as a smokescreen.

Mr. MOYNIHAN. I have to agree with the Senator from Oregon. He is one who understands the curiously mixed and difficult task facing us and knows that there is an ideological movement which is horrified by the existence of nonpublic schools. It reached its greatest moment in his own State of Oregon when the Oregon statute—which William B. Ball, a wonderful writer on these matters, describes as the brainchild and banner of the Imperial Council AAO Nobles Mystic Shrine—was adopted requiring all children between 8 and 16 to be enrolled in public schools.

It was only a Supreme Court ruling, Pierce against Society of Sisters, that later held otherwise.

"A combination," Ball writes, "of 100-percent Americanism," and he says, "a concept prickly with negative allusions to Catholics, Jews, Negroes, Germans, Irish, south, and central Europeans."

Another idea was the one that he puts in quotation marks as "public schools only." We forget how much this became an ideological movement in American life, and how it persists as a mind set by persons who would be appalled to associate themselves with either that era or with those opinions.

I had an experience which had a quality that James Joyce described as epiphany, a showing through of the essence of a phenomenon.

Last year about this time the Woodrow Wilson International Center for Scholars, with which I have been associated ever since its founding, held an evening—as it does, often with great benefit to the capital—to discuss a report which had been drafted by five former U.S. Commissioners of Education.

It happens that I knew each of these five men, from different parties and administrations, each of whom served in the last 15 years. HEW commissioned them to consider as a group the future course of American elementary and secondary education for the remainder of the century.

It was an interesting endeavor, and it produced a nice evening. These men gave up their time and received nothing more than their expenses, having spent about a year reviewing the last quarter century of education in the United States.

We had dinner in the Great Hall of the Smithsonian building on the mall, and then we repaired to the lecture rooms, where a discussion of the report ensued.

It was only half-way through the debate that I became aware that in all the documents and all the statements of the five former Commissioners of Education considering the future there was no reference of any kind of nonpublic schools. The nonpublic sector of education did not exist for them.

They had invited, from all over Washington, representatives of educational organizations, teachers' groups and research groups, yet they had not invited a single person from a nonpublic school organization—nobody from the religious schools, nobody from the nondenominational schools, nobody from the old private schools that we associated with New England. These schools just did not exist for them.

If you were to say to any one of these men, "Are you of the mind-set of Nobles of the Mystic Shrine? Do you find yourself appalled and alarmed by the presence in the United States of such an unseemly proportion of—how shall we say it, how does Ball put it—"Catholics, Jews, Negroes, Germans, Irish, south and central Europeans?" If you were to ask them, "Are you of the public schools-only mentality?" they would be distressed, and they might even be offended. And they would have reason to be offended because they do not think of themselves as such people, yet their mind-set is so deep that they have simply erased the nongovernment schools from their consideration.

They can spend a year thinking of the future of American education in the remainder of the 20th century, and it never occurs to them that there are any schools but the public ones. I do not suggest that this represents even a tacit wish that the others somehow disappear, but certainly theirs is a mind-set that would be less than alarmed by such a disappearance, and which, indeed, has held sway during a sequence of events which has certainly witnessed the considerable erosion of the nonpublic sector of education. We have seen the statistics, and although I do not mean to suggest that a correlation implies modality, a sharp dropoff of enrollments, in the private sector really did begin with Federal aid in large quantities to the public sector.

So, Mr. President, I would conclude my opening remarks this morning by suggesting that the Democratic Party has a clear responsibility here. If we are not going to keep our commitments, we ought to explain on the floor of the U.S. Senate why we choose not to. At the very least, we must explain why we will not do what our candidates have promised to do.

But beyond that, we have not infrequently been the party of reconciliation in this country. We have not infrequently been the party which has hastened the assimilation of disparate groups from other cultures into the mainstream of American culture. It would be no small achievement for us to have proven the vehicle by which legitimacy, at long last, was conferred upon these immigrants, distrusted for their faiths and distrusted for their strangeness.

One can, perhaps, understand the distrust, and even the fear and dislike. There was no previous record of a people's having encountered new and strange populations to the degree that the United States did in the 19th century. I do not altogether stigmatize the Nobles of the Mystic Shrine who were frightened by the Society of Sisters. They had never seen anything like it, as it were.

But that is all behind us, is it not? For me one of the most compelling passages in the Brown decision was that in which the Court stated that the ruling of Plessy might have been acceptable in the context in which it in fact occurred, in the sense that the country might have so held in 1896. "But" said the Court, "circumstances have so steadily changed * * *." I quote the decision:

> In approaching this problem, we cannot turn the clock back to 1868 when the Amendment was adopted, or even to 1896 when *Plessy* v. *Ferguson* was written. We must consider public education in the light of its full development and its present place in American life throughout the Nation. Only in this way can it be determined if segregation in public schools deprives these plaintiffs of the equal protection of the laws.

And, of course, they properly decided that it did.

Commencing in the latter part of the 19th century, fear of foreigners, hyperactive Americanism, and bigotry against that array of persons and groups named by Ball began to bring about a new reading of the Constitution and of the very intent of the first amendment.

I suggest the time has come that the Court, faced with the similar question of whether these nongovernment schools have in some sense been historically denied the equal protection of the laws, hold that it is time to provide it. Its denial is part of our past. It is not part of our present.

How anomalous that this hold of nativism should continue in the Court. Or is it the case that it does not continue in the Court at all? We would find that out by the simple expedient of adopting this measure and letting the Courts rule. I do not think it would be accurate to characterize the Court's current position as other than difficult to fathom and almost impossible to predict.

But, however, the Court does rule, the important consideration is that its ruling will be accepted. Nobody associated with this legislation intends anything but the absolute acceptance of whatever the Court hands down. But given that acceptance, and pending any decision, we must not be expected to yield up our own analytic abilities, our own sense of historic reality, our own disposition to state what we feel the outcome ought to be.

I believe it was Abraham Lincoln who most perfectly stated what is the right of citizens as well as their duty, when he spoke of the Dred Scott decision. He affirmed the responsibility of citizens not to suspend their own critical faculties in the face of Supreme Court decisions which they find difficult to understand or difficult to justify, given their own reading of the law and of history. We are not required to agree with the

Court; we are only required to obey. Our obedience is given freely and happily, and, in this matter as in all others, will follow the outcome of the lawsuits that would follow this measure's enactment, and for which we have provided.

Mr. President, I have not yet located that passage of Abraham Lincoln on Dred Scott. I ask unanimous consent that when I do find it, it be printed in the RECORD at an appropriate place.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MOYNIHAN. I thank the Chair. Mr. President, the retrieval system has worked—the retrieval system in the person of Dr. Finn. I would now like to read the Lincoln statement; it was in his Springfield statement of June 27, 1857, in debate with Douglas. I quote this passage:

> Judicial decisions have two uses—first, to absolutely determine the case decided; and secondly, to indicate to the public how other similar cases will be decided when they arise. For the latter use, they are called "precedents" and "authorities."
>
> We believe as much as Judge Douglas (perhaps more) in obedience to, and respect for, the judicial department of government. We think its decisions on constitutional questions, when fully settled, should control not only the particular cases decided, but the general policy of the country, subject to be disturbed only by amendments of the Constitution as provided in that instrument itself. More than this would revolution. But we think the Dred Scott decision is erroneous. We know the court that made it has often overruled its own decisions, and we shall do what we can to have it to overrule this. We offer no resistance to it.

(Mr. HOLLINGS assumed the chair.)

Mr. MOYNIHAN. That seems to be the perfectly formulated statement of what ought to be the position of persons who feel the Court has ruled wrongly and wish to see the Court rule otherwise.

Having considered carefully the precedents which the Court has established, let me add that it is our position that this legislation will be found to meet the three-part test which has been laid down. And let me ask this: if it were not so likely to do, why, then, did the Secretary of Health, Education, and Welfare deliberately distort the measure into a caricature before obtaining an opinion from the Office of Legal Counsel, a source which is not only disposed to but in a sense obligated to make the best case possible?

The Office of Legal Counsel would have made the best argument possible against the actual measure, but it would have been a very difficult argument to make with a straight face, because this measure is so clearly designed to meet the tripartite test the Court has set forth. So the Secretary of HEW chose instead to say, "Suppose it was not this measure? Suppose it was some other measure, altogether different—a question designed as if to invite rebuke? Suppose it was a measure that on its surface would arouse the utmost alarm of Justices? What then would you say, Mr. Attorney General?"

Not surprisingly, then, the Attorney General said "You are right. If it were another measure, it would be unconstitutional. I quite agree."

The Secretary of HEW did ask the Attorney General what his judgment of our measure would be. He said, "Suppose it was not the measure they have proposed? Suppose it was another one, so different in its nature as to be unrecognizable? What then would you say?"

Well, it is not that difficult to have your way with the Office of Legal Counsel if you are willing to put yourself through those exertions, but one does wonder whether such behavior can be characterized as good faith behavior. I do not suggest otherwise.

What did the Secretary of HEW think the President of the United States had in mind when, in October of 1976, with 2 weeks before the election, he gave a written statement of the firmest kind that he would support measures to provide aid to nonpublic schools?

What did the Secretary of HEW think the Presidential candidate meant? Did he think the Presidential candidate acted in bad faith? Did he suppose that it was an established practice of my party to promise this—to woo the ethnic vote, or whatever—a few weeks before the election and forget about the promise immediately thereafter? Is this simply considered a ritual of our party addressed to marginal people who will never know that the promises made to them are of a different category than promises made to 100-percent Americans?

What an awful thought. I cannot imagine that the Secretary of HEW entertained it. But why, then, did he act as he did? Why did he not say that here is an opportunity for us to keep some promises made and to do so in a straightforward and seemly manner and, in the course of doing so, to alleviate some of the tension and division in American life, to avoid another divisive issue, to prove our capacity to solve problems and resolve conflicts, and to grow in our understanding of one another?

Which of us is not proud of our advances in understanding between races? This is an ethnic society, an immigrant society combining many different groups. It always has been so and becomes more so, not otherwise. And we have found it successful. We have found that people come to this country and accept its ways and adopt its traditions, even as they add to them and in some sense change them.

Well, perhaps it took us two centuries to find this out, but now let us show it. We will be a little more proud of ourselves if we enact this legislation.

We are not a country so brimful of success at this moment that we could not well use an opportunity to feel a little more proud of ourselves.

I thank the Chair.

Mr. HODGES. Mr. President, I believe the latest remarks of the Senator from New York deserve study and thought. As always, he is eloquent; as always, he has a vast background from which he draws, and acquaintanceship with people in important places. But I suggest these remarks need to be looked at sharply.

The party to which he refers happens to be my party also. It is a great party.

I am going to respond only to some suggestions and questions he raised. I wrote them down, because I think it important to look at the words he used. Then let us respond.

He said the Democratic Party's credibility is in question. He said the honor of the party is at stake. He said the least the party can do is be straightforward and honest dealing.

I want first to read a quote from a gentleman who ought to be quoted, Thomas Jefferson. Jefferson, when he wrote his famous statement about the separation of church and state, used the phrase "thus building a wall of separation between church and state." Before he sent that to the Baptists he wrote his Attorney General, Levi Lincoln, and said the following:

> The Baptist address admits of a condemnation of the alliance between church and state, under the authority of the Constitution. It furnishes an occasion, too, which I have long wished to find, of saying why I do not proclaim fastings and thanksgivings, as my predecessors did. I know it will give great offense to the New England clergy; but the advocate of religious freedom is to expect neither peace nor forgiveness from them.

And I might add parenthetically some of the New England representation in the Congress:

> Will you be so good as to examine the answer, and suggest any alterations which might prevent an ill effect, or promote a good one among the people? You understand the temper of those in the North, and can weaken it, therefore, to their stomachs; it is at present seasoned to the southern taste only.

Let us talk for a moment about which party's honor and integrity is at stake here. The Senator from New York, a Democrat, comes down very hard on President Carter, but he leaves out the critical line in the statement that President Carter made at the time and written in response, I think, to some Catholic executives, school authorities. The statement said, "If it is constitutional," and they have done everything they can to shore up the constitutionality of their bill.

Hypocrisy? They take a perfectly good horse, which is aid to private postsecondary education, and try to mount on it a masked rider, which is clearly unconstitutional, aid to elementary and secondary private schools.

What skills are going to be affected? Who are these private elementary and secondary schools? Seventy-five percent of them are Catholic, 5 percent are Lutheran, and 10 percent are others. They are "90-percent plus" religious institutions.

That is fine; that is what makes America great, the freedom to do that sort of thing.

Why do they exist? Because these religious groups, particularly the Catholic Church in its own wisdom, desire to educate the young in their own religious doctrines. That is why they are there, by choice. They have the free exercise of religion granted under that same first amendment they are trying to breach. So it is by choice that they try to do that. These groups are the ones who are interested in this.

I shall have, later on, in a separate address about who really benefits by this and who really is interested in this legislation, statistics to show that. But I rise now to protect the honor of the Democratic Party and to ask the question on this bill, who is hypocritical?

I paid close attention during the Panama Canal debate because I had not made up my mind. The distinguished Senator from Oregon got up earlier and said that, give or take a vote, two-thirds of the Republicans are going to vote for this bill. But I remember those Republicans, day after day, who got up on this floor. They would hold up polls in their hands, just like this, Mr. President. They would say, "The American people are against giving away the Panama Canal. Why is this body not responsive to the American people?"

I refer to it as weathervane politics in legislating, but they thought it was wonderful argument, and day after day, we heard it from that side of the aisle.

The Roper poll shows that two-thirds of the American people are against Federal aid to elementary and secondary education.

I also call on these same Republicans, that Grand Old Party, these same people then talking about listening to the people, when it was cold and in the winter—apparently, that has frozen their minds; they have forgotten those thoughts now—where are those arguments? Come forward with them again.

This issue of aid to elementary and secondary education has been voted on 1, 2, 3, 4, 5, 6, 7, 8, 9—10 States have voted on it since 1967. And how have they decided, the people whom the Republicans are always telling us to listen to? I agree with them on that score: listen to the people. You do not have to be a weathervane, but listen to them. New York State, in 1967: vote against it, 72.5 percent: vote for it, 22.5. Michigan in 1970 turned it down, Nebraska in 1970 turned it down. Oregon in 1972 turned it down, 61 percent to 39 percent. Idaho turned it down, Maryland turned it down, Washington turned it down, Missouri, and lastly, Alaska in 1976.

Is it not strange that the same New England folks are here again trying to breach the wall? What about that listening to the people in Oregon? What about listening to people in New York State? That was a great and wonderful argument when it served their purpose and they thought they could gain some votes with the American people. But when you live by quoting the polls, you will die by quoting the polls, also. It is not with you on this one. Where is that great Republican Party, trying to harvest votes out of the discontent of the American people now?

Let us look at the second place. I have sat here for the last month and voted day after day, bill after bill, and listened to them quoting, "Cut the budget," they said, "the people don't want to spend money; cut the budget." This bill was going to cost $5 billion when they originally proposed it—$5.7 billion or thereabouts. They have cut it back now to get it through. Still it is going to cost over $2 billion. Two-thirds of those Republicans are going to vote for it. Yet they will turn right around and go home and tell people, "We are trying to cut Government, trying to cut the cost of spending, cut the cost of Government, cut spending."

Who is hypocritical? Who does one thing and says another?

The last point I want to make is that from that other side of the aisle, the Republicans consistently and constantly talk about, Let us get Washington out of your lives." If I have heard that once, I have been here on this side of the aisle. You can do it all in Washington, they say.

And what does this bill propose? How are they going to save primary elementary and secondary education? Oh, they want to come in, and Washington is going to help them out. Hypocrisy I say; hypocrisy, I say. You cannot have it one way and then the other, also.

I say the mark of a great party is consistency. If you want to talk about cutting costs, if you want to talk about getting Washington out of people's lives, if you want to talk about following the will of the people, then drop this bill.

If you want to talk about independence and self-reliance, let those religions—and 90 percent of these schools are religious; that is why they are there—let the people in their own integrity, in their own hearts, and in their own motivation, save the schools. Because they will.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. HODGES. Yes, I yield for a question.

Mr. MOYNIHAN. On October 19, 1976, Jimmy Carter, campaigning for President, wrote to the president of a group of administrators of religious schools.

Mr. HODGES. Let us be precise, if the Senator will. To whom did he address the letter?

Mr. MOYNIHAN. Mr. Russell Bleich, president of Chief Administrators of Catholic Education said:

> I am firmly committed to finding constitutionally acceptable methods of providing aid to parents whose children attend parochial schools. I am firmly committed to seeing that children who attend parochial schools benefit fully from educational programs.

I ask the Senator from Arkansas, Does he share the view? Does he think the administration wants to be fully committed in that way?

Mr. HODGES. Yes; to constitutionally acceptable ways, yes.

Mr. MOYNIHAN. I thought there was a difference; having found that something is constitutional, it may still not be desirable. Very well. He accepts the idea that whatever is constitutional should be done—within reasonable limits?

Mr. HODGES. Certainly not, because I think that there is a point at which it is going to cost too much. The Senator from New York is from a State where we recently guaranteed $1.7 billion worth of bonds. I do not think that is wise in every case. I voted for that. So I think it would take a particular issue.

Mr. MOYNIHAN. Clearly it is a simple matter of prudence, especially as to the amounts of money, but the principle remains—that something should be done if it is constitutional.

May I ask the Senator if he is aware of the factual assertion on the basis of which the Supreme Court has distinguished between the constitutionality of Federal aid to religion-based private schools at the college level and religion-based private schools at the secondary level?

Mr. HODGES. In which case?

Mr. MOYNIHAN. In Tilton against Richardson.

Mr. HODGES. The Senator is talking about the impressionability?

Mr. MOYNIHAN. Yes.

Mr. HODGES. Yes; I am aware of that.

Mr. MOYNIHAN. Would the Senator vote for tuition tax credits if only colleges and universities were included?

Mr. HODGES. I am inclined in that direction, yes.

Mr. MOYNIHAN. Why does he think that is constitutional?

Mr. HODGES. For a number of reasons. One, the Supreme Court clearly has held that it is constitutional.

Two, the Supreme Court distinguishes, and I also would distinguish, between institutions that regularly and ordinarily charge tuition—the Supreme Court distinguishes between higher education and that which is required, which is elementary and secondary education, required now by every State. What the Senator is doing—however, if the Senator will allow me to finish my remarks with respect to which party is or is not hypocritical, I shall be happy to respond. But I think that what the Senator is doing is leading off into the constitutional question, which I shall be perfectly happy to address.

I have an entire speech on that.

Mr. MOYNIHAN. Would the Senator then allow me to state what the Supreme Court has ruled in Tilton?

Mr. HODGES. I would be happy for the Senator to do that when I have completed my remarks.

Mr. MOYNIHAN. Fine.

The Senator has said that he would support tuition tax credits at the college level on the grounds the Supreme Court has ruled they are constitutional.

Mr. HODGES. No; the Senator has not listened closely.

Mr. MOYNIHAN. Will the Senator correct me?

Mr. HODGES. I would be inclined to do that.

Mr. MOYNIHAN. Oh, inclined to do that.

Mr HODGES. And then the Senator jumped to the second step and asked about the constitutionality of it.

But I think the Senator has to listen to what I say and not lead me where he wants me to go quite so readily.

Mr. MOYNIHAN. But surely the Senator said that the Supreme Court had found tuition tax credits to secondary institutions——

Mr. HODGES. No; I did not say that.

Mr. MOYNIHAN. Colleges.

Mr. HODGES. I thought the Senator said aid.

Mr. MOYNIHAN. All right, aid.

Mr. HODGES. There is a considerable difference.

If the Senator said tuition tax credits, then I did not hear him properly. I would say the Supreme Court has indicated aid is constitutional.

Mr. MOYNIHAN. Aid. Correct.

That is exactly what the Tilton decision involves.

Mr. HODGES. Yes.

Mr. MOYNIHAN. All right. I will return at the Senator's convenience to the basis of the Tilton case.

Mr. HODGES. I would say to the Senator that the same Attorney General's opinion to the President of the United States, which he does not like at all, and questions the motives, and so on, indicates that in his opinion probably the tax credits for postsecondary education are constitutional.

Mr. MOYNIHAN. The Senator is correct. I thank the Senator.

Mr. HODGES. And only that for elementary and secondary private school is not.

Mr. President, I ask unanimous consent that the Roper poll to which I had reference and the various elections in the States to which I had reference, be printed in the RECORD.

There being no objection, the material was ordered the be printed in the RECORD, as follows:

[*From "The American Public and the Income Tax System" by The Roper Organization, Inc. July, 1978]

TAX REFORM

A major issue with regard to tax reform during the past year has been that of providing tax aid for education. This study explored public opinion on tax aid for college tuition and for private elementary and secondary school tuition.

Of four plans to provide tax aid for college tuition, the Carter proposal to make more middle income people eligible for government grants or loans by raising income eligibility was the most popular. A relatively small minority approved direct government aid to colleges and universities. But the public turns thumbs down on a flat $250 personal tax deduction when a child is in college—either for everyone regardless of income or for those with less than $25,000 income.

Furthermore, the public gives a resounding "No" to extending tax aid to private elementary and secondary schools. The idea is equally disapproved when parochial schools are mentioned and when they are not mentioned.

Tax Aid For College Tuition

With college tuition costs rising at a rapid rate, a number of proposals have been made for providing tax aid for college tuition. In this study four plans were put before the public as means of helping people cope with the cost of college. The question explained that all four would mean higher tax rates to bring in the extra billion and a half dollars each plan would cost.

The public turns thumbs down on a flat $250 annual tax reduction for each year a child is in college—either for everyone regardless of income or for those with less than $25,000 income. The Carter proposal to make more middle income people eligible for government grants or loans by raising the income eligibility for them was the most popular of the four plans, approved by one-third of the public. Only 1 in 5 approved direct government aid to colleges and universities so they can hold down tuition fees. Only 16% favored none of the plans.

All subgroups of the population agreed pretty much along the same lines on the four plans, including those who have children of college age.

There's a good deal of concern about the high cost of college. Here are four approaches that have been suggested for helping people cope with the cost of a college education—all of which would mean higher tax rates to bring in the extra billion and a half dollars that each of these four plans would cost. (Card shown respondent) Which of these plans would you favor, or wouldn't you favor any of them if it meant raising the tax rate?

[In percent]

	Total public	Total taxpayers	Have children 19 to 22
Number of respondents	2,007	1,684	189
Plan C: Make more middle income people eligible to get Government grants or low-cost college loans by raising the income ceiling under which these grants and loans are available	34	36	35
Plan D: Provide direct Government aid to colleges and universities so they can hold down tuition fees	20	20	16
Plan B: A $250 reduction in taxes for those with less than $25,000 of income for each year a child is in college	14	14	19
Plan A: A $250 reduction in taxes for everyone regardless of income for each year a child is in college	9	10	11
None	16	16	15
Don't know	7	5	4

TAX AID FOR PRIVATE ELEMENTARY AND SECONDARY SCHOOLS

The public gives a resounding "No" to extending tax aid to private elementary and secondary schools. It was explained that the same four plans for college aid could be used for lower private schools, but that doing so would mean tax rates high enough to bring in four and a half billion dollars rather than one and a half billion dollars. On this basis, the public said it was opposed to extending aid to lower schools by 64% to 28%. For half the sample, the question asked about private and parochial schools, for the other half the question asked only about private schools, with no mention of parochial. Answers were virtually identical regardless of mention of parochial schools.

A majority of all subgroups are opposed to tax aid for private elementary and secondary schools with the exception of Catholics and even Catholics are more opposed (84%) than in favor of it (43%).

These same four plans could be used for children in private elementary and secondary schools as well as for children in colleges. But if they were extended to private schools it would mean tax rates high enough to bring in four and a half billion dollars rather than one and a half billion dollars. Would you be in favor of or opposed to extending tuition aid to private schools?

These same four plans could be used for children in private and parochial elementary and secondary schools as well as for children in colleges. But if they were extended to private and parochial schools it would mean tax rates high enough to bring in four and a half billion dollars rather than one and a half billion dollars. Would you be in favor of or opposed to extending tuition aid to private and parochial schools?

[In percent]

(Mr. ZORINSKY assumed the chair.)

Mr. HODGES. Mr. President, I will conclude this part of my remarks with one or two additional statements.

Mr. President, I think it is important as we look at this legislation to understand and see, really, where we are going, not where they tell us it leads us, but where, in fact, it does lead us.

One of the problems in Washington is that Washingtonians only talk to other Washingtonians, and that all the remarks on this floor are of high officials talking about differences of opinion and long conversations with ther high officials in Washington, D.C.

Let us be candid and frank all the way through. The Washington, D.C., public school system is 94.8 percent black. The Washington, D.C., area, however, is surrounded by very fine public schools, the overwhelming majority of which are white.

Washington, D.C., has some very fine private elementary and secondary schools. There are some here in the city that would benefit tremendously from this legislation because it would shore up and enhance those very private schools.

But if we want to see what policies are supporting and encouraging private elementary and secondary schools, of encouraging white flight, if we want to see the final results, look at the Washington, D.C., public schools, because we see here a living lesson of what is going to happen. Not some obscure theory, not some weathervane legislation that seeks to determine where the winds or the people are now blowing, but real life, real children, real sadness, real deprivation, real lessening of support for the public schools, and real leaders taking their children and sending them across the rivers.

Make no mistake about it, when people come to the Halls of Congress, when people come to work in high positions here, where do they look for a home? They ask, where are the schools? They

do not live in the District. They do not want to put their children in the District schools.

Mine are here, but there are not very many. Who is hypocritical?

I say the Democratic Party stands for all the people. It does not come forward with a bill that mainly helps the rich. It does not have to talk about the $20,000 and $30,000 and $40,000 brackets that need help, too.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. HODGES. If the Senator will let me finish.

Mr. MOYNIHAN. All right.

Mr. HODGES. This bill has nothing in it for people, the average family of four, who earns less than $7,250. This bill will not help them a bit. Not a dollar.

So to those two-thirds of Republicans who live out in McLean, who live on one side of the river or the other, and who will not put their children in these schools, I say who is hypocritical and who is not?

I yield the floor—excuse me, the Senator wanted to ask a question.

Mr. MOYNIHAN. Yes, I would.

Allow me to state the question, Mr. President.

The PRESIDING OFFICER. Does the Senator from Arkansas yield the floor?

Mr. HODGES. I yield for a question.

The PRESIDING OFFICER. The Senator yields for a question.

Mr. MOYNIHAN. Does the Senator think that Senator GEORGE MCGOVERN was wrong in 1972 when, as a Democratic Presidential candidate, he pledged to support a system of tuition tax credits?

Mr. HODGES. I know Senator MCGOVERN carried one State, Massachusetts, which I believe is heavily Catholic. Maybe it helped there. But I suggest to the Senator, the Senator was wrong if he meant by that a bill such as this.

But the best way to know is to have the Senator himself speak to that. He is in this body. He is a distinguished Member of this body. He is one of the broadest minded, most capable people in this body.

I suggest that the Senator should ask him.

Mr. MOYNIHAN. A perfectly fair response, but I did want to ask.

Mr. HODGES. I will say, he carried a State where that would probably be a most important issue.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, I would like for a moment to pursue the important statement by the Senator from Arkansas that he is inclined to support a system of tuition tax credits for colleges and——

Mr. HODGES. Will the Senator yield for a moment?

Mr. MOYNIHAN. I will yield for a question, of course.

Mr. HODGES. Yes.

I think that if the Senator will look back, if I did not say it, I intended to say it, I am inclined to support either tuition tax credit or some other system for aid to public secondary education.

Mr. MOYNIHAN. No more than what was said.

The Senator is inclined to support a system of that or some other form of aid. There are alternatives.

Mr. HODGES. Yes.

Mr. MOYNIHAN. The Senator from Arkansas did say that the Attorney General, much less the Office of the Legal Counsel, stated in his letter to Secretary Califano, "I am of the opinion that similar aid at the college level would be constitutional."

I do not know what the outcome of this debate will be. But at least we are going to see in the RECORD the level to which the Supreme Court's reasoning has declined.

I ask the Senator from Arkansas: Did he know the basis on which the Court distinguished between Federal aid to private colleges and Federal aid to private high schools, ruling one was constitutional and the other was not?

It is a very simple statement from Tilton against Richardson, and I will read it. I will refer to it again before this debate is over, when there are more than four of us in the Chamber, including the distinguished Presiding Officer. We have 5 percent of the Senators here, and perhaps only one whose opinion is not finally made up on this matter. But I will find occasion to read this, because Senators must hear it.

The Attorney General said that tuition tax credits to colleges are constitutional; tuition tax credits to a high school are unconstitutional. Why? Because of Tilton against Richardson. And what does Tilton against Richardson have to say on the subject? Heaven help the Chief Justice, a distinguished jurist, for he had to make this distinction. It is insupportable. He said:

> There are generally significant differences between the religious aspects of church-related institutions of higher learning and parochial elementary and secondary schools. The "affirmative if not dominant" policy of the instruction in pre-college church schools is "to assure future adherents to a particular faith by having control of their total education at an early age." . . . There is substance to the contention that college students are less impressionable and less susceptible to religious indoctrination.

Mr. President, I reiterate this:

> There is substance to the contention that college students are less impressionable and less susceptible to religious indoctrination.

It is on the assertion that there is substance to that contention that the Attorney General solemnly assures us that tuition tax credits for a college freshman are constitutional and tuition tax credits for a high school senior are unconstitutional.

Mr. President, I stand here in this Chamber and say there is no substance to that contention. It is utterly unsupportable. It has, in fact, been spared inquiry.

I took the liberty of writing a series of past presidents of the American Psychological Association to ask if there was any substance to this contention, and I will sum up their responses very simply. This is from M. Brewster Smith, the president of the American Psychological Association, a long-established, much respected organization:

> There is no comparable comprehensive treatment of religious change over the high school years that I know of, and while surely a close search might turn up scattered studies, I think it is fair to say, in answer to your question, that solid evidence regarding the high school vs. college comparison in which you are interested does not exist.

Mr. President, of course it does not exist. Anyone with even a passing amateur's knowledge would know that by the standards of research, the standards of measurement, this is very likely a proposition that is untestable.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield.

Mr. PACKWOOD. The Senator is also aware that in the last two sessions of Congress, we have passed day care credits. You are allowed to take up to $400 off your income tax for day care, on the very plausible theory that we want to encourage people to get off welfare, to work, and there must be some place for them to put their children.

This day care credit can be paid to a church day care center. In my experience—our child was in one at one time—most church-related day care centers are in the church, not in the school.

Mr. MOYNIHAN. We will find that, when asked, the Court will rule that preschool children are also less impressionable.

Mr. PACKWOOD. That is correct. It is only 6 to 17 that is the dangerous age.

Mr. MOYNIHAN. I am pleased that the Senator from Texas has arrived, and we have six Members present. The point is that scientists do not make statements like that. I do not know how to say it to this audience. In social sciences, you do not make statements like that. You cannot prove them; you cannot even set up a hypothesis. No responsible professor would ever let a Ph. D. candidate try. He would say, first, that Senator Proxmire would object. Second, he would say, "No, there is no way to measure this."

What does "impressionable" mean? What is impressionable with respect to religious matters? What is religious? Psychology is a rigorous subject.

Mr. PACKWOOD. I assume that a 4-year-old child in a church day care center in a school run by a nun wearing a crucifix, with a picture of Christ on the wall, and with Catholic symbols, might be thought to be placed in a religious circumstance. But that is all right. The 3-, 4-, or 5-year-old is totally lost in this and no impression is made on that child at all, so that is all

right. But all of a sudden they become 7, and you move them out of the church, across the parking lot, to the school, which is certainly a less religious setting than the church, and that becomes unconstitutional in the minds of some.

Mr. MOYNIHAN. There is simply a proposition that if you will believe that, you will believe anything.

I do not know whether it will help to ask the Senator from Arkansas and the Senator from South Carolina. I ask the Senator from Nebraska to believe me when I say that the whole basis for the assertion by the Supreme Court that Federal aid to colleges—private colleges and church-related colleges—is constitutional and aid to church-related high schools is not rests upon a difference in impressionability of college freshmen as against high school seniors.

I ask the Senator from Nebraska to realize that the Attorney General wrote, without question in the last line of his letter to Secretary Califano—and he did not even bother to ask the Office of Legal Counsel; he just volunteered, obiter dicta:

> However, I am of the opinion that similar aid at the college level would be constitutional.

Why? The entire argument rests upon this line in Tilton against Richardson, and it is insupportable.

Not only is there no evidence that "there is substance to the contention that college students are less impressionable and less susceptible to religious indoctrination," but also, most social scientists would say that is not the kind of proposition you could reasonably set forth. Typically, the Court writes, "Common observation would seem to support that view."

Backward reels the mind. Would Cardinal Newman have said so? He would say, "Nonsense." He would say that young men aged 14 to 17 are impenetrable with respect to a religious thought. Only by the time they have reached their second year in college would they even begin to consider what Aquinas might have meant or what Luther intended, much less to examine the Upanishad or the Koran.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield.

Mr. TOWER. Will the Senator clarify this point for me: Does not the bill provide for a constitutional test on the question of aid to students, or tuition tax credits, in elementary and secondary schools before the measure takes effect?

Mr. MOYNIHAN. Precisely. The Senator is correct, and it is thoughtful of him to raise that point. It was mentioned in our debate on Friday, when we said we were trying to be open about the fact that there will be a contest, and no one knows what the judgment of the Court will finally be. All we know is that whatever the judgment of the Court will be, we will accept it.

But because of that uncertainty when we designed this measure we deliberately mandated that no aid to elementary and secondary schools would take place until fiscal 1980—October 1, 1980—in order that when it came before the Court we would not have already created an interest group—an interest group of 14 million American parents, or 10 million, or 1 million, or however many—which would say, "You cannot take this away from us; we have received it from Congress; the Court must do what Congress said was right, whatever the Court thinks is right."

I have already said—and we know these things happen—that we did not want a Presidential election to come along in which a man simply declares, "Elect me, and I will find some judges who think what I plan to do is constitutional." That could happen, and it is perfectly possible in a democracy. We did not want any of that. We wanted the Court to rule under no pressure from an existing interest group created prior to its ruling.

Mr. TOWER. Given that fact, it occurs to me that the whole question of constitutionality as this measure relates to primary and secondary education is somewhat moot. I do not know what all the fuss is about. Perhaps the Senator from New York can explain why the big brouhaha over it if indeed the bill carries the provision that the Senator from New York has indicated it does carry.

Mr. MOYNIHAN. I wish I could explain that to the Senator from Texas. It is perhaps not for me to do the explaining, inasmuch as I think we could quietly and responsibly adopt this measure and await the decision of the Court. I have said earlier that many of the people who support this legislation see it as a petition of right. They would ask to be heard in court, and that is an assertion of the oldest and most precious of the traditions of parliamentary practice.

Mr. TOWER. I am delighted the Senator from New York made a reference to an old and established practice in the Parliament of the United Kingdom.

Mr. MOYNIHAN. Indeed.

Mr. TOWER. Which is I think a very good analogy.

Mr. MOYNIHAN. And it carries on in here in this petition of right. Let right be done. Let the Court decide what is right.

Mr. TOWER. We might get a ruling from Windsor Castle.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield to the Senator from Oregon.

Mr. PACKWOOD. If I may further respond to the Senator from Texas, and I do not hold out a motive to any Member of this body, but I think I can speak from firsthand experience of the number of people who have talked with me about this issue of constitutionality who when presented with the argument of the expedited Court contest and the fact that there would be no aid to primary and secondary schools if this part of the bill is unconstitutional, with that mask stripped away they very bluntly said they are opposed to giving money to Catholic schools anyway. It is an anti-Catholic bigotry that has existed in this country for the better part of a century and a quarter at least in the school system and continues to exist in the minds of many people today.

The irony today is that it is no longer just anti-Catholic. It is antireligious because as the Catholic schools have been declining, and continue to decline, we have seen since about 1965 a slight growth in basically fundamental Protestant Christian schools because they can no longer ironically be taught in the public schools what they used to be taught, or at least what they used to be able to absorb which was kind of an acceptable Protestantism. Since about 1965, maybe 1960 onward the public schools have been stripped of the right, and perhaps correctly, to make references to the King James Bible and to exude this respectable Protestantism so they asserted to create their own schools. They by and large support this provision also.

So apart from the argument of constitutionality, which I think we have answered, if someone says, "No, I am opposed to it anyway," they have to say "No" for one of two reasons, either "I am opposed even if it is constitutional for any aid going to parents to those who chose to send their child to religious schools" or "I think it is so necessary that we have a complete monopoly of education in this country by the public school system that I am opposed to anything that might give aid and comfort to a private school system be it a sectarian system or not."

Mr. TOWER. If the Senator will yield, as he well knows there are unfortunately many who believe the States should have a monopoly on education. God forbid if that should ever happen in this country. I hope we will always permit our citizens to have an option in the way they choose to educate their children.

I elected to send my children to private school, not a denominationally connected school, but a private school for their secondary education. I elected to send them to a Methodist connected university for their higher education. And at the same time I willingly pay my taxes to support the public education institutions. Indeed, I taught in a tax supported institution. And I think that there is a place for both. But I thought we should always preserve the option for people.

We have seen what happens when the State gets a monopoly on education in societies and the way things are trending these days, I think that the public schools of the States are coming more and more under the influence of the Central Government. We are going to create the Department of Education. Apparently, I know there are some for it and some against it, and it is an arguable case on both sides. But we could be moving strongly in the direction of centralized, if not controlled, at least very pro-

found influence over public education in this country.

That makes it, in my view, all the more urgent that we preserve the option for the people in our society in terms of education.

Mr. PACKWOOD. We had testimony from James Coleman, who did some of the landmark work on school busing and integration, and from Thomas Sowell, the professor at UCLA, both black, and from Roy Wilkinson, of the Congress of Racial Equality, all of whom testified over and over that the most positive effects of this legislation are not for the rich but for the poor.

The irony is: I have been in this Chamber 10 years, and I have heard Senator after Senator who is opposed to this legislation talk about the rights of the poor and what good does it do you to have a right if you do not have the money to exercise it, what good does it do you to have the right to food or a right to housing if you cannot afford it? And yet this very bill for the urban poor and especially the urban poor black who have not the money to march with their feet to the suburb and go to a school of their choosing, this bill may be the difference between whether or not they have the financial ability to exercise the right to choose a private school.

Mr. HODGES. Mr. President, will the Senator yield for a question?

Mr. PACKWOOD. I yield.

Mr. HODGES. As I understand the bill as it relates to elementary and secondary education it provides a tax credit so that if you pay or under the schedules are required to pay $250, and you had a child in an elementary or secondary school, and paid tuition, up to half of that tuition with a maximum of $250 could be taken off your income taxes; am I correct?

Mr. PACKWOOD. That is correct.

Mr. HODGES. Is the Senator aware that under the present tax schedule for a family of two adults and two children no tax is due and payable until the gross exceeds $7,250?

Mr. PACKWOOD. That is correct. That is why both Senator MOYNIHAN and I at a later date will offer an amendment to include refundability.

Mr. HODGES. The Senator then is now telling the Senate that after these glorious wonderful arguments there is another thing he is going to do, that he has not laid out before us everything that is going to come?

Mr. PACKWOOD. No; we made no secret of this all along.

Mr. HODGES. Is there something else on the Christmas tree? Is there another ornament?

Mr. PACKWOOD. Refundability had been an essential part of this bill for a lengthy period of time. It was removed from the bill because the Budget Committee said, to take the issue of refundability alone and present consideration of this bill on technical grounds, that they had to give a waiver before the bill could be considered if it had refundability in it.

Therefore, in order to make sure that this bill was considered and not stopped on a technicality, we took refundability out, and at the time, at a press conference, we stated that Senator MOYNIHAN, Senator ROTH, and Senator RIBICOFF, and I would add an amendment to include refundability.

Mr. HODGES. What the Senator is saying then is that those people who would owe no tax at all are going to be given $250 if they send their children to private elementary or secondary school?

Mr. PACKWOOD. That is roughly how it works. That is not exactly the idea, but that is roughly the idea.

Mr. HODGES. That is the final result?

Mr. PACKWOOD. Yes.

Mr. HODGES. So the cost of it will exceed what the Senator is telling us now the cost of it is, is that correct?

Mr. PACKWOOD. The difference between refundability and nonrefundability, $2.820 billion and $1.848 billion.

Mr. HODGES. Would the Senator, since we have added refundability, or the Senator intends to add refundability, back at the elementary and secondary private level, explain to me how someone would go about doing that? Would he submit his tuition; how would that work?

Mr. PACKWOOD. Well, the same way any other refundability works. If you owe the Government more money than all of your deductions or credits would entitle you to, you would pay them some money. If you add up all your deductions and credits, and if you have paid more money than those deductions and credits require you to pay or you have an entitlement or a credit, the Government gives you a refund. It is not an uncommon procedure.

Mr. HODGES. So you would then have to write in for the difference, or, if you made no money, and had no W–2 forms, you would be required to file a tax form?

Mr. PACKWOOD. Well, 94 percent of the people in the country today are covered by income tax forms.

Mr. HODGES. I understand. But essentially we are talking about the 6 percent that are not.

Mr. PACKWOOD. No, no. You are talking about the 94 percent that are covered. The Senator is talking about the 6 percent that are covered by no form at all, any kind. They are not required to fill one out, and my hunch would be they are a relatively small part of the group that now goes to private schools or would go to private schools. I have no empirical proof of that, but this argument has been used over and over about what of the great bulk of people who pay no income tax? I say again, 94 percent are covered.

That may be your filing one for your spouse and children or maybe filing one for an aged parent. But 94 percent are covered by some form of income tax whether or not a payment is owed, a tax return is filed. So all they will have to do if they have had to file one anyway and have attempted to send a child to private school is put down on one line what they spent, and they will be entitled, if they had paid no tax or if they paid less tax than they were entitled to as a credit, they would get some money back.

Mr. HODGES. $300 million, I take it, is based upon those people now sending their children to private elementary and secondary schools who would not owe a tax?

Mr. PACKWOOD. No, it is based upon an estimate by the Joint Committee on Internal Revenue Taxation as to what would be the likely effect of attendance if this bill is passed.

Mr. HODGES. How much of that estimate is additional children going into the private system?

Mr. PACKWOOD. That I would have to check. I can get the Senator an answer this afternoon.

Mr. HODGES. I would like to hear an answer.

I thank the Senator.

Mr. PACKWOOD. Mr. President, last Friday the name of Antonin Scalia was mentioned, and there was an attempt to impugn his reputation on the floor of the Senate much as any of us, in the practice of law, would attempt to impeach the credibility of a witness. And an attempt was made to say that he was John Mitchell's attorney, and that anyone who would serve under John Mitchell, who served at attorney general, is a man not to be trusted.

I want to read a résumé of Antonin Scalia into the RECORD so that the RECORD may be clear as to the integrity of this man:

ANTONIN SCALIA

Graduate of Harvard Law School magna cum laude 1960.

Note editor of the Harvard Law Review. Sheldon Fellow, Harvard University.

Private practice of law, prominent Cleveland law firm of Jones, Day, Cockly, and Reavis—7 years.

1970: Entered teaching: professor of law, University of Virginia.

1971: Took leave of absence to enter Government service to be general counsel new Office of Telecommunications Policy.

It is not the case that he was ever the "lawyer for John Mitchell."

1972: First chairmanship of the Administrative Conference—a prestigious and well respected independent agency of the Government which seeks to improve administration procedures throughout the agencies. Composed of prominent judges, high Government officials, lawyers, and other members of the private sector.

1974–77: He was next confirmed by this body to be the head of the Department of Justice Office of Legal Counsel, a position which he held first under William Saxbe (a distinguished former member of this body) and later under Attorney General Edward H. Levi.

During his period of Government service he testified frequently before this body and he served with honor and distinction.

After leaving the Government in June 1977, Mr. Scalia became a visiting scholar at the American Enterprise Institute and he is now professor of law at the University of Chicago.

Professor Scalia has published legal writings in the Harvard Law Review, the Michigan Law Review, the Virginia Law Review, the Duke University Law Review and the University of Chicago Law Review.

Mr. President, last Friday there was a discussion between the Senator from Arkansas and myself about what our constitutional founders intended with the first amendment clause. I propounded the theory that they did not intend to prohibit the payment of Government money to private primary and secondary sectarian schools, and I supported some evidence to that effect.

The response of the Senator from Arkansas was, "Well, of course, they were in favor of slavery and opposed to the right of women to vote also. Does that make it right?"

I did not enter the evidence to determine the righteousness or wrongness of it.

I have found, in discussing this topic, that principally because of Jefferson's letter about the wall of separation of church and state there has grown up in this country an assumption—not a presumption, but an assumption—that we have always had public schools in this country and that we have never publicly supported with public finances private church schools.

I will have to confess that I labored under that misimpression prior to my starting to do research on this subject. It is not just a possible mistake; it is irrevocable, irredeemable, and it is without question, that at the time this country started, and continuing up roughly until the early years of the 1819, 1820, 1821 period in Delaware, the 1820's in some other States, and the 1830's and 1840's in other States, that up to the 1818's and 1819's, there were no public schools in this Nation as we know them today, and by that I mean publicly financed, publicly supported, non-church-connected schools. There were none.

Last year I wrote to the Library of Congress in my first endeavor to inquire on this subject, and I asked them for a very brief history of public and church education in this country, and this is their answer on August 18 last year:

Reference is made to your inquiry of August 10, 1977, requesting information on the above matter, specifically, you ask (1) whether State aid to private church-related schools was a fairly common practice in the United States at least during the first half of the 19th century, and (2) whether such aid violated relevant Federal constitutional safeguards.

The answer to these questions is yes and no, respectively.

Yes, to No. 1. No, to No. 2.

It is a pleasure to get a response to a direct question.

I wrote again on January 30, 1978, and they responded, the Library of Congress responded, again as follows on that same subject:

In response to your request of January 30, 1978, for a memo regarding the status of schools in America from 1770 to 1820, the following generalization can be made: All, or almost all, the schools during this period were private, were religious, and were publicly supported, that is, denominational schools received public school funds.

There were a few so-called "public" schools, or town schools, in Massachusetts, Connecticut, and New Hamphire, but even these taught the doctrines of a specific religion, in this case, Congregational Calvinism.

As one educational historian wrote describing the period from 1775 to 1820, "public provision for religion and public support for private and church schools, in some form or other, direct or indirect, explicit or implicit, were either embodied in constitutions, or granted by laws, or carried out in customs or practice.—(From Gabel, Richard J., Public Funds for Church and Private Schools, Washington, D.C. Catholic University of America (1937) p. 137.)

Aid granted to private or semiprivate schools, church schools, primary and secondary, took many forms:

Connecticut, in 1774, turned over all proceeds of liquor licenses to the towns, where collected, to be used for schools. New Orleans, in 1826, licensed two theaters on condition that they each pay $3,000 annually for the support of schools in the city. New York, in 1799, authorized four state lotteries to raise $100,000 for schools, a similar amount again in 1801, and numerous other lotteries before 1810.

And again I want to emphasize, over and over again in this RECORD, the money to be turned over, not just to the school but to the church, which then used it for the purpose of educating those in primary and secondary schools who chose to go to primary and secondary schools:

Kentucky, between 1805 and 1808, authorized its thirty academies to raise $1,000 each, by lotteries . . . Louisiana conducted two lotteries in 1820 for the support of schools. Maryland authorized five lotteries, to raise $50,000 a year for five years for schools, between 1816 and 1821. Individual cities often set up their own lotteries without any special authorization. Congress—

Just to make clear that this was not just a State matter—

passed joint resolutions, between 1812 and 1836, authorizing fourteen lotteries to help provide schools and public buildings for the city of Washington . . . bank taxes were a favorite source of income for schools, between about 1825 and 1860, banks being chartered on condition that they would pay over each year for schools a certain sum or percentage of their earnings.

The source of this is Elwood P. Cubberly, "Public Education in the United States," still today, I think, regarded the outstanding book on public education and education generally in the United States.

In fact, it can be said that every State that sent delegates to the Constitutional Convention levied a variety of taxes and allowed local governments to levy a variety of taxes, the proceeds of which were paid directly to churches for the purpose of supporting the church-run primary and secondary schools.

Cubberly sums it up as follows:

In the beginning it was common to aid church schools on the same basis as the state schools, and sometimes, in the beginnings of state aid, the money was distributed among existing schools without at first establishing any public schools. In many eastern cities church schools at first shared in the public funds. In Pennsylvania church and private schools were aided from poor-law funds up to 1834.

The problem is not whether the money should go to public education, not whether it should go to churches to be used to create schools to educate children; the problem was as to which churches it was going to go to.

The Senator from Arkansas today mentioned Thomas Jefferson, and again made reference to that letter on the separation of church and state.

Let the record show that when Thomas Jefferson was President, he submitted to the Senate in 1803 a treaty concluded with the Kaskaskia Indians, and a part of that treaty reads as follows:

And whereas the greater part of said tribe have been baptized and received into the Catholic Church to which they are attached, the United States will give annually, for seven years one hundred dollars toward the support of a priest of that religion, who will engage to perform for said tribe the duties of his office, and also to instruct as many of their Children as possible, in the rudiments of literature, and the United States will further give the sum of three hundred dollars, to assist the said tribe in the erection of a church.

Mr. President, those are not the writings and that is not the treaty of a man who says that you cannot use public funds for private sectarian education.

Now let us get back to what happened in this country. Things were going along just dandy, and all those churches were getting money to educate the population to the extent that the population wanted to go to primary or secondary schools. The problem came with which churches would get it, and there was a continual squabble between the "in" churches and the "out" churches.

However, it was a fight between the "in" and "out" Protestant churches until about 1830 to 1840, and even among the Protestant churches, the "ins" fought each other. They even fought the creation of a public school system as we know it today. New Jersey is an example. Again to quote from Cubberly:

In New Jersey, the first general school law of 1829 was repealed a year later through the united efforts of church and private school interests, who fought the development of state schools, and in 1830 and 1831 new laws had permitted all private and parochial schools to share in the state appropriation for education.

The State appropriation for education. Let there be no doubt about what the fathers of this country intended, what they practiced, what they did. They gave money to the church schools if they approved the churches. By the farthest stretch of the imagination, it would have been totally foreign to them to say there could be no connection between public expenditure of funds and churches and

church education. Again quoting from Cubberly:

After the beginning of the forties, when the Roman Catholic influence came in strongly with the increase in Irish immigration to the United States, a new factor was introduced and the problem, which had previously been a Protestant problem, took on a somewhat different aspect. Largely through the demands of the Catholics one of the most interesting fights in the whole process of secularizing American education was precipitated in the city of New York.

* * * * *

By 1840 . . . Governor Seward, of New York, urged the establishment of schools in the cities of the State in which the teachers should be of the same language and religion as the foreign patrons.

Imagine that. Bilingual education. A terrible thing that they would ever think of doing something like that, though the fact is that 130 years later we are doing it:

This dangerous proposal encouraged the Catholics, and they immediately applied to the New York City Council for a division of the city school fund, and, on being refused, carried their demand to the legislature of the State. A Hebrew and a Scotch Presbyterian Church also applied for their share, and supported the Catholics in their demands.

Now, it was bad enough that the Catholics wanted the money that the other churches were getting, but then for the Jews to come in and want the money. But do you know what the straw that broke the camel's back was? The Scotch Presbyterians wanted money:

On the other hand, the Methodists, Episcopalians, Baptists, Dutch, Reformed, and Reformed Presbyterians united . . . in opposing all such division of the funds.

So let us not again get confused about whether this money was going for public education or not. It was going for education through the approved churches; and it so happened that certain of the churches—that were not the approved churches—disapproved it.

Mr. HODGES. Mr. President, will the Senator yield for a question?

Mr. PACKWOOD. Yes.

Mr. HODGES. I think the Senator has reflected very accurately the difficulties that were encountered and the deep divisions and acrimony between denominations and religions. That existed when there were very few denominations in this country. Does the Senator not think that he has made, very indirectly but very explicitly, the point made by the U.S. Supreme Court so often, and that is when you start making money available for private religious elementary and secondary education, or for religious education generally, you come by these sorts of deep divisions within our society, and it becomes very difficult for them to meet change?

Mr. PACKWOOD. No. No.

Mr. HODGES. How does the Senator believe that, if you have created the acrimony and you have the bigotry?

Mr. PACKWOOD. I think there would have been no problem at that time had all the religions been treated equally, and our bill treats every religion equally. Be it Roman Catholic, be it Dutch Reformed, be it Lutheran, be it Jewish, they are all treated equally.

Mr. HODGES. May I propound a further question on that point?

Mr. PACKWOOD. I would like to finish, if I might.

Mr. HODGES. Certainly; I can come back to my question.

Mr. PACKWOOD. The problem was that the "ins" had control of the money, and the "outs" did not. There is nothing unusual about that fight; it certainly is not confined to education. Any group, any time, any place that has control of anything does not want to share it. In fact, the tendency is just the opposite. They want to get a little more, a little more, and a little more, until they have got it all. And the only way—this is the irony—that these respectable Protestant religions could get out of this was to go to the creation of the public school system as we now know it, from 1840 or 1850 onward; and from that time on until about 1965, the public schools exuded a certain Protestant fundamentalism.

I do not want to say taught, but exuded. The days or holidays that we took off were never Jewish holidays. They were never All Saints Day that the Catholic Church took off. They were the Protestant holidays. The Bible that we read from in the public schools, or that we were read from, was the King James version. Until about 1960 to 1965 this was apparently acceptable until the Supreme Court started to say, "You cannot do that."

That was the way the respectable religions got around helping the Jews, the Roman Catholics, and Heaven forbid the Scotch Presbyterians from getting an equal share.

By the time of these recent Supreme Court decisions, 1965 onward decisions, there was a new group of "ins," and it was not the churches any more. They were not even related to the church. The new "ins" were the professional educators and those who revolve around them. The money now went to them. Just as a century earlier the church "ins" did not want to share any of their money and wanted to hog it all, now the public education lobby, especially led by the NEA, wants to hog it all and not share it with anybody.

It is as understandable today as it was understandable 140 years ago that the "ins" did not want to share, because to lose control, and I emphasize control, of the money, and you do lose control of it when you have a tax credit when I can send my child where I want and take it off my income tax, the Department of Health, Education, and Welfare, and the career bureaucrats in the sub-Department of Education down there do not have much control—to lose control of the funds means to lose control of the educational policy of this country.

One of the Senators talking in opposition to this bill on Friday said:

It is interesting in this perspective, that the tax credit bill, which in terms of dollars would constitute one of the largest federal educational programs in the nation's history, would have the contrary effect of further dispersing control over educational policy in both the executive and legislative branches of the government.

You bet it would. That is exactly what we have in mind, making sure that we can disperse this, decentralize it, pluralize it.

I was struck by his use of the word "legislative," though, because we have seen that so frequently in this battle. It would mean that the Human Resources Committee would no longer have sole control over education. No matter that there might be a better system or a better way, it could not be a better system if the members of that committee lost control over the educational policy-making decisions in this country. First things first, after all.

As far as the loss of control by the professional educators in this country, as far as their loss of control, it could not have been better said than by John Ryor, the president of the National Education Association. As I said, they are the leading "in" today in the area of primary and secondary education, and they are the most paranoid about losing control.

John Ryor and I, along with Thomas Sowell, professor of economics at UCLA, and Ernest Boyer, the Commissioner of Education, appeared on a televised debate which was taped on March 20.

In the course of the debate, Mr. Ryor kept hammering home about the unconstitutionality of giving money to the private schools. In wanting to probe a bit and see if his real argument was unconstitutionality, I posed the following question:

Mr. PACKWOOD. Let's separate private religious education from other private education for a moment. Would you be willing to allow the tax credit for the primary and secondary schools that are not religious?

Mr. RYOR. No; I do not think we should subsidize any private interest with public funds regardless of the basis.

Mr. PACKWOOD. For the schools that are not religious, there is no first amendment problem. Why would you not allow the tax credit for them?

Mr. RYOR. I would not allow the tax credit unless the money was controlled by public agencies.

There we have it, unless it is "controlled by public agencies" that are dominated by the NEA.

That is the philosophy of this bill and that is the hold we are trying to break. Concerning the issue of constitutionality or unconstitutionality of the issuance of aid to parents of those children who go to sectarian schools, for many, many people—and I am not impugning the motives of anybody in this Senate—for many, many people, the issue is not at all constitutionality; it is power. It is who has it now, who is in, and who might get it.

The public schools today have 91 percent of the students who go to primary

and secondary schools in this Nation; private schools, religious and otherwise, have 9 percent. Ten years ago that percentage was 87 and 13.

Without this tax credit, we will see private education in this country shrinking to, I will take a guess, 3 percent, 4 percent, 2 percent, I am not sure. It will be the Deerfields and the Exeters and the Grotons of this world, for those who make $60,000, $70,000, $100,000, a year can afford to send their children and care less about this tax credit. A $250 tax credit to those people is de minimis in a school that charges $3,500 to $5,000 a year tuition.

If there was a way the public education lobby could shut down those schools they would like to.

I will tell you this, Mr. President. If this legislation passes, and by chance in 10, 12, 15 years we have 15 percent of the people in private schools and 85 percent in public schools, and if with 85 percent the public schools cannot make it—with 85 percent of the children going, if for some reason they are losing prestige, if for some reason the parents are having doubt, if for some reason they are being beaten at a fraction of the price, and most of the public schools are being beaten on comparative tests—if the public schools cannot excel with 85 percent of the students then there is something wrong that will not be cured by their having 100 percent of the students.

I yield the floor.

Mr. MOYNIHAN. Mr. President, I rise to congratulate the Senator from Oregon on bringing into historical and political perspective some of the issues before us. It is a noble effort and it may or may not succeed.

In 1961, as the Kennedy administration was taking office, I published in the old Reporter magazine an account of the origins of the public school system in New York State. The idea that there had been a time when education was wholly based on publicly supported sectarian schools astonished people then, but they overcame their astonishment quickly, particularly in the White House.

May I make the point with which I know the Senator from Oregon would agree—that the public schools were an invention of the 19th century, and they were a superb invention. There was no possible way the fragmented church systems of this country could provide universal education, and it was universal education we required, not only to foster personal development but also as a prerequisite for a democratic belief in universal suffrage.

The belief in, and the arguments for a public school system came at a time in the Northern States when property qualifications for voting and related restrictions were disappearing, and the public schools were promulgated as an aspect of the expansion of democratic possibilities in society. They were a magnificent invention, and they are magnificent institutions.

It was never intended, however, that they should be a monopoly. It was never intended that their existence precluded the existence of other, earlier forms. It ought never have been desired. No doubt should ever have been cast on the legitimacy of those institutions that preceded them.

We are a pluralistic society. We cannot foster a public school system without having a very generalized set of secular beliefs. And such a set of beliefs just does not make room for persons who differ in a society that encourages individual expression.

How long have we thought of the Amish in Pennsylvania as a people who simply differed in these matters and for whom, as a matter of fact, we have had occasion to find that "laws do not apply to you in certain respects if you are Amish."

That does not bother me at all. No one ever suggested that the Amish do not take the most extraordinary care in the upbringing of their children. Of course, they do not accept certain standards which are general—but they are separate. And they have a right to be.

It is the acceptance of differences, some quite marginal and others quite fundamental, which has made possible this society's extraordinary mix of peoples, opinions, and backgrounds. It is in that spirit that we rise here—not with hostility toward the public schools. The public schools will prosper, and are recognized as appropriate educational institutions so long as persons who do not desire to attend them are not forced into them.

(Mr. BUMPERS assumed the chair.)

Mr. MOYNIHAN. This pluralistic society does not demand uniformity, though most people in it do, and should. This is characteristic of any society.

But there are people who march to a different drummer. Some of them belong to groups whose traditions are rooted in the 18th century. In New York City, my city, for example, one of the most interesting groups of relatively new arrivals is the Hasidim, a group of persons descended from Polish Jews who, in the 18th century, underwent a reaction to what they thought to be an overly intellectualized Hebraic orthodoxy. Their response was very much akin to the Methodist response in England against the Church of England, which in those days was appalled above all things by what was termed enthusiasm. The Methodists were enthusiasts. The Hasidim are enthusiasts in the same way. They sing, they dance, and they are very open in their expression of religious emotion and feeling.

The Diggers of 17th century England had some of these qualities, too. But the Hasidim now live in New York, and have retained intact the modes of dress and appearance which date back to the 18th-century Poland. They wear round fur hats that were actually the hats of Polish noblemen in those days; the Amish do the same, exhibit similar traditional patterns of dress and custom, rooted in their 18th-century German background.

They are very distrustful of public schools. They would be very distrustful of ordinary Hebrew schools. They want schools that reflect their own religious sensibilities and doctrinal beliefs, as much the one as the other.

Well, they ought to have them. They are not trying to prevent their children from being educated. Quite the contrary—it is out of their concern for their children's education that they insist on being different from what is considered the norm. They ought to have the education they desire, that is all. The fact that they can will strengthen the underpinnings of the educational animus and institutions of this country, rather than weaken them.

I do not understand the fear of such phenomena in this country, except to say that it has always been with us. But one fact remains: as the Court said in the Brown decision, what could be conceived in an earlier age as an opinion may gradually change through experience. The most powerful thing we have learned is that, for all the diversity of background of the American people, after a generation or two, we witness a very remarkable durability in the central institutions of our society. They emerge intact, often, after having the experienced the challenges of excessive patriotism.

If America has experienced a problem with its newcomers over the years, it is that they have been less critical of this society for a generation or so than might be the norm in a fairly contentious democratic polity. But far from having their loyalty in question, it has been often the other way around—they sometimes seem a little too unquestioning of the accepted proprieties and orthodoxies of this society.

Mr. President, we stand here in defense of pluralism and in defense of diversity. I ask my party yet another question. I do not want to spend the whole day asking questions of my party, although if need be, I will. But I ask, are we to become the party of the bureaucracy? Are we caught up in a kind of statist tendency that we cannot break, no matter how strongly we resolve to do so? Will we say during political campaigns that we are against certain trends—perceiving, perhaps, that the public is alarmed by them—but when the campaigns are over, we see fit to revert to the norm? We let the HEW bureaucracy tell the Secretary of HEW that this bill is bad, and the Secretary of HEW sends over to the Attorney General for an opinion to that effect, and he automatically gets it back.

Are we the party of the bureaucracy? Is there an unexamined but now uncontrolled acquiescence in the expansion of the powers of the State that has become so implicit in our thoughts and even in our language that we no longer even recognize in ourselves? We refer to the "public school" as against the "nonpublic school" without even recognizing the semantic advantage we give to the former.

Mr. President, in the end, the matter will turn on what the Senator from Oregon said: Is it not really religion; is it not really cost? Is it just power and an association with all things tending to the advantage of the State that animates our decision? If it is, it is a lamentable comment upon us.

I hope the Senators in opposition will address themselves to this proposition: The Attorney General has stated that tuition tax credit to a freshman in a Methodist college is constitutional; tuition tax credit to a senior in a Lutheran high school is unconstitutional. Now, I am sorry; if you believe that, you believe anything. Or, in any event, if you believe that, surely you should also be able to believe that somebody might think differently. Somebody might maintain that a tax credit to a Lutheran high school senior is constitutional, but not one to a junior.

Or one might say that since you draw the line between a junior and a freshman, you cannot draw the line between preschool and elementary school, because aid to preschool children has been challenged and has been upheld.

Surely, an openness to possibility argues that this is something the Court should be allowed to decide. If some arcane constitutional doctrine is going to distinguish between 18-year-olds and 19-year-olds in terms of their impressionability, then let the Court think about this one more time; let the Court directly rule on this. If that is the basis of our contention, then surely we are right in asking this.

We would say that to refuse to let the Court rule on that issue is to suggest that that issue is not really what is in your mind; or to insist on the money issue when that issue is not really what is in your mind. What is at issue here is an extraordinary—albeit tacit—decision in the direction of statism.

It is the disease of liberalism in our age. It has gotten into our bloodstream. We do not seem to be able to get it out. We are so caught up with it that we sometimes do not even recognize it.

I do not know when this began. I mean, if we breathe it in the air of the 20th century, must we retreat into the atmosphere of the earlier ages—as perhaps the Amish or Hasidim do—in order to be unaffected by it?

But to those who truly assert that their problems are constitutional, I ask, if that is the case, how can they refuse us the plain request that the Court be allowed to decide? What has come of the tradition of a petition of right? Let right be done by the Court.

We will accept and decision of the Court. What has come of us when such a petition is denied? And to those who believe the cost would be unbearable, impossible, please do tell us what cost would be agreeable.

On Friday, the Senator from Arkansas may or may not have known that we have made some adjustments in our bill. We had taken out an early provision which mandated that tuition paid to public schools could be deducted in the same manner, and we did so for a variety of reasons. First of all, tuition was unconstitutional in many States. In any event, we took it out.

When we did, he said that we had sharply shifted the balance away from the Constitution. We asked him to describe what balance he would consider that is constitutional.

But surely, when mathematical allocations of benefits are invoked as demonstrating a balance or tipping point, then, surely, we are in the realm of judgment and scarcely in an area of prudence as against constitutionality.

What is public policy? What is wise public policy as opposed to permissible public policy? How much more would we have to say before we establish to our friends what they probably do not know?

I am prepared to say that most persons, even Members of this Senate who have versed themselves in public law and American history, do not know the history the Senator from Oregon described. They just do not know it.

I mean, when we go to school in this country we are not taught educational history and do not know the extraordinary, almost aberrant nature of the Court's rulings.

A year ago in June, the Court was moved to decide that it was constitutional to provide a textbook to a student in a church-related school, but not a teaching aid. Not a map. A book of maps, which is an atlas, well, that introduces complexities which no doubt remain to be solved.

Mr. HODGES. Will the Senator yield for a question?

Mr. MOYNIHAN. I am happy to yield for a question.

Mr. HODGES. From what case, what is the name of that case? Does the Senator himself know?

Mr. MOYNIHAN. Wolman against Walter.

Mr. HODGES. Decided when?

Mr. MOYNIHAN. June 1977.

Mr. HODGES. And what does it distinguish between?

Mr. MOYNIHAN. It says that we can provide a textbook, but not a teaching aid.

Now, the Senator from Arkansas is wondering if I have not made an extraordinary blunder, and he is right to wonder, for to imagine that the Supreme Court would solemnly distinguish between a textbook and a teaching aid and find one constitutional and the other unconstitutional is to bring one's own credibility into doubt.

I accept the thought. Backward reels the mind.

Mr. PACKWOOD. If the Senator will allow me, that case specifically held on June 24, 1977, that it was right to provide books and standardized texts, not all right for private schools, not all right to provide globes, maps, or, interestingly, busing to a field trip.

Mr. MOYNIHAN. No busing.

Mr. PACKWOOD. Or even busing them to school and back, that is all right, but not to a field trip.

Mr. MOYNIHAN. The distinction is clear: Busing to a field trip is unconstitutional, while busing to school is constitutional. It is all there in the debates of the House of Representatives and the U.S. Senate in 1787.

I mean, just read it. Read where it says that persons in high school are susceptible to religious indoctrination and there comes with their arrival at college the onset of skepticism in critical faculties such as to make them impervious to the most persuasive efforts of wily indoctrinators who lurk in the hallways of those institutions, seeking to impart their primitive doctrine.

If we believe that, we would believe anything. If we believe that such a thing as susceptibility to religious indoctrination is measurable in constitutionally significant ways.

But spare those good gentlemen across the street. They did not ask for this mystery. They have been asked to provide a constitutional justification for the religious bigotry of the 19th century and the quality of our subsequent efforts suggests the lack of enthusiasm with which they have gone about it. Remember, the Supreme Court has got into the practice of citing social science research when empirical assertions are made.

I speak with some feeling on this subject because I will be happy to say that a work in which I was associated with Frederick Mosteler entitled "On Equality of Educational Opportunity" was, in fact, cited by the Supreme Court several years ago, very correctly, it seems to me, in evidence that the social scientists had not agreed among themselves on a variety of matters.

If that was the case, then certainly it was not for the judges to assert an even larger competence in the area.

The citation of social science in the Brown decision was an important one and established a tradition with respect to the Clark research, for instance, that when the Supreme Court said something is so, in an empirical way, the justices would say, "Here is the fellow who says so."

Later in the day, I will have occasion to speak to some of the extraordinary bigotry on which some of the court decisions seem to have been based.

I will speak to Justice Douglas' decisions citing the book entitled "Roman Catholicism."

But the afternoon can wait for that.

I would like to say for the moment simply that the Court had no evidence to reject this proposition. It did not even have any logic to it.

The logical conclusion of the Court's statement is an individual test of each child's level of religious impressionability.

At the point where that religious impressionability index drops below 5, on a scale of 1 to 10, assistance becomes constitutional. Some children will remain religiously impressionable as long as they attend school. Others will never be religiously impressionable, having lost that capacity before learning to speak or never having acquired it.

Let the American Psychological Association develop a dependable index of religious impressionability. Those who never rise above five on the scale will be eligible from the outset for public support. Those who find themselves irredeemably in the higher range of scores will never get it. No finer weapon to discourage religion could be devised than an American Psychological Association index of religious susceptibility to apply the Tilton against Richardson standard.

On the other hand, it might lead to dissembling. Persons who are of a naturally devout nature might find that they can feign irreligion. They might develop techniques of atheistic assertion and of blasphemy, of dark and occult beliefs such as would shock their parents and appall their society, but which would make them eligible for public assistance in the minds of the justices of the Supreme Court.

This could be funded, if Senate grantwatchers do not learn of it. This could be an appropriate area for Federal funding. Some people wear their blood type around their neck. People could be given a religious impressionability rank, and it could be put on their social security card, and things like that. They would be known as eligible for education tax credits from the first, and those who were not eligible would not be.

Then we have the problem that, after a while, a majority of the young people, if my judgment of their desire for education as against their desire for religiosity is correct, would be found to score below five, and it would be necessary to recalibrate the test. But that, too, could be undertaken by the Department of Health, Education, and Welfare.

International comparisons could be made. We could learn whether the children of simple peasant societies are naturally more religious or possibly more irreligious. We would have to learn to distinguish between the advanced religions and those thought to be less so.

In the part of Ireland from which my family comes—if I may divert just a moment—in a small part of western Ireland, in Kerry, the Moynihan farm is located, you might say, in the cleavage of the two breasts of Dana the one-eyed, known in less eloquent parlance as the paps. They are known to mythology, however, as the two breasts of Dana the one-eyed. This part of the Druidic past is long beyond us and formally has been eschewed by the people of Ireland since the time of Patrick.

Nonetheless, it always has remained an interesting thing to me that whenever I visit that native region, I find that the nipples on the tops of the teats are in good repair, they being stone cairns put up in the Druidic Age but somehow surviving 14 centures.

Are the people who go up in the light of the moon and fix up those stone cairns religious, or are they irreligious? How would they score on the Tilton against Richardson religious impressionability scale?

However, the religious impressionability scale is clearly ahead of us, and it may help solve the problem of a glut of Ph. D.'s, which is already emerging and has given some alarm to the graduate schools.

But what are we to say, Mr. President? One does not wish to ridicule, but what are we to say in view of the ridiculous? There is no such thing as a measure of religious impressionability that dependably can be associated with an age, with a class, with a level of schooling.

Twelfth grade is impressionable; 13th grade is not. That does not work.

I made this mock assertion: What if we associate this condition with the individual as against his year in school? That would not work, either. But that is what the court has been reduced to, and that is why we come along with a very straightforward, honest effort to say, "Look, think of it this way. Here is aid that meets your standards. And you can stop being forced into these insupportable distinctions of a constitutional difference between textbooks and maps, between the last year of high school and the first year of college, that preschool is one thing and kindergarten is another."

I do not wish in any way to challenge the dedication of the justices in drawing these distinctions, but they have been faced with a kind of assault on the judicial sensibility. They are asked to make distinctions where there is no difference.

It is the judgment of Philip Kurland, in which I find myself agreeing, that, in the main, what one learns from these decisions is that the justices have followed their own predilections and not any constitutional doctrine, because there is no constitutional doctrine.

Mr. President, what are we, as a Senate, to do, in the face of an assertion by the Attorney General that the tax credits to freshmen in this bill are constitutional and those to high school seniors are unconstitutional? That is not a basis which would command the respect of anyone who has any regard for the idea of constitutionality. Prudent, good, useful public policy perhaps; sane, intelligent, desirable legislation, yes. Constitutional, no.

They cannot argue a constitutional case and should not. If there is a constitutional question, it is to be resolved by those people who got us into this doubtful circumstance in the first place which is the court whose rulings I suggest are not now coherent, are in many ways ahistorical and cry out for one large, general purpose, clear, guiding decision which would be among the benefits that would come from this legislation. I make the point that it is not a decision which would necessarily go with the sponsors of this legislation but rather would be accepted by them as settling the matter once and for all.

In the name of social peace, reconciliation, and educational justice we have put forward this legislation. It has been adopted by the House of Representatives and it was reported to this floor by the Committee on Finance by a vote of 15-to-1, and I cannot doubt that when this debate is concluded it will have the support of a majority of Members on both sides of the aisle.

I see the Senator from South Carolina is on his feet as he has been for some time and as we have had the floor for the better part of the morning perhaps he wishes to speak to some of the observations we have made here.

Mr. HOLLINGS. Mr. President, does the Senator yield the floor?

Mr. MOYNIHAN. Mr. President, I yield the floor.

Mr. HOLLINGS. I thank my distinguished colleague.

Mr. President, our distinguished colleague from New York has taken us on quite a trip from the nipples on the teats of Dana to the leading psychologists, from the Democratic Party platform, to, through his associate in this assault, the Senator from Oregon, a charge of Catholic bigotry.

Let me try to bring some coherence and concentration into some of the fundamentals involved in this debate. We find that we are being charged with things never contended and with positions never assumed.

There is much of which we all agree on the early history of education in the life of our Republic. The importance of education to the life of our Republic cannot be overemphasized. In the way a country goes about educating its young people, we see that nation's character. its values, its fundamental commitments, its way of life. The Greek philosopher, Diogenes, was right over 2,300 years ago when he wrote:

> The foundation of every state is the education of its youth.

Nowhere has this been so true as in America. The system of education which this country has built up over the past 200 years is unmatched in all of history. No other facet of our national endeavor has done as much to build this country—to forge unity from a diversity of over 30 ethnic groups, to weld our people in a common purpose, to encourage civic action, and to build a nation both materially strong and morally rich.

The saga of American education includes both the public and the private school. It took both of them to bring us where we are, and it is my hope as a citizen that public and private will continue to exist alongside one another as far down the road as the eye can see. We are not here today to pit public against private, nor to downgrade the splendid contribution our private and church schools have made to our Nation's development. We are here to discuss what the proper role of the Federal Government should be concerning the public and private schools.

Let us begin at the beginning. The first schools in Colonial America were church schools; 350 years ago, the ties that bound church and state were close and tight, and part of the baggage that our forebears brought from Europe was this centuries old connection. To them, education meant religious education, and in a world where there were few books other than the Bible, the training of the young was focused almost exclusively on the propagation of the faith. Nine of the 13 colonies had established, tax-supported churches. Religious toleration, while more widely practiced in America than in Europe, was by no means 100 percent achieved. The quality of education provided by the churches

varied considerably from colony to colony, and from region to region. In my own South, education was the province of the few, and the private tutor was more frequent than a schoolhouse for the well-to-do. For the classes below, instruction of a formal nature was more the exception than the rule. The congregational churches of New England by and large placed a greater emphasis on education and the building of schools, and the record shows that the first public school in America, open to everyone on equal terms and financed primarily from the public treasury—was founded in Massachusetts in 1635. The ties to church were still very strong, however, because just about every facet of life in New England and elsewhere was bound up with the purposes of an organized religion.

Then came the Revolutionary War era, and nothing was ever the same again. It was a time of great ferment in the Western World generally, but most especially in America. Old shackles and institutions were being discarded, and the thirst for freedom was fast on the rise. Just as this revolutionary era changed the relationship between citizen and government, so too did it forever alter the ties between church and state.

I think it is very important that we emphasize the process of evolution, of change. Legal decisions are an evolutionary process. My colleague from New York goes with great delight to the first amendment and says, "You find the difference between a map, a chart, or bus or piece of equipment," and he just revels in the fact that you cannot find that. He should go further. He should go to the Constitution itself and find the word "education." He will not find that. It does not appear.

But just as sure as we stand here and debate, public education is fundamental and has been since the Revolutionary days.

The Revolution set in motion the disestablishment of religion in America, and while it took some years for this to be accomplished in some areas, the course was set and the direction of events was clear for all to see. There would be no State religion in the new Nation. There would be instead religious liberty, the freedom to believe or disbelieve, tolerance for men and women of all persuasions.

The Founding Fathers realized full well the importance of education in a country where the people were going to participate so actively in the decision-making process.

Later, I intend to emphasize the benefit and the value, and the appreciation that we have for public education, because too often we are deflected down side roads of psychologists and mythological Irish history and charges of Catholic bigotry and other things that really are not part of this debate. We are talking about the public school system in America.

Even while they were debating at the Constitutional Convention, the Congress of the Confederation was passing the Famous Northwest Ordinance of 1787.

Through this law and the Land Ordinance of 1785, the new Nation actively encouraged a system of free public education. Specifically public land was provided and dedicated for the support of public education. In each 6-square mile township consisting of 36 sections, one section—the one in the middle, No. 16—was set aside "for the maintenance of public schools."

This utilization of the public land for public education put schooling on a sound footing in an area which now constitutes our Middle West. Thus the national mandate for free public education goes back to the earliest days of our existence as an independent country.

The great Daniel Webster was later to say that he doubted whether "one single law of any lawgiver, ancient or modern, has produced effects of more distant, marked, and lasting character than the Ordinance of 1787. It set forth and declared it to be a high and binding duty of Government to support schools and advance the means of education."

If anyone here who is close to my good friend Jack Kilpatrick, the distinguished columnist, he should ask Mr. Kilpatrick to please read Daniel Webster. Mr. Kilpatrick finds no duty. He says in his column this weekend, that there is no public duty to provide public education. But there is that high and binding duty. The duty is fundamental. It is basic. It is based on our early history. It dates from those laws of 1785 and 1787 right up to our own time, when Hawaii and Alaska were not permitted entry into the Union until they provided free public education in their constitutions. Since Mr. Kilpatrick likes to write on constitutional and historical subjects, I would like to see any column of his to the effect that Congress has done wrong.

The point is he has never written that article. We have given those lands to foster public education, and that, Senator Daniel Webster said, was the one single law that distinguished this great Republic of the United States of America.

I hasten to add that it was not one law or any one man who launched the Nation It was many men, confronting common problems, thinking common thoughts. The impulse toward freedom of religion and the separation of church and State was abroad in the land. Nowhere was this impulse more eloquently and effectively propounded than in the words of Thomas Jefferson. Now, there is a Virginian for these writers who were trying to impress people over the weekend with their singular articles about going gently. They were not quoting Jefferson, the great Virginian. It was his statute for establishing religious freedom that was the proudest accomplishment of his accomplished life.

The fact that Thomas Jefferson served as President of the United States is not inscribed on his tombstone—but recognition of his authorship of the Virginia Statute for religious liberty is inscribed, at Jefferson's own request. This indicates the importance he placed on it.

The statute clearly states, "No man shall be compelled to frequent or support any religious worship place or ministry whatsoever." Jefferson believed in the building of a "wall of separation between chuch and State." Indeed, the term itself traces back to him.

"A wall of separation between church and State"—Jefferson helped build it, and the Supreme Court of the United States has confirmed and upheld it. It is not just what the Senator from South Carolina says, what the Senator from New York says, or even what that great psychologist, Brewster Smith or that mythological figure, Dana from Ireland says, but rather when we look to the law, what the Supreme Court has found. My colleague from New York tries his best to ignore this third branch of Government.

In Everson against Board of Education, the Supreme Court found that the first amendment meant the following, and I quote:

> The establishment of religion clause of the First Amendment means at least this: Neither a State nor the Federal Government can set up a church. Neither can pass laws which aid one religion, aid all religions or prefer one religion over another. Neither can force nor influence a person to go to or to remain away from church against his will or force him to profess a belief or disbelief in any religion. No person can be punished for entertaining or professing religious beliefs or disbeliefs, for church attendance or nonattendance.
>
> No tax in any amount, large or small, can be levied to support any religious activities or institutions, whatever they may be called or whatever form they may adopt, to teach or practice religion. Neither a State nor the Federal Government can openly or secretly participate in the affairs of any religious organization or groups and vice versa. In the words of Jefferson, the clause against establishment of religion by law was intended to erect "a wall of separation between the church and the state."

Mr. President, those are not just interesting historical facts—this is what the court has found. And I emphasize this because we heard some discourse earlier that all we have had are State court decisions, we are told the Supreme Court has never had a chance to rule. But we have just heard Justice Black outlining what the Federal Government can and cannot do.

Mr. President, the measure we are debating today is patently and outrageously unconstitutional. It flies in the face of the establishment clause of the first amendment and is therefore violative of the 14th amendment, too. The Attorney General of the United States has written a formal opinion which concludes that a tuition tax credit for families with children in private elementary and secondary schools is unconstitutional. That position is supported by most American constitutional scholars, whose arguments seem more to the point than those of certain Canadian scholars who have been dragged into this argument by proponents of the tax credit.

The conclusion that tuition credits are unconstitutional is not based on some arcane or outmoded doctrine. Rather, it is dictated by the most recent cases of the Supreme Court—cases decided during the 1970's—that give continuing vitality to the historic scope of the first amendment.

In Lemon against Kurtzman, 1971, the court summarized the three tests that a program of financial aid must pass for it to square with the Constitution. First, it must have a secular purpose. Second, it

must neither advance nor inhibit religion. And third, it must not foster excessive entanglement with religion. In Lemon, a program that provided salary supplements was struck down as unconstitutional because of the inherent tendency, in religious private schools, for religion to enter the classroom. By supporting the teacher's salary, the program was subsidizing the provision of religious instruction and the inculcation of religious values. And providing public support for that purpose clearly has the effect of advancing religion. Hence, it cannot pass constitutional muster.

The court applied the same analysis in Committee for Public Education against Nyquist, 1973. At stake in this case was a program that provided tuition reimbursement grants for low-income parents of children in nonpublic schools, and income tax relief for middle-income parents. The purpose and operation of the program—using the tax system to provide benefits for families paying tuition in private schools—could hardly be closer to the purpose of the tuition tax credit proposal we are currently considering. And the result was clear: The program was unconstitutional. Though the aid went to the family, rather than to the school as in Lemon, the effect was unmistakably to provide desired financial support for nonpublic, sectarian institutions. The aid thus provided could—and clearly would—be used in some substantial measure for religious instruction. Thus, the court concluded that:

> The money involved represents a charge made upon the State for the purpose of religious education.

The court found that the aid had the impermissible effect of advancing the sectarian activities of religious schools.

The court noted a second possible constitutional defect in the New York program—that it could foster excessive entanglement of the Government with religion. Aid to private schools through the tax system is not frozen in amount; the court noted that where a major part of that pressure in tax benefits comes from religious schools, there is enormous potential for church-state conflict and for seriously divisive political consequences. This risk of entanglement was termed by the court a "warning signal" that should not be ignored in applying the first amendment.

It is worth pausing to focus on Nyquist, since it is so closely on point. It can hardly be denied that the legislation under consideration would have the effect of providing financial aid to private schools, and that would be for sectarian instruction. Indeed, that is more than its effect. To a large extent, that is its purpose. Nothing is clearer under the first amendment than this: The Constitution prohibits the Government from taxing its citizens to support the religious activities of others. All Americans ought to be free to worship according to their own religious beliefs. But no American should be coerced into subsidizing the religious beliefs of others.

Nor can it be denied that this bill—just like the relief program in Nyquist that it so closely resembles—would lead to the possibility of religious strife in the political process. Indeed, this bill would be an invitation extended by this Congress, to engage in continuing debates, year after year, in which religious views will play a major role. The tuition tax credit, as now scaled back, is $250 a child. But beneficiaries of the credit will hardly forget that the credit originally proposed was $500. As inflation continues to run rampant, it hardly requires prophetic vision to predict that we will be asked to raise the $250. And as such proposals are advanced and debated, religious interests and religious views cannot help but come to the fore. Thus, the tuition tax credit presents another serious constitutional problems—the problem of church-state entanglement. The first amendment sounds a warning signal—to avoid excessive entainglement. And as is so often the case under our Constitution, this warning helps us to steer clear of serious practical problems in the political process that we would otherwise have to face. The warning to avoid entanglement is clear. And it is wise. We would be foolish to ignore it.

The Nyquist case was decided nearly five years ago. But only last summer, in the Wolman against Walter case, decided in June of 1977, the Supreme Court clearly reaffirmed Nyquist and all that it stands for. Once again, the court carefully enforced the provisions of the first amendment, striking down an Ohio programs whose effect was to provide aid, in the form of materials and services, to private school children—aid that could, and inevitably would, be used by those schools to support the provision of religious instruction and religious beliefs.

The Supreme Court has spoken. It has prohibited aid to private schools that—like a tuition tax credit—can be used to advance religion. Tuition tax credits are general aid—the assistance they provide can be used for any purpose at all by the private schools. They cannot help but advance religion. They cannot help but foster entanglement. They are—put simply—clearly and unequivocally, unconstitutional.

Mr. President, that is the history and those are the facts. Although some politicians and scholars may wish these cases had been decided differently, most agree that, under those decisions, a tuition tax credit for private school elementary and secondary students is unconstitutional.

Senator MOYNIHAN does not really dispute this conclusion. This January, he stated:

> Now I would say to you that this bill is constitutional, by which I do not mean that I predict the court tomorow would hold it so. I mean instead that a fair reading of our Nation's history demonstrates that the first amendment was never meant—and until recently, never understood—to bar the sort of aid which we propose.

This is an interesting viewpoint. It has a lot of appeal. For it gives each of us the freedom to make up our own minds about what the Constitution says. If we do not happen to like what the Supreme Court has ruled, we are free to ignore it—relying instead upon what we happen to deem to be a "fair reading of our Nation's history."

The possibilities are intriguing. A school board might decide that a fair reading of this Nation's history permits it to operate a dual school system—even though there once was a decision called Brown against Board of Education.

I am as great a believer in liberty as Senator MOYNIHAN. But article III of the Constitution says that:

> The judicial power of the United States, shall be vested in one Supreme Court, and that the judicial power shall extend to all cases . . . arising under the Constitution.

Much as each of us would like to be free to declare his own allegiance to his own fair reading of our Nation's history, article III provides otherwise—and makes the Supreme Court the final arbiter of the Constitution.

In an article he wrote this spring for Harper's, our good friend from New York relies for support for his interpretation of the First Amendment on that eminent constitutional scholar, Ulysses S. Grant, and that renowned source of constitutional guidance, the 1876 Republican Party platform. I had never before realized that in the address by Grant to which Senator MOYNIHAN refers us—remarks before the Army of Tennessee in Des Moines—the Nation was receiving a legal disquisition of great authority—nor had I realized that the politicians who drafted the election platform for the Republican Party in 1876 viewed themselves as resolving serious questions of constitutional law that might arise a century later.

One might think that, in determining what the first amendment prohibits, a good starting place is recent Supreme Court decisions. Yet in the article's extended discussion of constitutional interpretation, only the most fleeting reference is made to the controlling Supreme Court decisions in this area.

Mr. President, in considering whether tuition tax credit legislation is constitutional, I look not to Ulysses S. Grant, but to the Supreme Court of the United States. And I conclude—as Jefferson believed strongly in the building of a wall of separation between the church and state. I quote him—"It is sinful and tyrannical to compel a man to furnish contributions for the propagation of opinions which he disbelieves and abhors; and it is also wrong to force him to support this or that teacher of his own religious persuasion."

I might just divert for one second, Mr. President, to say that we will elaborate on that particular point. The Senator from Oregon talks about discrimination, he talks about who is hogging the aid, and he comes back and asks who is grabbing it and doing all these other unfair things. The truth of the matter is that what he asks the Senate to approve is financial support for religion, and many do not believe in that. On that score it was Thomas Jefferson—and it is just as true today as it was at that time—who said, "It is sinful and tyrannical," and I believe that. It is not anti-Catholic. Wait until we quote just exactly who the wall supporters are. We have the ADA. I would not think they would be anti-Catholic, Senator. We have all kinds of organizations, the AFL–CIO. Is that

anti-Catholic bigotry? We have the American Association of Colleges of Teacher Education.

That is not anti-Catholic bigotry.

James R. Kirkpatrick, the American Association of School Administrators. That is not anti-Catholic.

William B. Welsh, the American Federation of State, County, and Municipal Employees, AFL–CIO. The distinguished Senator from New York (Mr. MOYNIHAN), priding himself on his distinguished service first under President Kennedy and the Department of Labor, has tremendous respect and regard for the AFL–CIO.

George Henderson, American Alliance of Health, Physical Education, and Recreation. That is not anti-Catholic bigotry.

John Shattuck, American Civil Liberties Union. That is not anti-Catholic.

Albert Shanker, of New York—the great State of New York—American Federation of Teachers, AFL–CIO. That is not anti-Catholic bigotry.

Bette Chambers, American Humanist Association. That is not anti-Catholic.

Andrew L. Gunn, Americans United for Separation of Church and State. That is not anti-Catholic bigotry.

Joyce B. Miller, Coalition of Labor Union Women.

Fred Weintraub, Council for Exceptional Children.

Sam Husk, Council of Great City Schools.

Ruth J. Hinerfeld, League of Women Voters of the United States of America—certainly that is not involved in anti-Catholic bigotry.

Bill Hambrick, National Association of Elementary School Principals.

Wesley Apker, National Association of State Boards of Education.

Leon Shull, Americans for Democratic Action.

Then they talked about the Democratic Party platform, and where, oh where are we Democrats? Well, I would rather think the distinguished Senator asking where the party is would stand nearer that particular group than the Senator from South Carolina, but "they ain't no mistake," the Americans for Democratic Action, in a letter signed by Vicky Austin, comes out foursquare:

> Tuition tax credits on the primary and secondary level are equally reprehensible. Under the tuition tax credit plan, approximately two times as much federal aid would go to the private or parochial school student than would go to the public school student. It would give federal aid to private schools that do not need to comply with federal civil rights and Title IX guidelines, and could encourage segregation along religious, racial and class lines.

Let me read further from this list of distinguished authors.

Bayard Rustin, the A. Philip Randolph Institute. That is not involved in anti-Catholic bigotry.

Joseph Schneider, Council for Educational Development and Research.

Daniel B. Taylor, Council of State Chief School Officers.

W. J. House, the Horace Mann League.

Benjamin Hooks, NAACP. Certainly that is not antireligious. We have been charged with being antireligious.

Owen B. Kiernan, National Association of Secondary School Principals.

Joanne Goldsmith, National Coalition for Public Education and Religious Liberty.

Grace Baisinger, National Council of Parents and Teachers—one of the most distinguished of all of our groups in this country.

Esther R. Landa, National Council o Jewish Women, another distinguished group.

Margaret Buvinger, National School Boards Association.

Frank Jackalone, National Student Lobby.

Ronald H. Brown, the National Urban League.

Howard G. Paster, United Auto Workers.

James A. Hamilton, National Council of Churches. I almost knocked over the desk and the chair trying to get recognition this morning when they were talking about being anti-Catholic and anti-religious—but they just kept on with their dialog.

But here we have on record the National Council of Churches—and the Senator from Oregon has the letter, just as does the Senator from South Carolina.

Stanley J. McFarland, National Education Association.

Frank Viggiano, National Student Association.

Carl Holman, National Urban Coalition.

Robert Alpern, Unitarian-Universalist Association.

George H. Outen, Board of Church and Society, the United Methodist Church.

Now, Mr. President, this particular group constitutes the National Coalition To Save Public Education, and they have written a very cogent letter summing up their reasons. Mr. President, I ask unanimous consent that the letter in its entirety be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL COALITION TO SAVE PUBLIC EDUCATION

As the elected leaders and designated staff representatives of organizations united in the National Coalition to Save Public Education, we are writing with the specific purpose of urging your support for the Hollings Amendment to the Tuition Tax Relief Act, otherwise known as the Packwood-Moynihan-Roth bill (H.R. 3946). The amendment would delete coverage under the bill for tuition paid to elementary and secondary schools.

Unless the Hollings Amendment is adopted, the uniquely American approach to public education will be destroyed for the sake of modest tax relief for tuition-paying parents. In our judgment, this is far too high a price to pay.

Our public education system was established on the premise that the instruction offered would be of sufficiently high quality to attract the children of all Americans, not just those lacking the means to pay for private schooling. For the most part, this premise has proved sound: 90% of today's school-age population attends public school, and the public education system can take considerable credit for the nation's technological and economic achievements as well as for the social cohesion that has made American democracy work.

All of this will be gravely jeopardized if the federal government gets into the business of subsidizing non-public education. Public education would no longer be the norm as Horace Mann and other early school reformers intended; instead, public schools would be viewed as inferior: after all, why would Congress offer a bonus to parents who take their children out of public school unless by implication the public schools were viewed as second-rate?

The subsidy would accelerate the exodus of middle-class children from our large urban school systems and undo twenty years of progress toward integration within the public school framework.

Moreover, as increasing numbers of families take advantage of the subsidy, the schooling of those children remaining in the public system will deteriorate as political support for bond measures and school taxes withers away. In short, our educational system would be effectively resegregated and stratified by race and class. Surely this is an outcome that must be avoided.

It has been argued that tax credits for elementary and secondary tuition would not destroy public education but would merely allow non-public schools to compete on an equitable basis. But the fact that under Packwood-Moynihan the non-public institutions would not be required to meet various federal mandates for the education of handicapped pupils, for bilingual instruction, etc., suggests that precisely the opposite would occur: it would be the *public* schools which would be forced to operate at a disadvantage. In addition, aid to non-public schools carries with it the danger that public funds will be used to support sectarian purposes or ideological viewpoints in violation of the Constitution and American principles.

Finally, we raise an issue which Senator Moynihan himself has raised provocatively in another context, namely *cui bono*—who benefits. The Congressional Budget Office estimates that Packwood-Moynihan would cost the treasury some $5.8 billion by FY 1983; CBO's projections indicate that 46% of the benefits would go to families earning more than $25,000 per year, whereas middle-income families—those earning between $15,000 and $25,000—would receive only 32% of the benefits. Needy families would get the short end of the stick—only 22% of the benefits, according to the CBO figures.

So for the sake of an institution which has served America well—public education—as well as for the sake of fiscal restraint and tax equity, the seventy million voting Americans represented by our Coalition call upon you to support the Hollings Amendment.

Sincerely,

George B. Imig, American Assoc. of Colleges for Teacher Education.

James R. Kirkpatrick, American Association of School Administrators.

William B. Welsh, American Federation of State, County and Municipal Employees, AFL–CIO.

George Henderson, American Alliance of Health, Physical Education and Recreation.

John Shattuck, American Civil Liberties Union.

Albert Shanker, American Federation of Teachers, AFL–CIO.

Bette Chambers, American Humanist Association.

Andrew L. Gunn, Americans United for Separation of Church and State.

Joyce B. Miller, Coalition of Labor Union Women.

Fred Weintraub, Council for Exceptional Children.

Sam Husk, Council of Great City Schools.

Ruth J. Hinerfeld, League of Women Voters of the United States.

Bill Hambrick, National Association of Elementary School Principals.

Wesley Apker, National Association of State Boards of Education.

Leon Shull, Americans for Democratic Action.
Bayard Rustin, A. Philip Randolph Institute.
E. Joseph Schneider, Council for Educational Development and Research.
Daniel M. Taylor, Council of Chief State School Officers.
W. J. House, Horace Mann League.
Benjamin Hooks, NAACP.
Owen B. Kiernan, National Association of Secondary School Principals.
Joanne Goldsmith, National Coalition for Public Education and Religious Liberty.
Grace Baisinger, National Congress of Parents and Teachers.
Esther R. Landa, National Council of Jewish Women.
Margaret Buvinger, National School Boards Association.
Frank Jackalone, National Student Lobby.
Ronald H. Brown, National Urban League.
Howard G. Paster, United Auto Workers.
James A. Hamilton, National Council of Churches.
Stanley J. McFarland. National Education Association.
Frank Viggiano, National Student Association.
M. Carl Holman, National Urban Coalition.
Robert Alpern, Unitarian Universalist Association.
George H. Outen, Board of Church and Society, United Methodist Church.

Mr. HOLLINGS. Now, Mr. President, they want to know where my party is. Since we have brought the party into this, I think back to DeToqueville, the French philosopher who said when he visited America over 125 years ago:

In America there are many men of integrity in both political parties.

But he added:

In America there is no party of integrity.

If my colleague wants to know where the party is, I would hope, for starters, this is where it is with these groups that I have mentioned, from the Urban League to the AFL–CIO to the League of Women Voters to the National Council of Jewish Women to the Parent-Teachers Association to the National Council of Churches, right up and down the aisle, secular or sectarian. And let me add that none of them is trying to "hog it all." They are truly and genuinely concerned. Mr. President, about the future of public education.

Let us go back and complete that other thought with respect to the early days and the Founding Fathers, because Jefferson's colleague, James Madison, who had as much or more to do with the writing and ratification of the Constitution as any man, was of a like persuasion, holding that the national Government lacked jurisdiction over religious matters, and lacked any "shadow of right to intermeddle" with it.

Madison's "Memorial and Remonstrance Against Religious Assessments" in 1785 is one of the great documents in the march of America toward freedom, although, sad to say, it is not among the most widely known. Madison wrote:

Religion is wholly exempt from the cognizance of civil society and since religion is exempt from the authority of the society at large, still less can it be subject to that of the legislative body whose jurisdiction is both derivative and limited.

We might heed particularly one of Madison's remonstrances:

The same authority which can force a citizen to contribute three pence only of his property for the support of any one establishment may force him to conform to any other establishment in all cases whatsoever.

Mr. PACKWOOD. Will the Senator yield?

Mr. HOLLINGS. No, I want to keep on. I am having a difficult time trying to keep all my thoughts together and cover all the points made. I want to be courteous, but I want to complete these points.

Mr. President, it might be well here to point out the test goes, not just to the simple wording of the first amendment but to the intent and the historical determination of the Congress and the courts and the people over the last 200 years. My friend comes in with an ingenious approach. He had a different one with respect to the bill on Friday when we last debated, but now on Monday, he says, "Aha, how do you answer this question: Do you favor it for higher education?" If you answer yes, you favor it for higher education, then ipso facto, bam-bam, you have to favor it for the public education system.

That is absolutely false. It is false in premise; it is false in law; it is false in principle, and it is easily distinguishable if they would only stop for a second, as the Court has had to deliberate over the many years. These distinguished jurists over the years have been trying to consider and determine, as they did for example in Plessy against Ferguson, cases before the Warren court, and many other cases.

We ought to see what Earl Warren, for example, said about public education.

(Mr. ABOUREZK assumed the chair.)

Mr. HOLLINGS. Chief Justice Warren, at a very important point in his Brown against the Board of Education, said:

Today education is perhaps the most important function of State and local governments.

He was discussing elementary and secondary education.

I refer to Mr. Kilpatrick who found no function at all. I refer to Justice after Justice and Congress after Congress, leader after leader, and they have all found that. But here on the floor it has been so twisted that the Senator from Louisiana comes on the floor and says there is no responsibility on the part of Government. Rather, he says, it is up to the individual citizen.

Think of that for a minute. Think of the compulsory attendance laws that we have in all the States. They do not wait until a citizen wakes up in the morning, or does not wake up in the morning, for the parent to perhaps say or perhaps not say that his children shall attend school. Our children of this audience today are required by law to attend elementary and secondary school. That is the fundamental policy.

What is the big difference when it comes to higher education? To go right down the list, we find, first the impressibility the courts refers to much like in the day care centers. The day care centers have children of tender years.

Second, we find diversity. The Senator could not find the diversity in a student body. I did serve on a Lutheran college board, and the Senator was asking about a Lutheran elementary school and a Lutheran college. The Senator could go to the Newberry College, where I served some 7 years. I have also served on the State university boards in my State. But I served on a private college board. In 1978, 30 percent of the students enrolled at Newberry College are Lutheran, and at Baptist College 60 percent are Baptist. You can go to Presbyterian college, or to Wofford, the Methodist school, and find about the same thing. If you look at the makeup of the student body in these schools of higher learning there is a tremendous diversity coming from all walks of life. You will not find that in the little parochial school of the Catholic Church.

This is not anti-Catholicism, but these are facts. Some church leaders speak of it as a mortal sin, in some parishes still today, if you do not send your child to a Catholic school in order to be taught and inculcated with the principles and faith of the Catholic dogma.

There we are. It is a religious belief. The overwhelming percentage of students attending the Catholic schools are made up of Catholics, at the elementary and secondary level, and this vast majority of little Catholic children are responding to the teaching of the Church. Whom are they taught by? The Senator cannot see the difference with a Lutheran college. In the Catholic school level, they are taught by the various priests and the nuns. Over the years that is the way they have taught their school.

I have a diversity of employees in my own Senate office. One young lady as we were talking about this last week said, "Well, I attended Catholic schools both at the elementary and secondary level. It was supposed to be integrated. But not one black child attended that school while I was in the Catholic school."

I can, if necessary, identify the school.

Of course, I know that has changed a little in some of the southeastern areas, particularly in my own backyard in South Carolina. They do have black students within the parochial schools. Generally, if we look at the diversity within the student body, the persons by whom they are taught, and the curriculum, I am confident, if you would go to the Lutheran parochial school at the elementary and secondary level, you will get a certain catechism, you will get a certain Bible teaching at that young age because that is how it is organized. But I am equally confident that you can go to Newberry College for 4 years and get a degree without ever attending a religious class.

I say to the Senator from New York, and I hope the microphone is open because I see him in the cloakroom and I want him to listen, there is a definite difference between the elementary and secondary level and the institutions of higher learning. That is why the Supreme Court, the very Court that he says has never had opportunity, had that opportunity—for example, with the GI bill of rights. They said the majority of students affected are nonchurch students: namely, 80 percent of the college students, or slightly over now—80 percent of those college students attend what might be termed a public college, a State university, local municipal schools

or otherwise, without church affiliation; 85 percent are nonchurch affiliated at the higher level, whereas over 85 percent at the elementary and secondary private level are church affiliated.

So the impact, then, of the assistance given by Congress at the higher level is not a major, majority impact on religion. It does not establish a religion. I would agree with my colleague that when they get to the tough decisions and have to split hairs between a textbook and a bus ride, between secular and sectarian aid and assistance, the Court is, amidst the greatest difficulty trying to interpret and trying to maintain the law and trying to maintain an integrity and an understanding which I think they have. And which, incidentally, the Senator from Oregon thinks they have and the Senator from New York thinks they have, because they lifted the Court language and put it in their bill. They lifted that Court language.

If you look in the bill itself, you will find a declaration of purpose at the very beginning. At last, we have the Senator from New York reading a few lawbooks, rather than psychiatry and Irish mythology. We are finally going to get him over to the Court.

Listen to one bright glow of sunshine that finally comes into the constitutional doctrine and law. He puts in his bill:

> The Congress further finds that the provision of such assistance in this matter fully complies with all provisions of the Constitution; that it does not constitute excessive governmental entanglement with religion;

That is one of the tests in Lemon against Kurtzman, coming right on down to the Nyquist situation, going right on down through Wolman against Walter. Last year. Oh, the Supreme Court has taken several opportunities to speak out and elaborate the three-part test. That was one of the parts. Here is what he puts in his bill:

> That it is wholly secular in purpose and that such assistance will neither advance nor hinder religion.

That is part No. 2. That is again Lemon against Kurtzman:

> The primary purpose of this act is to enhance equality of educational opportunity for all Americans at the schools and colleges of their choice.

That is the third part of the test: What is the intent of the legislative body?

Those are the three parts of the constitutional test that they have tried to bring into this particular doctrine. You do it at the level of higher education, the college level, which has been passed, oh, six times through this Congress.

I voted for it. There is a good chance of voting for it again if we can clear a way.

Why would I, 11 years ago, if you please, make a talk when I first came to the national Congress, why would I put in a tax tuition credit for higher education, but feel so strongly as I do in opposition to any kind of delving into the public schools? It is just exactly that: There should not be any entanglement, there should not be any involvement, there should not be any governmental delving into the matters of religion. If they can, on a categorical basis, receive assistance, then find that Congress that has allowed them to participate as students on the categorical basis. Mr. President, we have yet to give general assistance to the elementary and secondary schools, public schools, of America, much less private. We have, until 1965, to all intents and purposes, other than the grant provisions that I have indicated previously, left the schools alone. We have tried to say that this was the local and State governments responsibility. In Washington, all of those at the State level—State attorneys general, chief executives, the supreme courts at the State level and otherwise, including each U.S. Supreme Court, have, until this day, said "Mr. Congress, stay out of the nonpublic elementary and secondary schools."

And they say, "Wait a minute. What we want to do"—and they are talking about discrimination. Can you imagine that? The NAACP does not know anything about discrimination? The American Civil Liberties Union does not know anything about discrimination? The Urban League does not know anything about discrimination? The Council of Jewish Women does not know anything about discrimination? But they have all of a sudden found discrimination. They have found discrimination that they want stopped, so we will not "hog it all," as the Senator from Oregon says.

Mr. President, I quoted Madison and Jefferson, but these are not the isolated musings of a few philosophers or ivory tower theorists. They are the fundamental beliefs of those who founded our country and they bespeak the common wisdom of men who knew too well the long history of persecution and intolerance and trouble that almost inevitably were the handmaidens of the unions between church and state. They were determined that no such clouds would darken the American experiment.

The framework of our Government is, of course, the Constitution, an instrument of government founded four-square on the principle that government has no power to legislate in the area of religion. Just as it may not limit its free exercise, neither may it provide for its direct support. What was implicit in the Constitution as drafted at Philadelphia was soon thereafter made explicit by the first amendment.

Now, back to 1965. There we have a very interesting departure with respect to various happenings in education in America. In the midfifties, we had Sputnik. At the advent of Sputnik, there was a great unease and concern, upheaval and turmoil, relative to what we really were providing by way of scientific, engineering, and research talent and capability in this land of ours. Here were the Russians—we were always smarter than the Russians, we thought. We are smarter than the Germans, we are smarter than everybody. We are smarter than the British, we are smarter than the French. The Russians? Oh, my heavens, we are really smarter than that crowd of people.

But here they were, up in space, headed, if you please, to the Moon. And where were we? We were just coming home from Korea. That is where we were. And we were beginning to wonder, then, what about the educational system that had served us so well in World War II and in Korea? All of a sudden, technology was the concern.

We started emphasizing science and technology within the public school systems, within the universities and colleges and we were not going to be outscienced or outspaced or out-technologied by any Soviet people.

Then, when we finally got into Vietnam, by that time we were moving toward the Moon under the leadership of John F. Kennedy, and into space by our two distinguished colleagues, the Senator from Ohio, JOHN GLENN, and the Senator from New Mexico, JOHN SCHMITT. We then saw the young college students in the midsixties come in, and they were talking about Vietnam and being sent off.

They said it was unfair to be sent to this war, for various reasons. We had to look at them and agree with one premise. That was that it certainly was unfair for certain ones to be sent there fighting and getting killed and these others standing there demonstrating and breaking up the countryside and subjected to no law, with all the draft dodgers and everything else. We began to think of equal justice under law.

In 1965, we passed the Elementary and Secondary Education Act on the heels of the Civil Rights Act of 1964. When we enacted that particular statute, there came the locales in the States, with their tight fiscal situation, saying, "Wait a minute, you've now mandated to throw open all the school doors." We need help to implement this education for all policy.

Talking about "hogging it all," we will get around to whose responsibility is what, who keeps open doors, who closes the doors, who is discriminated against and who is not, and whether we throw open our doors to everyone.

They put these burdens on us, and how are we going to finance it?

The Congress then in its wisdom started enacting various statutes. It passed title I of the Elementary and Secondary School Act for the disadvantaged children. The private schools came along and said, "All right, if you're going to have that for disadvantaged children, we have disadvantaged children in our particular classrooms, so we would like to have those also."

So they participated also in the programs for disadvantaged children.

Then they had the bilingual requirement.

Then section 504, of the Vocational Rehabilitation Act for the handicapped. That one said they had to provide for the education of our handicapped students.

Thereupon, Congress started passing targeted, categorical grant money to individual students for a particular purpose, with no real impact on religion, because it went in a particular fashion for a particular purpose, and the majority were not handicapped or were not disadvantaged or were not bilingual.

It did not have that major impact and

went into the degree they were eligible for participation.

If a Catholic school came to me and said, "Look here, we are now, rather than just 98 percent Catholic," but here they are, every religion, no one having over 50 percent, but 98 percent are poor, they would qualify for the whole one.

Title IX of the Civil Rights Act of 1964 was sex discrimination. Title VI of the Civil Rights Act itself, that there be no discrimination as to race, creed, color, or national origin, and section 504 of the Vocational Rehabilitation Act for the handicapped.

Mr. President, this brings us to one of the major points in the entire debate, the idea of competitiveness. Let us fix in on that because the Senator from New York has been making graduation speeches. He has been writing various news articles. He has written Outlook articles in the newspaper.

In one particular article in the April Harpers magazine, Senator MOYNIHAN noted:

> A pervasive sense in American society that government has got to stop choking the life out of institutions that could be seen to compete with it.

Senator MOYNIHAN said:

> It is an issue that reflects a broad revival of interest in religious education, an upheaval in constitutional scholarship, and a pervasive sense in American society that Government has got to stop choking the life out of institutions that could be seen to compete with it.

Along that line, the Senator goes on and further says that the Federal Government has systematically organized its activities in ways that contribute to the decay of nonpublic education and he finds "the bureaucracy is never open and often truly dishonest."

Then he says that it is remarkable that the bureaucracy gets away with this.

So this monolithic, great Federal bureaucracy does not allow any competition.

The Senator from Oregon says, "Hog it all, they're going to hog it all."

That is what they are doing and we are here against Catholic bigotry. We will stop them here with our bill today.

More nonsense you have never heard in your whole lifetime. What really is the case with respect to public education, civil rights, and those trying to really create an equal educational opportunity?

Well, here they come. They come with all of these particular requirements that tie the hands behind the back of public education. Here is education tied one hand back here with title I, for the disadvantaged. See how many disadvantaged get into some of these private schools. They have to take an entrance exam to begin with. Do we think the disadvantaged can pass this entrance exam?

Come to some of the private schools here—and they are fine ones. I have had one daughter attend the Cathedral School in the city of Washington. As I stated earlier, I had another daughter graduate from Woodrow Wilson High School, a public high school.

But when asked about St. Alban's at that particular time, they said, "Well, yes, your boy can qualify, but what we are looking for are some to sing in the choir and we would like to know if he has got a good voice."

He did not have any voice. He sounded like his daddy. He could not sing. He does not get in St. Alban's. Who is discriminating? Who is hogging it all?

Look at some of the endowments of these schools. We go down that list, Phillips-Exeter has a $60 million endowment. Sixty million bucks written off the taxes.

Who is hogging what? Where is an endowment at Charleston High or Woodrow Wilson High? The endowment is in the good conscience of the public servants of America, and they will stand up and defend the public school system because they do not have any money.

Phillips Andover, 57 million bucks endowment. St. Paul, under the church schools, $46 million endowment.

Should I go down the entire list?

Sure, they have the money and they have the solution, no equal educational opportunity or title I for the disadvantaged, no title VI for the race discrimination, or title XI for sex discrimination. They can take who they want.

One school is there for boys. Do not send a girl there because that is a private school and the Congressman and the Senator and the President and the Supreme Court have nothing to do with that all-boy school, and should not have anything to do with it because it is private.

But do they not look around to finance it?

And when my daughter applies under title VI, title XI, she cannot come in. Do not tell me here about competition because the public schools of America allow both sexes, all sexes.

Well, there we are. They have another hand tied with title VI. That is title IX, as we were, on sex discrimination, but title VI, no discrimination on race, creed or color.

They were talking about the IRS; this is a great crowd from the Finance Committee to be talking about the IRS.

Look at the Civil Rights Commission report on the IRS and find out what kind of capability they have. We increased the Civil Rights Commission budget, the equal employment opportunity budget, and many others. I do not have the IRS budget, but I wish I did.

Ask Dr. Arthur Fleming, the head of the Civil Rights Commission, what he thinks about IRS and its enforcement of nondiscrimination, and then come around and tell me to compete. No blacks, no women, no disadvantaged, no handicapped—slam the door. Take the exam.

I know of one school that must have known something about Congress long before the public polls showed it. They said, "We have enough children of Congressmen and Senators now." Imagine that, I say to the Senator from New York: "We have enough children of Senators and Congressmen now." That is one private school here in the District of Columbia.

Oh, how grand. Who is hogging what? They must have had something against Congressmen and Senators. Is that the diversity they are talking about? They can pick and choose, just so they do not get any who are dumb or discipline problems or do not get any women in the boys' school or boys in the women's school, just so they do not get any handicapped—because "We don't have ramps and we don't have time to fool with those."

But they come on the floor of the U.S. Senate and talk about what? Competition. Here comes the Congress of the United States, on the one hand, with these titles requiring of public schools that which they cannot require of private schools. They are required of all public education. Here comes the U.S. Supreme Court enforcing those requirements.

The Lau decision on bilingual is another limb tied behind your back. If the little kid speaks Spanish, then under the law which Congress passed, you must have someone who speaks Spanish to teach the little Spanish-speaking child the various courses in English. First, teach the child English as best you can and have someone instruct him so the child can understand what is going on in public education, what is going on in his school, what the course is all about. Who makes that requirement? Congress does. It is a requirement of whom? It is made a requirement of the public schools of America, not the private schools. Oh, my; oh, me. They come around and start talking about competition. The hands of public education have been tied by the Court itself in the Lau decision on bilingual.

So they come now with Roy Innis, talking about equal educational opportunity. He had not read the decision.

Mr. President, he wrote on Friday about freedom of choice. It is very interesting that he wrote about freedom of choice, because that was the argument that the lawyers made in the Swann decision, which said that they had freedom of choice and could go to the neighborhood school.

Now comes a writer about competition and diversity, and Roy Innis comes out about an argument for better education, and he concludes—

> We believe it is time that the laws of this country give more than lip service to freedom of choice and quality education.

This is from CORE. I understand CORE has been taken over. It is not the CORE I knew when I was Governor of South Carolina, I can tell you that. This sounds more like me when I was Governor, and that is what the Court found against. The Court told us not to come around with this freedom of choice. The Court said we are not going to have a two-tiered school system. We are going to have an equal opportunity school, as Congress mandated in 1965.

So in the Swann case they knocked down freedom of choice. But here it raises its head on the floor of the U.S. Senate, with the charge that those who are opposing it are discriminating.

Here is what the distinguished Senator from Oregon said, and I wrote it down so I could get the exact quote. When he opened this morning, the Senator from Oregon said we have not discriminated against them simply because he chooses a private school—not dis-

criminated against them simply because he chooses a private school.

Mr. President, I ask unanimous consent that I may yield momentarily to the majority leader, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from South Carolina (Mr. HOLLINGS).

ORDER FOR CONSIDERATION TODAY OF H.R. 13468, D.C. APPROPRIATIONS BILL

Mr. ROBERT C. BYRD. Mr. President, this request has been cleared all around.

I ask unanimous consent that at 3 p.m., the Senate proceed to the consideration of Calendar No. 998, the D.C. appropriation bill; that the vote on final passage occur at 4 p.m.; that paragraph of rule XII be waived.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

TUITION TAX RELIEF ACT OF 1978

The Senate continued with the consideration of the bill.

Mr. HOLLINGS. Mr. President, I ask Senators to listen to these words, because this is very important.

As to the idea of who is competing, if anyone wants to know where the competition is, we will be glad to point it out.

The Catholic schools are not being closed. The enrollment decline in our parochial schools has bottomed out. It has bottomed out in the last 2 years. According to the most recent studies, in 1977 there was a slight increase. So they are not being forced out.

If anyone wants to know about competition, it is the public schools of America that have their doors open to diversity, to the bilingual, the handicapped, the equal opportunity schools.

If diversity means rich; if diversity means, yes, we have students who can study at the Sorbonne, in Paris; if diversity means we can slam the door in the face of those who are not quite prepared and who the public schools must take; if diversity means that if you are a discipline problem, let mama take care of you, if you can find your mother, but do not bother us because we do not have time for that, so go on over to the public school—if that is what diversity means, then someone has been busy changing definitions.

Look at the 107,000 public schools in America, with 16,000 elected and appointed school boards. Could there be a greater diversity in education, be it public or private? Can you find it? I do not know who serves on the boards; but if a poor person got on the board at Andover or Exeter, I would be so surprised I would call for an investigation. He would have sneaked in. If a discipline problem is on that board, then it is going to be a surprise to me.

The truth of it is that we should learn how diversity comes about. Let us see who has spoken about public education.

I quoted Chief Justice Warren. I also want to quote William O. Douglas:

> The public school was a true melting pot and the public school teacher was the leading architect of the new America that was being fashioned.

That is Justice Douglas talking about the early days and the contributions made by public education, public schools that supposedly are afraid of diversity. They are nothing but diversity. That is all they are.

Pointing the finger at who is diversity and who has a sameness, look at the boards of the school systems in the public sector in America and look at the boards of private education. If you want to find a sameness and a lack of diversity you can go to some of these schools. I do not mean to ridicule or disparage whatsoever, but obviously the parochials are in parochial garments. From their dress, from their appearance, from their religious beliefs and there is a high degree of uniformity and sameness.

The Lutheran school is organized on the basis of the Lutheran religion. The Catholic school on the basis of Catholic faith. But some of these others are organized on the basis of money. That is the way they are.

Let us find out what Lyndon Johnson said, and he said this at a college graduation at Brown University.

> At the desk where I sit I have learned one great truth. The answer for our national problems, the answer for all the problems of the world comes to a single word. That word is education. There is no substitute for education unless it is the American public school system.
>
> The American people amongst their notable contributions to the arts and crafts of civilization have insisted that education not be the prize possession of the few.

That is what President Johnson said. That is where our party stands.

But the Senator from New York wants to finance the few in the name of diversity and competition.

We can quote many others. There are many quotes here with respect to Hubert Humphrey and John Kennedy, but let me move on.

I am quoting now from Friday's statement by the Senator from Louisiana, the distinguished senior Senator, Senator LONG:

> The suggestion here is that we allow some tax consideration to help ease the burden on the taxpayer who is paying to educate his own children in addition to paying to educate those in the public schools. To me, that is simply a consideration of equity and justice. That citizen is paying to educate all children with his tax money generally. He is not benefiting from that.

I cannot imagine a statement with which I disagree more. I will read it again because he finds no benefit in public education. He finds equity and justice, and that is the cosponsors of this particular bill, and the distinguished doctor in education now is looking up. I have his attention, and will quote once again:

> The suggestion here is that we allow some tax consideration to help ease the burden on the taxpayer who is paying to educate his own children in addition to paying to educate those in the public schools. To me, that is simply a consideration of equity and justice. That citizen is paying to educate all children with his tax money generally. He is not benefiting from that.

Heavens. I do not know how we are going to prepare our society. I do not know how we will maintain a strong national defense. I do not know how we will have the enlightened leadership that goes into the competitive new world from this particular Senate unless we shed our minds, our souls, and our consciences of that kind of an approach about not beneting at all from public education.

He is saying, in effect, "Look, I pay taxes on my home, but I send my child to a private school. All the other children are going to the public school that I help finance. Since I am sending my child to the private school I am not benefiting."

There is no misunderstanding or play on words.

What is the overriding public purpose? Mr. President, I ask the Senator from Oregon, the Senator from New York, the Senator from Arizona, and others, what is the overriding public purpose, if we cannot find it in public education? California found it. California had a very interesting vote earlier this summer in proposition 13.

But I am going to tell Senators what California is saying. After voting proposition 13 and having a 10-percent diminution in property taxes over the State, all the local budgeters, city councilman, and county groups, reorganized and said: "Where are we going to cut?" They had the field polled in California, and they literally went down the list. I cannot remember them all, but the people said: "Cut out the parks. Maybe we do not need all of these parks. If you are going to have to economize, cut out some of the public employees. You have too many of them down there at city hall." And the people of California said: "Yes, you can cut back and hold off on water and sewer services and developments right now until we adjust. You can even cut the firemen and the police officers, law enforcement." But, lastly, they said: "Do not cut our public schools."

That is what they said on benefiting because they understood what the Senator from Louisiana failed to understand on the overriding public purposes of an informed, intelligent, and a literate society in which we live in these great United States of America.

Mr. President, I try to think of some of those public services. In my hometown we have a municipal airport. They have them in many other cities. We are all going down in December to Memphis where they have a little difficulty now. They have an airport there, a magnificent one, to say the least. There are municipal airports all over. Now, imagine a citizen coming and saying: "I do not fly on airplanes. In fact I am afraid to fly. Rather I take the train. And since I have taken the train it is only in equity and only in justice, since I get no advantage from the airplane, that you send me a check." Senator MOYNIHAN and Senator PACKWOOD, please, when you look out for those private schools with those

endowments, please also look out for those riding on the trains in America, send them a check, too.

Then we have in my town a golf course. Now that is taking it pretty far, but they have had a municipal golf course, and when I think of it, and I see Lee Elder. I do not believe Elder started off at, what is that place, Burning Tree. I take it he started off at a municipal golf course. But Lee Elder plays great. I do not play. I would like to try. But let us assume that those around here who do not play golf will say: "Then please figure, Senator from New York, in your little amendment that is going to bring equity and justice, because we are paying taxes now, and you have Federal Government golf courses. Let us take the money out since I do not play golf and send me a little check because I do not play golf or tennis. We have municipal tennis courts."

But there are many a couple who not only do not have children but who cannot send children to either the public school or the private school. You can send them two checks.

If they do not have any children at all, let us send them a check, not just tuition, send them a check under equity and justice. Let us do that. If the chairman of the Committee on Finance sees that that is due and owing, because you do not get a benefit, then let us also send them a little check because they do not play tennis, they do not play golf, they do not have children, and they do not fly on planes, and we can go right on down to every particular public service.

I know an editorial is bound to come on that saying "We do not need a U.S. Congress. If that crowd would only adjourn you might save the Republic."

But we have found, Mr. President, that the overriding public good is there. We all know John F. Kennedy, Lyndon Johnson, from Earl Warren to Justice Douglas, we know from the Urban League, NAACP, we know from Jefferson and Madison to Justice Powell, all point to one singular thing, they point out a great contribution, and I do not think that is going to be refuted, there is really no reason to argue, it is just to wake them up, to sober them up from this binge they are on, and say the great thing of value we have in our society is public education.

Mr. President, when they referred these bills to the Appropriations Committee and the Budget Committee, they were turned down on substance. That was Resolution 401, on the basis of which it was referred, but section 303 of the Budget Act says you cannot appropriate in ensuing years for which a concurrent resolution has not passed Congress. That was one reason. But the over-riding reason was to avoid these budget-busting outlays. Read the report of the Appropriations Committee, and we will get to that later in the debate. When they were turned down they took their 3946 that had two appealing elements, and they were the public and the poor, and they said, referring to public and nonpublic schools alike, with respect to this tax credit, "We are going to treat them all equally." But then they came back in and said, "Oh, no, if we have to economize, we know this ship is springing leaks, we have got to get this one to the shore, we have got to get this one into the dock of a majority vote in the U.S. Senate, so let us get rid of the public." I cannot imagine a public Senator rather than a private agent saying this, but here is a U.S. Senator coming and saying:

> We will get rid of the public on this score and we will get rid of the poor. There will be no refundable tax credit. We will take out the equity because, you know, we spent all winter long on TV and on college campuses and in national periodicals writing all about the equity, because we were thinking really not of Phillips Exeter, we were thinking of this poor little impoverished kid down in the District of Columbia. And believe it or not, we are really thinking of him, so we are going to send him a check.

But the public and the poor were the first to go.

Of course, it caused some rather embarrassing moments and, now the proverbial millionairie who pays no taxes will get his check, not for $500 but $250, for sending his kid to Choate, Andover, Phillips, Exeter, or Lawrenceville and those places. Is not that grand? When the ship sprung leaks, we found the true intent of this crowd that wants to talk about Catholic bigotry, discrimination, equity, justice, and fairness.

What are we going to do? We are going to force the little fellow down in the district, because it is coming from the tax funds of the United States, to pay for what? To pay for the school that will slam its door in his face, because there is just no way he can get in. If he is disadvantaged and unprepared, "We got an entrance exam. Get out." If he is bilingual, and we do not have time for bilingual professors in courses there, "This is a small private college, do you not understand? Get out."

I can list 100 other reasons why the private schools—and we will discuss that later this afternoon when we go into competition—do not have the money in many of the protest academies that have sprung up around the countryside. They do not have the money for a chemistry lab, a physics teacher, a gymnasium, or any of the other things. Yes, they would like this money to start taking action where they can start slamming the door, on the one hand, and building the gymnasium, on the other, with that fellow being taxed with no chance of getting in. As to Senator LONG's parent who is sending his child to private school, no one is keeping that child out of public school, and assuredly the higher public purpose, the public itself is benefiting therefrom.

But here they come now in the name of competition, in the name of diversity, talking, as they say, against discrimination, and they want to discriminatorily tax from the Federal level and say that this money goes to nothing but private schools that you cannot control, that you cannot serve on the board, that do not have to take these particular categories of American school children that the public schools do. And they say that is one thing we want to guarantee, that no public school will benefit. This is solely private. So, we are back down to the costs. You can argue the various costs, and we can give the figures of 128 and 60, and you add 250 to 60, and then you are over $300, and you are adding 50 percent or 100 percent more or 200 percent more and what you have done is in the first instance break the financial dam. Here everybody is going to balance the budget, as the Senate voted last week. They will have broken the financial dam with respect to the general appropriating of funds at the Federal level for education. All for what? For the private schools and none for the public schools. They wonder why the Budget Committee and they wonder why the Appropriations Committee turn it down.

Mr. President, we are up to a multibillion-dollar operation, and they know it, and they maneuver every kind of way they possibly can. They say now on refundability they will have a measure to have refundability and let the poor back in. Maybe if we talk long enough they will let the public back in. Maybe if we talk long enough they will let fiscal commonsense in and find out really how many billions they have in mind.

Mr. President, let us read one step further with respect to what was said by the Senator from Louisiana.

Because he went on, and he talked about a Federal judge friend. He was quoting the judge, as follows:

> He said, "Well now, keep in mind my duty as a Federal judge is one thing and my duty as a parent is something else."

For those who could not be here Friday, the distinguished Senator, who is chairman of the Finance Committee, was telling of a Federal judge who had ruled for integration and ruled for equal opportunity education, but had sent his child to a private school. The judge said:

> Well, now, keep in mind my duty as a Federal judge is one thing and my duty as a parent is something else.

Then the Senator from Louisiana, speaking for himself, said:

> His duty as a parent he felt was to see that his child got the best education that child's talents deserved.
>
> It seems to me that the final responsibility is not on the Government to see that the children are well-educated, even though it has a duty and I want it to do that. The final responsibility is on the parent, even if he has to do it in his own home, to see that the child receives the best education that parent can provide for his child.

Note an exception there. Mr. President. For the duty on the U.S. Senate and the duty on the National Government and the duty on the local and State governments, as is shown by very law of compulsory education and every other practice that we have had over 200 years of history, is to provide the best free public education that we possibly can provide

Now we are at a crossroad. I have some other points to elaborate on, but since I do have the attention of my distinguished friends here, I think we have reached a crossroad, and that is that all government has gotten too large and too expensive. All government is too big. It costs too much money, and we are trying to readjust and cut back in certain

places in the National Congress and at the local and State levels, by proposition 13 and everything else. And the question boils down to this: In the coalition, the Senator from Arkansas, the Senator from South Carolina, and many others interested in this have said we just do not have enough money for the so-called diverse system of private education or parochial education and public education. There just are not enough tax dollars to go around.

The teachers are being paid better now. When I first came to the legislature some years ago, the average pay for the teachers on a 9-month basis, was $1,296, a year. We have had to bring our teachers to a competitive level financially. They are reaching a level there that is near competition, but the fact of the matter is, even though South Carolina is at the top of the States in its measure of endeavor, the amount of State effort made in order to support public education, it is very difficult for a low per capita income State to compete within the public education system today.

That is where the competition is: Within public education. Make no mistake about that; do not go around with this hogwash on private education, that we owe a duty there, to parochial schools, that we start financing the church. That is their job, and it should remain their business.

But the competition now is out there to try to continue to pay these bills for all these public services and public education, just now reemerging after the fifties and the sixties and the discipline problems, with all the court decisions.

Go back to that Supreme Court decision that says you cannot cane that child again. I remember when I was in public school, they could make you hold out your hand and whack you several times, and more than that in other places, until the Supreme Court ruled otherwise. But we no longer can keep public education in competition on these discipline problems, and we are having problems in discipline in public education in America.

They say, "Give him his civil rights; you can't expel him, you can't hold him up, you have got to keep him in the school, you cannot use corporal punishment." There is one decision recently that you can use some corporal punishment. But we are coming to this particular era where bond issues are being voted down, and the signal to be given from the Federal level is very, very important at this time in education in America. Are we to give a signal that from here on, let us abandon the public schools?

You know the story about the Secretary of HEW going up to New York—oh, great old New York—and he went to go into a school there, a public school, and we have all learned in unique fashion that the public school really came from the private—that is a wonderful little piece of history, and I am enthralled with it, really—but when the Secretary of HEW goes into that school today, due to the decisions by Congress and the courts, everyone has to check his knife at the door, and they said:

Mr. Secretary, you are no exception. We search all the students and teachers for weapons, and we check them at the door, and when school is over we will reissue your weapon.

That is a sad thing, but it is something that we are having to contend with, by the policies set by the school boards that we have and the leadership we have in this country.

The American public does not approve of it. They are trying their dead level best to bring out the parents and have them participate, as in the private schools. I know one private school in the District of Columbia that requires its parents to come and spend one full day every month either in the library or in some activity. The public schools cannot do that. You can enforce what you wish at the private school level, and call it diversity at the end, and call it competition, but I think it is downright unfair. And you know it is unfair. The private schools can do that, but we cannot force the parents. You cannot do that in public education.

But we are working at it. We are improving the situation every day. We are paying our teachers more. We are coming out of this emphasis on peripheral type subjects. We are now going back to the basics, the reading, writing, and arithmetic in public education; and while we are about to do that, no one had any idea, because this did not come from education, that a little tack-on in the Finance Committee that had not cleared appropriations, had not cleared budget, and had not cleared judiciary, where they have a new judicial procedure, and that had not even cleared the Education and Human Resources Committee, could be seriously debated on the floor of the Senate, and almost succeed—and may do so, I do not know.

They say it is historic, and talk about party platforms. I say it is historic, but the platform is that of equity, justice, and the basic heritage of public education and the policy of unfettered religion in our country.

At that crossroad, are we going to try, now, to say we are going to finance these private schools with all these particular policies, that, as soon as you mention them, they want to say you are anti-religion, or anti-this or anti-that?

Necessarily we get rancor. One editorial will say I should speak more gently. But I waited. I waited for the Human Resources Committee. I waited on those in education to come forward, but I could see what was coming down, and I knew they had the decks stacked. I read and looked at that hearing. They had the kangaroo procedure: one Senator nods his head, and we know all they will do is run the witness through, and say, "Your time is up, get out," when the witness is unfavorable.

Then they wrote the report, if you please, in the Finance Committee, and you can hardly find the word education in it. The staff hardly knows anything about education. They did not tell you anything about its history. They only said how to get the money.

This is an adulteration of procedures within the Congress. I am not talking about constitutionality. I am talking about desirability. It is an undesirable procedure at best, to come along now and wonder why we are excited, disturbed, and upset. They can attempt this fundamental change at this particular level by sneaking it through without reference to any of these committees which have a responsibility for this area.

Can you imagine, a tuition tax credit? Poor people just do not pay any tuition. This is all premised upon paying something. They start right then disregarding the poor and trying to plead the case of the poor.

Then, if we are worried about the cost, get rid of that public crowd and just get our foot in the door in any way we possibly can and start generally financing public education.

I believe if we do this, if we cannot stop it, it goes forward. I am not talking about getting stopped at the Court, though I think it will, I really do. Let us assume for the purpose of argument that it does not stop it. I then find an America unlike John F. Kennedy, who said:

I believe in an America where the separation of church and state is absolute. I believe in an America where no person is taxed to support a church or church school.

Now we come in contrast with:

I believe in an America to tax Americans for religion and religious purposes. I believe in an America that will give a refundable tax credit to the rich, private schools in this country. I believe in an America, where Roy Anderson was talking about freedom of choice, with Senators talking about being disadvantaged, discriminated; where we can discriminately choose that private school and slam the door in our neighbor's face who has to pay those taxes.

Once we do that, it goes without saying that as Senators we will be called upon to answer, if nothing else, if we do create the inequity at least with respect to the principle, the financial inequity, and then on the one hand we come trying to impose public education to equal that of private education. It is a veritable civil war with various interest groups coming each year.

"Who are you up here for?"

"I am here for parochial schools."

"I am here for public schools."

"I am here for Andover-Exeter. We have to get our money."

We will have religious wars, a civil war on the floor of the Senate each year for more money, and then they will say it is our conscience with respect to civil rights. Then they will say, "You are not going to see those things. We are not going to let the IRS in."

"We are going to send in the Civil Rights Division," if the Civil Rights Division can come down without entanglement in the Catholic or parochial school.

The Court is saying so now, but let us assume that they get what they want, that they can get it by the courts. Then the Government will come down with the Civil Rights Commission and all the other particular commissions and start examining the various schools. Then they will have to take care, just as they do at the public level. The discipline problems will have to be accepted. Then we will find that, since it is public support they are asking for, we will have a publicly supported system of private and pa-

rochial schools and a publicly supported system of public schools. The public just does not have that much money. We just cannot and should not try to extend our financial capacity that way.

More than anything else, our leadership and interest in education should win support from the parents and those interested in education.

Many of the protest schools, and we will get into this particular subject later in the debate—are having a hard time at this particular juncture also, just like public schools are. Some have gone bankrupt. Some have been in existence for 10 years. Talk about the competition. The Catholic conference's own material refutes the premise that Protestant schools are losing enrollment. The Protestant schools in the Southland of America are breaking out like the measles.

Some years ago when we had Brown against the Board of Education, there were some 30 private schools in South Carolina and now there are over 200. Some of them have been in business now for 10 years and are falling on financial difficulties. They find they are not able to support excellence which people are demanding. There is a mix as you find it in public education and I find it in private education.

The Senator speaks with great conviction about this diversity and capacity in character, in excellence, you might say, in private schools. That is not uniform. I can show him many private schools that he would not apply to, where there is mediocrity at best.

Those types of schools are beginning to fall by the wayside because they cannot get an athletic program, a science program, or some of the other courses which should be taught. The teachers are not qualified.

There is another aspect in this particular measure that we have gotten into. The bill has the language "where certified." You say, "Well, if you do not have a system for certification at the State level, then compulsory education is mandated by the law."

All the States have compulsory education but there is no certification process. So what we are finding is that you are financing private schools that cannot be certified, and that cannot meet the test of public education, so you are getting private snobbery, discrimination, separatism, white flight schools that do not come up to the competition, if that is what you want to use. They are not competing with any educational system today.

And these are the schools to be financed without any kind of certification?

Where State certification laws are nonexistent, this measure would have you rely on compulsory attendance laws. You have not only the poor fellow being taxed where they are going to slam the door in his face, but you have us financing those things which cannot be certified or that can even compete with public education.

Mr. MOYNIHAN. Will the Senator yield for a brief question?

Mr. HOLLINGS. Yes.

Mr. MOYNIHAN. Is the Senator aware that the legislation before us requires that in order to qualify for a tuition tax credit the school involved, one, must be certified by the State school authorities, as is any school, such that if a school were not certified no credits would be available to a person attending it; and, second, that it must conform to the Internal Revenue Service standards for 501(c)(3) facilities which would be fully in accord with the civil rights statutes of the U.S. Government?

Mr. HOLLINGS. We are aware of the civil rights statutes, but what if a State does not have the certification process? Is it that no such schools could participate? Is that the point?

Mr. MOYNIHAN. Yes.

Mr. HOLLINGS. The Senator stated that if a State did not have the certification process then we would provide that if the compulsory education requirement was there the school would qualify for a tuition tax credit. Now, the Senator is saying that if you do not have a certification process for those private schools——

Mr. MOYNIHAN. The phrase is "applicable State law."

Mr. HOLLINGS. "Applicable State law" alluded to compulsory attendance, not to certification.

Mr. MOYNIHAN. No, sir.

Mr. HOLLINGS. That does refer to certification. I am going to take the Senator's word for that and answer it this way.

Mr. MOYNIHAN. I want not to mislead the Senator in the phrase "applicable State law," which includes certification and a whole range of things. I suppose it probably refers to the health and safety standards. May I just say that the provisions are very simple. I shall state them so that the Senator will understand them.

The legislation refers to schools which are "(A) operated in accordance with applicable State law, and (B) exempt from taxation under section 501(a) as an organization described in section 501(c)(3)."

Mr. HOLLINGS. Mr. President, if the distinguished Senator—let us talk about the applicable State law, because it was spelled out very clearly in the original bill, 3946, and, I think, in 2142, the Senator's original bill, the one of last year.

Has this been put in? I am not charging the Senator with trying to be devious here. What I am saying is that he has "applicable State law." He takes advantage of the Constitution on the one hand and says it is going to be constitutional; we have all these psychiatrists and everything else to get it by the constitutionality. But then he uses that phrase "applicable State law," and he knows and every lawyer knows that there is no certification process for these private schools. For example, in my State of South Carolina, we do not certify the private schools. The potential for entanglement and government involvement would be great and from all indications, this would be unconstitutional. So we do not certify them.

What he has in essence said is, "Hollings, if you ever were concerned, you had better get worried now."

Mr. PACKWOOD. Will the Senator yield?

Mr. HOLLINGS. In just a minute. "You had better get worried now because there is not any way that the private schools of South Carolina can benefit under this one."

Yes, sir, I yield.

Mr. PACKWOOD. Is the Senator suggesting, seriously suggesting, that if a State wants to require certification of private schools, it is unconstitutional to do so?

Mr. HOLLINGS. We can get into that. That is a later subject. I shall discuss constitutionality when you want to get into it with the courts.

Mr. PACKWOOD. What did the Senator just say?

Mr. HOLLINGS. I said exactly what I meant to say, that certification involves a constitutional question.

Mr. PACKWOOD. Of what?

Mr. HOLLINGS. Entanglement.

Mr. PACKWOOD. Certification is entanglement?

Mr. HOLLINGS. That is what the court found. Does the Senator want me

Mr. PACKWOOD. Yes; I do.

to read the citations?

Mr. HOLLINGS. Well, the Senator can amuse himself. What I am saying now, getting back to Senator Moynihan's point, is that they have to be certified, and the point I was making in debate here today is there is no certification process for the private schools by the government of South Carolina. As a result thereof, constitutional or otherwise, desirable or undesirable, there is not anything, I can tell you here and now, that the private school student can take under this particular bill. I think if I get that word around to numerous Senators, I might be able to pick up some votes, because there is no way under this trick law that the children in their States can possibly benefit under this particular measure. So there they are.

Mr. HATCH. Will the Senator yield?

Mr. HOLLINGS. No; I am not going to yield.

Mr. HATCH. Will the Senator yield for a unanimous-consent request?

Mr. HOLLINGS. I am glad to yield.

Mr. HATCH. I thank the Senator.

Mr. President, I ask unanimous consent that Jeanne Newman of my staff may be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Will the Senator yield for a brief question?

Mr. HOLLINGS. I yield to the Senator from New York.

Mr. MOYNIHAN. I am surprised to find that there is a State that has no certification provisions for nongovernment schools. Have they no compulsory attendance?

Mr. HOLLINGS. We have compulsory attendance.

Mr. MOYNIHAN. You have?

Mr. HOLLINGS. Right.

Mr. MOYNIHAN. That would apply.

Mr. HOLLINGS. Oh, we are back now to what I said a moment ago, 3946. That is how the Senator covered it on compulsory attendance. He sees compulsory attendance as equated with certification. That is not necessarily the case at all.

Mr. MOYNIHAN. I am only concerned for the people of South Carolina, not for the effect of this legislation. It seems to me that most States have certification proceedings, which, in effect, license a school as meeting certain standards.

Mr. HOLLINGS. I understand what the Senator is saying, but I know the result. What I am saying is that many of them could not be—I do not know what the proportion is. I think that is one of the things, also, that should be emphasized in the debate when we talk of private schools and private education.

I have, just at random in the last several weeks, talked to numerous educators, public and private. I have consulted with the Bishop of my own diocese, which is the Bishop of the State of South Carolina for the parochial schools.

I have consulted with the educators there, including the superintendent of education. I have consulted with leaders in education in this country. There is a paucity or lack of any kind of real information with respect to private education. The exact number of students, the courses taught, the exact impact that would be had would vary over the country, generally speaking, the certification process and everything else. It is not that the Senator has failed to ask, because I wondered, myself. I know of certain schools that are not certified and could not be and, in all candor it was then that I found out that South Carolina does not have a certification process for private schools. Upon graduation, the students can take an examination and get a State certificate, but the school itself is not certified.

Finally, Mr. President, let me answer one question. Then I shall yield the floor and come back to some of the other questions. We have covered, if you please, the difference with higher education. The court has said simply and solely that religious indoctrination is not a substantial purpose or activity of the church-related colleges—that is not difficult to find; whereas, it is with respect to the elementary and secondary schools.

Our amendment relates to elementary and secondary. It goes to the public school system; it goes to the financing of that public school system. We are having constraints fiscally over the country, and there have been demands made by the people. I shall never forget the former Senator from New York, Mr. Robert Kennedy, and I were debating the matter of public education, 10 years ago, with respect to revenue sharing. At the time, I sponsored revenue sharing, over 11 years ago, now. I said that the money should go for education, public education.

We discussed education in New York at that time. This has been a running matter of interest to this particular Senator. I am familiar with the Hudson Institute study made of the public school system in the city of New York. I have watched the public school system development. I remember well, and unfortunately, their demise. When I went to college, I would say the New York public school graduate was 2 years ahead of the public school graduate of the State of South Carolina when he got to college. In contrast, I say to the Senator, we are ahead now in our State when you bring those New York students down to college. It is a matter of competition.

It has been a moving, changing subject. But it is one that is fundamental to our society. We cannot, at this particular time in history, come in just casually with a tuition tax credit measure like this—just a little finance matter before the Finance Committee—give persons who attend private schools a little money for equity and justice and fairness. They are not benefiting from public education. And they do not worry about the fact that they are not complying with civil rights; they do not worry about the fact that they do not have to comply, as the Archer amendment said. They did put the language in on the House side. The Senators did have the decency to leave it out here. But let us talk about what the House passed with such sanctimony.

The House passed the Archer amendment and said, "Make no mistake, we have no idea of these private schools ever complying with the civil rights."

They are not an institution, if you please, for receiving public aid.

They said on page 11, if we look, that any educational institution which enrolls a student for whom a tax credit is claimed under this act shall not be considered to be the recipient of Federal assistance under this act.

That is what we want to do, get them out from under all these things that are pleaded. We cannot plead today what the House passed, on the one hand, and plead nondiscrimination, sex, race, religion-wise, rehabilitation, bilingual-wise, on the other hand, because that is what they meant when they passed that with the Archer amendment.

Mr. President, I see my distinguished colleague from Arkansas has been waiting here, so I yield the floor.

Mr. MOYNIHAN. Before the Senator does that, I do not wish to interfere with any comment the Senator from Arkansas might have, but there are several points in the Senator's speech this afternoon to which I would like to address myself. I wonder if the Senator from Arkansas would allow me 5 minutes in which to do so, and then I will yield to him.

Mr. HODGES. I am happy for the Senator from New York to take whatever time he feels necessary.

I yield the floor to him and simply let him——

Mr. MOYNIHAN. I will take a very short time. Then perhaps I will take 10 minutes, no more.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. MOYNIHAN. Mr. President, there are three points I wish to make and I will be succinct.

First, I would like to take exception in the most unrancorous way with the statement of the Senator from South Carolina that I was trying to avoid the third branch of Government.

I cannot see how any such characterization could be used with respect to someone who has spent most of a day and a half now saying that if there are those who question the constitutionality of this measure, surely there is only one way to settle the matter and that is the way Senator RIBICOFF stated in his opening address, which is to adopt the bill and then to let the Court decide.

Far from trying to avoid the Court, I am seeking the Court's help.

I have said that this was an issue on which there were differences of opinion, pervasive and widespread, and that only by going to the Court could we resolve it and avoid the rancor and difficulty of its continued irresolution.

I have said that whatever the Court decides will resolve the matter, certainly for such as I, and far from seeking to avoid the Court, we seek the decision of the Court.

I have described our measure as a petition of right. We ask the Court to judge.

Mr. HOLLINGS. Will the Senator yield?

Mr. MOYNIHAN. I am happy to yield for a question.

Mr. HOLLINGS. I am just referring to the initial finding the Senator makes. He makes a finding; rather than avoid them, he wants to overrule them. He finds the provisions are such substance in this matter, fully compromised with all provisions of the Constitution.

He made a finding on his own and then goes down that the Court said must be necessary in order to bolster that finding.

Mr. MOYNIHAN. May I say, we will be happy to amend that preamble if it troubles the Senator.

We seek the decision of the Court. We will accept it, whatever it may be.

We have a more than ordinary degree of confidence that it will accept this measure. But we seek the Court, we do not seek to avoid it.

Second, the Senator stated that there was not enough money to go around to provide public aid to these other institutions. I would like to make the simple point that if it is concern for public expenditure that animates anyone here—and I doubt it—they should face the elementary proposition that the 5 million students in nonpublic schools today constitute the equivalent expenditure of some $9 billion, for which we propose a tuition tax credit on an annual basis of less than half a million.

In my own city of New York, if just the Roman Catholic parochial schools were to close, we would be forced to add to the budget some $900 million a year.

Finally, I want to bring up a subject which is rather sensitive—only because it would not be understood if the matter were not raised.

I wish to make it clear that in no way do I suggest the Senator from South Carolina was in a position to know what he said was not, in fact, the case. But he did speak of parishes wherein it is to this day a mortal sin—he used the words "mortal sin"—in the Catholic Church not to send children to Catholic school.

Now, there is no reason for the Senator to have thought otherwise. Yet this is misinformation that many people share.

But I would say to my friend from

South Carolina gently and with no intention other than to set the record straight, that this is not so and can never have been the case.

It is a misreading that is not unusual. But it is not now and never has been a teaching of the Roman Catholic Church that it is a mortal sin not to send children to a Catholic school. It simply is not.

The Senator raised the question of religious bigotry in this matter, and I hope——

Mr. HOLLINGS. If the Senator will yield, it was the Senator from Oregon that talked about bigotry. I was following his comments.

Mr. MOYNIHAN. The Senator from Oregon spoke about bigotry in its historical context. Let me say that we do not come to this floor to discuss this matter. Little, if anything, turns on this question save some of the historical impedimenta that make the judicial decisions difficult today.

But I would like to suggest that there has been a lack of sensitivity on this subject in some areas, and that it has often been surprising. I provide as an example the decision in the Lemon against Kurtzman case of 1971, drafted by one of the most respected and beloved men ever to sit on the Supreme Court, Mr. Justice Douglas.

None would question his stature as a judicial scholar, as a liberal, as a libertarian, as an altogether admirable man.

But I would like to point out a passage in his opinion in that case where he states:

> We do not deal with evil teachers, but with zealous ones who may use any opportunity to indoctrinate a class.

Then he cites in a footnote a work by a Loraine Boettner, entitled, "Roman Catholicism," published in 1962 in Philadelphia by the Presbyterian and Reformed Publishing Co.

This is the passage which the Justice cites:

> In the parochial schools, Roman Catholic indoctrination is included in every subject. History, literature, geography, civics, and science are given a Roman Catholic slant. The whole education of the child is filled with propaganda. That, of course, is the very purpose of such schools, the very reason for going to all of the work and expense of maintaining a dual school system.
>
> Their purpose is not so much to educate but to indoctrinate and train, not to teach Scripture truths and Americanism but to make loyal Roman Catholics. The children are regimented and told what to wear, what to do and what to think.

Here we see a Justice of the Supreme Court who opposed aid to Catholic schools citing in evidence a passage which tells you all you need to know about the book from which it was derived—a passage which says these Roman Catholic schools do not teach Scripture truths. They are heretical schools. And what is their heresy? Their heresy is having fallen away, I fear, from the Church of Scotland. It is a wonderful book. I will cite some other passages.

The Justice cites the work generally. On page 7 he says:

> The fact is that through these ages and in her official capacity the Roman Church has been guilty of the most atrocious crimes, practiced in the name of religion, including murder, robbery, persecution of all kinds, bribery, fraud, deception, and, practically every other crime known to man. Such crimes have been practiced not merely by church members, but by Popes, Cardinals, Bishops, and priests who, as a study of Church history will show, undeniably were evil men.

At another point he says:

> We must . . . be prepared to engage in controversy. We possess a priceless heritage in Protestant America . . . something God has given us, not something formulated in the minds of men. The Scriptures exhort us to "contend earnestly for the faith which was once for all delivered unto the saints." (Jude 3). We must carry the battle to our adversaries. Not one Roman Catholic in a hundred, priest or layman, knows the true story of his own church. They are forbidden to read the truth. What they are given under the name of "Catholic truth" is a gross perversion of theology, church history, science, and secular history. (pp. 450–51.)

At another point in this book, the author cited by Justice Douglas questions whether Catholic citizens should be allowed to teach in any kind of school.

There is no harm in books like this. They are not, indeed, without their charm. But it seems scarcely to serve the purpose of secularism to say that the real failing of the Roman Catholic schools is that they do not teach Scripture truths. What this gentleman wants is the true truth taught, not the false truth.

Here we see a Justice of the Supreme Court citing this as sociological, educational information.

I suggest that there is an insensitivity associated with such citations and that it portrays a mind-set which has been insensitive for a very long time. It would be inconceivable to my mind that a comparable citation from the Ku Klux Klan or the Protocols of the Elders of Zion would pass unremarked in the public press.

I would not mind had Justice Douglas cited a determined secularist saying that there should be no religious teaching in school, but the Justice cited the passage that said the Catholic schools teach the wrong religion. No doubt that is the view of many people, but it scarcely is the stuff of a Supreme Court decision.

Mr. HOLLINGS. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield for a question.

Mr. HOLLINGS. The Senator from New York, of course, is not associating me with that. is he?

Mr. MOYNIHAN. No; I am not.

Mr. HOLLINGS. I am not an authority on the Catholic religion, but I do not speak lightly. I could not tell what the up-to-date practices are, because in the Catholic Church, as in other churches, there have been changes.

Mr. MOYNIHAN. There have been changes.

Mr. HOLLINGS. With respect to my comment about mortal sin, I will just use the bishop's name. His name is John Joseph Russell, so the Senator will know from whence I speak. Different bishops have made different findings. That was his finding at that particular time. I can elaborate further, but I do not think it assists the argument.

I would not want a newspaper reporter or anyone else to think I had gotten into a religious debate and that I had spoken lightly or had made a mistake. If I make a mistake, I will be glad to say so. I might just as well use the gentleman's name, so the Senator will know that I was not just talking casually.

Mr. MOYNIHAN. I accept that.

Mr. HOLLINGS. I had nothing to do with Lemon against Kurtzman.

Mr. MOYNIHAN. Nothing whatever.

I only say it was a not uncommon perception. It happens not to have been so, and there you have it. But it is the case that a good deal of our present situation derives from a certain religious animosity of the 19th century and more generalized antireligious—or simply prosecular—sentiments of the 20th century.

The present ones are dominant views. They are dominant views, but they are not universal ones.

The point is that a competent democracy makes provisions for pluralism. It makes allowances for those who march to a different drummer. It will obtain more conformity if it does not insist upon it; if it allows persons to provide a special experience for their children—be it in an Amish school in Pennsylvania, or in a Hassidic school in Crown Heights, or in the Virginia Military Institute, which is a special school—in response to the personal judgment about the formation of children that parents will have. This individuality is legitimate, acceptable, and not to be discouraged.

I make this point to those of my friends who share my judgment that the public schools are the natural vehicle for the education of the great majority of our students: To the degree that alternate arrangements—parallel but alternate—are available, there will be less dispute within the public school system as one set of opinions or the other seeks to attain some measure of advantage. This always has been the case.

In the beginning, the difficulty in public schools turned on which Bible would be used. We have also had cases in which public schools have been roiled up in profound battle over which theory of evolution should be used.

I often have thought that nobody can be so sure of anything as to insist upon any level of orthodoxy with respect to education. For what it is worth, I look back to the Scopes trial, in which the defender of the Biblical view of evolution was subjected to scorn and ridicule—that he should be so ignorant of the theories of Charles Darwin.

One need not be any more than an interested layman to know that, after the passage of a half century, those confident assertions have become increasingly quaint as new doctrines become law.

No great harm has ever been done in permitting orthodox beliefs to be challenged from the traditional points of view as well as from the radical ones.

A great deal more knowledge and a great deal more opinion is circular than perhaps we choose to think, and what

seems outmoded today frequently becomes novel on the morrow.

But the point I wish to make to the Senator from South Carolina in response to his capable and sustained argument is as follows:

If we are wrong in our beliefs about the constitutionality of our proposal, there is only one way for him to establish that fact finally, and that is to enable us to take the issue to the Supreme Court. If he is not willing to do it, then I suggest he is not confident in his position.

Anyone who says that this is not a measure that would pass the scrutiny of the court, but declines to allow that scrutiny to be brought to bear is, in my opinion, suggesting less than complete confidence in the belief he asserts.

We are confronted here with a situation in which the court has solemnly told us that it is constitutional to provide Federal aid to college freshmen but not to high school seniors.

The Attorney General has said that one-half of this legislation is clearly constitutional and the other and quite distorted version of the remainder is not.

That is not an argument that settles anything. It does, however, clearly suggest that it is time for the court to be given a look at the subject in its entirety.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield to the Senator from Oregon.

Mr. PACKWOOD. Again I might add it was perfectly permissible to send your child from zero to six to the Catholic, the Jewish, or the Lutheran day school run in the basement of the church and take a credit off your income tax, and that is constitutional.

Mr. MOYNIHAN. That is constitutional.

The field is in chaos.

I cited Philip Kurland this morning to the effect that anyone who says there is constitutional certainty in these matters is deluding or deluded. I have not heard anyone say otherwise.

Mr. PACKWOOD. Again we should put into the RECORD the constitutional experts because time and time again we are being hit by the argument of constitutionality, and the Senator from South Carolina in his press conference said every constitutional expert agrees this is unconstitutional.

The telegram I read last Friday and will read again is signed by Robert H. Bork, Yale University Law School; Prof. Gerhard Casper, University of Chicago Law School; Wilber Katz, University of Wisconsin Law School; Philip Kurland, University of Chicago Law School; Victor Rosenblum, Northwestern University Law School; Antonian Scalia, University of Chicago Law School; and Ralph Winter, Jr., Yale Law School; all of whom say that this bill is probably constitutional but certainly arguably constitutional and that we should not use the argument of unconstitutionality to defer action in this legislative body.

Mr. HODGES. Mr. President, will the Senator yield for a questions?

Mr. PACKWOOD. I yield.

Mr. MOYNIHAN. I believe I have the floor.

The PRESIDING OFFICER. The Senator from New York still has the floor.

Mr. MOYNIHAN. I am happy to yield to the Senator from Arkansas to whom I offered to turn over the floor. I talked longer than perhaps I should have.

Mr. HODGES. And I disappeared.

The PRESIDING OFFICER. The Chair understands the Senator from New York is yielding for a question or the floor?

Mr. MOYNIHAN. For a question.

Mr. HODGES. These constitutional scholars which were just mentioned were also mentioned Friday. Is it not correct that the flag which was run up and they saluted was quite a different flag than the bill which is before us now and in some important constitutional ways? That bill had refundable credits. As to that bill, the one they saluted so nicely, actually they were very uncertain about that bill, but it also had in it public schools; did it not?

Mr. PACKWOOD. That is correct.

Mr. HODGES. And, therefore, it is not fair to these men, is it, to have them passing on a bill which is no longer in existence? As a matter of fact, the bill number they were writing about is not this bill.

Mr. PACKWOOD. I read another telegram which arrived this morning:

> We understand that question has been raised whether our views regarding the constitutionality of tuition tax credit legislation in the form of S. 2142, expressed in a mailgram to Senator HAYAKAWA dated April 3, 1978, apply likewise to the House-passed tuition tax credit bill now under consideration by the Senate, H.R. 12050. They assuredly do.
>
> The last signatory of that earlier mailgram, Prof. Gerhard Casper, is out of the country and could not be reach for comment.

All the same gentlemen signed that telegram concerning this bill we are now considering.

Mr. HODGES. Is there no difference between the House bill and the one the Senators now propose?

Mr. PACKWOOD. They are referring to the one before us. The House bill that is currently before us is what the telegram relates to.

Mr. HODGES. I see.

Mr. MOYNIHAN. I plead with the Senator from Arkansas, whatever else his views on this matter may be, to know that we are not trying to fool anyone here. We have been as open as I think we know how to be, and willing to accept the fact that there will be honest differences of opinion among us. We have not attempted to belittle or disparage such differences. We have said, to the contrary, that we think they can best be settled, and that the only place where they can finally be settled is in the court. But I also plead with my friend.

Mr. HODGES. Mr. President, will the Senator yield for a question at that point?

Mr. MOYNIHAN. I yield.

Mr. HODGES. If the Senators are so convinced of the constitutionality of tuition tax credit to elementary and secondary education, let us divide the bill and vote separately and send them to the Court separately. Are the Senators willing to do that?

Mr. MOYNIHAN. No; the Senators are willing because the Court has pronounced a general test which requires that the purpose be general—a three-part test of which the most important part is that the purpose be general—and we have attempted to meet the test. There is no reason why we should not. We are confident that just as the House of Representatives has passed a bill substantially equivalent to this one, confident of its constitutionality, we propose it confident of its constitutionality.

Mr. HODGES. If the Senator is so confident, let us separate it. I suggest again, as I did this morning, that the Senator is taking a white horse of college tax credits and putting the masked rider on it and trying to lob it through.

Mr. MOYNIHAN. The measure has a separability clause. The measure contemplates the possibility of the Court declaring one part constitutional and another part, a separable part, not acceptable.

We are willing to go to the Court, and we are willing to accept its decision.

Who is not? Who are those who will not accept the judgment of the Court? Why will they not? On the question of bona fides with respect to constitutionality, we stand here saying that we believe our case and wish nothing more than to submit it to the highest tribunal, and that we will abide by its decision. What more can we say? Who does not want to have that final decision?

When he opened this debate on Friday morning, the Senator from Connecticut, the senior sponsor of our legislation, the first Democrat Secretary of HEW said the Supreme Court does not issue advisory opinions.

Mr. HODGES. Mr. President, will the Senator yield for a question?

Mr. MOYNIHAN. I am happy to yield.

Mr. HODGES. The Senator makes a great virtue out of submitting it to the Supreme Court and then says, "We are willing to abide by its decision." Will the Senator indicate to me what decision of the Supreme Court he will not abide by, as if there were any he will not abide by?

Mr. MOYNIHAN. No, no; unfair, unfair. This Senator said repeatedly this morning in this Chamber, and I believe the Senator heard it, that we do not owe the Supreme Court the suspension of our critical faculties. What we owe it is obedience to its final decisions. This Senator has said that over and over again. We will obey the Court.

The Court can only function if people with different opinions come before it. That is the point. We say we will put this matter to the highest tribunal and abide by its decision. Of course we will abide by the decision. And if that is not a fair proposition, if that does not indicate an open willingness to see the matter resolved, those who will not let us go to court ask for the social conflict and division that will attend the persistence of this unresolved issue.

Why can we not see the wisdom of getting a final and conclusive decision? Why can we not see that there are more than enough issues that divide us and more than enough problems that prove intractable here before us?

Here in our hands is the chance to resolve an issue that has been with us quite literally since 1876.

Mr. HODGES. Mr. President, will the Senator yield for 1 minute of rebuttal?

Mr. MOYNIHAN. The Senator is happy to yield the floor, not unaware that there is a minute left.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. President, we have heard a lot on this floor in the last days about the separation.

The PRESIDING OFFICER. Will the Senator desist a moment until the Senate is in order? Conversations must cease. Staff members will please remove themselves from the floor. The Senator from Arizona.

Mr. GOLDWATER. We have heard a lot in the last days about the separation of church and state, and I have listened to a lot of comment on this over the weekend.

Mr. President, I asked HEW to compile a list for me of every piece of property, anything of value, that has been given by the Federal Government to any church.

I ask unanimous consent that that updated information be printed in the RECORD at this point in by remarks, and I suggest that my colleagues look at this.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[1] Dates prior to Jan. 1, 1950, indicate cases processed by W.A.A., our predecessor agency. All others were processed by DHEW, which has the compliance responsibility for all cases.

Mr. GOLDWATER. I do not think there is a State in the Union or a denomination that has not received some of this literally hundreds of millions of dollars that the Federal Government has given to churches in the last 30 years.

DISTRICT OF COLUMBIA APPROPRIATIONS, 1979

The PRESIDING OFFICER. Under the previous order, the hour of 3 o'clock having arrived, the clerk will report H.R. 13468 by title.

The assistant legislative clerk read as follows:

Calendar 998, H.R. 13468, an act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Appropriations with amendments.

Mr. MOYNIHAN. Mr. President, I suggest the absence of a quorum and request that the time be equally divided on the bill.

Mr. ROBERT C. BYRD. Mr. President, will the Senator withhold his suggestion?

Mr. MOYNIHAN. I withhold my suggestion.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. I ask unanimous consent that the rollcall vote on the passage of the D.C. appropriations bill be a 25-minute rollcall; that it not exceed 25 minutes. This will accommodate some Senators who have to go to the White House and some Senators who are coming in.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. It will begin at 4 o'clock. It need not be 25 minutes if all Senators are here, but it will have that outside limit on it.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MOYNIHAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will proceed to call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SARBANES). Without objection, it is so ordered.

Mr. LEAHY. Mr. President, we have before us the appropriations bill for the District of Columbia, and I would like to thank the majority leader, Senator ROBERT C. BYRD, for his efforts last Friday to bring this bill to the floor of the Senate.

In that regard, I would also like to thank the minority leader, Senator BAKER, for his efforts in assisting in this regard.

I know I remained and changed my original plans to leave town, hoping they might be successful, knowing how hard they were working on it, and I share the leaders' interest in trying to move this bill.

It has been carefully worked out with Senator MATHIAS, the ranking minority member. It is a bill which has no matters of great controversy involved. In fact, I will point out that it passed the Appropriations Subcommittee unanimously, and it passed the full committee unanimously.

I also thank the majority leader for his generous and kind remarks of appreciation for the work that I and the other members of the subcommittee have done in what some people describe as a "thankless job."

I might point out, however, that it is a job that would be impossible to do without the help of Senator MATHIAS who, as I have stated on many occasions previously, has far more expertise in this area than I have, and I also thank Senator BUMPERS, Senator DECONCINI, and Senator WEICKER; and as for the staff, Mike Hall, our permanent staff counsel; Marty Franks, and Bob Paquin, of my staff.

This week, Thursday, the House goes out in recess. There had been hope, I had hoped, to schedule a conference with the House on the D.C. appropriations bill this week. Had we been more successful in bringing this to the floor last Friday we almost certainly would have had a conference this week. We now are no longer certain that the conference can be arranged with the House for this week. We may have to wait until after the Labor Day recess, so the bill may be slowed down almost a month.

I do want to thank the distinguished majority leader and the distinguished minority leader for their excellent and generous efforts to help us move the D.C. appropriations bill along.

I would hope in that regard, however, that we might meet in conference shortly after we come back from Labor Day. I do not think anyone in his right mind thinks we will actually recess at the time we have been told by the House and Senate, that is, by October 7. I think we all realize that it will be as ethereal a recess date as the October 10 recess date last year, which I think dragged on until December 15. But there are those who are looking forward to the possibility. I think Jimmy the Greek has given 5-to-4 odds that we will be out before Christmas Eve.

I am pleased to have the opportunity to bring to the floor the committee's recommendations on the District of Columbia Appropriations Act for fiscal year 1979. We held a day of overview hearings on February 1, and we held 6 days of hearings in May. On July 19, we held additional hearings to consider the fiscal year 1978 supplemental request, and by now I have read dozens of memos and hundreds of pages of materials regarding this budget.

All of the items recommended in the bill have been gone over at great length before the subcommittee and before full Appropriations Committee. I would like to reemphasize one or two things that have been highlighted at the subcommittee level and at the full committee level. One is that we have based this budget upon anticipated local revenues being raised in the city. Since becoming chairman of the District of Columbia Appropriations Subcommittee, I have found out that each time we made these projections of local revenues, they have actually turned out to be lower. This year, when we had the delays in conference committee for awhile because of a controversy of sorts that had grown up over the Convention Center, we found out that two things happened: First, the city made more money than we had anticipated; and second, there turned out to be less money needed than previously projected because the city remained on the continuing resolution for several months. There may be a moral there; I am not sure.

But the point of the whole thing, Mr. President, is that we have based this balanced budget—and it is indeed a balanced budget—on projected revenues from the city. But I have stated in subcommittee and again in committee that if our estimates of local revenues prove wrong, I will urge the subcommittee and the committee to increase the Federal payment to make up the difference, if indeed the city makes a good faith effort to collect these revenues, and I think they can easily do so, but if they make a good faith effort to collect them and are unable to do so, certainly I would urge a larger Federal payment to make up the difference. I have heard concern expressed by some people in city hall; it is obvious that they have not taken the time to listen to the fact that we had made that commitment earlier. So I just thought I would repeat it here today.

On July 19 the committee held an additional hearing to consider the fiscal year 1978 supplemental request and the fiscal year 1979 amendment request that was transmitted to the Congress on July 11. The late submission of the city's additional requirements is a matter that delayed our action on the bill this year as the House and the Senate waited the additional time in order to learn the city's full request for fiscal year 1979. As you know, Mr. President, the lateness of the city's budget transmittal to the Congress has been a problem for the last 4 years. In order to help remedy the situation, one of the recommendations that we are making to the Senate is to establish a February 1 transmittal due date for the submission of the city's budget to Congress. This recommendation is one that also has been made by the House and it is a reform that is badly needed.

The District of Columbia budget request for fiscal year 1979 is $1,428,442,000, of which $1,298,652,000 is for operating expenses and the remaining $129,790,000 is for capital improvements. The committee has also considered a 1978 supplemental request which totaled $27,406,100 and a 1979 budget amendment request which totaled $31,813,300. The committee analyzed these requests in great detail and the budget we are recommending is fully balanced and provides full funding for all the basic city needs. I would also like to report that while the target ceiling in the first concurrent resolution for budget authority for the District of Columbia was $500 million, the total in Federal funds recommended by the committee is $258.2 million or $241.8 million less than the budget ceiling.

There are two major reasons why the committee is able to recommend a Federal funds total less than the target ceiling. First, instead of providing additional funds for loans for capital projects, the city is able to fund its needs this year with cash balances remaining from previous years due to the delay in a number of capital projects. The second reason that permits us to recommend a Federal funds total which is less than the ceiling is that large increases in local revenues make it possible to reduce the Federal payment. These actions can be taken while providing for all the basic needs of the city and doing so with a fully balanced budget.

For fiscal year 1979 the committee recommends a total budget of $1,364,781,500, of which $1,287,291,500 is for operating expenses and $77,490,000 is for the capital improvements program. This represents an increase of $47,841,700 over the level provided last year for operating expenses and a decrease of $51,683,400 over the level provided for the capital outlay program for a net decrease of $3,841,700 compared with the level provided in fiscal year 1978. The recommendations for the capital outlay program can be reduced primarily because of the delay in the convention center project. The committee also recommends a total of $21,930,100 for the 1978 supplemental request which is $5,476,000 less than requested. The recommendations for the 1978 supplemental provide the city with the additional funds needed to pay bills that have come due because of unforeseeable and unexpected circumstances. Due to the lateness of fiscal year 1978, the committee does not recommend the initiation of any new programs or funds to provide for new positions. This permits us to reduce the supplemental request. The city has requested $31,813,300 for a 1979 amendment and the committee recommends that we defer consideration of this request until later in the year after we have received the city's additional supplemental request for 1979 and until after the House has had the

opportunity to hold hearings on these requests and to give them consideration.

Instead of taking the Senate's time in going over each and every detail of the bill, I would like to provide a brief summary of some of the highlights. The Federal payment in fiscal year 1978 is $276 million. The committee is recommending a decrease in the Federal payment to provide the city with a Federal payment in fiscal year 1979 of $238 million. This reduction is made possible because of several increases in local revenues. The subcommittee has given its commitment to the city that if the local revenue projections do not hold true we will assist them in obtaining an additional Federal payment to fund needed programs.

The most notable of these local revenue increases results from approval of the city's request for a new parking enforcement program which will raise an additional $17,450,000 in 1979. This and several other recommendations by the committee, all based on advice and projections from the city, provide for a total increase of $42,816,000 in local revenues. This increase in the local revenues permits a reduction in the Federal payment while at the same time it permits us to recommend several funding increases over the level recommended by the House for needed program improvements. I would like to touch briefly on several of these items of increase recommended by the committee.

First, $9.9 million in Federal funds would be included so that the city will have adequate funds to retire the R. F. K. Stadium bonds that come due on December 1, 1979. The Congress provided $9.9 million in the 1978 bill for this purpose and this additional money will provide the full amount that is required to retire the bonds which come due on December 1, 1979.

Also, an additional $1.9 million would be provided to the public schools for the maintenance of school facilities. This is the amount requested by the School Board, but denied later in the process by the Mayor and the City Council. The committee has long urged the schools to spend more on the maintenance of its facilities some of which are falling rapidly into disrepair.

These actions would also provide an additional $7.4 million over the amount recommended by the House to implement the parking enforcement program that I discussed earlier.

The committee has also recommended additional funding for the Advisory Neighborhood Commissions program and for the D.C. Commission on Arts and Humanities. The committee has recommended that we provide an additional $250,000 over the House mark for the ANC program and provide the full $100,000 requested for grant funds for the Commission on the Arts and Humanities.

An additional major item in this bill is the several recommended prohibitions on the use of D.C. funds with regard to the CETA program. The purpose of these prohibitions are to help insure that the city uses the CETA program to meet the program's primary purpose of providing training and temporary employment for unemployed individuals instead of using the program in several unauthorized ways as detailed recently in the local press.

Finally, I would like to touch on two items that the committee is in substantial agreement on with the House. The first action relates to the city's police and fire retirement program which has been referred to by Senator EAGLETON as the "premier rip-off system in the United States." The looseness of the retirement and disability program has resulted in almost 80 percent of the police and fire retirees being on 100-percent tax-free disability pensions. The committee has concurred in the House action of reducing the funds available to pay disability pensions by $10 million and has directed the city to initiate the needed administrative reforms to permit this funding reduction.

Second, there is the matter of the welfare program in the District of Columbia which now has an error rate of 42.7 percent. In spite of the additional positions we have given the city to focus on reaccreditation and to generally assist in reducing this high error rate which wastes over $15 million a year, the error rate has continued to grow each year. The House has denied the city's request for an additional $5,057,100 for increases in the welfare program and for funds requested to provide for the 1979 cost-of-living adjustments to program recipients. The committee has essentially concurred with the action of the House. At the same time Senate Report 95–1076 directs the city to provide all eligible individuals with the full level of benefits and it directs the city to reduce the error rate to make funds available to pay the cost-of-living adjustment. It seems to me that since the Congress provided the city with 180 positions in the 1978 bill to attack this error rate problem that substantial improvements should be made in 1979 making additional funds available to be used for full funding of the program and for the provision of a cost-of-living adjustment to program recipients as well.

Mr. President, I would like to thank Senator MATHIAS, the ranking minority member of the subcommittee, for his excellent assistance and support in the preparation of these recommendations.

Mr. President I ask unanimous consent that a table be printed in the RECORD at this point which details the committee's recommendations.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Agency and item	New budget (obligational) authority, fiscal year 1978	Budget estimates of new (obligational) authority, fiscal years 1978 and 1979	New budget (obligational) authority recommended in House bill	New budget (obligational) authority recommended by the Senate committee	Senate committee recommendation compared with—		
					New budget (obligational) authority, fiscal year 1978	Budget estimates of new (obligational) authority, fiscal years 1978 and 1979	House allowance

Mr. LEAHY. Mr. President, I yield to the ranking minority member for any comments that he might have to make. As I said earlier, Senator MATHIAS is really the brains of the committee, the one who has the expertise, and I am delighted that we were able to show the unanimity we did show on the matter this year.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. MATHIAS. Mr. President, I ask unanimous consent that Michael Shorr of the staff of the distinguished senior Senator from New York (Mr. JAVITS) may be granted the privilege of the floor during the consideration of all matters pertaining to the D.C. appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Will the Senator from Maryland yield for one other procedural point I overlooked?

Mr. MATHIAS. Surely.

Mr. LEAHY. Mr. President, I make the usual unanimous-consent request that the committee amendments be agreed to en bloc, and that the bill as thus amended be considered as original text for the purpose of further amendment, provided that no point of order shall be regarded to have been waived by reason of agreement to this request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amendments agreed to en bloc are as follows:

On page 2, line 25, strike "$264,000,000" and insert "$238,000,000";

On page 3, line 8, after "1611)" insert a colon and the following:

Provided, That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, $9,900,000, without fiscal year limitation, for the purposes of the sinking fund established by section 6(a) of the District of Columbia Stadium Act of 1957, as amended

On page 3, line 19, strike "$93,718,500" and insert "$95,133,100";

On page 5, beginning with line 1, insert the following:

For an additional amount for "General operating expenses", fiscal year 1978, $2,719,400, including payments made pursuant to the Water and Sewer Repair and Compensation Act of 1976, D.C. Law 1-98, effective March 29, 1977.

On page 5, line 1, strike "$266,473,800" and insert "$265,961,200";

On page 6, beginning with line 4, insert the following:

For an additional amount for "Public Safety", fiscal year 1978, $889,700.

On page 6, line 8, strike "$282,201,200" and insert "$283,605,400";

On page 6, line 13, strike "$216,838,600" and insert "$218,242,800";

On page 7, line 3, strike "$5,392,000" and insert "$7,257,800";

On page 7, beginning with line 6, insert the following:

For an additional amount for "Education", fiscal year 1978, $68,600.

On page 7, beginning with line 11, insert the following:

For an additional amount for "Recreation", fiscal year 1978, $58,000.

On page 7, line 16, strike "$284,767,700" and insert "$283,321,300";

On page 8, beginning with line 9, insert the following:

For an adidtional amount for "Human resources", fiscal year 1978, $8,086,000.

On page 8, line 15, strike "$71,380,900" and insert "$78,735,200";

On page 8, beginning with line 21, insert the following:

For an additional amount for "Transportation", fiscal year 1978, $1,082,200: *Provided further*, That authorization is hereby provided to the government of the District of Columbia to fund the additional cost of snow and ice removal out of funds heretofore appropriated to such government for fiscal year 1978 for Washington Metropolitan Area Transit Authority but not to exceed $1,254,700.

On page 9, beginning with line 13, insert the following:

For an additional amount for "Environmental services", fiscal year 1978, $1,550,400.

On page 9, beginning with line 20, insert the following:

For an additional amount for "Personal services", fiscal year 1978, $7,000,000.

On page 10, line 2, after "Stat. 121)" insert "and for payment to Robert J. Pierce, not to exceed $250,000, pursuant to provisions of District of Columbia law";

On page 10, line 4, strike "$72,800" and insert "$322,800";

On page 10, line 16, strike "$111,700,000" and insert "$120,400,000";

On page 10, beginning with line 17, insert the following:

For an additional amount for "Repayment of loans and interest", for fiscal year 1978, $475,000.

On page 11, line 5, strike "$77,215,000";

On page 11, line 11, strike "$2,855,400" and insert "$,880,400";

On page 16, line 7, strike "37,126" and insert "37,239";

On page 18, beginning with line 7, insert the following:

SEC. 220. (a) No funds appropriated by this Act shall be available to pay any part of the salary of any employee of the government of the District of Columbia, or any department, agency, office, or other entity thereof, if any part of such employee's salary is paid from funds appropriated pursuant to the authority of the Comprehensive Employment and Training Act of 1973 (or successor statute), and the annual salary of such employee is in excess of that paid for the position of GS-9, step 1, under the General Schedule,under section 5332 of title 5, United States Code.

(b) Subsection (a) of this section shall take effect upon the expiration of the ninety-day period following the date of the enactment of this Act.

SEC. 221. (a) No funds appropriated by this Act shall be available to pay any part of the salary of an employee of the government of the District of Columbia, or any department, agency, office, or other entity thereof, if any part of such employee's salary is paid from funds appropriated pursuant to the authority of the Comprehensive Employment and Training Act of 1973 (or successor statute), and has been so paid for an aggregate period of at least twenty-four calendar months.

(b) Subsection (a) of this section shall take effect upon the expiration of the ninety-day period following the date of the enactment of this Act.

SEC. 222. (a) No funds appropriated by this Act shall be available to pay any part of the salary of any employee of the Council of the District of Columbia, or committee or subcommittee thereof, or any employee of any elected official of the government of the District of Columbia, if any part of the salary of any such employee is paid from funds appropriated pursuant to the authority of the Comprehensive Employment and Training Act of 1973 (or successor statute).

(b) Subsection (a) of this section shall take effect upon the expiration of the ninety-day period following the date of the enactment of this Act.

SEC. 223. No funds appropriated by this Act shall be available to pay any part of the salary of any individual hereafter employed by any department, agency, office, or other entity of the government of the District of Columbia, having ten or more employees, if, at the time of such employment any part of the salary of more than ten per centum of the employees of such department, agency, office, or entity is paid partly from funds appropriated pursuant to the authority of the Comprehensive Employment and Training Act of 1973 (or successor statute), and

partly from funds of the District of Columbia.

SEC. 224. Notwithstanding any other provision of this Act, the provisions of sections 220, 221, 222, and 223 of this Act shall be deemed repealed upon the date of the enactment of the Act entitled "An Act to amend the Comprehensive Employment and Training Act of 1973, to provide improved employment and training services, to extend the authorization, and for other purposes.".

Mr. MATHIAS. Mr. President, the first thing I would like to do today is thank the chairman of the subcommittee, the distinguished Senator from Vermont (Mr. LEAHY) for the careful job he has done on this bill, and for all the many hours and hard work he has put into what is, essentially, despite the fact that he protests, a thankless task for him.

I think he has covered all the major points in the bill, and so I am not going to take the time of the Senate to go over the ground that has been covered.

I expressed my view at the subcommittee markup that the figure arrived at for the Federal payment was, I think, too low by perhaps the sum of $26 million, but I understand that the subcommittee arrived at this figure after studying the District of Columbia's own books and their own prognostication as to increased tax revenues, and that, therefore, if these prognostications are accurate, even with the very low Federal payment recommended, this does represent part of a balanced budget. As the first months of the fiscal year 1979 pass, we shall then see if this is true or not.

The chairman has assured me that in case a shortfall appears to be developing, he will, in timely fashion, consider a supplemental, with additional Federal payment funding to accommodate such a shortfall of income. I take the chairman's commitment on that as a very serious one, as I know he does, and it is on that basis that I join Senator LEAHY in recommending this measure to the Senate. I know that he is sincere in his promise to take a hard look at the fiscal and monetary picture as the fiscal year evolves, and that his assurances can be counted on that the District Government can be accommodated so that their budget will remain in balance and adequate funds will be available for all District programs and projects which have been approved by Congress.

Of course, both of us, I know, take full cognizance of the fact that these programs approved by the Congress are actually required by the activities of the Federal Government.

Many of them would not be required in a municipality if it were not the seat of the Federal Government.

Having all this in mind, I am sure that the subcommittee will be keeping a very watchful eye on the fiscal developments in the District of Columbia.

I want to again thank the chairman for his courtesy and his cooperation during the hearings on the bill, and during the committee consideration of this bill. He is a very constructive Member of the Senate with whom it is easy to work.

Sometimes the impression is given around the District of Columbia that his heart is as hard as the granite of his native State. But I think anyone who has followed the development of this bill carefully knows that that is not true; that every program recommended by the municipal government has found a place in this bill; that the human concerns, the human needs, which are represented by the bill have been carefully weighed by him; that what is necessary to be done has been done.

I would like to pay tribute to the human consideration with which Senator LEAHY has dealt with this difficult task.

It is a lean budget, it is a tight budget, but it is a budget which reflects the realities. I believe that is the kind of budget which both the people of the District of Columbia wanted and the people of the United States at large expect us to produce.

So with the possibility that we may have to consider a supplemental, Mr. President, I urge the Senate to approve this District of Columbia appropriations bill.

Mr. LEAHY. I thank my colleague from Maryland for his kind and gracious statement. I can assure him that my heart, instead of being made of Vermont granite, has only the sweetness of Vermont maple syrup. It has nothing to do with granite.

Sometimes I either hear about or read editorials that are printed about our activities here. It is obvious that none of the editorial writers or speakers have ever bothered to sit in on even one of our markup hearings or sit in on one of our hearings, which go on into great detail. They will complain about our committee cutting out funds, or complain about our digging into particular programs. That guarantees only one thing: Every time that happens, I know my office will get flooded with mail from District of Columbia taxpayers who say, "Thank God your committee is watching where the taxpayers' dollars are spent."

In that regard, we should say there has been cooperation, I know, from Mr. Coppie and the city. Every time we have asked for information it is given to us.

I will state again as I have before, Mr. President, I do not like the hybrid kind of home rule situation we have here, a situation which on many programs puts the city in the position of saying, "We do not really have to look at that very much because the people on the Hill will look at it." None of us on the Hill begin to have the amount of time necessary to look at the city programs with the detail we should, so the buck gets passed right back down there and we must take actions that require them to be frugal and careful with the taxpayers' money.

I would hope the day would come that, if we are going to have home rule, that we have home rule in fact and not in name.

Mr. President, I am not aware of any amendments to this bill.

If there are no amendments, I am willing to yield back the remainder of my time and go to third reading.

Mr. MATHIAS. Mr. President, I will inquire whether there are any amendments on our side. If there are none, I will join the Senator from Vermont.

Mr. LEAHY. Mr. President, I suggest the absence of a quorum with the time to be divided equally.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill is open to further amendment. If there be no further amendment to be proposed the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. LEAHY. I yield back the remainder of my time.

Mr. MATHIAS. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

Mr. ROBERT C. BYRD. Mr. President, it appears that the Senators are willing to have a voice vote on passage of this bill. That being the case, I ask unanimous consent that the order for the vote to occur at 4 p.m. today be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill, having been read the third time, the question, Shall it pass?

So the bill (H.R. 13468), as amended, was passed.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATHIAS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I once had the honor of acting as chairman of the D.C. Appropriations Subcommittee. I believe it was Jacob who worked for Laban, the father of Rachel, for 7 years. He was promised—before I begin to say this, let me be sure that the distinguished junior Senator from Arkansas, who is an ordained minister, corrects me if I make an error.

My recollection of this Biblical story is somewhat faded by the murky mists of the passing years.

Jacob worked for Laban under a contract—I suppose it was an oral contract in those days—by which he was to give Laban 7 years of labor in return for Rachel, younger daughter of Laban. At the end of 7 years Jacob expected Laban to carry out his part of the contract.

But Laban, instead of giving Rachel to Jacob, gave Leah, sister of Rachel. I forget how the story describes Leah's eyes, but I recall that Leah seems to have had some problem with her eyes. Perhaps she had weak eyes. But Rachel, we are told, was beautiful, and the 7 years seemed but a day to Jacob.

In any event, Laban then promised Jacob that if he worked 7 additional years, he could have not only Leah, but also Rachel. So Jacob worked 7 additional years and married Rachel.

I was chairman of the D.C. Appropriations Subcommittee for 7 years, the long-

est period that anyone has served as chairman of that subcommittee in this century. I can assure you that those 7 years did not go by as a day as they did for Jacob; they were difficult years.

Mr. TOWER. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. TOWER. Did you get the girl at the end of the 7 years?

Mr. ROBERT C. BYRD. No, but I can say this: I got weak eyes from all of the poring over that bill, year after year. In those 7 years, and indeed, in the 20 years I have served in the Senate, I do not recall the D.C. appropriations bills ever having passed the Senate with so short a debate. Perhaps that statement may not be accurate insofar as the 20 years is concerned, but certainly, it is accurate insofar as the 7 years are concerned in which I handled the bill.

Today, that bill has been passed in less than 20 minutes—less than 15 minutes, I suppose. This can be attributed to the remarkable preparation made beforehand, the study, the forethought, the labor, and the skill of the manager and ranking manager of the bill (Mr. LEAHY and Mr. MATHIAS). They have done an amazing job on what has been, many times, one of the most difficult appropriations bills out of the 13 regular appropriations bills.

So I compliment them. I express my appreciation to them.

I thank both the Senators for the good work they have done, and all of the members of the subcommittee.

Mr. President, the District of Columbia appropriations bill for fiscal year 1979 is a thoughtful bill. It has been carefully reviewed and contains important recommendations for more efficient operations of agencies and departments of the D.C. government. Again, let me thank Senators LEAHY and MATHIAS and members of the committee for their fine work.

Mr. LEAHY. I thank the Senator from West Virginia very much. If it were not for the fact that we need him so badly as the majority leader, we would be happy to give him back the chairmanship and change places. I feel that the Senator from West Virginia owns a place in the Guinness Book of Records for the years that he served. I can assure my very, very good friend from West Virginia that if Guinness so notes his 7 years' achievement, the Senator from Vermont will do nothing whatsoever to knock him out of the pages of that book.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. LEAHY. I thank the Senator very much and I must say, in all seriousness, that there are days, when I am walking around the fields of my farm in Vermont, when I sometimes wonder how I got involved as chairman of the D.C. Appropriations Subcommittee. But I look at the distinguished people who have preceded me, people such as the distinguished majority leader, and I look at people like Senator MATHIAS, who has put so many years of service in there for the District, and I feel humbled by it. I must say that I have enjoyed many aspects of it. I have enjoyed the work with the people of the city, the fact of learning of the intricacies of urban problems, something that a person from Vermont would not normally know. All in all, like so many experiences in the Senate, I have found it personally very much of a plus.

I have also enjoyed the experience, also, as the experience goes, of being on the Appropriations Committee.

I apologize to the Senator from Utah. I have spoken longer than I had intended to.

Mr. GARN. I wanted the Senator only to yield briefly.

Mr. President, I do not want to detract from what the distinguished majority leader said about the performance of my colleagues. I agree with what he said. I only want to say that had I been on the floor, I would have objected to vitiating the rollcall. And had there been a vote, I want the RECORD to show that I would have voted against the appropriations bill.

Mr. LEAHY. Mr. President, I ask unanimous consent that the Secretary of the Senate, in the engrossment of the amendments to H.R. 13468, be authorized to make any technical and clerical corrections.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Will the Senator yield to me?

Mr. LEAHY. Yes.

Mr. CHILES. I wonder if it would be proper for me to propose a unanimous-consent agreement to have the staff be able to make the technical corrections and additions to the bill so it will conform completely with the story told by the Senator from West Virginia.

Mr. LEAHY. I would object.

Mr. MATHIAS. Mr. President, I want to say to the distinguished chairman that there are some people around the District of Columbia who feel that he has neglected his farm and that he ought to be spending more time on his farm in Vermont and less in the District of Columbia. But I hope that he is not going to be deterred by those sentiments and is going to continue to devote the kind of patient time and interest and prudent judgment that he has so far to this subcommittee. I look forward to working with him for a long time to come on this appropriation.

Mr. LEAHY. I thank the Senator from Maryland.

Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer (Mr. SARBANES) appointed Mr. LEAHY, Mr. DECONCINI, Mr. BUMPERS, Mr. MAGNUSON, Mr. MATHIAS, Mr. WEICKER, and Mr. YOUNG conferees on the part of the Senate.

Mr. LEAHY. Mr. President, as I said before, the help of the Senator from Maryland and the other members of the committee, and Mike Hall, our staff counsel and Veneda Carre of the committee staff and others who have worked on this is appreciated.

Mr. President, I have nothing further. I suggest the absence of a quorum.

If I may withhold that, I have two quick things. I ask unanimous consent that Susan Branigan of my staff be granted the privilege of the floor during the debate ond votes today and any succeeding days on any matters involving the tuition tax credit.

I make the same request for Robert Paquin of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I yield to the Senator from New York.

TUITION TAX RELIEF ACT OF 1978

The PRESIDING OFFICER. The clerk will state H.R. 12050.

The assistant legislative clerk read as follows:

A bill (H.R. 12050) to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

The Senate continued with the consideration of the bill.

AMENDMENT 3445

The PRESIDING OFFICER. The pending question before the Senate is amendment No. 3445, offered by the distinguished Senator from Arizona.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that Richard Weisman of my staff be granted the privilege of the floor for the duration of the debate on H.R. 12050.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, as the Senator from Arizona does not appear to be on the floor at this moment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I thank the Chair.

Mr. President, I would like to take the opportunity as we resume debate on this important legislation to restate four questions which I addressed to the Democratic Members of the Senate at the outset of today's session of the debate.

I said that it seemed to me in light of the very heavy support for this legislation coming from the Republican side of the aisle—where, of course, there are two distinguished Republican sponsors—and with the expectation that some two-thirds of the Republican Senators would likely support the bill in its entirety, and with the expectation that an even larger number would support it with respect to one or both provisions, that the question very much becomes, Will the Democratic Party support this legislation?

It is clear that the fate of the measure will turn on the extent to which the majority party supports it. This, I reiterate, presents difficult and important questions for us.

I numbered four questions. I would like to speak to them and elaborate somewhat upon them.

The first question, as I put it, is: Are we to think that the House of Representatives, with its heavy Democratic major-

ity, was wrong and approved an unconstitutional measure when on July 1 it passed legislation providing tuition tax credits for elementary and secondary schools?

This is the bill, H.R. 12050, in the form reported by the Finance Committee, which is now before the Senate.

The second question I put to my brother Democrats was: Are we to think that Senator ABRAHAM RIBICOFF, the first Democratic Secretary of Health, Education, and Welfare, was wrong and proposed an unconstitutional measure when he first called for tuition tax credits in 1963, or when he said on Friday, "We can only discover if this is a constitutional form of aid to parents who pay nonpublic school tuition if we try?"

Are we to deem his judgment faulty when he said:

> If I thought this bill clearly failed the tests used by the Supreme Court in striking down aid programs designed by the States, I would not support it.

The third question I addressed to my fellow Democrats was: Are we to think that Senator Hubert H. Humphrey and Senator GEORGE MCGOVERN were wrong and proposed an unconstitutional measure when, in the course of their presidential campaigns, each specifically pledged his support for tuition tax credits for elementary and secondary schools?

Finally, Mr. President, I asked a fourth question: Are we to understand that the Democratic Party was wrong and proposed an unconstitutional measure in 1972 and 1976 when in its platforms it twice committed itself to aid for children in nonpublic schools? Are we to conclude that our party held out a false hope?

Mr. President, it seems to me that these are matters of very large concern to this party of ours because we have so consistently—for almost two decades now—presented ourselves at election time to voters with these unfulfilled promises. I would not hesitate to suggest what is clearly the case—that the voters I speak of represent a constituency with which we have historically been very closely associated. Have we been falling into the habit of promising in the election, in the quest for power, what we have no intention of delivering when we are successful in that quest?

This would be a very ponderous judgment to make about any organization and fatal to many of the things we most cherish in our beliefs about ourselves as a democratic party.

I think of the time in New York City in July 1976, when the Democratic National Convention was in session and printed copies of the platform were distributed. This was a matter of some interest to me. I was a delegate. I had been a member of the platform committee and was a member of the drafting committee. I drafted one of the two planks to which I referred in the fourth question I addressed to the members of my party.

We printed up the platform, and affixed to it a rather striking cover with a striking statement by Harry S. Truman. It said simply, "The platform is the party's contract with the people."

We meant it when we drafted it, and we knew what we were referring to. We were referring particularly to this proposal. It had been most recently espoused by Senator GEORGE MCGOVERN when he was our candidate in 1972. It was clearly in our minds as an example of what we intended—not the only alternative, but clearly that measure which had the most support. Senator Humphrey had pledged himself to it in 1968. Senator MCGOVERN had done so in 1972.

We were carrying on a tradition. I had occasion to remind the members of our platform drafting committee that the beginning of Federal aid to education, as the term came to be used in reference to elementary and secondary education, had come about with the adoption of the Elementary and Secondary Education Act of 1965, in the aftermath of a negotiation in which I was involved. It led to the insertion in the 1964 platform of a statement that the Democratic Party is committed to providing aid to all students and, within the limits of the Constitution, to all schools.

It was very clear then that you could provide aid for students and their parents directly. That was a well-settled proposition. It was in the aftermath of the inclusion of that measure in the 1964 platform that there developed strong support for the Elementary and Secondary Education Act; it went forward and was adopted very early in the Congress that followed. Yet, that intended commitment was not followed by any Government action, by any action on the part of the Department of HEW, that in any way would approximate what was expected and intended.

A small office was set up in HEW, in the Office of Education, dealing with nonpublic schools. It did little. Indeed, one of the early acts of the administration now in office was to schedule the dismantling of the office, which was not a very large enterprise. I believe it had three employees. So there truly was a question of our having kept faith.

As a party, we had espoused a measure of great importance, a measure of which we were properly proud—the beginnings of regular, ongoing Federal participation in the financing of elementary and secondary education. We had done so by making a pledge to the nonpublic sector, and we had not kept it.

So, in our 1976 platform, I inserted a simple statement that the Democratic Party reaffirms its pledge, acknowledging an earlier one not kept. It was, of course, agreed to.

Then came the 95th Congress and the opportunity to begin keeping it. The President proposed nothing. I was disappointed in that; but, then, the President's educational measures were not large. There was a judgment of priorities, as there had to be. So it remained for us to act here, in this branch of Government.

We waited a year before we acted; then we did. We held hearings on a measure that is substantially the President's bill. We took it to full committee, where it was accepted by both parties and adopted by a vote of 14 to 1. It was a remarkable affirmation of support.

No sooner had this happened than the Secretary of HEW rushed to counter us, in a well-publicized memorandum to the President. He said this measure was coming along and had to be stopped; he said that the aid to students and colleges and universities could best be stopped by proposing the ultimate extension of an existing program—a good program—the Boggs program.

I hope we will be forgiven if my colleague from Oregon and I seem to be excessively autobiographical in these matters, but an affirmation of commitment is important here. One's record is a measure of commitment. We have said repeatedly that public schools come first and that low-income people come first. And we have kept that commitment.

It happens that the basic economic opportunities grants, the Pell grants, as they properly are known, were first proposed in a Presidential message which I drafted, as counselor to the then President.

So we were surprised at the vehemence with which the Department responded to our proposal. We had thought we had done nothing more than the party had pledged to do. In fact, the President had stated in a most explicit way his desire for some similar measures. He did not speak of this measure, but he spoke in general terms of doing something which this measure addresses in specific terms.

Then there was the sad business of that distorted request for a constitutional opinion from the attorney general, which produced the predictable answer to the distorted proposition presented, but which must be obiter dicta, as I have described it: That is, the attorney general saying that tuition tax credits for colleges are constitutional.

Here, Mr. President, it seems to me that we enter a realm of serious inquiry as to the meaning of the words which are contained in this legislation. The idea of constitutionality is the guiding principle for the basic law of the land, a law very much concerned with that which the Government may do and may not do. Here we may obtain some guidance in a troubled field where there is not much clarity.

The Supreme Court has declared that aid to private institutions of higher education is constitutional. Then, in the commanding case, it made the quite extraordinary and unsupported assertion that there was a difference between the religious impressionability of students in college as against students in high school or elementary school, and that, on that foundation, a constitutional distinction could be drawn.

Mr. President, if there is such a difference, no one has ever established it, much less have they established which way it goes. It is not an empirical proposition. There is no evidence for it. It would be extraordinarily difficult even to frame it in terms that would admit objective inquiry.

We have taken the liberty of asking the president of the American Psychological Association whether there is any such finding, any such data, and his answer is no—there is none.

That might or might not be an argument which an attorney would make before the Supreme Court; but at the very least it suggests to us the fragility, at

times the almost idiosyncratic nature of the Court's decision, is such that the whole subject fairly begs for one opportunity to be put clearly before the Court. But first, Congress itself must say, "Look, we think this should be done."

On Friday morning Senator ABRAHAM RIBICOFF, former Secretary of HEW, put this clearly when he said:

> We can only discover if this is a constitutional form of aid if we try.

Coming from such a man it is an assertion which we must heed. He added:

> If I thought that this bill clearly failed the test used by the Supreme Court in striking down aid programs designed by the States, I would not support it.

This is the man who has spoken for our party in these matters for so long saying he does support it because he does so conclude.

So I ask my party, what is to be made of us if we reject this evidence? What is to be judged of us if we forego a simple opportunity to keep our contract with the American people as we chose to delineate it? What do you say of people who make promises they do not keep? What do you say of people who repeatedly make promises they do not keep?

That is what confronts us in this matter and it is not with any great satisfaction that I raise these issues. But it is based on a sincere conviction that if I do not, someone else will. These pledges have been too public, too persistent, and the pattern has been too clear not for it to be asked at this moment, when, for the first time since Senator ABRAHAM RIBICOFF first proposed it 15 years ago, the issue is before us on the floor of the Senate. How will my party respond?

Mr. President, I shall reiterate one last time the question of party responsibility in this matter. I do very much hope that before this debate is concluded it will come to be seen by the members of my party in the Senate that to fail in the support of this measure, to be deficient in enacting it, will be to call into question the commitments of our leaders and of the party as a collectivity over a long period of time. And it will be to do so in a way that does not promise to enhance the degree of intraparty harmony and effectiveness which we hope to achieve in the years ahead.

We are a party that has repeatedly pledged that we would do what we are now at long last in a position to do.

We have said it over and over again; our Presidential candidates have promised it; our platform has pledged it; here it is before us. To fail in this moment to rise to that clear opportunity is to cast a shadow not only upon this area of commitment but upon the nature of our commitments generally.

I do not suggest that we should be unanimous in this. We were not unanimous in our promotion of it in the first place. But there is no question that the men who campaigned for the Presidency under our party's banner, men who accepted our platforms, remember that ritual. I hope it does not ultimately prove an empty one, in which the successful candidate at each party convention says, "I accept the platform," only to abandon it later.

Here is the chance to fulfill that commitment. I cannot imagine that we will not do so.

I see the Senator from Oregon is in the Chamber.

Mr. PACKWOOD. Mr. President, I was not rising to interrupt the Senator from New York, except to indicate again, of course, I speak as a Republican. I am sure he is right. This will not be the end of this matter no matter which way the vote goes. This will not be the end of it. But it is a significant change of philosophy from the philosophy that has been followed in the past. And I think it is one that has been in harmony with at least many views expressed by Republicans before, which is one of decentralization, diversity, pluralism, an effort to make sure that we do not overly centralize the running of the country from Washington, D.C., be it in the educational field or otherwise. There is no question in my mind that Republican platforms will endorse the subject very specifically of tuition tax credits for primary and secondary schools in terms as clear as that and that our candidates, the bulk of them, will stand on that position.

What the Democratic Party chooses to do is, of course, out of my control. But no one should assume that it will not become a political battle. Senator RIBICOFF said it the other day.

(Mr. LEAHY assumed the chair.)

Mr. MOYNIHAN. Senator RIBICOFF said it most emphatically. He said it would be a central issue in the 1980 Presidential election.

Mr. PACKWOOD. I would go further than that. The Senator from New York has made reference to the letter sent to the Catholic educators by President Carter, then candidate Carter, 2 weeks before the election pledging his support through constitutional means for parochial schoolchildren. He did not say private, he said parochial schoolchildren.

It might be argued that he did not quite say tax credits, because the words "tax credits" or "tax deductions" did not appear in that letter. But there is no question that President Carter pledged himself to constitutional methods for aiding parochial school students, and there is no question but that the listeners at that convention thought, and what parochial school associations around the country, Catholic and non-Catholic thought, they understood what that statement meant.

Now, time after time the Senator from New York and I have seen editorials in parochial publications. The words that are used are "doublecross," "treason," "lie." In one case one editorial indicated that for the last time "has this publication been taken for granted and for the last time is this publication to be counted on as a guarantor of Democratic votes and guarantor of Democratic endorsement." Not one more time or one more inch will at least the editor of that publication believe those words again.

I do not know if one of the problems that President Carter had with many groups is that you hear what you want to hear, perhaps. All I know is that parochial educators, Catholic and otherwise, in this country heard they thought President Carter say, "I promise to support tax deductions or tax credits," and they now feel betrayed and the Republicans will take that issue to the public and pledge ourselves to the support of an effort to give to private education in this country, primary and secondary education, the tax credit that this bill espouses.

Mr. President, that is all I want to say to the Senator from New York. I have other things to say, but I do not want to interrupt him.

Mr. MOYNIHAN. I thank the Senator.

I would like to repeat for those who have come onto the floor—and I see the Senator from Rhode Island is here, and I believe we are going to have an exchange in a short while—but I would like to repeat that this matter before us with respect to the first amendment, and so forth, is such an open one that in the commanding decision, which is Tilton versus Richardson in 1970, the Court, almost as an obiter dictum, in finding the Higher Education Facilities Act constitutional, simply said:

> There is substance to the contention that college students are less impressionable and less susceptible to religious indoctrination. A common observation would seem to support that view.

Well, the Court did not say that even so it would not find aid to high school seniors constitutional. It was just indicating why it found the aid to colleges constitutional.

Mr. PACKWOOD. I wonder if the Senator will yield there for a moment?

Mr. MOYNIHAN. Yes.

Mr. PACKWOOD. It is interesting that in the GI bill, the Veterans' educational benefits bill, payments will be made to the following educational institutions: Any public or private elementary school, secondary school, vocational school, correspondence school, business school, junior college, teachers college, normal school, professional school, university, scientific or technical institution, and this is constitutional.

We have checked with the VA. They have made payments to primary and secondary sectarian schools under the GI bill of rights, along with public schools, primary and secondary, under the GI bill.

There must be an assumption that the ones who have gone through the military service have been indoctrinated that any kind of religious school payments are safe. In this case they are payments to the institution, not payments to the individual on behalf of the institution but to the institution. So by the time, as we have said earlier, you are allowed to make payments to the church to take care of your preschool children until they are 6, you are entitled to make payments to colleges, public and private, if you are a veteran you are entitled to have payments made to primary and secondary sectarian schools, it is a very narrow group that seems susceptible to being unduly influenced by religion.

Mr. MOYNIHAN. Well, the Senator is right, and the extent of the disarray in this field was the repeated message of the witnesses before the Committee on Finance subcommittee during hearings

on this bill, along with a new element which seems to me so important, and that is the recovery of our past with respect to the intention of the drafters of the first amendment.

The first amendment never meant anything at all such as the courts have found themselves saying, first in the Everson decision of 1947, and in this zig-zag way ever since.

I recall for my fellow Senators the language considered in the Senate on Wednesday, September 9, 1789, the penultimate occasion on which the first amendment was considered:

> Congress shall make no law establishing articles of faith or a mode of worship or prohibiting the free exercise of religion or abridging the freedom of speech or the rights of people to peaceably assemble and to petition the government for a redress of grievances.

If only we had stopped there we would have avoided an extraordinary amount of confusion, once the collective memory has faded, that to establish religion means to establish articles of faith or a mode of worship. I mean, that is what they said they meant, there was going to be no national church, which was the term Madison had proposed in the House earlier in July.

We have recently recovered that history. It is odd that it has vanished with us, but it did. Now it is back.

The Senator from Oregon pointed out that one of the great early disputes in the distribution of public aid to the different church schools was the request of the Scots Presbyterians.

Mr. PACKWOOD. Is it a terrible thing that they should want their share?

What is interesting is that the Senator from South Carolina quoted from Everson. I believe this is what he said I do not have exactly what he said, but paraphrasing, he said that no tax can be levied for the support of any church, or words to that effect.

Yet it is interesting that at least from the time of adoption of the first amendment, for the next 40 years, at least, the very people who founded this country, wrote that first amendment, sat on city councils, were members of State governments that appropriated public funds to churches to run schools—I want to emphasize that again, not to students, not to the school, but appropriated public funds to the church—the thought never entered their minds that that was support of religion. They thought it was support of education. They thought it was a perfectly normal thing and, presumably, they were acting on what they thought was constitutional. They wrote that amendment. There was nothing wrong with giving money to churches to run schools for the benefit of the public. Not a tax credit, mind you, but a tax that is collected and then given to the church.

Somehow this has been construed by latter day Justices of the Supreme Court to say that this can no longer be done.

Now, Charles Evans Hughes, the former Chief Justice of the United States, once said the Constitution is whatever the Supreme Court says it is, and that is true. We may disagree with it, but we will live with it, as anyone should. Amend it, argue new cases before them, try to get them to reverse themselves, as they have done on occasion, but there is no way that any Justice of the Supreme Court can point to the early-day history of this country and conclude that our Founders thought there was anything wrong with giving public money to a church to provide for a school, to support education.

Mr. MOYNIHAN. Nothing whatever: and Chief Justice Burger has so stated on a number of occasions in rulings of the Court.

The Court has begun to recover its history. It is an odd thing. It has been almost an intellectual event, the rediscovery of the early history. There is something to be written about how that started coming about.

For example, Walter Berns' new study, "The First Amendment and the Future of American Liberty," is a remarkable piece of work, as is the study by Michael J. Malbin on "Religion and Politics: The Intentions of the Authors of the First Amendment."

Malbin was a graduate student of Berns. They studied the same subject and came to slightly different conclusions; which is a function of graduate students; I think.

We will mark the event with this matter. As I say, it once became a threatening matter to the Nation in the context of the great immigrations of the 19th century. It became threatening; it was perceived as a threat, and a great deal of the concerns about Americanism—the term "nativism"—respond to that reality.

That is what the Court said when, in the Brown decision, it reversed Plessy against Ferguson. It said that what might have been argued in 1896 could not be sustained under the changed conditions of 1954.

That is present here. We will find the Court far more accepting of the constitutional origins here, and looking into the purposes of the legislation. I am absolutely convinced the Court will say it is a perfectly straightforward tax measure that in no way arouses any constitutional alarm. They will say that what is acceptable for a college freshman is clearly acceptable for a high school senior, and that to draw a constitutional distinction between someone in the 11th grade and someone in the 13th grade would not be supportable. The Supreme Court does not run to that kind of stricture.

I see the Senator from Rhode Island has risen; does he wish to join in this matter?

Mr. CHAFEE. Mr. President——

Mr. MOYNIHAN. I would like to yield for a question, if that is the Senator's desire.

Mr. HOLLINGS. First Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield.

Mr. HOLLINGS. I ask unanimous consent that Alfred Pollard and Tom Polgar of Senator MORGAN'S staff be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I make the same request in behalf of Richard Stranger and Sandra Allen of the Joint Tax Committee staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. If the Senator wishes to have the floor, of course, he may.

Mr. CHAFEE. Yes, I would like to have the floor, if I might, for a while. I shall not be too long.

Mr. President, I would appreciate the attention of the principal proponents of this measure, because there are some questions that I have that I would like to direct their attention to in the course of my remarks; to direct to the attention of the Senator from New York and the Senator from Oregon.

I must say, Mr. President, like all of us, this is a measure that deeply troubles me, because I have many, many constituents in my State whose children do attend nonpublic schools, and who would obviously be beneficiaries of this measure.

Mr. MUSKIE. Mr. President, will the Senator yield for a question?

Mr. CHAFEE. Yes.

Mr. MUSKIE. Does the Senator have any idea how long he would like to occupy the floor? I ask the question not to press him, but I am trying to modify my plans for the next hour or two.

Mr. CHAFEE. I was going to be about 15 minutes, perhaps.

Mr. MUSKIE. I thank the Senator.

Mr. CHAFEE. I would make it 12 if I could be sure that the Senator from Maine would remain on the floor.

Mr. President, this is a matter to which, along with all the rest of the Senators, I have given a good deal of thought.

One of the things that comes to my mind is, why do the proponents of the measure continually say that the nonpublic schools are in danger of being vanquished, pushed right off the map, when indeed the statistics show otherwise?

We touched on this in some measure last Friday but, because of the press of time and airplanes' departing, and so forth, we could not get a full discussion of it.

I agree that the statistics to some degree are not absolutely perfect; but nonetheless they give us a pretty good lead. Just to review the bidding, if I might: After World War II, starting in around 1948, there was a dramatic increase in the number of nonpublic school children in the country, both in numbers and in percentage of the total, and there was a tremendous building program undertaken for nonpublic schools. So the nonpublic school enrollment went up as a percentage, and indeed in total numbers, until about 1965, when it reached its peak. Then it underwent a dramatic decline until 1970, and since then it has stabilized, so that the percentage of children in nonpublic schools as a percentage of the total number of elementary and secondary school children has remained constant at just about 10 percent.

Now, indeed, Mr. President, this is really remarkable, that it has remained constant, because of two factors which I

would call to the attention of the Senator from New York.

First of all, we have got to concede that as a percentage of the total, the nonpublic school children have remained constant since 1970. The statistics show it, and if he wishes to dispute that, obviously we can.

Second, there are two factors that make it even more unusual that the percentage of youngsters in nonpublic schools has indeed remained constant, because of this factor: There is a total decline in the number of children in the elementary and secondary grades. That has come about with the declining population in that group. So, for example, in the schools that have been affected, the total reached its peak in 1971, of 46 million in elementary and secondary schools. This fall it is estimated there will be 42 million children in elementary and secondary schools, which represents a decline of about 7 percent, overall, in that group of youngsters. But the decline is continuing, so the percentage of those in the elementary group as opposed to the secondary group shows an even greater drop from the peak years.

Now, this is very important to note, because the largest number of nonpublic schools are for the elementary grades. So, as you have a large decline in the elementary group, then it is reflected out of proportion in the nonpublic statistics.

There is point 1, which I believe is very important.

Point 2: The Senator from New York has remarked that in his State of New York there has been a decrease in the number of schools and the number of children overall in the nonpublic schools of rather dramatic proportions.

That is true because the great growth in the country in population has occurred not in his section of the country, not in the New England States, but, of course, it has occurred in Arizona, in the Southwest, in Florida, in Texas, in California. These are the boom population growth areas of the Nation. These are the very sections of the country that do not have a large number of available nonpublic schools. In other words, the parish school is not there, the nonpublic school is not there.

So as we have the large growth in population there is not the school available in Phoenix, Tucson, Tallahassee, Orlando, wherever it might be, for the youngsters to go to. Automatically they gravitate into the public school system.

Undoubtedly, there is construction there, but it takes longer to build a nonpublic school than it does a public school. We know that from experience.

So these are two very significant factors.

The Senator from New York has pointed out that in his own city of New York there has been a very, very high drop in the number of youngsters attending nonpublic schools. Well, that can be explained. We would expect that to occur if there was all the money in the world to pay for youngsters to go to nonpublic schools because the fact is New York City at best has retained its population at a constant figure since 1950, but beyond that the percentage of older people; that is, over 65, within that city is constantly growing. In other words, the young married couples, the young people, who have the schoolchildren are not there, so the total number of youngsters available to attend public and nonpublic schools in the city of New York has dropped.

In my own State we pick up the newspaper and read that some public schools are closing. They are closing schools because there are not the youngsters available to go to them. So there has been a drop in the number of public schools as indeed there has been a drop in the number of nonpublic schools.

These, it seems to me, are very important points. When the Senator in fostering his bill and seeking support of it says that we have to retain pluralism, that the nonpublic school is an endangered species, that, in his own words, it is in danger of being vanquished, the facts just do not bear it out. The facts show that since the last great shakeout, since the great decline, which came for all kinds of reasons, since 1970, the percentage of youngsters in nonpublic schools in the Nation has remained constant and indeed has gone up a bit.

The second point I would like to make is this: One of the chief reasons the proponents of this measure use is that it is good to have competition between nonpublic and public schools; that this brings up the level of both; that this is the whole essence of the American system—competition.

I would like to have that explored a little further, if I might, Mr. President, by the proponents. Of course, we remember the old days when we used to say there is nothing better than competition—competition in the newspaper field, for example. No city had more competition in the newspaper field than the city of Boston and few cities had as bad newspapers as the city of Boston. So it does not always hold true.

Nor, in fact, can we look at certain sections of the country where there is a high percentage of nonpublic school youngsters and say to ourselves: "This has resulted in a better public school system." I do not know about that. I wonder if the Senator from New York would be prepared to stand before us and say that from his State where the percentage of youngsters in nonpublic schools is higher than the national average of 10 percent, the result has been a better public school system? I do not think so.

Certainly, it is my impression that the finest public schools in the United States are in the Midwest or in the Far West or in the Southwest. In those areas where this high competition in fact does exist I have not seen it result in better public schools.

Mr. PACKWOOD. Will the Senator yield?

Mr. CHAFEE. I would like to finish one point.

A lot of discussion on this floor sounds like a presentation of a case before the Supreme Court. Is it constitutional or is it not constitutional? It is not going to be decided by us, that is for sure. It will be decided by I will not say a higher body but a different body. What I think we ought to concentrate our energies upon, Mr. President, is what is best for the education of the youngsters in this country. We indeed have a particular responsibility to the youngsters who are attending the public school system in the United States.

It seems to me that when we take an oath of office, when we take on obligations in handling public funds, that we have a duty to see that those publicly supported institutions, be they the publicly supported libraries or be they the publicly supported school systems, should be the very best that we can make them.

I think we readily will acknowledge that the private school system, the nonpublic school system, is probably going along and doing a better job teaching the youngsters than the public schools. I think the public schools are laboring under a lot of problems. A lot of these problems they brought on themselves. But it is not themselves, it is ourselves. They have been brought on by the public, which is you, Mr. President, me, and others, not paying enough attention to those schools. They may, in some instances, have been brought on by overaggressive unions which appear on occasion to be more anxious to achieve benefits for their members than to make improvements in the system.

So I wish a little less time was spent in arguing this before the Supreme Court and more time spent on how we can produce the best public school system anywhere in the world.

I am glad to yield for a question.

Mr. PACKWOOD. I wanted to know if the Senator was aware that the five States which have the highest attendance in nonpublic elementary and secondary schools are also the five States with the highest expenditure, and, conversely, the States with the lowest expenditure have the lowest number. It is not true that because there is a high incidence of attendance in parochial that there is a declining support of public education.

Mr. CHAFEE. If I could just respond to that, obviously, without seeing the statistics I would suspect that New York City, for example, is one of the highest, probably.

Mr. PACKWOOD. New York State.

Mr. CHAFEE. New York State. Well, we have to look at the statistics. I suspect that probably one of the lowest might be in the Southwest or in the South. But those statistics deal with much more than what kind of an education they are getting for their dollar. That does not mean that more attention or more money would not produce better education in those institutions or schools where the per capita investment or the per pupil investment is high.

Mr. PACKWOOD. I would like to thank the Senator from Rhode Island for his statements about constitutionality. Both Senator MOYNIHAN and I for the better part of 2 days have been wanting to put aside the argument of constitutionality and go on to the substance of whether or not this is good or bad

legislation. That is why there is in it a deferral provision so it will not go into effect for primary and secondary schools for 2 years, time for an expedited Court test. The Senator from Rhode Island is right, that no matter what we argue here, the decision will not be made here. I can assure him someone will sue.

I can assure him that someone will sue if this legislation should pass, and we have expeditiously arranged for that case to be heard. I should be happy if, from quarter to five onward, we heard nothing more about the issue of constitutionality.

Mr. CHAFEE. I would appreciate it—I do not want to infringe on any time the Senator from Maine wanted. I would appreciate it if I could get a reply to the two questions: One, what is this talk about the nonpublic schools' being vanquished? The facts just do not show it.

Second, what about this suggestion that you get a better public school system when you have competition? Who knows that is the best public school system? I suspect that the Senator from New York has given this a good deal of thought, and he has seen the results of the public schools in different sections of the country. I shall take a gamble here, though lawyers should not gamble, and ask a question to which he may have the answer.

I say this to the Senator from New York, and I shall rely on his experience, as he has seen these youngsters come from public schools throughout the Nation. It has been my experience that the youngsters who come from the public schools are receiving a better education in the public schools of the West and the Midwest than they are from the public schools in the East. That is not saying that plenty of youngsters do not come out of the public schools in the East with a good education; of course, they do. But overall, it is my impression that they receive a better education in the public schools—I think the public schools are better in the Midwest and the West. That may be heresy for one from the East to say that, but I suspect that. Those are the very areas where the percentage of youngsters in nonpublic schools is lower than it is in our section of the country.

Mr. MOYNIHAN. Let me thank the Senator for raising these questions and repeat the thanks of my colleague from Oregon for the suggestion that we set aside the constitutional issues, which are clearly not for us to decide. Senator RIBICOFF dealt with that properly on Friday morning. He said that, in his firm conviction, this is a wholly constitutional measure and that is as far as we ought to go and the Supreme Court will pass one way or the other.

Now, to the Senator's question: let me refer to a question I asked him on Friday, when he said that he was looking at the statistics on enrollment in public and nonpublic schools and he finds that they correlate. I asked him if he had run a correlation, because when he presented some questions to me about the data, I was hesitant on a couple of points. He said he did not want any "uh's" from me and he was obviously going to be fairly strict with me. So I asked him, had he run a correlation or had he just looked at these two lists and found that they looked alike? Because if we are going to talk about statistics, we have to talk statistics. If we are going to talk beta weights, we talk beta weights. If we are going to say it looks alike, then we say it looks alike; if you say there are statistics, we say, have you run a correlation?

I tried to be then and I shall try to be now very open about the extent of our statistical knowledge and the quality of our statistical knowledge. I have to say to him that the first fact is that we have very poor statistical knowledge about the private sector, the nonpublic sector. These are estimates. I do not know why they should be poor. There is no reason why the National Center for Educational Statistics cannot get these things at a high level of confidence, but they do not. I think there is a reason: because the Federal educational establishment does not want to have anything to do with these schools.

They just do not want to know they are there. They do not talk about them when they project the future, they do not count them when they record the present. They just sort of wish they would go away.

I quoted "The Condition of Education 1978." The projections on nonpublic schools sort of run at one round figure up to the next decade. They do not even vary.

Now, to the Senator's proposition about enrollment trends. He is quite accurate in saying that the sharp drop in nonpublic school enrollments took place in the second half of the 1960's. It was not until the 1970's that public school enrollments began to decline. Whether or not there is any causal relationship between the fact that the nonpublic school enrollment began to decline at just about the time that Federal aid became available to the public sector, I do not know. It is a legitimate question for which there is no answer.

I make the point that the National Center for Educational Statistics, in its "Condition of Education 1978," gives the estimated nonpublic enrollment at 5 million in 1972. They have estimated enrollment in 1972 at 5 million; 1974, 5 million; 1976, 5 million; 1978, 5 million.

They have then a series of intermediate alternative projections. They project 5 million for each year between 1978 and 1986. In that case, they have the elementary and secondary public school enrollment dropping from 42.8 million to 40.2 million.

Then they have low alternative projection. It goes from 42.8 to 38.1 million in the public sector. Again, it just goes 5 million, 5 million, 5 million, in the nonpublic.

Then they have the high alternative projection, which shows public school enrollments rising from 42.8 to 43 million, and nonpublic again goes 5 million, 5 million, 5 million, 5 million, 5 million. The computer got stuck. They simply do not know.

Now, I do know that private as a percentage of the total has dropped by one full percentage point from 1970. I know that since 1970, private, as a percentage of public——

Mr. CHAFEE. I wonder if the Senator will yield?

Mr. MOYNIHAN. Not until I have finished.

Mr. CHAFEE. Just on that statistic.

Mr. MOYNIHAN. Surely. Go ahead.

Mr. CHAFEE. We are looking at exactly the same statistics and somehow, we come out differently. It may well be my figures.

In 1971, the Senator said, the percentage of private was 10 percent.

Mr. MOYNIHAN. No, in 1970, private as a percentage of total was 10.53.

Mr. CHAFEE. In 1970, 10.5?

Mr. MOYNIHAN. Yes.

The PRESIDING OFFICER. The Chair reminds the Senators that it is the Chair's understanding that the Senator from Rhode Island had the floor.

Mr. MOYNIHAN. Will the Chair restate that?

The PRESIDING OFFICER. It is the Chair's understanding that the Senator from Rhode Island had the floor in the beginning.

Mr. MOYNIHAN. I thought the Senator had yielded to me.

Mr. CHAFEE. Yes, I have yielded—I will yield.

The PRESIDING OFFICER. When the Senator yields, will he be yielding the floor or for a question only?

Mr. CHAFEE. No, I shall yield the floor.

The PRESIDING OFFICER. That clears up the confusion in the Chair's mind. I appreciate it.

Mr. MOYNIHAN. I thank the Senator. Will he proceed?

Mr. CHAFEE. I hate to quibble over these figures.

Mr. MOYNIHAN. That is the condition of anyone dealing with statistics, particularly in this area.

Mr. CHAFEE. My statistics show that total public enrollment in 1970 was 45,909,000.

Mr. MOYNIHAN. No. We must have different series. Mine show 433 for 1970, public.

Mr. CHAFEE. It just makes it so difficult. Mine came from the National Center for Educational Statistics.

Mr. MOYNIHAN. So did ours. They are the same source, though they are based on census surveys in the first instance.

I certainly do not insist, but I would say to the Senator our data shows total public in 1970 at 43.3 million. So that there was a decline in private as a percentage of total from 10.53 to 9.43.

Remember, in 1976 the data are for the school year 1976–77 and we are missing 1 year. We will pick it up probably in the autumn.

Now, as for the regional variations, clearly there are regional variations. We can imply that from the new schools chartered under 501(c)(3) by the Internal Revenue Service.

California has a strikingly larger number of new schools in the private sector. But look at the Senator's own State of Rhode Island where the largest number of private schools are Catholic.

Between 1967-1968 and 1977-1978, the enrollment in Catholic schools in Rhode Island dropped 43 percent.

The national figure, if I recall, was 39 percent.

The Senator's is slightly higher. Rhode Island's Catholic schools lost 19,297 pupils in that decade, 43 percent of the total. The number of elementary schools dropped by half, from 111 to 64. The number of secondary schools dropped by slightly less than 23 to 13.

The Catholic schools of Rhode Island are well on their way to disappearing. I certainly would say that. Whether their circumstances would change in the context of this legislation, I cannot say.

I do not think I know enough. I do not think anybody does.

I would say in the context of this legislation, there will no longer be an overwhelming economic determinant of the capacity of the Catholic schools to survive.

If they decline, it is because people feel they do not need them longer, not because they cannot afford them.

It is the universal testimony of the people we dealt with in this particular system that if they do not get some assistance, they will disappear.

To the Senator's second question, he says it is his impression that the public schools of the region which have fewer private schools are better, and we asked about the question of competition.

May I say, I do not think any person who is propounding this legislation over here in the center aisle has spoken of competition in a direct marketplace sense. I think of it as pluralism more than competition. I mean, if we had anything like true economic competition, there would long since have been a huge move to increase private sector education because, on balance, it is about one-fourth the cost.

Public school education in this country on the whole costs about four times the amount of the comparable private sector outlays per pupil and nobody moves to diminish its size. The public school sector is valued for other reasons. If it were just a competitive matter, the manifestly greater efficiency of one system would be an issue of public debate. But we never hear the matter discussed.

I would put it a different way. As the Senator probably knows, all around the world there are seed banks in which seeds are being preserved of different varieties of corn, wheat, weeds, chickpeas, and so forth, out of a fear of the risk to the species, the genus, I guess one would say, of overconcentration in certain genetic pools. Even chickpeas have gene pools.

The more advanced the more easily cultivated, the more advantageous in one form or another, are driving out the older primitive ones. Yet, scientists are holding onto those earlier ones. We never know what might turn out to be valuable tomorrow.

I have always had in my mind the kind of educational diversity in which we hold onto a rare species of school.

How many high schools teach Greek any longer in America? Not many. But one would hope the teaching of Greek would not disappear, would hold on someplace until the day came we might want to start it up again.

How many schools transmit Amish beliefs or Hasidic beliefs, or the practices of a military academy?

I think of this as the maintenance of diversity such that we have alternatives when we want to change the uniformity we have adopted.

The Senator asked whether the schools of the Middle West, in places where there is not a large proportion of private schools of this kind, are better than the Eastern schools?

Unless we do something on a satistically reliable basis, impressions will not get us very far. In fact, impressions are always a very narrow sample and they are idiosyncratic.

We have begun to learn to measure educational achievement. But we have been very loath to do so.

One of the scandals of public education in the United States today is the incredibly slow pace with which national assessment has advanced.

For all the advantage the public school system has of openness and access, just try to measure what the students learn there, and you will find that the reluctance is very great.

The best data of a certain kind of educational achievement will be found in a series now concluded, the achievement scores on the selective service examinations which were given every year from 1948 to 1973—that is 25 years—and it is the best single collection of data by States that exists or ever has existed.

It is rather striking, for the achievement tests were uniform and so were the medical tests. There you see an absolutely startling difference between States. I will not speak of those States which have awful records, but the Senator is absolutely right in saying that the Middle West has very good records. There are Senators in the Chamber whose States do not turn out so well.

An issue on which I have done some work, as a matter of fact—and never got anybody very much interested in—was that there is an inverse ratio between failure in the mental test and failure in the physical test. Wherever people are very smart, they are also unhealthy; and where they are not very smart, they are very healthy.

In any event, that is an effort to answer the Senator's question. But I say this: What I said on Friday was that unless we adopt this legislation or legislation which would have a comparable effect—and we will adopt this or we will not; nothing else with comparable effect will happen—the private sector of education will become an elite sector. It will be the Deerfields, the St. Marks, the Andovers, and the Exeters of which we have heard today. You will not have any more neighborhood schools that are nonetheless run on alternative bases and provide options to people who have no more than the ordinary opportunities of the ordinary American.

If you care about those schools, you care about this legislation. If you do not care about those schools, this legislation makes perhaps a marginal claim on your support.

Mr. President, we do have some regional reading scores which I will be happy to present to the Senate, but I believe the Senator from Maine wishes to speak.

Mr. CHAFEE. The Senator from Maine has been waiting to speak, but it is not I who have been detaining him. [Laughter].

Mr. MOYNIHAN. It was the Senator from Rhode Island who asked the question, to which he is entitled to an answer, which I proposed to give him whether he would tarry or not.

Mr. CHAFEE. I wanted a sip of water, not the hydrant. [Laughter.]

Mr. MOYNIHAN. Then the Senator went to the wrong post. [Laughter.]

We do have a figure on performance for 9-, 13-, and 17-year-olds. They are largely predictable, and follow almost exactly the pattern of the selective service statistics.

At age 17, the Central region is 2.41 points above the national mean. The Northeast is 1.48 percent above. The West is 1 percent below. The Southeast is 4.11 percent below.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that at 55 minutes past the hour of 5, I be allowed to have 5 minutes to discuss my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, if anybody has any urgent request for any more educational statistics, we can provide them. Failing that, I believe the Senator from Maine had hoped to address the issue, and the Senator from Arizona may wish to do so.

Mr. DECONCINI. Mr. President, the Senator from Maine has been waiting for some time. I have a request for 5 minutes or less, just for a statement, but I defer to the Senator.

Mr. MUSKIE. I would have no objection to the Senate proceeding. I would like to make my statement in plenty of time to let the Senator from Arizona (Mr. GOLDWATER) have his time. Other than that, I am under no pressure. If the Senator wishes to proceed and that accommodates other Senators, that is fine with me. Then I would like to follow the Senator.

Mr. DECONCINI. I thank the Senator.

Mr. MOYNIHAN. Mr. President, I yield the floor.

Mr. DECONCINI. Mr. President, I am pleased to support the Tuition Tax Relief Act of 1978. In my estimation, passage of this measeure will help insure the continuance of the vital nongovernmental components of our educational system.

Perhaps no other nation in the history of the world has placed such great emphasis on unimpeded access to educational opportunity for all its citizenry as has the United States. From the earliest colonial settlements, Americans have recognized, albeit imperfectly at times, that the advantages of education could not be confined to a privileged elite, if the ideals of liberty, equality, and in-

dividualism were to have anything more than symbolic significance. The history of this country and, in fact, of the Western World, amply demonstrates the indissoluble link between the dispersion of educational opportunity to ever wider segments of the population and the growth and vitality of democratic political and social institutions.

At every level American education is characterized by remarkable heterogeneity. Thus, private preparatory schools have coexisted with both public and parochial institutions in providing elementary and secondary instruction to the Nation's children. And, post-secondary education is, if anything, even more richly variegated—ranging from 2-year vocational and technical schools through small State colleges and private liberal arts institutions to world renowned centers of advanced learning, some of which are maintained by private endowment and some by public funds. This diversity is one of the major strengths of the American approach to education; it both reflects and reinforces the social-cultural pluralism from which our country draws so much of its dynamism and vitality and makes it possible for those of varying tastes, interests, and needs to find the kind of institution and/or curricular offering that best meets their particular requirements.

Unfortunately, recent developments threaten to reverse the historic trend toward both wider accessibility and diversity in American education. The crux of the problem is quite simple: schools and colleges across the country—public and private—are facing a devastating combination of declining enrollment and sharply escalating costs.

For example, tuition and fees in public and private colleges increased more than 93 percent between 1967 and 1976, while the median after-tax income of the families with college-age children rose just 66.8 percent. The average annual total cost of a private university will be $5,110 for 1978–79, with the cost of attendance at a public university averaging $3,054. Further, the cost of private elementary and secondary schools has increased substantially in recent years and enrollment in these schools has dropped sharply—from 6.3 million in 1965 to 4.5 million in 1975.

Mr. President, one of the criticisms being levied against this proposed legislation is that the benefits will go primarily to the well-to-do. I respectfully disagree with those who make this charge. According to the Joint Committee on Taxation, 78 percent of the benefits of tuition tax credits would go to families earning less than $30,000 a year. The bulk of the benefits (55 percent) would go to middle-income families earning between $10,000 and $30,000 a year.

Another argument being used by those opposing H.R. 12050 is that it is unconstitutional, particularly the elementary and secondary tax credit provision. Mr. President, I would like to point out that the Supreme Court has never ruled on the constitutionality of a Federal tax credit for tuition paid to college, vocational, elementary and secondary schools. Many who say that this legislation is unconstitutional base their opinion, at least, in part on the Nyquist decision. In this decision, the Supreme Court overturned a State statute which gave almost 100 percent of its benefits to parochial school students. The Court said in its opinion that a bill with a broader class of beneficiaries may be constitutional. H.R. 12050 of course meets that test. Only 24 percent of the benefits go to students attending church-sponsored elementary and secondary schools.

Mr. President, I also want to compliment the Senate Finance Committee for its willingness to try and meet the objections of those who contended that the originally reported bill, H.R. 3646, was too costly. The committee responded by reporting H.R. 12050 which would reduce the cost of the bill when fully implemented by approximately 45 percent.

Mr. President, I believe that H.R. 12050 is consistent with the principles that have guided American educational philosophy and policy. In my view, pluralism is at the center of all we Americans do—it is as central to our educational system as it is to our politics and our culture. Unlike repressive societies we support and encourage diversity of all sorts. To the extent that this legislation will assist an ailing nonpublic educational sector, it will also directly contribute to a continuation of this vital tradition. I, personally, would be greatly saddened if the ravages of inflation and other economic woes forced the closing of private educational institutions. Certainly we cannot deny that our public schools are among the best in the world, but we are better off as a people and a Nation as the result of diversity in our educational system.

Mr. President, I hope, that my colleagues will not view this legislation as a narrow, sectarian measure. Because, in truth, its purposes are broad, and its effects will be positive for all of us. We cannot here say for sure what the Supreme Court may decide about the constitutionality of this legislation. However, as I read our Constitution, tuition tax credits in no way involve the "establishment of religion, or prohibiting the free exercise thereof." I hope, therefore, that we will act favorably on the measure, and I commend the distinguished sponsors of the legislation for their efforts.

Mr. President, I also offer my support for the amendment of my colleague from Arizona to be taken up at 6 p.m.

I thank the Senator from New York and the Senator from Maine.

The PRESIDING OFFICER (Mr. METZENBAUM). The Senator from New York.

Mr. MOYNIHAN. Mr. President, if the Senator from Maine will allow me one-half moment of comment, I express on behalf of the Finance Committee, and I am sure I speak for my colleague, Senator PACKWOOD, in conveying our appreciation for the generous remarks made by the Senator from Arizona and tell him that we are more than sensible of the honor that he does us by supporting this legislation. He has been a distinguished legal officer in his own State. He is an admired and valued Member of the Senate, and we very much appreciate his remarks.

I thank the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Mr. President, the pending legislation has stimulated a wide range of discussion of a fascinating complex of issues from educational opportunity, to diversity of education, to its economic costs, the role of Government providing various kinds of education, performance of education; and all of these are relevant issues that should be discussed and debated at length.

In 20 years in the Senate I have found that when legislation of this kind is introduced, it often stimulates a change in our institutions that by and large is unanticipated at the time the policy is established.

It is not a simple matter to predict the flow of mercury when pressure is applied at any point. So I suspect that what we are debating here if the proposed changes are implemented will produce changes in the pattern of education in this country and its impact upon our youngsters that we probably will not identify with very great precision in the course of this debate.

But I shall confine my remarks this afternoon to what I have come to regard as my prime responsibility in the Senate since the adoption of the Budget Act, and that is the budgetary implications that may flow from this legislation if enacted into law.

Mr. President, 2 weeks ago tonight the Senated voted 59 to 28 to balance the budget by 1981.

Soon the Senate will consider two bills which will guarantee that a balanced budget cannot be achieved by 1981—or even anytime in the foreseeable future.

One of these bills alone could add $14 billion to the deficit by 1983. And it would add more than $5 billion a year after that.

The other bill will add $6 billion to the deficit by 1983. And more than another billion and a half every year after that.

If Congress wants both bills—and the House has already passed both in some form—the total 5-year addition to the deficit could be more than $20 billion.

And the annual cost of these two programs would be nearly $7 billion, even if neither program is never expanded. But we all know both will be enlarged as time goes on.

I refer, of course, to the so-called tuition assistance bills reported by the Committee on Finance and the somewhat less expensive alternative offered by President Carter.

And last Friday the Finance Committee reported a new addition to the family of tuition tax credit bills.

This new addition is a strapping little brother to the somewhat more expensive tax credit bills recently rejected by the Budget and Appropriations Committees.

The apparent reason for this offspring's birth is to avoid the budget process and the appropriations process.

But while Junior's legitimacy may be in some doubt, his parentage is not. He looks a lot like his older brother. Junior

will cost more than $8½ billion during the next 5 years. And it is a good bet his parents intend junior to grow to be just as big as his brother before long.

I understand that before I arrived in the Chamber this afternoon some explicit indications of that prediction were started.

As chairman of your Budget Committee, I must warn the Senate that there is no way any of these bills can be enacted, if we are to come near a balanced budget by 1981—or even within the next 5 years.

Therefore, much as I would like to vote for some of these attractive bills, I will vote against all of them and urge my fellow Senators to vote likewise.

And we must watch with interest how the 59 Senators who voted last Monday to balance the budget by 1981 vote on these multibillion dollar additions to the deficit.

Because 32 of these 59 are cosponsors of one or another of these budget-busters.

Mr. President, I can understand why Senators who want a balanced budget would also like to vote for these deficit deepening tuition aid bills.

I know the pressure which exists to pass these bills.

The citizens of my State are just as anxious for relief from tuition costs as anyone else.

I know what it is to pay to put children through parochial schools, college, and even graduate school, because I had all three of those experiences.

I have 5 children of my own. I have paid my share of tuition bills. But our responsibility, Mr. President, goes beyond responding to the popular causes of the moment. We are talking here about enacting a tax credit bill which would add more than $5 billion a year to the deficit within 5 years. Even little junior would cost nearly $3 billion every year within 5 years, and that assumes we can stunt his growth.

We are talking about adding the President's alternative program which will add more than another $1.5 billion a year to the same deficit by 1983.

So we are talking about a combined cost of these bills, and there are those who would like to see all three enacted, which could reach $7 billion a year in deeper deficits by 1983.

All this, Mr. President, at a time when we still have not figured a way to get the deficit down below $40 billion a year. The Budget Committee completed its consideration of the second concurrent budget resolution last Friday. The resulting deficit projected was $42.8 billion, and we thought we had made substantial and significant progress, because that was a reduction from the $60 billion which the President has projected in January of this year. And still we are at $42.8 billion for fiscal year 1979.

Mr. President, this year's budget resolution does contain some allowance for a tuition tax credit. That allowance is $300 million. That allowance covers only one-half of the first year's cost proposed in the Committee on Finance original tuition tax credit bill. It covers only 60 percent of the first year cost of little junior as reported by the Committee on Finance last Friday.

This $300 million allowance covers only about 5 percent of the costs 5 years from now of the original tax credit bill, the bill which the tuition tax credit proponents really preferred and want to pass. It covers only about 10 percent of junior's annual cost after 5 years.

The budget resolution, Mr. President, also allowed up to $700 million for the President's alternative tuition assistance spending program. The first year cost of the bill which the Human Resources Committee has reported is $1.4 billion, twice the amount budgeted. So all these bills in all their forms violate this year's budget, and their $7 billion a year eventual cost will destroy all our efforts to balance future budgets.

Sure, these bills are attractive, and they do have powerful constituencies. But just where is that extra $7 billion to pay for them going to come from? Who is going to pay for these bills? I will tell you who. It is you and I and every American taxpayer and every child of any of us for the rest of our lives. We will pay for these bills in the form of higher taxes, higher tuition, and higher interest on a higher national debt. That is the sum total of it all.

I know the polls show Americans favor proposals of this kind. These polls have shown favorable majorities for such bills for all the 20 years the Senate has considered them, and I have been here all that time.

But those polls also show something else. They show that most Americans know there is no such thing as a free lunch, especially when the Federal Government provides it. According to a recent Harris poll, 7 out of every 10 Americans feel that the trouble with getting something special from Government for your group is that you will end up paying for it four or five times over in higher taxes. How true that is in the case of these tuition bills.

Let us see how the tax credit, which seems to confer such an attractive gift, actually costs most Americans more than they can ever get from it. After all, even if a family gets some money for 4 or 8 or even 12 years under these proposals, they will pay for that gift all their lives in higher taxes. They will pay the bill for the benefits others receive, and their children will pay the bill. They will all pay the bill every year on every tax return all the rest of their lives.

I asked the staff of the Budget Committee recently to estimate the value American families of four would actually get from a $5.3 billion tax credit if they received an average tax credit of $400 a year for 4 years. That would be $1,600 out of the $21 billion the bill will cost during a full 4-year period.

Then I asked the staff to compute how much these different families would have to pay in the form of higher taxes during their working lives for this tax break.

Similar calculations could be made, of course, for other bills like junior, whose costs and benefits are somewhat lower.

Here is what the staff found: First of all, many families will pay higher taxes but get nothing for their money. Every family whose children are beyond college age will pay taxes for the program but never get anything in return. Many senior citizens in our country, who continue working, and every older working American, whose children have finished school, will also pay taxes for this program all the rest of their working lives, but they will get nothing.

Many families of all ages, more than one out of three do not have any children who go to college or to a private grade or high school. These families and their children will get nothing, but they will all pay higher taxes all the rest of their lives for the benefits more fortunate families will get.

Young couples lose as well.

Any 20-year-old married couple whose joint income is more than $15,000 a year will lose from this bill, unless more than one of their children eventually goes to college.

So will any taxpaying family of four, whose parents are about 30 and who have a joint income over $25,000, even if both their children attend 4 years of college a decade later.

So when all the results are in, many of those families who get something at some time from the tax credit bill will lose over the long run.

There is, after all, no such thing as a free lunch.

The cost to families in increased taxes throughout their working lives to pay for this "tax break" will be greater than many families will ever get in value from it.

In fact, for the most part, only families already eligible for existing direct Federal grants for tuition assistance would, over their taxpaying lifetimes, come out ahead under this bill.

And the existing grant program averages almost $900 per student per year—much more than any of the proposed tax credits would provide.

So for the families this bill would mainly aid, it is unnecessary.

And for the rest of us, this bill is really a kind of Trojan horse—an apparent gift which in fact will cost us all dearly.

Let us take a minute to remind ourselves of the story of the Trojan horse.

Remember how the Greeks, the enemies of the people of the city of Troy, presented a beautiful gift to the Trojan people? It was a giant carved horse allegedly given to enrich their city.

Too late the Trojans learned that the horse was hollow. It contained their most feared enemies. And when darkness fell, out these enemies came and ravaged the city.

The warning the Trojan king gave his fellow citizens about the horse—to "beware of Greeks bearing gifts"—echoes down the ages to us now as we consider this "gift" of tuition paid for with tax dollars.

For as surely as the Trojan horse contained the feared foreign enemies, these multibillion dollar tuition bills will unleash our worst domestic enemies—more deficit spending, more inflation, and more unbalanced budgets.

Let us just examine how expensive these bills really are.

Let us look at each bill we are serious-

ly asked to consider in these days of $40 and $50 billion deficits.

Most expensive is H.R. 3946, the tuition tax credit bill originally reported earlier this year by the Committee on Finance.

It provides credits to taxpayers for tuition for college, for graduate school, for grade school, for high school, and even for part-time students.

It also provides direct payments to those same taxpayers, if their credit is larger than the tax they owe.

It even provides payments to people who owe no taxes at all.

And it provides this aid equally to rich and poor alike.

It will add at least $5.3 billion to the deficit each year by 1983—for a total of $14 billion by that time. And if the level reached at that time—$5.3 billion—is continued for the next 5 years without any increase in the grant or in the amount available, or in the number of eligibles, the next 5 years would add to the deficit by $26 billion—or $40 billion over a 10-year period.

This is the bill both the Budget Committee and the Appropriations Committee have voted to urge the Senate to reject.

So the proponents of the tax credit have created little junior.

They gave birth to junior to avoid some of the objections to the cost of the original bill which have been lodged by the Appropriations Committee and the Budget Committee.

But even junior will cost almost $3 billion a year by 1983 and a total of more than $8½ billion in new deficit by that time.

At the same time, the proponents of the original bill may take some of the most costly provisions deleted from big brother and offer them as amendments in the Senate to beef junior up.

And no matter how we come out on these amendments, we know that we have not seen the last of big brother, even if only junior is enacted.

The proponents of the original, more expensive bill will soon be back to help junior grow.

Now the President has proposed an alternative program, which is better targeted on those in need and restricted to college education.

No payments to millionaires here.

No deficit financed private grade and high school tuition payments.

But still an average annual cost of more than $1.2 billion a year during the next 5 years.

And a total addition to the deficit by 1983 of more than $6 billion.

So the combined deficit-financed cost of the tax credit and the President's bill could be as large as $20 billion within 5 years and $7 billion more a year after that.

And these two deficit-financed proposals are offered at the same time as the Federal Government is already spending nearly $8 billion a year to support higher education, and almost $21 billion a year to support education at all levels.

So before we plunge forward and add another $20 billion to the deficit for education aid, let us take a look at the more than $7 billion in Federal aid for tuition costs which is already available to college students without our writing in the law.

First is the basic educational opportunity grants program. Under this program, a student from a low- or moderate-income family may obtain a grant of up to $1,800 a year for attending college.

Last year more than 2.4 million students received basic educational opportunity grants, which averaged $895 each.

Congress appropriated $2.2 billion for this tuition grant program last year alone.

Students who need even more Federal aid to finish their education can get up to another $1,500 a year under the supplemental educational opportunity grants program. Congress appropriated $220 million for this student-aid program last year.

The Federal Government also helps fund the State incentive grant program, which makes college grants of up to $1,500 a year to eligible students.

Last year Congress provided $64 million for the State incentive grants program and the State provided another $64 million.

In addition to these grants, loans are also available through the Federal Government for college costs.

A college student can obtain a loan of up to $5,000 for undergraduate school and another $10,000 for graduate school from the national direct student loan program.

Repayment of these loans, which bear only 3 percent interest, is made over a 10-year period after graduation.

Congress has appropriated $3.6 billion for this revolving fund program during its 20-year existence. We appropriated $311 million just last year.

Loan aid is also available through the guaranteed student loan program. Under this program, a college student can obtain a Government guaranteed loan of up to $7,500 during undergraduate years and up to $2,500 a year more for every year of graduate school.

In many cases the Government will pay the 7 percent interest on these loans during the student's school years.

After graduation, the student has up to 10 years to repay these loans.

Last year these two loan programs generated $2.4 million in additional tuition assistance for 1.9 million college students.

In addition, the federally funded college work study program pays for work by students on campus for up to 15 hours a week. Last year Congress appropriated $435 million for college students participating in the work study program.

And let us not forget the GI bill, under which more than 1,300,000 college students are receiving benefits today. Any of the 5.5 million veterans now eligible for this program can obtain up to $311 per month for as long as 45 months for college and post graduate studies.

Last year the Federal Government provided $2.1 billion to pay for this college education through the GI bill.

So the Federal budget is not stingy about education. Last year alone we appropriated almost 21 billion Federal dollars to support education in this country. And more than $7 billion of that amount was directed solely to these tuition aid programs, which directly benefited more than 52 percent of all college students in this country.

And now some Senators—yes, including many who voted the other night to balance the budget by 1981—are asking us to add another $7 billion a year to these programs and to the Federal deficit.

Even if we could afford these new subsidies, they would provide little tuition relief to those who receive them.

First of all, the effect of dumping another $7 billion a year in spending into the economy will itself be inflationary for everyone.

And what college board of trustees—and I am a member of one—will be able to withstand the temptation to raise tuition by exactly the amount of the tax credit, since it goes to every single student in equal shares?

What State school which now charges a tuition fee less than these proposed payments will not raise fees to soak up this new free money?

I recognize that poll after poll seems to suggest a great demand for these tax credits.

But what would the average taxpayer say if the pollsters pointed out that much of the money distributed under these programs will simply be lost to inflation?

That the richest millionaire would receive the same benefits as the poorest citizen?

That many taxpayers whose children leave public high school and go to work will get nothing?

That the taxes paid to finance benefits to others will in many cases vastly exceed any benefit a family will ever get?

That all these bills will have to be financed from the deficit?

Fortunately, we do have the answers to some of these questions, because the pollsters have asked them.

According to the Harris poll released on May 18 of this year, Americans want Federal aid for tuition.

But 3 out of 5 of these same people oppose any plan—like the tax credit proposals before us—which give rich and poor the same benefit.

A recent Roper poll reports that the public rejects by more than 2 to 1, proposals like this tax credit which extend Federal aid to elementary and secondary schools.

And there is one finding in the polls which should rivet our attention. The Harris poll, just 90 days ago, revealed what we should have known all along: That the public does not want new tuition aid which—like these bills—would add to the deficit.

So I think we underestimate the citizens we represent if we believe that what they really want is another big dose of deficit in the name of tuition assistance.

And so I must return to the 59 Senators who voted the other night to balance the budget by 1981.

Sure we want to balance the budget.

I hope we can.

But let me tell you this:

The enactment of any of these multi-billion dollar tuition bills absolutely guarantees that we will be deep in deficit for years to come.

Mr. President, I think our response to all these bills must be clear.

If we were presiding over the distribution of a $5 or $6 billion surplus we might decide that these bills should be enacted.

Because, like the Trojan horse, they are powerfully attractive, despite their multi-billion dollar cost.

But the truth—and we all know it—is that we cannot afford them.

Our citizens cannot afford the deficit and inflation this Trojan horse releases into our midst.

And it is our duty—even though we may take some political heat for it—to eliminate the unprecedented continuing deficit we already have, before we add these new multi-billion dollar budget-busters.

So for me the choice is clear.

And I hope it is for you.

And I hope it is for the 59 Senators who voted last Monday night to balance the budget by 1981.

I would like to add a word about the Goldwater amendment, not in itself, because I understand, I think, what motivates my good friend from Arizona to offer it, but because I think it illustrates a point about this kind of legislation and what will happen to it if it goes on the books.

The Goldwater amendment is an excellent example of the major revenue losing amendments that inevitably will increase the long term budgetary costs of the tuition tax credit bill because somebody will be trying to straighten out what he sees to be the inequities of the resulting policy unless changes are made and those changes will inevitably involve cost.

The tax credit for elementary and secondary school tuition in H.R. 12050 would constitute a substantial shift in Federal education aid policies toward private schools, and away from public schools. As a result, it is very likely that an amendment such as the Goldwater amendment would be offered to give some comparable additional tax relief to taxpayers supporting the public school system and not otherwise benefiting from the tuition credit.

According to the best estimates now available, the Goldwater amendment will cost $1.5 billion annually after it first becomes effective in fiscal year 1981.

We can be certain that unless the tuition tax credit bill is defeated completely, its provisions inevitably will be expanded in numerous ways comparable to the Goldwater amendment—both in this bill as well as in future legislation.

For example, other Senators will be likely to offer amendments to make the credit refundable. That subject has been raised this afternoon. After all they will say, why limit the credit benefits to taxpayers? They will offer that to the Goldwater amendment if it becomes law.

Others will offer to make the maximum credit $500 for elementary and secondary school tuition—the same maximum credit as for college tuition. After all, they will say, why should not the maximum elementary and secondary school credit be the same?

Others will want to extend the credit to graduate students, and others to part-time students.

And finally, in time, others will want to expand the maximum college credit to $1,000 and even higher levels. And all these amendments each would cost billions of dollars—just like the Goldwater amendment.

Just like the application of the tuition credit to elementary and secondary tuition, the Goldwater amendment first becomes effective in fiscal year 1981. These deferred effective dates avoid the discipline of the budget process, and avoid competition with other budgetary decisions Congress will be making in the future for fiscal year 1981 and later years. The Goldwater amendment will serve as a blueprint for other revenue losing amendments to the tuition credit bill which also are likely to be made prospective to fiscal year 1981, thereby reducing the ability of Congress to cut future year budget deficits.

The Goldwater amendment and the entire tuition tax credit bill, H.R. 12050, must be defeated if we are to meet our goal of balancing the budget a few short years from now.

I have been saying over and over again in the last 4 years that probably the most difficult problem we face if we are to get a handle on the budget is to control uncontrollables. We are now considering one of the biggest uncontrollables to come before the Senate in my 20 years in the Senate.

(Mr. PELL assumed the chair.)

Mr. DECONCINI. Will the Senator yield for a question?

Mr. MUSKIE. Yes, I am happy to yield.

Mr. DECONCINI. Early in his remarks, the Senator from Maine talked about inability to balance the budget if this particular legislation were passed and if the Goldwater amendment were passed. Is that not fraught with some contradiction? Really, is it not a matter of where we place our priorities and whether or not we reduce spending in some other areas; that if truly, we are to meet our responsibility in this body, we are to set those priorities, and if this is where we are to give the taxpayer a reduction, then we should meet the responsibility somewhere else?

How does the Senator respond to that?

Mr. MUSKIE. That is the rationale with which other Senators and I comforted ourselves for 16 years in my Senate career. We all made our individual priorities, we all said that we were carrying around in our heads a balanced budget of our own that made room for our priorities, but not necessarily everybody else's. The result was no discipline with respect to priorities. We approved every priority so that we could get the votes for our own priority.

The second most important point, I say to my good friend from Arizona, is the point I have just completed: The biggest problem in the budget is uncontrollables. By that, I mean spending that can be reduced or controlled only by changing existing law.

When we enact these tuition tax credit bills into law—this includes the Goldwater amendment—we add to the uncontrollables. Uncontrollables have grown from 59 percent of the budget just 10 or 12 years ago to 73 percent, close to 75 percent, this year.

The Senator says, well, balance the budget elsewhere. Out of the remaining 25 percent? What does 25 percent of today's budget amount to? Figure it out. $125 billion. That is what we have available to us, that $125 billion of controllable spending, with which to balance a budget that is $42 billion out of whack. That means we would have to cut every other program of the Government by 40 percent, including these direct programs of student assistance. Those are not uncontrollables. We would have to cut them and every other function of the Government, from national defense, which is pretty much the result of annual authorization bills, we would have to cut every other function in the Government in order to get balance.

So we say, let us add to these uncontrollables and take that out of the present controllables. We cannot do it.

Mr. DECONCINI. Will the Senator admit to the fact that it is a matter of priorities, and that this body is to set those priorities? They may be different from what the Senator's priorities are, but is that not the process?

Mr. MUSKIE. If the Senator wants my candid opinion, yes, the Budget Act makes priorities of equal importance to the balancing of the budget and so on. But let me say, I have been in charge of the process on this side for 4 years. The big problem we face right now is inflation, the declining value of the dollar. For me, there is only one priority at the present moment in time: That is, controlling inflation and holding Government spending down to the bare minimum. That is my one priority.

The Senator is entitled to his own. But I have a special responsibility as chairman of the Budget Committee and I am making that statement in that capacity, not as an individual Senator.

Mr. DECONCINI. I understand.

Mr. MUSKIE. I think the Senator from Arizona has the floor.

Mr. GOLDWATER. A parliamentary inquiry. Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. GOLDWATER. I think the hour is now 5:55. I have the floor for 5 minutes.

The PRESIDING OFFICER (Mr. METZENBAUM). The Senator is 1 minute in anticipation of that moment.

Mr. GOLDWATER. It depends on what clock you are looking at.

Mr. MOYNIHAN. Will the Senator yield me 1 minute?

Mr. GOLDWATER. Yes, by that clock.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that Gerald Rosen of Senator GRIFFIN's staff be granted the privilege of the floor throughout the duration of consideration of this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. I should like to thank the chairman of the Budget Committee for a forceful and effective statement. He makes the case that the committee

cannot support the Goldwater amendment because it was not part of the Finance Committee budget request. The tuition tax legislation before us, however, was part of our budget request and has been so incorporated by the Budget Committee.

One final quick comment: In providing support for the non-Government sector of elementary and secondary schools, the Congress will be supporting a vastly more efficient sector of the educational system.

The PRESIDING OFFICER. Under the previous order, the hour of 5:55 having arrived, the Senator from Arizona (Mr. GOLDWATER) is recognized for 5 minutes.

Mr. GOLDWATER. I thank the Chair.

First, Mr. President, I ask unanimous consent that my assistant, Mr. Terry Emerson, be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, in the printing of the amendment, inadvertently, there was left out a sentence. I ask unanimous consent that the printed amendment be modified as follows: In line 18, page 2, at the end of the word "years", add "beginning after December 31, 1980."

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment was modified.

The PRESIDING OFFICER. Will the Senator please send the modification to the desk?

Mr. GOLDWATER. Yes.

Mr. President, I have listened to the Senator from Maine and I have full sympathy with the problems he is faced with. I realize that only 30 percent of the money we talk about in this Congress can be worked on as a possible means of cutting down the expenses of Government. But, Mr. President, I think there are ways that this can be cut and I admire the Senator from Maine for the courage he has shown in trying to do it. I do not have a lot of admiration for my colleagues who keep trying to add to that 30 percent.

I will admit that the costs he used in relation to my amendment are substantially true. On June 8, 1973, I was provided by the Department of the Treasury with a written estimate of the cost of my residential property tax proposal. At that time, the estimate was about $1 billion annually.

The proposed tax credit was the same then, as it is today, $150. But there were other features in my bill that would have made it more costly.

For example, the bill which the Treasury Department reviewed in 1973 had a refundable provision under which all elderly taxpayers, 62 years of age or over, would be granted a cash rebate of the tax credit if their incomes were so low that they could not otherwise benefit from it.

Second, I have now added a restriction in the bill on using the same amount of property taxes twice: once as an itemized deduction and again as a tax credit. The portion of property taxes used for the tax credit cannot be claimed under my new proposal as a deduction.

Third, any taxpayer who claims the tuition tax credit will not be eligible to use the property tax credit in the same tax year. Thus, the number of taxpayers who are covered by my proposal will be reduced by the number of persons claiming the tuition tax credit.

These three changes will substantially reduce the cost of the property tax credit.

Nevertheless, the Joint Tax Committee has given me an informal estimate that is higher than the one provided by the Department of the Treasury. The Joint Committee staff estimates my amendment would cost $1.5 billion, on the ground that property taxes have increased since the earlier estimate was made.

Now, in view of the fact that the tax credit is but $150, I cannot believe that very many property owners would pay a real estate tax of $150 today who did not already pay at least that much in 1973. Moreover, I believe the Committee staff has failed to take adequate account of the major reductions in cost that result from the important changes I have made in the bill.

At this time, I do not have anything in writing from the committee staff showing what assumptions were made in arriving at the estimate, so I think the figure of $1 billion is about as good as the $1.5 billion estimate.

In any case, those are the ball-park figures we are talking about.

I might state further that this amendment is not a last-minute idea. I remember introducing this in 1961. I got the magnificent total of 10 votes and there are 4 of those gentlemen still left with us, so I think I can count on at least 5 and, hopefully, more.

Mr. President, let us look at the moneys that are spent in this body. They are from the International Monetary Fund, where money is loaned at 2 percent and they do not start paying for 10 years. We look at foreign aid, where we have tossed hundreds of billions of dollars down the drain without doing a terrible amount of good.

We just created the other day a Consumer Bank and Lord knows how much money that is going to cost. It goes on and on.

All I am asking in my amendment is that for each of the 50 million single family, owner-occupied households in this country—not a person paying rent, but a person who is paying property taxes on his or her residence—of which a portion of those taxes go to education, that he be allowed up to $150 deduction on his tax. This becomes a cost that I think would be justified as a credit because of other costs of a similar nature that are under the pending bill as to private schools.

Mr. President, in the great majority of States, and the District of Columbia, the property tax is still the major single source of revenue for public elementary and secondary schools.

In 30 States and the District of Columbia, more than 40 percent of elementary and secondary school revenues are derived from local taxes, which are preponderately real estate taxes.

In only five States, Kentucky, North Carolina, New Mexico, Alaska, and Hawaii, do local taxes constitute less than 20 percent of total public school revenues.

My amendment states that the property tax can be used as the basis for the tax credit in all States where it provides "a substantial source of revenues raised for the support of public education."

Clearly, the property tax is a "substantial" source of revenues in any State where it provides 20 percent or more of total revenues. Moreover, I think we could agree that the property tax would qualify as a substantial source of funds in any State or locality where it reaches the level of about 15 percent.

This would qualify the tax in all States except possibly two or three.

This provision is put in the bill to guarantee that in those few areas where property taxes are not important as a source of public school financing, taxpayers will not be left out from the public school tax credit. But in nearly all States, the real estate tax will be the basis of the tax credit.

I ask unanimous consent that this table be printed in the RECORD at this point in my remarks.

There being no objection, the table was ordered to be printed in the RECORD as follows:

Percentage of public school revenues derived from local sources, 1977–78 (elementary and secondary)

U.S. aggregate	47.6
70 percent and over:	
District of Columbia	83.7
Nebraska	74.7
New Hampshire	85.7
South Dakota	73.6
60 to 70 percent:	
Connecticut	63.4
Massachusetts	61.3
Michigan	61.6
Oregon	65.2
Vermont	66.4
Wisconsin	60.7
Wyoming	62.8
50 to 60 percent:	
California	50.7
Colorado	57.9
Iowa	55.0
Missouri	56.3
Maryland	52.0
Nevada	57.4
New Jersey	56.7
New York	57.6
Rhode Island	52.5
Ohio	53.3
Virginia	58.7
40 to 50 percent:	
Arizona	45.7
Idaho	41.3
Illinois	45.9
Indiana	42.5
Kansas	42.5
Maine	45.7
Montana	40.0
North Dakota	45.0
Pennsylvania	46.4
30 to 40 percent:	
Arkansas	32.1
Florida	38.1
Georgia	35.8
Minnesota	36.3
Oklahoma	33.8
South Carolina	30.9
Tennessee	36.9
Texas	38.1
Utah	38.5
Washington	30.9

20 to 30 percent:	
Alabama	21.0
Delaware	22.0
Louisiana	24.9
Mississippi	23.2
West Virginia	27.2
Less than 20 percent:	
Alaska	17.5
Hawaii	5.9
Kentucky	16.3
New Mexico	16.5
North Carolina	18.7

Source: National Education Association "Estimates of School Statistics 1977–78."

Mr. GOLDWATER. Mr. President, the great bulk of money for public schools has historically come from property taxes. It does come in a growing measure now from Federal funds. This is why I stood on this floor, year after year, fighting Federal aid to education, because I could see the costs going over $18 billion and they are now over $20 billion. I could see our entire educational program being taken over by a union, the National Education Association. They are the ones who do not want to see this thing happen. They are the big activating and motivating force behind the objection to both credits for tuition to private schools and my own.

Mr. President, I repeat that amendment does not grant a tax credit to the renters of a household.

For the most part, the amendment applies only to owner-occupied, single-family residences.

It does not apply at all to commercial apartment developments or other types of business realty.

Since the owner of an apartment building will not get a tax credit under the amendment, I have not included renters either.

As to the few number of taxpayers who may be renting the house they own to another party, the ceiling of $150 put on the tax credit will prevent them from benefiting in almost all cases from taxes paid both on their principal residence and their rental home.

But if it would help any Senator to support the amendment, I would be agreeable to modify it to specify that the tax credit is only granted to a taxpayer for a house he owns and uses as his principal residence.

Now, I would like to explain that the $150 tax credit is not pulled out of the air.

I have reviewed the property tax relief programs of the several States which have adopted circuit breaker statutes that rebate excess tax burdens to particular groups of homeowners, such as the aged or low-income families.

The national average benefit given by the States with such programs is about $150. Thus, I selected $150 as the amount of property tax relief provided in the Federal program which my amendment would create.

In closing, I have to say, Mr. President, this has not entered into the argument, but elementary education in this country has never been at such a bad level as it is now. If the answer is more Federal spending for elementary education, I am afraid we are going in the wrong direction. All we have to do is look at the results of tests given in our military academies to find out where our elementary education is going. All we have to do is look at colleges that have to teaching reading, writing, and arithmetic.

Thus, I would hope that instead of direct Federal financing, a tax credit might be granted for taxes imposed by local governments to finance their schools.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Under the previous order, the hour of 6 p.m. having arrived, the Senate will proceed to vote on amendment No. 3445 offered by the Senator from Arizona, as modified. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Iowa (Mr. CLARK), the Senator from Mississippi (Mr. EASTLAND), the Senator from Kentucky (Mr. FORD), the Senator from Colorado (Mr. HART), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Georgia (Mr. NUNN) are necessarily absent.

I further announce that, if present and voting, the Senator from Iowa (Mr. CLARK) and the Senator from Minnesota (Mrs. HUMPHREY) would each vote "nay."

Mr. STEVENS. I announce that the Senator from Massachusetts (Mr. BROOKE) and the Senator from Kansas (Mr. PEARSON) are necessarily absent.

The result was announced—yeas 21, nays 69, as follows:

[Rollcall Vote No. 314 Leg.]

YEAS—21

Allen	Griffin	McIntyre
Biden	Hatch	Meicher
Curtis	Hathaway	Roth
DeConcini	Helms	Stevens
Durkin	Laxalt	Talmadge
Garn	Lugar	Thurmond
Goldwater	McClure	Tower

NAYS—69

Anderson	Hansen	Muskie
Baker	Haskell	Nelson
Bartlett	Hatfield, Mark O.	Packwood
Bayh	Hatfield, Paul G.	Pell
Bellmon	Hayakawa	Percy
Bentsen	Heinz	Proxmire
Bumpers	Hodges	Randolph
Burdick	Hollings	Ribicoff
Byrd, Harry F., Jr.	Huddleston	Riegle
Byrd, Robert C.	Inouye	Sarbanes
Cannon	Jackson	Sasser
Case	Javits	Schmitt
Chafee	Kennedy	Schweiker
Chiles	Leahy	Scott
Church	Long	Sparkman
Cranston	Magnuson	Stafford
Culver	Mathias	Stennis
Danforth	Matsunaga	Stevenson
Dole	McGovern	Stone
Domenici	Metzenbaum	Wallop
Eagleton	Morgan	Weicker
Glenn	Moynihan	Williams
Gravel		Young
		Zorinsky

NOT VOTING—10

Abourezk	Ford	Nunn
Brooke	Hart	Pearson
Clark	Humphrey	
Eastland	Johnston	

So the amendment No. 3445, as modified, was rejected.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I take the floor at this time to determine, if I may——

The PRESIDING OFFICER (Mr. GLENN). May we have order in the Senate? Conversations will cease, so that we can hear the majority leader. Will Senators please take their seats or retire to the lobby or the cloakroom? Will conversations please cease on the floor?

Mr. ROBERT C. BYRD. Mr. President, I take the floor at this time to determine, if I may, what the prospects are for further votes into the evening. May I see a show of hands as to amendments during the remainder of the day?

Mr. MOYNIHAN, Mr. PACKWOOD. Any others?

Could either or both of these distinguished Senators inform the Senate as to how much time they desire to take on their amendments?

Mr. MOYNIHAN. About a half hour on my amendment.

Mr. PACKWOOD. I would expect to take about an hour on mine.

Mr. ROBERT C. BYRD. I wonder whether we could have a time agreement on the two amendments.

Mr. PACKWOOD. I would be reluctant at the moment to enter into a time agreement. I do not think mine would take more than an hour.

Mr. MOYNIHAN. We, of course, are working together, and the first amendment would be done in a half hour.

Mr. ROBERT C. BYRD. Would the Senator prefer not——

Mr. MOYNIHAN. I would prefer not to enter into a time agreement.

Mr. ROBERT C. BYRD. Does the Senator from New York intend to call up his amendment first?

Mr. MOYNIHAN. That is right.

Mr. ROBERT C. BYRD. And he expects to have a rollcall vote on it?

Mr. MOYNIHAN. I do.

Mr. PACKWOOD. I expect a rollcall vote.

Mr. ROBERT C. BYRD. Then, it would appear that we will be here a while, with prospects for a couple of votes.

Mr. PACKWOOD. Yes—for certain.

Mr. ROBERT C. BYRD. Is it possible now to get an agreement on a time for a vote on the amendment by Mr. HOLLINGS tomorrow?

Mr. PACKWOOD. Not right now, but I think before the evening is over we could have an agreement. Not right now, so far as I am concerned, but I think that before the evening is over we can get it.

Mr. HOLLINGS. Will the Senator tell us the nature of his amendment? I am not familiar with the amendments.

Mr. MOYNIHAN. These are preambular amendments.

Mr. PACKWOOD. Both.

Mr. HASKELL. Mr. President, would it be too much to ask the Senator from New York what a preambular amendment is?

Mr. MOYNIHAN. An amendment to the preamble.

Mr. ROBERT C. BYRD. Mr. President, I have no desire to hold the floor longer. I suggest that the Senator from New York may wish to call up his amendment.

UP AMENDMENT NO. 1651

(Purpose: To add to the statement of findings the importance of the existence of diverse public and nonpublic educational institutions of high quality)

Mr. MOYNIHAN. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN), for himself and Mr. PACKWOOD, Mr. ROTH, and Mr. RIBICOFF, proposes an unprinted amendment numbered 1651.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, line 25, insert the following: after "-cans." and before "Federal,"

"The Congress finds that the existence of diverse public and nonpublic educational institutions of high quality, at the primary, secondary, and postsecondary levels, is important to an educational system suited to the pluralist preferences and aspirations of the American people."

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator's point is well taken.

May we have order in the Chamber, please? Will Senators please take their conversations to the cloakroom or the lobby?

The Senator from New York is recognized.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. MOYNIHAN. Mr. President, I yield for a unanimous-consent request to the Senator from Indiana.

Mr. BAYH. I thank my colleague from New York.

Mr. President, I ask unanimous consent that Barbara Dixon, of my staff, be accorded the privilege of the floor during the debate and votes on the bill and amendments thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that Greg Fusco, of Senator JAVITS' staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I ask unanimous consent that Bob Collins, of my staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I am happy to yield to the Senator from Washington.

Mr. MAGNUSON. How long does the Senator expect we will be here tonight?

Mr. MOYNIHAN. We expect in the area of 2 hours.

Mr. MAGNUSON. Two hours?

Mr. MOYNIHAN. That is right.

Mr. MAGNUSON. Are there substantial amendments the Senator is making?

Mr. MOYNIHAN. These are in our view substantial amendments.

Mr. MAGNUSON. All right.

Mr. MOYNIHAN. The first of which I shall address myself to is more by way of making a statement of educational policy.

Mr. MAGNUSON. I am not objecting to it. I simply want to get an inkling of how long we will be here tonight.

Mr. CHILES. Are there Senators who are going to be opposed to those amendments, or is this something we could do by modification by unanimous consent?

Mr. MOYNIHAN. No, I think it is the case that we hope the Senate might hear us on these matters and as our colleagues judge the worth of these amendments they will make some judgment about the worth of the legislation itself.

Mr. PACKWOOD. If I might say, I think there will be some opposition. I do not think they are voice vote, no problem, everybody-for-them amendments.

Mr. MOYNIHAN. Mr. President, I am more than aware, as are my associates, that we have a moment when the Senate will be attending to some of the arguments that we have been making—and some of those made against us—in what is now 2 long days of debate ranging from very large constitutional issues to very specific questions of public finance.

The amendment which I have sent to the desk simply adds to the preamble of the legislation the statement that Congress finds that the existence of diverse public and nonpublic educational institutions of high quality at the primary, secondary, and post-second levels is important to an educational system suited to the pluralist preferences and aspirations of the American people.

Mr. RIBICOFF. Mr. President, may I make a point of order?

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. RIBICOFF. The Senate is not in order.

The PRESIDING OFFICER. The Senator's point is well taken.

We have had fairly good order the last few minutes. Could we have all conversation cease, please, so we may hear the Senator from New York, so proper attention may be given to his amendment, his preamble to the legislation?

The Senator from New York.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, the purpose of this amendment is to focus in particular the attention of the Democratic Members of the Senate to a difficulty which our party has faced in recent years which is the charge that we are becoming the party of the bureaucracy, that we are becoming a party wedded to governmental solutions, to the continual expansion of State functions.

It seems to me and to some of my associates that that question will be tested in the way in which we support or fail to support this legislation as in few issues before us in recent times because our party, responding to the clear direction of public opinion, has repeatedly endorsed this measure in its general form or called for measures of this general form for a period of 15 years since tuition tax credits were first proposed by Senator ABRAHAM RIBICOFF in 1963, the year he entered the Senate from having been the first Democratic Secretary of Health, Education, and Welfare. Now, after 15 years, the measure is on the floor.

So this morning I put four questions to fellow Democrats in this Chamber:

Are we to think that the House of Representatives with its heavy Democratic majority was wrong to approve this legislation?

Are we to think that Senator ABRAHAM RIBICOFF was wrong and proposed an unconstitutional measure when he first proposed tuition tax credits or when he said on Friday, "If I thought that this bill clearly failed the tests used by the Supreme Court in striking down aid programs designed by the States, I would not support it"?

Are we to think that Senator Hubert H. Humphrey and Senator GEORGE MCGOVERN were wrong and proposed an unconstitutional measure when in the course of their Presidential campaigns each specifically pledged his support for tuition tax credits for elementary and secondary schools?

And finally, are we to understand that the Democratic Party was wrong and proposed an unconstitutional measure in 1972 and 1976 when in its platforms it committed itself to aid for children in nonpublic schools? Are we to conclude that our party held out false hopes?

Mr. President, on Friday morning in a brilliant address which began this debate Senator RIBICOFF stated the plain fact, as I see it, when he said:

I do not know whether this bill will pass or fail, but I predict that what has been started here today in the U.S. Senate will come to fruition. There is no question but that if this bill does not pass, it will become one of the key issues in the 1980 Presidential campaign—and rightly so.

Mr. President, I ask whether my party which has so courageously espoused this proposal over 15 years now wishes to turn its back upon it.

Mr. RIBICOFF. Mr. President, will the Senator yield at this point?

Mr. MOYNIHAN. I am happy to yield to the Senator from Connecticut.

Mr. RIBICOFF. Mr. President, I have followed the debate so far, and it seems to me that a few questions have been raised that I wish to discuss with my distinguished cosponsors. It seems that the debate is posing a conflict between public schools, on one hand, and a monolithic sectarian system of schools on the other. There has been much talk that this bill has been designed to take care of Catholic parochial schools.

Will the distinguished Senator explain to us what schools are we talking about in this bill?

Mr. MOYNIHAN. Well, I would put it this way: We are, first of all, talking primarily about schools which have a church affiliation. We have gone into great detail in our earlier debates documenting the fact that the first schools in the United States, without exception, had this affiliation, and some continue to exist.

I could give the Senator some examples. The largest number are Catholic schools. That is the oldest system, older than the Protestant schools that joined the public school system in the first half of the 19th century.

There are 166,000 students in schools run by the Missouri Lutheran Synod. There are 76,000 students in Seventh Day Adventist schools. There are 49,000 in Calvinist schools. There are 230,000 in Evangelical Christian schools. There are 90,000 in Jewish day schools, 14,000 in Quaker schools; 76,000 in Episcopal schools.

Military schools are an old tradition and an honored one in this country, and there are 14,000 students in those schools.

There are about 277,000 students in schools not affiliated with a church, generally described as independent schools. It is immensely varied. It goes to every State of the Union.

Some of these schools date well back into the 18th century. Some are recent. The State of California has shown perhaps the greatest productivity of new schools in recent years.

Mr. RIBICOFF. There has been much talk, too, in the debate so far that private schools are full of people of the same economic and social groups, whereas the public school has great diversity.

Is that actually the case today when you talk about neighborhood schools today, that the neighborhood has a degree of sameness throughout? It usually comes in neighborhoods where people of the same ethnic background, same social background, and same economic background reside. Do you not have great variety in these private schools that I have often found in the public school system?

Mr. MOYNIHAN. I think that is exactly the statistical case. There is no profile of the nongovernment school in this country because none would be possible. No two are alike.

Four hundred thousand students in the nonpublic schools are minority group members. One of the largest Catholic schools in the United States, if not, I think, the largest, is in Holy Angels Parish in Chicago which is in a black neighborhood and is predominantly black.

The characteristic of these schools from the Hassidic Day Schools in Crown Heights in Brooklyn to the Amish schools in rural Pennsylvania to the big city schools in Chicago to the military academies founded in the 18th century, is their diversity, but it is a diversity that extends to the full range of the characteristics of the American population, which is an immensely diverse population.

Mr. RIBICOFF. Even the so-called better private schools, do you not find a trend, with large scholarship grants, that there is a diversity not only of the so-called rich kids but you have poor, middle class, minorities, and, as a matter of fact, that they go out deliberately to seek a representative group of students in the private schools throughout our land; is that not so?

Mr. MOYNIHAN. I think that is entirely the record, and you can almost make the general judgment that as the school moves up from being strictly a neighborhood school to a regional or national characteristic. That is distinctively the case.

Mr. RIBICOFF. Much has been made about the cost of this bill, and it will cost money. I do not think it is our contention that somebody is getting something for nothing. The taxpayers will pay.

But is it not true that there has been a decline in the private school enrollment over the past number of years because of the onerous financial burden? Where do the children go who drop out of the private school system? They go to the public schools, is that not true?

Mr. MOYNIHAN. In the main that is what we have to assume, and that appears to be the case.

Mr. RIBICOFF. Is it not the case that the average pupil expenditure for the primary and secondary school is $1,600?

Mr. MOYNIHAN. About $1,800 now, I believe.

Mr. RIBICOFF. It has gone up.

The average proposal for the elementary and secondary level would be about $170 a year.

Mr. MOYNIHAN. About that.

Mr. RIBICOFF. If these schools go under, the private schools, because of their inability to finance themselves, you would have the potential of some 5,300,000 students who would come as a burden on the public school system; is that not so?

Mr. MOYNIHAN. That is exactly the case.

I can add another figure. We do not have an exact number, but as best anyone can say the nongovernmental elementary and secondary schools of this country cost about one-quarter per student of what the government schools cost, and the point the Senator from Maine (Mr. MUSKIE) was making earlier is that if we lose these students at the rate we have been losing them, we will lose the most efficient sector of our education.

We have estimated—it is obviously only an estimate—that if these students were to go into the public sector you would add approximately $9 billion a year in educational expenditure to the public sector.

Mr. RIBICOFF. So that would be a substantial burden on public education and the taxpayers that they now do not have.

Mr. MOYNIHAN. And $9 billion additional spent for no additional product. That is the definition of an inflationary measure.

Mr. RIBICOFF. There are those who contend that this proposal would destroy the public school system. What has been the impact of Federal aid to the private colleges? Has that harmed the State college system?

Mr. MOYNIHAN. It certainly has not yet reversed the shriveling of the private colleges and universities. Twenty-five years ago they had half the enrollment in the country. Today they have 22 percent.

I might add that there can be no mistaking the sharp falloff in enrollment in private elementary and secondary schools that commenced just after Federal aid to public schools begins.

Mr. RIBICOFF. I think maybe we should ask the assistance in this colloquy of the distinguished Senator from Oregon. There has been much debate in this Chamber over the last 2 days concerning the constitutionality of tax credits.

Are any of these funds going directly to church-related or private elementary and secondary schools?

Mr. PACKWOOD. No, not at all. They are tax credits which are taken off your income tax. You make the choice of where you want to go to school, primary, secondary, or college. You pay your tuition and you take a portion of it off your income tax.

Mr. RIBICOFF. The Senator from Oregon and, I believe, the Senator from New York and the Senator from Delaware, and myself have not been the ones, have we, to state this is an absolutely constitutional matter? We have said we believe it is, but we do not decide constitutional questions. That question has to be decided by the Supreme Court of the United States.

Is it not true that there is a divergence among constitutional scholars as to whether this proposal is or is not constitutional?

Mr. PACKWOOD. There is a split of opinion among men and women of equal repute, equal ability, as to whether or not the tax credit idea is constitutional. That is why we have put into this bill an expedited court test and a 2-year delay in the primary and secondary tax credit, and the court can test it before any dollar of credit is claimed in anybody's income tax.

Mr. RIBICOFF. In other words, there has been a very, very careful drafting of this measure to assure the policy we are discussing concerning the advisability would be determined as to its constitutionality by the Supreme Court of the United States before there was any expenditure or any tax credit given any single individual in this country.

Mr. PACKWOOD. Drafted very carefully and in good faith because we know there are people who are convinced that this is unconstitutional. But what we are saying is give us a chance. We are all going to live with the Supreme Court decision, whatever it might be, whether we like it or not. We will live with it, and all we are asking is a chance to get it to the Court and not have this body try to decide whether or not it is constitutional.

Mr. MOYNIHAN. The Senator from Connecticut, knows that we did not proceed in a way that would create a large public interest in tuition tax credit before the Court had a chance to rule, such that the Court might feel pressured by an existing condition.

It was our desire that the Court be able to rule with complete freedom to say what it thinks. But as you know, the Attorney General has already advised us of his opinion that the college and university credits are constitutional, and there is no ground for thinking—no reasonable ground, in my view—for thinking the same would not apply to elementary and secondary.

Mr. RIBICOFF. The distinguished Senator from New York is a most experienced educator on every level, and has taught at our most prestigious colleges and universities. I would like his appraisal of the importance of diversity of educational experiences in this Nation. Is this an enrichment of American society or a detriment to American society?

Mr. MOYNIHAN. This is precisely the point of the amendment, to confirm what we have got, what we finally are learning to live with as one of the greatnesses of the American society, that it has managed to maintain diversity in unity.

In an odd way, it is there on the great seal: "E Pluribus Unum."

From the beginning, we have sensed our diversity. The diversity of church education at the time of the original colonies was already evident, and we took it as something to be preserved. The whole point of the first amendment, unmistakably, was not to prevent any assistance to church related education. That was the only kind of education there was, and it was to be encouraged rather than otherwise. The point of the first amendment was that Congress should not establish a national religion, choose one over the others, because there were already so many there could not have been unity by preferring one.

It has turned out to be a rich heritage. If I may use a biological reference, we have an incomparable genetic pool in the variety of our cultures. It is what makes for our strength. If we ever become truly uniform and homogenized, we become exposed to the kind of disasters that befall any species that acquires too narrow a range of characteristics.

Mr. RIBICOFF. As you look at the entire spectrum of education throughout the world, what nations or what countries are completely devoid of nonstate schools? I mean what nations are without nonstate education?

Mr. PACKWOOD. The Library of Congress has made a study on that. The only ones they can find are the Communist countries plus several nations, either extremely small such as San Marino, or extremely poor, such as the Central African Republic. If you will, they are poverty-stricken, one-party dictatorships, with one or two exceptions.

Mr. RIBICOFF. In other words, the norm for most civilized society is that while public schools are an absolute necessity and public education is afforded, there is a recognition that there is a place in society for the private nonstate school?

Mr. MOYNIHAN. I would say exactly, if I may, and offer the thought that you will find a single educational system in any country where you will find a single political party, and the reverse is equally applicable: Any country that has more than one party has more than one system of education. It is an aspect of the liberty of this society. It is something of value that ought to be preserved, and it was with the thought that Congress should so declare that we have submitted this amendment.

Mr. RIBICOFF. I thank my colleague for the comments. While this may seem just an introductory amendment, it is important to state the philosophy that exists in this country and should continue to exist.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. MOYNIHAN. Happy to yield.

Mr. HELMS. This colloquy between the three distinguished Senators has been very helpful to the Senator from North Carolina. I would like to ask a question to determine whether this is the intent of the sponsors of this legislation: Is it the intent and the position of the sponsors of the legislation that any educational institution which enrolls a student for whom a tax credit is claimed under this act shall not be deemed to be a recipient of Federal assistance under the act?

Mr. MOYNIHAN. No; I believe the Senator speaks of the Archer amendment, as it is called in the House committee.

Mr. HELMS. Yes.

Mr. MOYNIHAN. It is not included in the bill before us.

Mr. HELMS. I understand that; but what is the Senator's own feeling about this?

Mr. MOYNIHAN. I see the Senator from Oregon has risen. I yield to him.

Mr. PACKWOOD. As I indicated earlier, that amendment was never considered in our bill. We drafted our bill 6 or 7 months ago, and when we saw the procedural delays we would be involved in, we simply took the House bill as passed, stripped it down, and put our language in it. All the students must have the 501(c)(3) exemption before the parents are eligible for the tax credit. But, as I indicated to the Senator from North Carolina before, I first heard of the Archer amendment when it was passed on the House floor. I do not believe it was a committee amendment.

I am quite sure that if it prevails, if there is a tax credit allowed it would not nullify the provision we had, that indeed you would still have to comply with section 501(c)(3) and promise not to discriminate. That is as much as I know about the amendment.

Mr. MOYNIHAN. I think I can say to the Senator from North Carolina that we are thinking of schools that are certified by their State and are given their tax deductible status by the Internal Revenue Service.

Mr. HELMS. Perhaps I inferred incorrectly from what the distinguished Senator from Connecticut said that he did not regard a student for whom a tax credit is claimed to be considered a recipient of Federal assistance under this act; but the Senator was speaking for himself and not the sponsors of the bill, is that correct?

Mr. MOYNIHAN. I think that is correct.

Mr. PELL. Mr. President, will the Senator from New York yield for an observation?

Mr. MOYNIHAN. I am most happy to.

Mr. PELL. I am sure we all would agree that nonpublic schools play a vital role in the educational system of this country, that nonpublic schools have contributed significantly to the quality of education in America, a strong and diversified system of American education requires the continued viability of these nonpublic schools, and a Federal program of assistance is needed to assist the schools. I am sure the Senator will agree with that.

As I inquired of the leadership just this morning, coming up this week will be S. 1753, the ESEA bill, which contains a generous amount, $0.5 billion, which could be cut back if it is too generous for our colleagues. This money would be used for direct aid of youngsters in nonpublic schools for the purpose of furnishing textbooks, instructional materials, testing services, guidance and counseling services, speech and hearing services, psychological testing services, and transportation; and this money would make a real incursion on the burden the private, nonpublic schools are carrying now. I agree with everything the Senator has said about the contribution that nonpublic schools make to our Nation, and the services he earlier mentioned are presently available under our own title XII, and that is why I made the point of reading them.

My own feeling is the nonpublic schools need the help; that the tax credit route is not the best way to skin the cat in getting there. But even if we do not do it this route, which costs $0.6 billion, this other route, title XII, remains to be taken up later on in the week. It costs $0.5 billion. I would hope that our colleagues would be aware of that as the fallback position. Those who have the Senator's position, should be aware that they would have this to fight for at a later date. I recognize, obviously, that this proposal plus the Senator's proposal might be a little bit too generous, but I would hope that we could get through one or the other.

Mr. MOYNIHAN. May I say first that there are few persons who are more entitled to speak on this matter than the senior Senator from Rhode Island whose sponsorship of the Pell grants, after the GI bill, in our generation of legislation, is the most notable event of its kind.

Mr. PELL. I thank my colleague so much for that reference. I have heard so much reference to the Boggs grants and Senator Boggs has been gone for so long. I am happy to hear them referred to as the Pell grants.

Mr. MOYNIHAN. Pell grants it shall be.

I am also aware of the proposed new title XII. It is a landmark event. To my knowledge, there has been no such proposal ever on the floor of the Congress, and I shall support it.

I would have to say that to support one does not preclude supporting the other. I know, for instance, in the State of Rhode Island—we had a little colloquy early on with the junior Senator—the Catholic school system has lost 43 percent of its students in the last 10 years.

Mr. PELL. But we still have 12 percent at the parochial schools and 3 percent more in others.

Mr. MOYNIHAN. And does the Senator want to have it down to 1 percent in each? That is the prospect he faces.

I will have to say the Senator's proposal may face constitutional questions more formidable than we.

Mr. PELL. It is title XII, incidentally, not title VIII.

In this particular program, I do not think we will face those questions because every one of these efforts has been used before and I believe has been tested in the courts.

Mr. MOYNIHAN. More is the reason to support title XII of Senator Pell's new bill, and he shall have my support.

Mr. President, before I conclude, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. I would like to state once again the extraordinary honor which I feel, having had the opportunity to cosponsor with the senior Senator from Connecticut this measure. His support gives us heart in the sense that we are doing the right thing and that it will prevail.

With that, Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. There is no time limit on this amendment.

SEVERAL SENATORS. Vote.

Mr. MOYNIHAN. A vote has been called for, Mr. President.

Mr. HOLLINGS. Mr. President——

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. HOLLINGS. Mr. President, I will vote for the amendment. The congressional finding at this particular instance of a diversity in public and nonpublic education no one can quarrel with, and the pluralistic preference and aspirations of the American people cannot be quarreled with by anyone.

If I wanted to write pure constitutional history, perhaps we would object to it, but the fact of the matter is that, when the court looks at a measure of this kind, if and when it does, they are going back to find whether that was the true intent and how seriously it was considered. They will find exactly the consideration given at the particular time the vote was taken on this measure.

The Senator from New York has had a tendency all day long to change this into the Democratic Convention. He has charged us as Democrats to respond, and he started with this amendment again as Democrats and how we are going to act as Democrats.

I think as Americans, irrespective of party, that we all agree with the need for diversity and the so-called pluralistic preferences constitutionally found.

I could argue at length, but I think it is in order to save time.

Other than giving the emphasis of "constitutionally found," I could not hear the answer given by the distinguished Senator from New York to the question by the Senator from North Carolina when he asked whether the recipient should be considered as a recipient of Federal assistance under this act. I do not want to sound rude and say answer yes or no, but I am trying to get a yes or no answer.

Mr. MOYNIHAN. Yes. I indicated that there is no such provision in our bill comparable to the one in the House bill. Technically, the parents or taxpayers are the recipients, but, in order to take credit, their school has to comply with applicable laws of its State and also has to be cleared by the IRS under 501(c)(3).

Mr. HOLLINGS. So title VI of the Civil Rights Act of 1968 would apply, and title VI of the 1972 Civil Rights Act on sex discrimination would apply?

Mr. MOYNIHAN. The IRS has comparable if not identical prohibitions against discrimination.

Mr. HOLLINGS. And title VII on bilingual aid and also section 504 of the Vocational and Rehabilitation Act with respect to the handicap would all apply?

Mr. MOYNIHAN. I will have to withhold my assertion that that is what the IRS certification extends to. I know it extends to discrimination on the basis of race and national origin as envisioned in those first two measures of the Civil Rights Acts. Whatever it extends to it extends to.

Mr. HOLLINGS. I thank the Senator.

Mr. PACKWOOD. Mr. President, I ask unanimous consent for Lawrence Grisham, of Senator PERCY's staff, to have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I ask unanimous consent for Dan Grady to have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, I ask unanimous consent that John Hamm, of my staff, be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from New York. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Iowa (Mr. CLARK), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HART), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Georgia (Mr. NUNN), the Senator from Florida (Mr. CHILES) and the Senator from Kentucky (Mr. FORD) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) and the Senator from Iowa (Mr. CLARK) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Massachusetts (Mr. BROOKE), the Senator from Nebraska (Mr. CURTIS), the Senator from Nevada (Mr. LAXALT) and the Senator from Kansas (Mr. PEARSON) are necessarily absent.

The result was announced—yeas 87, nays 0, as follows:

[Rollcall Vote No. 315 Leg.]

YEAS—87

Allen	Hansen	Moynihan
Anderson	Haskell	Muskie
Baker	Hatch	Nelson
Bartlett	Hatfield,	Packwood

So Mr. MOYNIHAN's amendment (UP No. 1651) was agreed to.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that Polly Gault of Senator SCHWEIKER's staff and Steve Kittrell of Senator DOLE's staff be granted privilege of the floor.

The PRESIDING OFFICER (Mr. MATSUNAGA). Without objection, it is so ordered.

UP AMENDMENT NO. 1652

(Subsequently numbered amendment No. 3474)

(Purpose: To clarify that only the United States Supreme Court can determine the constitutionality of the provisions of tuition tax credit legislation)

Mr. PACKWOOD. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oregon (Mr. PACKWOOD) proposes an unprinted amendment numbered 1652:

On page 14, line 14, beginning with "The Congress," strike out all through "religion" on line 19, and insert in lieu thereof the following:

"The Congress further finds that the constitutionality of federal tuition tax credits for the educational expenses of students attending non-public schools can only be established by the enactment of a law providing such tax credits, which will in turn provide the Supreme Court of the United States with an opportunity to rule in a decisive and determinative manner."

Mr. PACKWOOD. Mr. President, I shall not take long, I would enter into a time agreement on this.

Mr. EAGLETON addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Will the Senator yield?

Mr. PACKWOOD. Yes.

Mr. EAGLETON. Mr. President, is there a unanimous-consent agreement on this amendment?

The PRESIDING OFFICER. There is none.

Mr. EAGLETON. I will object to any unanimous-consent agreement on this matter. This goes to the very vitals of the constitutional debate. I intend to address myself on that issue tomorrow. We can debate it for 6, 7, 8 hours tonight, but I will enter into no unanimous-consent agreement.

I thought, at first blush, that this amendment was as innocuous and meaningless as the previous Moynihan Amendment which has commanded our presence here tonight. I thought that this was yet another exercise in egocentricity by Senator MOYNIHAN whereby he could chalk up another unanimous vote.

Mr. SCOTT. Will the Senator yield?

Mr. PACKWOOD. I believe I have the floor.

The PRESIDING OFFICER. The Senator from Oregon has the floor.

Mr. PACKWOOD. Mr. President, I have no desire to delay the Senate. I was willing to enter into a time limitation of 15 minutes on a side. That is obviously going to be objected to.

We have been in session 10 hours today. I am perfectly willing to debate with the Senator from Missouri at whatever length he wants tomorrow on this amendment, or I will stay with him tonight, if he wants to debate. But if there is going to be no vote on this particular amendment, and if it is now the pending business, I am not sure there is much point in any of the other Senators staying.

I will yield to the Senator.

Mr. SCOTT. I appreciate the distinguished Senator yielding.

Mr. President, I have serious doubt as to the constitutionality of this bill and because of that I did, and still do, have an amendment that would strike out the findings, the section 1(b) of the bill as introduced.

Now, we have just voted on an amendment called an innocuous amendment, one with no meaning. But this does have some meaning to it, finding that it is necessary that Congress finds that the constitutionality of Federal tuition tax credits for the educational expenses of students attending nonpublic schools can only be established by the enactment of a law providing such tax credits, which will in turn provide the Supreme Court of the United States with an opportunity to rule in a decisive and determinative manner.

The Supreme Court has done that. It has done it on several occasions. Nyquist is on all fours with this proposal before us.

The PRESIDING OFFICER. Will the Senator from Virginia cease for a moment? There is too much conversation going on on the floor.

The Senate will be in order. Members will cease conversation.

Mr. PACKWOOD. Mr. President, do I have the floor?

The PRESIDING OFFICER. Yes, the Senator from Oregon has the floor.

Mr. PACKWOOD. Mr. President, I do not mind yielding for a question or for an agreement to a time limit, but I did not yield to the Senator from Virginia to initiate the debate on this amendment.

The PRESIDING OFFICER. The Senator has the floor.

Mr. SCOTT. Will the Senator yield further?

Mr. PACKWOOD. Yes.

Mr. SCOTT. I appreciate the courtesy of the Senator in yielding.

I would say that I will discuss this matter in some detail on my own time tomorrow.

I thank the distinguished Senator.

Mr. PACKWOOD. Mr. President, as I said earlier, it is obvious we are not going to have a vote on this tonight on this issue.

I am prepared to discuss it as long as anybody wants to discuss it.

I will say, very briefly, while we are waiting for the majority leader, why I made this change. Two Senators in the Chamber, not counting the Senator from Virginia, took strong exception to the language that we made a finding that this bill was constitutional. They said we were attempting to preempt the Supreme Court. It was not our intention to do that. I do not think Congress can declare this constitutional.

So I changed this language to somehow say that the only way we are going to find out whether this is constitutional—and I am prepared to argue at length that no one can be sure whether or not it is constitutional—is to pass a bill for Federal tax credits which has not been tested in court, and then let the Court decide it. That is the reason why we put a 2-year delay in this bill. Credits for primary and secondary schools do not go into effect for 2 years. There is an ordered, expedited court test. The Supreme Court will make a decision long before the first dollar of credit is claimed on the income tax.

All this amendment to the preamble says is that the only way the Supreme Court ever is going to get a chance to pass on the constitutionality of Federal tax credits for primary and secondary education, which they never have passed on——

Mr. SCOTT. Mr. President, will the Senator yield briefly?

Mr. PACKWOOD. I yield.

Mr. SCOTT. I am told by the clerk that apparently the Senator sent the wrong amendment to the desk and that it is identical with the Moynihan amendment. If that is true, the distinguished Senator may want to revise it.

Mr. PACKWOOD. I thought the amendment that was read was not the Moynihan amendment.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. PACKWOOD. I yield.

Mr. ROBERT C. BYRD. It is my understanding that there are Senators who wish to talk on this amendment before a vote is reached. Let me see if I understand the temper of the Senate correctly at this point.

Could we agree on a time to vote on this amendment this evening or in the morning, sometime tomorrow?

Mr. HOLLINGS. If there is a time agreement to vote on my amendment up or down. That is what I have been trying to do.

Mr. ROBERT C. BYRD. Is there a possibility that we could get an agreement to vote on the pending amendment and then on the amendment by Mr. HOLLINGS, both tomorrow?

Mr. PACKWOOD. I would agree to a 40-minute limitation on the pending amendment.

Mr. EAGLETON. I would object.

Mr. ROBERT C. BYRD. Can we agree to vote on the pending amendment tomorrow morning or tomorrow at some point, and then an agreement to vote on the amendment by Mr. HOLLINGS following that?

Mr. HOLLINGS. I suggest to the distinguished majority leader that we could vote on the Senator's amendment at 2 o'clock, up or down, and then vote on mine, or vote on my amendment first, one way or the other. But I have not been able to call up my amendment yet. On amendment 3466, I can agree to an up-or-down vote at 2 o'clock tomorrow. We could vote first on the amendment of the Senator from Oregon and then on mine, if there is an understanding that he will not amend mine and I will not amend his.

Mr. PACKWOOD. I know that the Senator from Ohio (Mr. METZENBAUM) has an amendment to the Hollings amendment. He spoke to me about it. So I could not enter into that agreement.

Second, if the amendment is not tabled, Senator MOYNIHAN and I have one or two amendments to offer to the Senator's amendment. So we would not want to vote up and down.

Mr. ROBERT C. BYRD. The Senator says "if the amendment is tabled." Does he refer to the amendment by Mr. HOLLINGS?

Mr. PACKWOOD. Yes.

Mr. ROBERT C. BYRD. Could we agree for a time to vote on the amendment by Mr. PACKWOOD, to be followed after a period of time tomorrow with a vote on the amendment by Mr. HOLLINGS?

Mr. HOLLINGS. They will not give me an up-and-down vote. If he objects to mine, I will object to his.

Mr. ROBERT C. BYRD. Could we agree to an up-and-down vote on the amendment by Mr. HOLLINGS?

Mr. MOYNIHAN. The fact is that we propose to move to table the amendment by Mr. HOLLINGS; and in the event the motion to table does not succeed, we propose to submit one or more amendments to his amendment.

Mr. ROBERT C. BYRD. Could we agree to a time to vote on the Packwood amendment at a reasonable time tomorrow, so that Mr. HOLLINGS could call up his amendment, and we could let developments take their course?

Mr. PACKWOOD. I am amenable to a time limit to vote on——

Mr. MOYNIHAN. There seems no reason why we cannot conclude this matter tomorrow. We have some votes we want to take, but they could go in sequence.

Mr. SCOTT. If the Senator will yield, the distinguished Senator from New York sees no reason why we cannot have a vote, if we do things his way.

Mr. President, I have spent the whole weekend working on this matter and preparing some comments directed at an amendment I have prepared. Now that has been changed by the amendment before us and by the amendment that has just been agreed to by unanimous vote, the so-called harmless amendment. We have changed the declaration of policy, whereby we, as the Senate, find an act of Congress constitutional. It is presumed to be constitutional, but why are we invading the judicial function?

Now I have to reword my amendment, because of these harmless amendments. This will take some time. I also will have to revise my remarks because of these harmless amendments.

So there has to be a little quid pro quo here. If the distinguished floor managers want cooperation, they should not spring the so-called innocuous amendments before us, when we have amendments, too. I have often heard that we are a body of 100 coequal Senators, and I submit that the two distinguished floor managers are not more equal than the other 98.

Mr. PACKWOOD. The Senator would not object to a time limit on this amendment. It will be voted up or down. If it is voted down, the bill is no different. If it is voted up, it is still subject to amendment to knock the whole thing out.

I am perfectly willing to get an agreement on this amendment or to start early in the morning and talk, as long as somebody wants to talk on this amendment, until we are talked out, and then we will vote on it.

Mr. ROBERT C. BYRD. Let me at least make the effort.

Mr. President, I ask unanimous consent that a vote occur on the amendment by Mr. PACKWOOD tomorrow at 11 a.m.

Mr. METZENBAUM. I object. I do not object to the vote being taken. I just would like to be able to be present to vote on it. Could we make the hour 2:30?

Mr. ROBERT C. BYRD. I will not be present, either, but the Senate can work its will without me.

Mr. METZENBAUM. It seems to me that it does not matter whether the amendment is acted upon at 11 or 2:30.

Mr. ROBERT C. BYRD. Provided it is not too late. I hope the Senate will complete action on this bill tomorrow. We have been on it Friday and today.

Mr. METZENBAUM. I am not trying to delay the matter.

Mr. ROBERT C. BYRD. I will give the Senator a pair. Whatever way he wants to vote, I will vote the opposite.

[Laughter.]

Mr. HOLLINGS. You cannot beat that.

Mr. ROBERT C. BYRD. I will be here. I will give the Senator a pair, if we can reach an agreement to vote at 11 o'clock, so that we can get to the amendment by Mr. HOLLINGS.

Mr. EAGLETON. I would have no objection, if we could get some tentative agreement as to when Senator HOLLINGS will be able to get a vote on his amendment, so that we can bring this matter to a conclusion.

There is an interrelationship between the Packwood amendment and the Hollings amendment. The Packwood amendment seeks to declare the sense of the body that what we are trying to do is constitutional and that this is the only way under the sun it can be done. The Hollings amendment seeks to strike from the bill the elementary and secondary provisions which make the bill per se constitutional.

So there is an interrelationship between the Packwood amendment and the Hollings amendment. We should vote on both in an orderly sequence tomorrow.

Mr. HOLLINGS. The Senator says, "I do not mind—just give me an up-and-down vote on mine and I would like to table yours; and if I cannot table it, I would like to amend it and substitute it and harass you for another 2 days around here." That is what he is saying.

Mr. ROBERT C. BYRD. I do not believe the Senator is willing to go another 2 days.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Reserving the right to object.

Mr. DURKIN. Mr. President, I reserve the right to object.

The PRESIDING OFFICER. The Senator from Ohio reserves the right to object.

Mr. ROBERT C. BYRD. Mr. President, could we agree on the vote on the Packwood amendment at, say, 11:30 a.m.?

Mr. METZENBAUM. Mr. President, would the leader be willing to have the vote on the amendment at 1 o'clock?

Mr. ROBERT C. BYRD. Yes; could we vote on the amendment by Mr. PACKWOOD then at 1 o'clock tomorrow? And I would hope that that being done we could then with reasonable expedition——

Mr. DURKIN. Mr. President, I think I might have to object to that unless we get agreement to vote on both.

The PRESIDING OFFICER. The Senator from New Hampshire still reserves the right to object.

Does the Senator from Ohio still reserve the right to object?

Mr. METZENBAUM. No.

Mr. EAGLETON. Mr. President, will the leader propound in sequence the vote at 1 o'clock on the Packwood amendment and a vote at 5 o'clock on the Hollings amendment? I could not object to that.

Mr. SCOTT. Mr. President reserving the right to object.

Mr. ROBERT C. BYRD. I make the request.

The PRESIDING OFFICER. The Senator from Virginia reserves the right to object.

Mr. DURKIN. Mr. President, I reserve the right to object.

Mr. SCOTT. Mr. President, I do have about 2 hours that I want to discuss this prior to any vote on the Hollings amendment, and I am sure that the distinguished Senator from South Carolina wants time to discuss his own amendment, and I would like to make my comments prior to the time there is a vote on the Hollings amendment.

Mr. ROBERT C. BYRD. Very well.

Mr. SCOTT. I think it is pertinent to that portion of the bill.

Mr. ROBERT C. BYRD. Very well.

Could we vote at 1 o'clock on the amendment of Mr. PACKWOOD and 6 o'clock on the amendment by Mr. HOLLINGS, with the understanding that the Senator from Virginia has 2 hours?

Mr. SCOTT. Two hours.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Mr. President, reserving the right to object, will the leader yield for a question?

Mr. ROBERT C. BYRD. I yield.

Mr. METZENBAUM. I may have an amendment and I may not have an amendment to the Hollings amendment. If we enter into this unanimous-consent agreement will my amendment then be in order to be brought up and voted on prior to the 6 o'clock hour? I am perfectly willing to agree to a time limit if the amendment does come up that it will come to a vote prior to that time.

Mr. ROBERT C. BYRD. Yes; the request I have made would allow an amendment because I did not include the request that the Hollings amendment be voted on and that no amendment be in order.

Mr. HOLLINGS. I say to the leader that we just made a unanimous-consent agreement to just vote open house, and I object now. I cannot tell what his amendment is.

Mr. METZENBAUM. I am happy to explain my amendment.

Mr. HOLLINGS. Yes; I have been trying to explain mine.

[Laughter.]

Mr. HOLLINGS. I never heard of this one until just this afternoon. Just let us get his at 1 o'clock. We can at least do that.

Mr. ROBERT C. BYRD. Let us do that. If it is agreeable vote on the amendment by Mr. PACKWOOD at 1 o'clock p.m. tomorrow and then go from there.

Mr. HOLLINGS. And as to the Senator from Virginia, I agree with him, because he has been very considerate. He was ready on Friday and earlier today. I hope that he would help us in the morning because it does go to the preamble language and does go to the constitutionality, and I know that is the point he wants to speak to.

Mr. DURKIN. Mr. President, reserving the right to object, will the Senator from West Virginia be willing to propose the vote on the Packwood amendment, say, at 11 o'clock rather than 1 o'clock?

Mr. METZENBAUM. I object.

Mr. ROBERT C. BYRD. Mr. President, would the Senator from Ohio be willing to have the vote, say, at 12 o'clock? That would give us more time during the afternoon to settle the issue.

Mr. METZENBAUM. The Senator from Ohio does not have objection to it except I wish to vote on it and I cannot be here at 11 o'clock. It is physically impossible for me to get back.

Mr. ROBERT C. BYRD. If I give the Senator a pair, will that make a difference?

Mr. METZENBAUM. It does not help. I appreciate the courtesy extended. I do not think that will help.

Mr. ROBERT C. BYRD. Would 1 o'clock be better? Would 1 o'clock be the earliest?

Mr. METZENBAUM. One o'clock.

Mr. DURKIN. I object to 1 o'clock.

Mr. EAGLETON. Is it the customary practice that a Senator object to any amendment because of personal social agenda appointments for him not to be here at the appointed hour and thereby require the Senate to stay in session for 3 extra hours to accommodate the social engagement? I have never delayed the Senate for such an occasion.

Mr. METZENBAUM. I say to the Senator if I were going to Cleveland for a social matter I would accept it. But the fact is I am going to testify in an environmental protection miner hearing involving 15,000 Ohio miners and people of southeastern Ohio, and I believe it is part of senatorial responsibilities to be there.

Mr. EAGLETON. The point is the Senator is willing to delay 99 other Senators. We could vote at 11 o'clock. The Senator is going to delay 99 other Senators for his own personal convenience.

Mr. METZENBAUM. Ninety-nine other Senators will not be delayed.

Mr. EAGLETON. This amendment of Senator PACKWOOD is just as useless as any amendment I know of.

Mr. METZENBAUM. I am willing to stay here this evening and vote this evening. The Senator is the one who did not want to vote this evening.

Mr. ROBERT C. BYRD. Mr. President, if the Senator from Ohio will allow me, I would give him a pair which would serve his purpose, and I may say to the Senator from Missouri that I have never nor will I ever delay the Senate simply because for some reason I cannot be present. When we get into that situation where a Senator will not let the Senate vote simply because he cannot be here then we are not going to be able to get very far very fast. That is the reason I offered to give the Senator my pair.

Mr. LONG. Mr. President, I believe the Senator is against the amendment. If it is Mr. PACKWOOD's amendment I suppose I am for it. I am glad to give the Senator a live pair, and I will be here and pair with the Senator. I will be glad to do that.

Mr. ROBERT C. BYRD. I hope the Senator from Ohio would let us vote under those circumstances. It is a perfectly legitimate arrangement in which his vote is paired against the Senator from Louisiana or mine.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. PACKWOOD. I just heard the Senator from Missouri say that my amendment is now useless. Before he said it went absolutely to the guts of the matter. He does not want to agree to a time. If he has no concern about the time limit, I will agree to vote tonight and vote tonight.

Mr. METZENBAUM. The Senator from Oregon said he is willing to agree to a half hour on the amendment a half hour ago. I will stay here for a half hour this evening and vote on it.

The PRESIDING OFFICER. Is there objection?

Mr. EAGLETON. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, let me put the request once more to vote on the amendment by Mr. PACKWOOD at 1 o'clock tomorrow. This will allow the amendment to be set aside by unanimous consent. In the meantime other amendments will be called up and allow us to make some progress. And I would hope then following that vote we could get on with the amendment by Mr. HOLLINGS, with all reasonable men working together, and complete action on that bill tomorrow night.

I make that unanimous-consent request.

The PRESIDING OFFICER. Is there objection?

The Chair hears none. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank all Senators.

There will be no more rollcall votes tonight.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I ask unanimous consent that a member of my staff, Lyle Morris, be accorded the privilege of the floor during consideration of this bill and votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Mr. Horowitz, of my staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, the subject before us today—providing Federal assistance to alleviate the cost of education through tax credits—is not a new topic. The Senate has passed some form of tuition tax credit six times in the past 10 years and the need for this legislation has been clear. Escalating tuition costs preclude some students from continuing their education. From 1967 to 1976, total annual college costs increased approximately 75 percent. While income levels also increased over this period, so did the tax burden. According to a CRS study, the median aftertax income increased by 66.8 percent, thus not keeping pace with the 75-percent increase in total college costs.

It is the middle-income group that has been hit the hardest by this cost increase because their incomes are not high enough to absorb the higher costs and yet their incomes are too high to be eligible for most Federal assistance. The most significant long-term decline in college attendance is from those with incomes about $10,000; a decline from 52 percent to 48 percent for the $10,000 to $15,000 range and a 68-percent to 58-percent drop for the above $15,000 range. At the elementary and secondary school levels, with a 13-percent drop in nonpublic school enrollment, the middle-income student is again the one most affected. Private schools primarily educate the lower and middle income groups with 71 percent of private school students coming from families with incomes below $25,000. Fewer than 4 percent of those attending private schools have incomes greater than $50,000.

The effect of these trends is obvious. If the cost of tuition keeps rising and families become less able to afford payment, then those schools whose very existence depends on these tuition payments will be forced to close. And with the decline in the private segment of our educational system, so goes the pluralism and diversity that has been a main contributor to our system's excellence. The public and private schools are complementary, each adding to the success of the whole system. The importance of private institutions lies in their ability to address more select needs and interests than do public schools, thereby fulfilling an important function in the educational process.

Mr. President, I support the concept of tuition tax credits as a means by which this trend can be arrested. Tax credits provide direct and accessible aid that maximizes the role of the individual and minimizes the role of the government. Tax credits provide the simplest and most equitable way to provide middle income families with both tax and tuition relief. It places dollars directly where they are needed and provides assistance to needy families who have been deemed ineligible for aid under the present student assistance programs.

Unlike the present student aid program, tax credits do not pump money into programs that have been proven to be wasteful and ineffective. Compared to the present student aid program, which last year spent an incredible $623.5 million on administrative costs alone, the tuition tax credits would not require any additional overhead expense, they do not require the completion of complex forms nor the submission of confidential financial information, they do not create uncertainty as to eligibility for aid and they do not require parents to plead poverty in order to receive aid.

It is my understanding that the majority of my colleagues are in favor of the provision of tax credits at the college level but that many have reservations regarding the portion of the bill dealing with elementary and secondary school students. Apparently this opposition is based on possible effects on the public school system, on the constitutional question, on the segregation issue and on the cost of the legislation.

Mr. President, I would like to address these concerns because I feel that too many misconceptions and misinformation have been circulating about tuition tax credits. One of the concerns which I find especially disquieting is the opposition that has been generated mostly by elementary and secondary school bureaucrats. It has been alleged that Federal aid to private pre-college level institutions will mark the decline in public

school attendance because the tax credit provides more aid to private than public institutions. Mr. President, it is true that of the benefits that will accrue to the parents of elementary and secondary school students as a result of this bill, the majority will go to those whose children are attending non-public schools.

However, it must be remembered that under existing aid programs, the Federal Government spends an average of $352 per public elementary and secondary school student and only $98 for each private school student. The proposed tax credit would only provide an additional $170 per private school student bringing the total amount of aid to $268. Do the opponents really believe that an additional $170 will induce a mass exodus from the public schools? I hardly think that such a relatively small contribution to the continued existence of the private schools will be the "death of the public schools."

On the contrary, providing aid to insure that these private schools will not have to shut down will actually keep down the capital costs of operating public schools. The closing of these private institutions would require that some 5.3 million elementary and secondary students be absorbed by tax-supported schools at an extra cost of $9.2 billion per year.

Mr. President, I find it interesting that the administrators and teachers who make up the public school bureaucracy are opposed to providing any Federal assistance to the parents of elementary and secondary school students. For, in effect, what these opponents are claiming is that, given the choice between public and private schools, parents would prefer to place their children in the latter.

They are claiming that making private schools more affordable will increase the competition between the two types of institutions by putting them on more equal ground. Mr. President, I support this type of competition and think that it can only serve to better the overall quality of our schools. If the public school administrators truly feel threatened by a $170 credit, then I must assume that their schools are in serious trouble and perhaps parents should disenroll their children.

Another concern that has been expressed by the opposition of the Tuition Tax Relief Act is the constitutional issue of separation of church and state. Mr. President, I find it hard to believe that providing aid to secular schools would constitute a violation of the Constitution. The first amendment states that "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." The tuition tax credit will provide aid to about 10 percent of all elementary and secondary schools and of that 10 percent, about 20 percent are not church affiliated. I hardly term an average $170 tax credit to parents whose children are attending only 13 percent of all our elementary and secondary schools "establishment of a religion."

The Supreme Court has never before ruled on the constitutionality of a Federal tax credit but have only dealt with State aid. In addition, the Court has continually upheld legislation providing indirect aid to churches and church-related schools. Regardless, the Tuition Tax Relief Act contains a provision to guarantee that the Court will be able to expeditiously review this issue without any hardship on the taxpayer. I would hope that my colleagues would not view this legislation negatively because of the possibility that the Court may declare the elementary and secondary provision unconstitutional. The bill must be viewed and assessed according to its merits and we must let the Court decide the constitutional issue.

A third concern which has been expressed by the opposition of this bill is that it will foster segregation in our elementary and secondary schools. Further, they claim it will benefit middle and upper income families at the expense of the low income families and allow whites to escape racially mixed schools. Mr. President, I do not believe it can be logically argued that upper income parents who are not already sending their children to private schools, would do so with the knowledge of a possible $250 credit. That amount is not sufficient inducement for the upper income families. A $250 credit would, however, provide an incentive to those middle income parents who might otherwise disenroll their children from private schools for financial reasons and it would provide an incentive to those lower-income parents to view private schools as a viable, affordable alternative. It will especially aid the lower income group because it will increase their range of choice.

Another very important point to be raised in light of the segregation issue is the ineligibility for claiming a tax credit for those parents who send their children to schools which discriminate on the basis of race. Written into the Tax Credit Relief Act is a provision stating that a school must be a qualified tax exempt organization under IRS regulations—that is to say that the school can not be racially discriminatory in order for the parents to claim the tax credit. The bill also provides for regular reports on the effectiveness of IRS enforcement of the regulations. It is clear to me, therefore, that this bill will not foster segregation but will have the opposite effect by increasing the educational opportunities of the less advantaged.

The last concern I would like to address is the total cost of this legislation. Many opponents of tax credits have criticized the bill for its cost to the Treasury and so the Finance Committee amended the act to reduce the revenue impact. In 1978, the tax credit would be only $30 million and is truly insignificant when compared with this year's $12 billion Federal outlay for public education. The amended bill, when fully effective in 1983, will cost $2.8 billion, which is $900 million less than the education assistance proposal put forth by the Human Resources Committee. With all due respect to the Committee, I would prefer to see my tax dollars go directly to families via a tax credit rather than have it whittled away by educational institution's application processing costs and HEW's administrative overhead. The Tuition Tax Relief Act, while providing an efficient means for alleviating educational costs, is also, and more importantly, preferable for the freedom of choice it provides. By expanding the educational opportunities, a basic economic decision is made by the marketplace, not by the Government and I have complete faith in the ability of parents and the marketplace to make those decisions which will have the best effect on the cost and quality of our schools, public and private.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, with the understanding that Senators may stay this evening and debate the amendment if they wish, I ask unanimous consent that when the Senate completes its business today it stand in recess until 9:30 a.m. tomorow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RESUMPTION OF CONSIDERATION OF H.R. 12050 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the two leaders on tomorrow and any orders for the recognition of Senators, if there be such, the Senate resume consideration of the pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business with statements by Senators limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there morning business?

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVALS

A message from the President of the United States reported that on August 11,

1978, he approved and signed the following joint resolution and acts:

S.J. Res. 102. A joint resolution entitled "American Indian Religious Freedom";

S. 920. An Act relating to the disposition of certain recreational demonstration project lands by the State of Oklahoma; and

S. 2463. An Act to amend the Surface Mining Control and Reclamation Act of 1977 (Public Law 95-87) to raise certain authorized funding levels contained therein, and for other purposes.

MESSAGES FROM THE HOUSE

At 4:41 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that Mr. CARTER was appointed a conferee on the part of the House in the conference on the disagreeing votes of the two Houses on the amendment of the Senate to H.R. 11445, an act to amend the Small Business Act and the Small Business Investment Act of 1958, vice Mr. STANTON, resigned.

The message also announced that the House agrees to the amendments of the Senate numbered 1 and 2 to H.R. 2931, an act to amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage provided pursuant to contracts made under such chapter by preempting State or local laws pertaining to such benefits and coverage which are inconsistent with such contracts; that the House agrees to the amendment of the Senate numbered 3 to the bill, with an amendment; that the House agrees to the amendment of the Senate numbered 4 to the bill with an amendment; and that the House agrees to the amendment of the Senate to the title of the bill with an amendment; in which it requests the concurrence of the Senate.

The message further announced that the House agrees to the amendment of the Senate numbered 1 to H.R. 10878, an act to extend until October 1, 1981, the voluntary insurance program provided by section 7 of the Fishermen's Protective Act of 1967, and for other purposes, with an amendment; and that the House agrees to the amendment of the Senate numbered 2 to the bill, with an amendment; in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 13007. An act to amend the Consumer Credit Protection Act to establish rights, remedies, and responsibilities for all participants in the utilization of electronic fund transfer services; and

H.R. 13511. An act to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes.

The message further announced that the House has agreed to House Concurrent Resolution 687, directing the Clerk of the House of Representatives to make a correction in the enrollment of H.R. 10732, in which it requests the concurrence of the Senate.

HOUSE BILL PLACED ON CALENDAR

The following bill was read twice by its title and placed on the calendar:

H.R. 13007. An Act to amend the Consumer Credit Protection Act to establish rights, remedies, and responsibilities for all participants in the utilization of electronic fund transfer services.

HOUSE BILL REFERRED

The following bill was read twice by its title and referred as indicated:

H.R. 13511. An Act to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes; to the Committee on Finance.

ORDER FOR REFERRAL OF S. 2053

Mr. CANNON. Mr. President, I ask unanimous consent that when S. 2053, the Deep Seabed Mineral Resources Act, is reported, it be referred to the Committee on Foreign Relations for not to exceed 30 days.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORTS OF COMMITTEES RECEIVED DURING THE RECESS

Under authority of the order of August 11, 1978, the following reports of committees were submitted on August 11, 1978, during the recess of the Senate:

By Mr. LONG, from the Committee on Finance, with an amendment and an amendment to the title:

H.R. 1920. An act to amend section 5064 of the Internal Revenue Code of 1954 to provide for refund of tax on distilled spirits, wines, rectified products, and beer lost or rendered unmarketable due to fire, flood, casualty, or other disaster, or to breakage, destruction, or other damage (excluding theft) resulting from vandalism or malicious mischief while held for sale (Rept. No. 95-1112).

By Mr. LONG, from the Committee on Finance, without amendment:

H.R. 8811. An act to amend section 7447 of the Internal Revenue Code of 1954 with respect to the revocation of an election to receive retired pay as a judge of the Tax Court (Rept. No. 95-1113).

By Mr. LONG, from the Committee on Finance, with an amendment and an amendment to the title:

H.R. 10161. An act for the relief of Eastern Telephone Supply & Manufacturing, Inc. (Rept. No. 95-1114).

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LEAHY, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

S. 3274. A bill to designate the U.S. Department of Agriculture's Bee Research Laboratory in Tucson, Ariz., as the "Carl Hayden Bee Research Center" (Rept. No. 95-1115).

By Mr. EAGLETON, from the Committee on Governmental Affairs, with an amendment and an amendment to the title:

S. 518. A bill to provide increased employment opportunity by executive agencies of the U.S. Government for persons unable to work standard working hours, and for other purposes (Rept. No. 95-1116).

By Mr. MATHIAS, from the Committee on the Judiciary, with an amendment:

S. 1185. A bill to regulate interstate commerce with respect to parimutuel wagering on horseracing, to maintain the stability of the horseracing industry, and for other purposes (Rept. No. 95-1117).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. BENTSEN:

S. 3404. A bill to provide rapid depreciation for certain expenditures required by mandatory OSHA health and safety standards; to the Committee on Finance.

By Mr. ABOUREZK:

S. 3405. A bill to establish certain rules with respect to the appearance of witnesses before a grand jury in order to protect the constitutional rights of such witnesses under the fourth, fifth, and sixth amendments to the Constitution; to provide for independent inquiries by grand juries; to require periodic reports to Congress, and for other purposes; to the Committee on the Judiciary.

By Mr. McGOVERN:

S. 3406. A bill to amend chapter 55 of title 10 of the United States Code to qualify certain former spouses of members of the uniformed services for medical and dental benefits, and for other purposes; to the Committee on Armed Services.

By Mr. MELCHER (for himself and Mr. PAUL G. HATFIELD):

S. 3407. A bill to place in trust status about 1.8 acres on the Fort Peck Indian Reservation, Mont.; to the Select Committee on Indian Affairs.

By Mr. INOUYE (for himself, Mr. GRAVEL, and Mr. STONE):

S. 3408. A bill to provide for the development of aquaculture in the United States, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Commerce, Science, and Transportation, jointly, by unanimous consent.

By Mr. BIDEN:

S. 3409. A bill to establish a program of grants to States and units of local government which have established property tax relief programs; to the Committee on Governmental Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BENTSEN:

S. 3404. A bill to provide rapid depreciation for certain expenditures required by mandatory OSHA health and safety standards; to the Committee on Finance.

● Mr. BENTSEN. Mr. President, according to a survey recently conducted by the McGraw Hill Co., it will cost American business $3.4 billion this year to comply with OSHA-mandated safety regulations.

Obviously, Mr. President, the American worker must be fully protected on the job. But equally obviously, the job of the American worker also needs a little protecting. Without jobs, there is going to be precious little to protect in this society.

Recent hearings conducted in the Joint Economic Committee disclosed that Federal regulation alone costs American business and the American consumer more than $100 billion annually; $3.4 billion of this sum is right here in OSHA regulations.

After American businessmen comply with these regulations, they will have less profit; they will have less money to invest; they will be less able to modernize; and they may well raise prices to compensate, thereby fanning the fires of inflation.

We are confronted, Mr. President, with a worthy objective—worker protection—that bears a heavy price tag: $3.4 billion. I am proposing legislation today that will help us achieve that objective while, at the same time, helping to reduce the cost burden on American business and consumers.

Under my bill, the cash-flow burdens of OSHA-mandated equipment would be reduced by allowing amortization of such equipment over a 3 year period while retaining the full investment tax credit now available for such expenditures.

Compliance with OSHA standards can place severe strains on a business, especially small businesses. Funds for compliance are capital expenditures that can only be recovered through amortization. However, particularly with small businesses, the funds come out of cash flow. When a small firm cannot afford to comply, it is forced to shut down; jobs disappear; competition is reduced; big business is subsidized, and the end result is frequently higher consumer prices.

Alternatively, some firms will take money from planned expenditures in productive equipment and divert it to OSHA compliance. This practice places American business at a competitive disadvantage in the international marketplace, contributes to our balance-of-trade problems, and weakens the strength of the dollar.

Mr. President, there is no sense in protecting the American worker if we are going to export his job or drive his employer out of business with redtape and a sea of regulation.

Combating the high cost and choking burden of Government regulation is one of the most urgent legislative priorities facing this Congress. The legislation I have introduced today will help the process along.

It does not compromise on the issue of worker safety. What this legislation does, Mr. President, is provide American business with that rarest of commodities—an incentive—to help them meet the cost of compliance. We are saying to the American businessman: You can now amortize your OSHA-mandated expense in 3 years rather than in 10. You can recover your capital faster. And you will still be able to receive the full benefit of the investment tax credit. We are asking you to spend money, but we are also prepared to help you recover your investment.

In an economic environment that is short on the carrot and long on the stick, I think this is precisely the sort of legislative initiative that is urgently required if we are to break the hammerlock of regulation and control that is inhibiting our economic performance in this country.●

By Mr. ABOUREZK:

S. 3405. A bill to establish certain rules with respect to the appearance of witnesses before a grand jury in order to protect the constitutional rights of such witnesses under the fourth, fifth, and sixth amendments to the Constitution; to provide for independent inquiries by grand juries; to require periodic reports to Congress, and for other purposes; to the Committee on the Judiciary.

GRAND JURY REFORM ACT OF 1978

● Mr. ABOUREZK. Mr. President, when I first introduced grand jury reform legislation in May of 1977, my goal was to restructure the institution to correct the defects which made it vulnerable to political abuse. I felt strongly then, as I do now, that the examples of grand jury abuse which abounded in the early 1970's, and which I detailed then in my introductory statement, had to be taken seriously by those of us who are concerned about the trend of the erosion of individual rights and liberties in this country.

In introducing more comprehensive legislation today—the Grand Jury Reform Act of 1978—I am reiterating that concern. I feel strongly that we not forget, nor allow the passage of time to diminish our memories of that period when grand juries were used as a weapon to silence those in our society who openly disagreed with the establishment and the administration.

The grand jury has historically been regarded as functioning as an independent body between the Government, represented by the prosecutor, and the accused. The responsibility of grand jurors is to ascertain whether the charges brought against an individual are founded upon just cause rather than malice, and to make a judgment to indict based on the evidence presented to them. But rather than exercising independence in this process, and performing as a shield between the accuser and the accused, the grand jury is, in most cases, a rubber stamp for prosecutorial decisions. And as such, the institution is, and has been, subject to manipulation by Government officials responsive to politics, not justice.

Today little has changed. The grand jury is still a captive of the Government. What goes on inside the grand jury room is guided solely by the prosecutor. There are still no countervailing checks and balances to prosecutorial discretion. And therein lies the present danger—a danger we know is not illusory, but very real.

Enactment of the Grand Jury Reform Act of 1978 would right these wrongs and bring this institution back to its intended purposes. The following is a general overview of what the bill does:

First. It increases grand jury independence by requiring that the grand jury be adequately instructed about its powers, rights, and responsibilities; by requiring that the grand jury vote on subpenas, and requests for a contempt hearing; and by prohibiting prosecutors from using the grand jury in fishing expeditions for intelligence gathering.

Second. The bill establishes standards for investigations. It provides for a minimum notice requirement of 7 days for a subpena. It provides that when an investigation includes violations of substantive criminal statutes as well as conspiracy, the grand jury may not be convened in the district where only the conspiracy occurred. It also requires that the scope of the investigation be stated by the prosecutor, and that the witness be so notified in his/her subpena. All questions asked or documents subpenaed must be relevant to that inquiry. And, it abolishes reiterative contempt, a position also endorsed by the ABA, and would limit imprisonment for contempt to 6 months.

Third. My proposed Grand Jury Reform Act also addresses the right-to-counsel issue by permitting the witness to have a lawyer accompany him while testifying. A witness is not presently entitled to the advice of counsel inside the grand jury room—a practice the American Bar Association has recently suggested be ended.

Fourth. Currently a witness before a grand jury may be confronted with evidence seized in violation of his/her constitutional rights, and the Supreme Court has recently held that an indictment can be based on such illegally seized evidence. *United States* v. *Calandra*, 414 U.S. 338 (1974). This bill will remedy this situation by preventing the use of illegally seized evidence.

Fifth. The bill establishes a mechanism for independent grand jury inquiry when there exists a question of possible criminal activity on the part of any Government official. The bill provides that the grand jury may initiate such inquiry itself. It also provides for an independent court-appointed prosecutor to assist the grand jury and sign any indictment in lieu of the U.S. attorney in certain investigations.

Sixth. And the bill provides for consentual immunity. When the witness consents to the immunity, the type of immunity, and the only type of immunity to be granted will be transactional.

The specific provisions of my proposed legislation, which were designed to address substantive areas of reform follow:

First. With respect to the issue of recalcitrant witnesses: Twelve or more members of the grand jury must vote to make application to the court for an order directing a recalcitrant witness to show cause in a hearing why he/she should not be held in contempt.

The bill gives the witness 5 days notice of a contempt hearing. Upon a showing of special need after a hearing, shorter notice may be given, but not less than 48 hours.

The witness has the right to appointed counsel in contempt proceedings, if the witness is unable to afford it.

Imprisonment shall be in a Federal institution if one is located within 50 miles of the court.

My bill reduces the period of imprisonment from a maximum of 18 to 6 months for civil contempt, and prohibits reiterative contempt, by making the 6 months cumulative, and applying it against any confinement resulting from

prior, subsequent, or related grand jury investigations.

The bill provides that the confined person shall be admitted to bail, pending appeal unless the appeal is patently frivolous and taken for delay. Appeals shall be disposed of pursuant to an expedited schedule, eliminating the unique "30-day rule", which requires that appeals be decided within 30 days.

The bill provides that a refusal to answer questions or provide other information shall not be punished if the question or the request is based on any violation of the witness' constitutional or statutory rights.

Second. With respect to the issue of notice to the grand jury of its rights and duties; my bill requires that the district court judge who empanels the grand jury give instructions in writing to the grand jurors at the beginning of their term and insure that the grand jury reasonably understands them. These instructions shall include: The grand jury's powers with respect to independent investigation, the necessity of legally sufficient evidence to indict, and the power of the grand jury to vote before a witness may be subpenaed be given a contempt hearing or indicted; prescribes that failure to so instruct the grand jury is just cause for a refusal to testify.

Third. With respect to the issue of independent inquiry, my bill allows the grand jury, upon notice to the court, to request the attorney for the Government to assist it in an inquiry into offenses committed by Government or former Government officials. The grand jury shall serve for 12 months with no more than two extensions for a maximum of 24 months.

Provides that the court, upon a vote of the grand jury, may appoint a special attorney to assist the grand jury in such an investigation, if the attorney for the Government is found to have refused to assist in, or to have hindered or impeded the investigation. Such attorney will be paid a reasonable rate and may fix compensation for such assistants as is deemed necessary, with the approval of the court. Such attorney shall sign any indictment in lieu of a Government attorney.

Fourth. With respect to the issue of the rights of grand jury witnesses: The legislation requires that subpenas are not returnable on less than 7 days notice, unless a special need has been determined after a hearing; and then they are not returnable on less than 2 days notice. The subpena must advise the witness of the right to counsel, whether his/her conduct is under investigation, the subject matter of the inquiry, and the substantive statutes involved. Any witness not advised of these rights cannot be prosecuted, subjected to penalty, or have the evidence used against him/her in court.

Gives witnesses the right to have counsel in the grand jury room, such counsel to be court appointed where appropriate. Counsel shall not be bound by secrecy and shall take part in the grand jury proceeding.

Prescribes that when an investigation includes violations of substantive criminal statutes as well as conspiracy, the grand jury may not be convened in the district where only the conspiracy is alleged. On the motion of the witness the court shall transfer the investigations to another district in which the proceedings may be properly convened. The court shall take into account the distance of the proceedings from the residence of the witness, other burdens on the witness, and the existence and nature of any related proceedings.

Provides that once a grand jury has considered a matter to another grand jury unless the Government shows and the court finds that the Government has discovered additional relevant evidence.

Provides that a transcript shall be made of the proceedings and be available to the witness and counsel within 48 hours or within a reasonable time if 48 hours is not possible. After examination of such transcript a witness may request permission to appear before the grand jury again to clarify his testimony which shall become part of the official transcript and be circulated to the jury.

Stipulates that if the attorney for the Government is given written notice in advance that a person subpenaed intends to claim his fifth amendment privilege against self-incrimination, the witness shall not be compelled to appear before the grand jury. The witness must consent to immunity. There will be no compelled testimony.

Gives the witness and his/her counsel the right to examine and copy any statement of the witness in the possession of the United States which relates to the matter under investigation.

Provides that no person shall be required to testify or be confined if, upon evidentiary hearing, the court finds:

(a) A primary purpose or effect of the subpena is to secure for trial evidence against a person already under indictment, or formal accusation; (b) Compliance with the subpena is unreasonable or oppressive and involves unnecessary appearances; or the only testimony that can reasonably be expected is cumulative, unnecessary, or privileged; (c) The primary purpose of the subpena is punitive: to harass the witness, to induce the witness to commit perjury or false utterance or to place the witness in contempt.

Gives the court in the district out of which the subpena was issued, the court in the district in which the subpena was served, and the court in the district in which a witness resides concurrent jurisdiction over motions to quash and other relief. It allows such motions at any time. If a motion is made prior to or during an appearance, the appearance is stayed, pending ruling. If the motion is made during or subsequent to the appearance, the motion must be made in the district of the empaneled grand jury.

Provides that any person may approach the attorney for the Government to request permission to testify on a matter before a grand jury or to request that an inquiry be initiated. The attorney for the Government shall keep a public record of all denials of such requests. Any individual dissatisfied with the disposition of his request may appear before the grand jury if the court finds that such appearance would serve a relevant purpose.

Fifth. With respect to the issue of reports concerning grand jury investigations:

My bill requires the Attorney General to file detailed annual grand jury reports, describing:

(a) The number and nature of investigations in which grand juries were utilized; (b) the number of reports for orders requesting testimony, and the number granted; (c) the number of immunity grants requested, the number consented to, and the nature of the investigations; (d) the number of witnesses imprisoned for contempt, and the date of their confinement; (e) an assessment of the effectiveness of immunity, including the number of arrests, indictments, no-bills, etc., resulting from immunity; and (f) a description of the data banks, et cetera, by which grand jury data is processed and used by the Justice Department.

Sixth. With respect to the issue of evidence taken during the grand jury process: my bill requires the Government to introduce all evidence in its possession which it knows will tend to negate the guilt of a potential defendant.

Prohibits the grand jury from returning an indictment on the basis of summarized or hearsay evidence alone, except for good cause shown.

Requires that questioning of witnesses and subpenas for documents be relevant to the subject matter under investigation.

Requires that the only evidence that can be presented to a grand jury is evidence properly seized and legally obtained.

Seventh. With respect to the issue of immunity: My bill provides that a witness must consent to immunity, thereby preserving his or her fifth amendment rights. If the witness consents to the immunity, the sort of immunity granted would be transactional, as I discussed earlier.

I urge my colleagues to join with me in an effort to restore some of the rights of the individual which have been lost in the recent past. If this proposed legislation passes, it will restore the grand jury to its proper role—as a guardian of the people; a sword to ferret out governmental abuse and corruption.

Mr. President, I ask uanimous consent that the text of the Grand Jury Reform Act of 1978 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3405

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Grand Jury Reform Act of 1978".

Sec. 2. The table of contents is as follows:

TABLE OF CONTENTS

Sec. 1. Short title.
Sec. 2. Table of contents.
Sec. 3. Uncooperative witnesses.
Sec. 4. Unauthorized disclosure of grand jury information.
Sec. 5. Rights and duties of grand jurors; independent inquiry.
Sec. 6. Immunity.
Sec. 7. Rights of grand jury witnesses.
Sec. 8. Recording, transcribing, and availability of grand jury proceedings.
Sec. 9. Preliminary examination.

Sec. 10. Reports concerning grand jury investigations.
Sec. 11. Effect on other laws and rules.

UNCOOPERATIVE WITNESSES

SEC. 3 (a) Section 1826 of title 28, United States Code, is amended to read as follows:

"§ 1826. Recalcitrant witnesses

"(a)(1) Whenever a witness in any proceeding before or ancillary to any court or grand jury of the United States refuses without just cause shown to comply with an order of the court to testify or provide other information, including any books, papers, document, record, recording, or other material, the attorney for the Government may apply to the court for an order directing the witness to show cause why the witness should not be held in contempt.

"(2) After submission of such application and a hearing at which the witness is entitled to be represented by counsel, the court may, upon a finding that such refusal was without just cause, hold the witness in contempt and order the witness to be confined. Such confinement shall be at a suitable Federal correctional institution, if one is located within fifty miles of the court ordering confinement, unless the witness waives this right. Upon a showing of need or hardship, the court ordering confinement may grant a request by the witness to be imprisoned at a suitable correctional institution near the place of residence or employment of the witness, or the witness' family or relatives or the attorney of the witness.

"(3) Confinement under this section may continue until such time as the witness is willing to give such testimony or provide such information. No period of such confinement shall exceed the term of the grand jury, including extensions, before which such refusal to comply with the court order occurred, and in no event shall such confinement exceed six months.

"(4) No hearing shall be held under this subsection unless five days' notice is given to the witness who has refused to comply with the court order. A witness may be given a shorter notice of not less than forty-eight hours if the court, after a hearing and upon a showing of special need by the attorney for the Government, so orders.

"(b) No person who has been confined under this section for refusal to testify or provide other information concerning any transaction, set of transactions, event, or events may be again confined under this section or under section 401 of title 18, United States Code, for a subsequent refusal to testify or provide other information concerning the same transaction, set of transactions, event, or events.

"(c) Any person confined pursuant to this section shall be admitted to bail or released in accordance with the provisions of chapter 207 of title 18, United States Code, pending the determination of an appeal taken by him from the order of his confinement, unless it affirmatively appears that the appeal is frivolous or taken for delay. Any appeal from an order of confinement under this section shall be disposed of as soon as practicable, pursuant to an expedited schedule, and in no event more than thirty days from the filing of such appeal.

(d) In any proceeding conducted under this section, including all necessary appeals, counsel may be appointed in the same manner as provided in section 3006A of title 18, United States Code, for any person financially unable to obtain adequate representation.

"(e) A refusal to answer a question or provide other information before a grand jury of the United States shall not be punishable under this section or under section 401 of title 18, United States Code, if the question asked or the request for other information is based in whole or in part upon evidence seized or otherwise obtained by an unlawful act or in violation of the witness' constitutional rights or of rights established or protected by any statute of the United States.".

(b) Chapter 21 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 403. Refusal of a witness to testify in a grand jury proceeding

"No person who has been imprisoned or fined by a court of the United States under section 401 of this title for refusal to testify or provide other information concerning any transaction, set of transactions, event, or events in a proceeding before a grand jury (including a special grand jury summoned under section 3331 of this title) impaneled before any district court of the United States may again be imprisoned or fined under section 401 of this title or under section 1826 of title 28, United States Code, for a subsequent refusal to testify or provide other information concerning the same transaction, set of transactions, event, or events.".

(c) The table of sections for chapter 21 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"403. Refusal of a witness to testify in a grand jury proceeding.".

UNAUTHORIZED DISCLOSURE OF GRAND JURY INFORMATION

SEC. 4. (a) Chapter 73 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 1512. Violations of grand jury secrecy

"(a) Whoever knowingly discloses any evidence introduced, statement made, or other matter occurring before any grand jury summoned or impaneled by a court of the United States shall be fined not more than $500 or imprisoned not more than six months, or both.

"(b) Whoever knowingly discloses any evidence introduced, statement made, or other matter occurring before any grand jury summoned or impaneled by a court of the United States, with the intent to secure compensation therefor, to affect the actions of or any decisions by that jury, to affect further legal proceedings against any witness, or to affect further legal proceedings as to the subject matter of any investigation by that jury, shall be fined not more than $20,000 or imprisoned not more than five years, or both.

"(c) This section shall not apply to—

"(1) disclosure to or by an attorney for the Government in the performance of his duties, provided that a record is presented to the court of the date and purpose of each disclosure and of the name of the person to whom the disclosure is made;

"(2) disclosure directed or permitted by a court;

"(3) disclosure by a witness who has appeared before such grand jury, or by his attorney, of any matter about which the witness has testified, or produced other information before the grand jury; or

"(4) any representative of the press, broadcasting, or information media, acting in his professional capacity.

"(d) Subsection (a) shall not apply to disclosure by any person other than a person present at the grand jury proceeding.

"(e) As used in this section—

"(1) 'attorney for the Government' includes the Attorney General, an authorized assistant of the Attorney General, a United States attorney, and an authorized assistant of a United States attorney;

"(2) 'disclosure by a witness' includes disclosure by others of matter the witness has previously disclosed when made as a consequence of such disclosure by the witness.

"(f) Nothing contained in this section shall be construed to affect the power of the court to punish any person for contempt for violation of any rule or order of the court.".

(b) The table of sections for chapter 73 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"1512. Violations of grand jury secrecy.".

RIGHTS AND DUTIES OF GRAND JURORS; INDEPENDENT INQUIRY

SEC. 5. (a) Chapter 215 of title 18, United States Code, is amended by adding at the end thereof the following new sections:

"§ 3329. Rights and duties of grand jury and attorney for Government

"(a) Upon impanelment of each grand jury before a district court of the United States, the court shall give adequate and reasonable notice to the grand jury of, and shall assure that the grand jury reasonably understands—

"(1) its duty to inquire into offenses against the criminal laws of the United States alleged to have been committed within that district;

"(2) its rights, authority, and powers with respect to an independent inquiry under section 3330 of this title;

"(3) its right to call and interrogate witnesses;

"(4) its right to request the production of documents or other evidence;

"(5) the subject matter of the investigation;

"(6) the criminal statute or statutes involved, if these are known at the time the grand jury is impaneled;

"(7) the necessity of legally sufficient evidence to form the basis of any indictment as provided under section 3330A(1) of this title;

"(8) the duty of the grand jury by an affirmative vote of twelve or more members of the grand jury to determine, based on the evidence presented before it, whether or not there are sufficient grounds for issuing indictments and to determine the violations to be included in any such indictments;

"(9) the obligation of secrecy and that it is a criminal offense to disclose to any person any information concerning any grand jury proceeding; and

"(10) such other duties and rights as the court deems advisable.

The court's failure to instruct the grand jury as directed in this section shall be just cause within the meaning of section 1826 of title 28, United States Code, for a witness' refusal to testify or provide other information before such grand jury, until such time as the court instructs the grand jury in accordance with this section.

"(b)(1) Any person, including a witness who has previously testified or produced books, records, or documents, may make a written request to the attorney for the Government, or a special attorney appointed pursuant to this title, and request to testify in an inquiry before a grand jury, or to produce books, records, or documents, or to appear before a grand jury and request that the grand jury proceed in accordance with its powers under section 3330 of this title.

"(2) The attorney for the Government, or the special attorney—

"(A) shall forward any request under this subsection to the grand jury and may make a recommendation as to such request;

"(B) shall take reasonable steps to notify any person of his intention to present evidence against the person and request a presentment or indictment and of the person's right to testify or present evidence under this subsection and such notice shall be given a reasonable time in advance of any request for such presentment or indictment unless the attorney for the Government or the special attorney can prove to the satisfaction of the court that notice would result in the flight of the person, would endanger other witnesses, or would unduly delay the investigation and prosecution; and

"(C) shall establish a pubic record of all

requests and the action taken on each such request.

"(3) The grand jury shall not be required to hear any witness, or consider any book, record, or document, but shall consider all requests forwarded to it by the attorney for the Government or the special attorney. Unless the grand jury, upon an affirmative vote of a majority of its members, refuses to hear the testimony, or consider the documents offered by, a person, under this subsection, the attorney for the Government or the special attorney shall subpena the evidence or witness offered. If the grand jury refuses to hear the testimony or consider the documents offered, the attorney for the Government or the special attorney shall notify the person making such request, in writing, of the refusal.

"(4) Upon appearing pursuant to a subpena, such person shall be permitted to testify, only upon submission of a waiver of immunity, as to relevant and competent matters under consideration by the jury and shall be subject to examination by the attorney for the Government or the special attorney.

"(c) The attorney for the Government and the special attorney shall not bring before the grand jury any witness who has given written notice in advance of the witness' appearance that such witness intends to exercise his privilege against self-incrimination, nor bring to the attention of the jurors, in any way, the invocation of the privilege by such witness, unless such witness has been given a grant of immunity.

"(d) The attorney for the Government or a special attorney shall not initiate, and a grand jury shall not conduct, an inquiry into a transaction or event, if any other jury has failed to return an indictment based on the same transaction or event, unless the court finds, upon a proper showing, that additional evidence relevant to such witness and previously unavailable to the Government has been discovered.

"§ 3330. Independent grand jury inquiry

"(a)(1) Any grand jury impaneled before any district court (including a special grand jury summoned under section 3331) may, after giving notice to the court, inquire upon its own initiative into offenses against the criminal laws of the United States alleged to have been committed within that district by any officer or agent of the United States or of any State or municipal government or by any person who, at the time of the alleged commission of the offenses, was an officer or agent of the United States or of any State or municipal government. Such grand jury may request the attorney for the Government to assist the grand jury in such inquiry.

"(2) The grand jury shall serve for a term of eighteen months after giving notice to the court under paragraph (1) unless an order for its discharge is entered earlier by the court or upon a determination of the grand jury by an affirmative vote of twelve or more members that its business has been completed. If, at the end of such term or any extension thereof, the district court determines the business of the grand jury has not been completed, the court may enter an order extending such term for an additional period of six months. No grand jury term so extended shall exceed thirty-six months from the date on which notice to the court was given under paragraph (1).

"(3) If a district court within any judicial circuit fails to extend the term of a grand jury engaged upon an independent inquiry under this section or enters an order for the discharge of such grand jury before such grand jury determines that it has completed its business, the grand jury by an affirmative vote of twelve or more members may apply to the chief judge of the circuit for an order for the continuance of the term of the grand jury. Upon the making of such an application by the grand jury, the term thereof shall continue until the entry by the chief judge of the circuit of an appropriate order upon such application. No grand jury term so extended shall exceed twenty-four months.

"(b)(1) In the event that the attorney for the Government is unable to impartially assist, refuses to assist or hinders or impedes the grand jury in the conduct of any inquiry under subsection (a), the grand jury may, upon the affirmative vote of twelve or more of its members, request at any point in such inquiry that the court appoint a special attorney in lieu of the attorney for the Government, to assist the grand jury in the conduct of any independent inquiry referred to in subsection (a). Such special attorney, with the approval of the court, may appoint and fix the compensation of such assistants, investigators, and other personnel as he deems necessary. The special attorney and his appointees shall be appointed without regard to the provisions of title 5 of the United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that the special attorney and any appointees shall be paid at a reasonable rate to be determined by the court. The special attorney shall be reimbursed for actual expenses incurred by him and his appointees in the performance of duties pursuant to this section.

"(2) Notwithstanding sections 516, 518, and 519 of title 28 or any other provision of law, a special attorney appointed under this section shall carry out the functions of an attorney for the Government and shall have the exclusive authority to—

"(A) assist in the conduct of independent grand jury investigations under this section,

"(B) prepare and sign any indictment returned by a grand jury pursuant to such inquiry in lieu of any attorney for the Government, and

"(C) conduct all other phases of any criminal prosecution arising out of such inquiry (including the argument of appeals in the United States court of appeals and the United States Supreme Court).

"(3) A special attorney appointed under this section is authorized to obtain from any department or agency of the United States any files, records, documents, or other materials which he deems necessary or appropriate in the carrying out of his functions under this section.".

(b) The Administrator of General Services shall furnish offices, equipment, supplies, and services to a special attorney appointed under section 3330 of title 18, United States Code, in the same manner as such items are furnished to agencies and departments of the United States.

(c) Section 524 of chapter 31 of title 28, United States Code (relating to appropriations for administrative expenses), is amended by adding at the end thereof the following new sentence: "Such appropriations shall also be available for payment of the compensation and other expenses of the special attorney appointed under section 3329 of title 18 to assist a grand jury in the conduct of an independent investigation.".

IMMUNITY

SEC. 6. (a) Chapter 119 of title 18, United States Code, is amended by inserting immediately after section 2513 the following new section:

"§ 2514. Immunity of witnesses

"(a) In any proceeding before a grand jury impaneled before a district court of the United States, the attorney for the Government may submit an application to the court for an order that a witness shall testify or produce books, papers, or other evidence subject to the provisions of this section only if—

"(1) there is an affirmative finding by twelve or more of the members of the grand jury that such testimony or the production of books, papers, or other evidence by the witness is necessary to the public interest;

"(2) the witness gives her or his written consent to such application; and

"(3) the Attorney General approves such application.

"(b) Whenever in the judgment of an attorney for the Government the testimony of any witness, or the production of books, papers, or other evidence by any witness, in any cases or proceeding before any court of the United States, is necessary to the public interest, such attorney for the Government, with the written consent of the witness, and upon the approval of the Attorney General, shall make application to the court for an order granting the witness immunity so that the witness shall testify or produce evidence subject to the provisions of this section.

"(c) Pursuant to subsections (a) and (b) of this section, upon the court's order granting immunity, such witness shall not be excused from testifying or from producing books, papers, or other evidence on the ground that the testimony or evidence required of such witness may tend to incriminate her or him or subject her or him to a penalty or forfeiture, and no such witness shall be prosecuted or subjected to any penalty or forfeiture on account of any transaction, matter, or thing concerning which she or he is compelled, after having claimed her or his privilege against self-incrimination, to testify or produce evidence; nor shall testimony so compelled be used as evidence in any criminal proceeding (except in a proceeding described in the next sentence) against such witness in any court. No witness shall be exempt under this section from prosecution for perjury or contempt committed while giving testimony or producing evidence under compulsion as provided in this section.".

(b) The table of sections for chapter 119 of such title is amended by inserting immediately after the item relating to section 2513 the following:

"2514. Immunity.".

(c) Section 6002 of title 18, United States Code, is amended—

(1) by striking "(1) a court or grand jury of the United States;";

(2) by striking "(2)" and inserting in lieu thereof "(1)"; and

(3) by striking "(3)" and inserting in lieu thereof "(2)".

RIGHTS OF GRAND JURY WITNESSES

SEC. 7. (a) Chapter 215 of title 18, United States Code, is further amended by adding at the end thereof the following new section:

"§ 3330A. Counsel

"(a) Every witness subpenaed to appear and testify before a grand jury impaneled before a district court or to produce books, papers, documents, or other objects before such grand jury shall be entitled to the assistance of counsel, including assistance during such time as the witness is questioned in presence of the grand jury.

"(b) Such counsel may be retained by the witness or shall be appointed as provided in section 3006A of this title in the case of any person financially unable to obtain legal representation.

"(c) Such counsel shall be allowed to be present in the grand jury room during the questioning of the witnesses and may participate fully in all proceedings before the grand jury.

"(a) In the case of any proceeding before a grand jury impaneled before a district court, except with the consent of the witness or when the court, after a hearing and upon a showing by the attorney for the Government or a special attorney appointed under this title, finds special need, no subpena may require any witness to testify or produce other information at such proceeding at any

time before the expiration of the one-week period beginning on the date of service of the subpena. In no event may a subpena be issued less than forty-eight hours prior to the intended date for the testimony.

"(b) Upon the service of any subpena requiring any witness to testify or produce other information at any proceeding before a grand jury impaneled before a district court, the witness shall be given adequate and reasonable notice of—

"(1) his right to counsel as provided in section 3330A of this title;

"(2) his privilege against self-incrimination;

"(3) the subject matter of the grand jury investigation;

"(4) whether his own conduct is under investigation by the grand jury;

"(5) the substantive criminal statute or statutes, violation of which is under consideration by the grand jury, if these are known at the time of issuance of the subpena;

"(6) His/her rights regarding immunity under section 2514(a)(2); and

"(7) any other rights and privileges which the court deems necessary or appropriate.

"(c)(1) The district court which issued a subpena, or the district court for the district in which the person resides or is served shall have concurrent jurisdiction to hear, and take appropriate action with respect to any motion relating to, including any motion to quash, such subpena.

"(2) A motion relating to a subpena may be made at any time prior to, during, or when appropriate, subsequent to the appearance of any witness before a grand jury. Any motion made during or subsequent to the appearance of the witness before the grand jury may be made only in the district in which the grand jury is impaneled.

"(3) If a motion is made under this section before the day on which the person subpenaed has been ordered to appear or books, records, or documents have been ordered to be produced, the appearance of such person, or the production of such documents, shall, upon appropriate aplication, be stayed until the court has ruled on such motion.

"(d) Upon proper motion, the court may quash a subpena and take other appropriate sanctions when it finds that—

"(1) a primary purpose or effect or requiring such person to so testify or to produce such objects to the grand jury is or will be to secure for trial testimony or to secure other information regarding the activities of any person who is already under indictment by the United States, a State, or any subdivision thereof for such activities; or of any person who is under formal accusation for such activities by any State or any subdivision thereof, where the accusation is by some form other than indictment;

"(2) the witness has not been advised of his rights, as specified in subsection (b);

"(3) the evidence sought is not relevant to the grand jury investigation properly conducted within the grand jury's jurisdiction;

"(4) compliance with the subpena would be unreasonable or oppressive, as such subpena would require unnecessary appearances by the witness, would lead to testimony or other information that is cumulative, unnecessary or privileged, would be primarily for punitive purposes or would not involve other like circumstances; or

"(5) a primary purpose of the issuance of the subpena is to harass the witness, to induce the witness to commit perjury or false utterance, or to place the witness in contempt.

"(e) Upon proper motion, the court shall quash a subpena and take other appropriate sanctions when it finds that—

"(1) the witness has already been confined, imprisoned, or fined under section 1826 of title 28, United States Code, or section 401 of this title for his refusal to testify before any grand jury investigating the same transaction, set of transactions, event, or events;

"(2) the witness has given written notice that such witness intends to exercise his privilege against self-incrimination, unless a grant of immunity has been obtained; or

"(3) the grand jury is inquiring into the same transaction or event that was under consideration by another grand jury which failed to return an indictment based on such transaction or event, unless a court finds upon a hearing that there is no additional, newly discovered evidence relevant to such witness which was previously unavailable to the Government.

"(f)(1) A grand jury impaneled to conduct an inquiry into offenses against the criminal laws of the United States may be convened only in a district, or districts, in which it is believed criminal conduct may have occurred which are elements of such offenses; except that when a grand jury is to be convened to conduct an inquiry into both violations of substantive criminal statutes and violations of statutes forbidding conspiracy to violate substantive criminal statutes, the grand jury may not be convened before a district court in a district in which the only criminal conduct alleged to have occurred in that district is conspiracy to commit the substantive criminal act.

"(2) The district court may quash a subpena or transfer any grand jury proceedings or investigation into any other district where it might properly have been convened if the court finds that a witness' appearance would impose a substantial and unnecessary hardship on such witness or his family because of the location of the proceeding. In considering whether such hardship exists, the court shall take into consideration all the relevant circumstances, including the distance of the grand jury investigation from the places of residence of witnesses who have been subpenaed, financial and other burdens placed upon the witnesses, and the existence and nature of any related investigations and court proceedings.

"§ 3330C. Evidence presented to the grand jury

"(a) The attorney for the Government shall not be permitted to present to the grand jury any evidence seized, derived from, or otherwise obtained by any unlawful act or in violation of the witness' constitutional rights or of rights established or protected by any statute of the United States.

"(b) An attorney for the Government shall present to the grand jury all evidence in such attorney's possession which he has reason to know will tend to negate the guilt of the person under investigation.

"(c) A grand jury may indict a person for an offense when (1) the evidence before such grand jury is legally sufficient to establish that such offense was committed, and (2) competent and admissible evidence before such grand jury provides reasonable cause to believe that such person committed such offense. An indictment may be based on summarized or hearsay evidence alone only upon showing of good cause to the court which impaneled the grand jury.

"(d) The district court before which a grand jury is impaneled shall dismiss any indictment of the grand jury if such district court finds that—

"(1) the evidence before the grand jury was legally insufficient to establish that the offense for which the indictment was rendered was committed;

"(2) there was not competent and admissible evidence, or summarized or hearsay evidence allowed by the court upon a showing of good cause, before the grand jury to provide reasonable cause to believe that the person indicted committed such offense;

"(3) the attorney for the Government has not presented to the grand jury all evidence in his or her possession which the attorney knows will tend to negate the guilt of the person indicted; or

"(4) the attorney for the Government has submitted to the grand jury evidence seized or otherwise obtained by an unlawful act or in violation of the witness' constitutional rights or of rights established or protected by any statute of the United States.".

(b) Section 3006A (a) of title 18, United States Code (relating to appointments of attorneys), is amended—

(1) by striking out "or," before "(4)" in the first sentence thereof; and

(2) by inserting before the period at the end of the first sentence thereof: ", or (5) who is a witness before a grand jury impaneled before the district court".

RECORDING, TRANSCRIBING, AND AVAILABILITY OF GRAND JURY PROCEEDINGS

SEC. 8. (a) Chapter 215 of title 18, United States Code, is further amended by adding at the end thereof the following new sections:

"§ 3330D. Recording of grand jury proceedings

"A complete and accurate stenographic or electronic record of all grand jury proceedings shall be kept, except that the grand jury's secret deliberations and consultations between witnesses and their counsel shall not be recorded. Such record shall include the court's notice to the grand jury of its rights and duties and all other comments or charges by the court to the jury at any time; all introductory comment, or other comments, directives, and other utterances made by attorneys for the Government or special attorneys to the grand jury, witnesses and their counsels; all questioning of and testimony of witnesses; all interchanges between the grand jury and attorneys.

"§ 3330E. Availability of grand jury transcripts and other statements

"(a) Any person summoned to testify or provide other information before a grand jury impaneled before a district court shall be entitled, prior to testifying or providing other information, to examine and copy any statement in the possession of the United States which he has made and which relates to the subject matter under inquiry by the grand jury. Such examination and copying may be made by the attorney for such person if such person gives his written approval. As used in this subsection, the term 'statement' has the meaning provided by section 3500 (e).

"(b) Any witness who testifies before a grand jury, or his attorney with such witness' written approval, shall, upon request, and under such conditions as the court deems reasonable, be entitled to examine and copy a transcript or electronic recording of the record for the period of such witness' own appearance before the grand jury, and if a witness is proceeding in forma pauperis, he shall be furnished, upon request, a copy of such transcript. Such transcript shall be made available for inspection and copying not later than forty-eight hours after the conclusion of such witness' testimony, unless, for cause shown, more time is required to prepare such transcript. After examination of such transcript, a witness may request permission to appear before the grand jury again to explain his testimony. Additional testimony given under this subsection shall become part of the official transcript and shall be shown to the members of the grand jury.

"(c) Upon a showing of good cause, the court may, at any time, order that the disclosure of the recorded proceedings of a grand jury be denied, restricted or deferred, or make such other order as is appropriate. Upon motion by the Government, the court shall permit the Government to make such show-

ing, in whole or in part, in the form of a written statement to be inspected by the judge alone. If the court enters an order granting relief following such a showing, the entire text of the party's statement shall be sealed and preserved in the records of the court to be made available to the appellate court in the event of an appeal by the defendant.

"(d) A reasonable time prior to trial, and after the return of an indictment or the filing of an information, a defendant shall, upon request and under such conditions and limitations as the court deems reasonable, be entitled to examine and copy a transcript or electronic recording of—

"(1) the grand jury testimony of all witnesses to be called at trial;

"(2) all statements to the grand jury by the court and the attorney for the Government or special attorney, relating to the defendant's case;

"(3) all grand jury testimony or evidence which in any manner could be considered exculpatory; and

"(4) all other grand jury testimony or evidence which the court may deem material to the defense.".

(b) Section 3500(e), title 18, United States Code, is amended—

(1) by inserting "or" at the end of paragraph (1);

(2) by deleting "; or" and inserting a period at the end of paragraph (2); and

(3) by deleting paragraph (3).

(c) The table of sections for chapter 215 of title 18, United States Code, is amended by adding at the end thereof the following new items:

"3329. Notice to grand jury of its rights and duties.
"3330. Independent grand jury inquiry.
"3330A. Certain rights of grand jury witnesses.
"3330B. Subpoenas.
"3330C. Evidence presented to the grand jury.
"3330D. Recording of grand jury proceedings.
"3330E. Availability of grand jury transcripts and other statements".

PRELIMINARY EXAMINATION

SEC. 9. (a) Chapter 217 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 3368. Preliminary examination

"(a) A defendant is entitled to a preliminary examination, unless waived, when charged with any offense, other than a petty offense, which is to be tried by a judge of the district court.

"(b) Such preliminary examination may be held prior to, or within a reasonable time following, the filing of an indictment or information in the district court.".

(b) The table of sections for chapter 217 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"3368. Preliminary examination.".

REPORTS CONCERNING GRAND JURY INVESTIGATIONS

SEC. 10. Section 522 of title 28, United States Code (relating to reports of business and statistics), is amended by striking out "The Attorney General" and inserting in lieu thereof "(a) The Attorney General" and by adding at the end thereof the following new subsection:

"(b) The Attorney General, at the beginning of each regular session of Congress, shall report to the Congress and to the Administrative Office of the United States Courts with respect to the last preceding fiscal year on—

"(1) the number of investigations undertaken in which a grand jury or a special grand jury was utilized together with a description of the nature of each investigation undertaken;

"(2) the number of requests by United States grand juries to the Attorney General for approval to apply to the court for an order compelling testimony under section 2003 of title 18, and the number of such requests approved by the Attorney General;

"(3) the number of applications to district courts for orders granting immunity under title 18;

"(4) the number of applications to district courts for orders granting immunity under title 18 that were approved and the nature of the investigations for which the orders were sought;

"(5) the number of instances in which witnesses in the investigations enumerated in paragraph (1) were held in contempt and confined, and the dates and lengths of such confinement;

"(6) the number of arrests, indictments, nobills, trials, and convictions resulting from testimony obtained under orders granting immunity, the offenses for which the convictions were obtained, and a general assessment of the importance of the immunity;

"(7) a description of data banks and other procedures by which grand jury information is processed, stored, and used by the Department of Justice; and

"(8) other appropriate information concerning grand jury activity during such year.

The matters contained in the report required to be made by this section shall be set forth according to judicial district.".

EFFECT ON OTHER LAWS AND RULES

SEC. 11. (a) The enumeration of this Act of any rights and privileges of grand jury witnesses shall not affect any other rights and privileges to which such witnesses may be entitled under any law or rule of law.

(b) Notwithstanding section 3771 of title 18, United States Code, no rule contained in the Federal Rules of Criminal Procedure shall apply to the extent that such rule is inconsistent with the provisions of this Act.●

By Mr. INOUYE (for himself, Mr. GRAVEL and Mr. STONE):

S. 3408. A bill to provide for the development of aquaculture in the United States, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Commerce, Science, and Transportation, jointly, by ananimous consent.

NATIONAL AQUACULTURE POLICY ACT OF 1978

● Mr. INOUYE. Mr. President, today I am pleased to introduce the National Aquaculture Policy Act of 1978.

Aquaculture is the cultivation of aquatic organisms both in inland waters and the open sea. To define it thus is to stress the consonance between aquaculture and agriculture. The cultivation of both aquatic and terrestrial organisms has been practiced by man for many centuries.

When I survey the present status of aquaculture in the United States I see a comparison with the status of U.S. agriculture well over a century ago, when Congress passed the first Morrill Act. At that time the great abundance of native game was showing the severe impacts of intensive hunting and agricultural practices introduced from Europe were pushing rapidly westward across our Nation. Today we are witnessing severe impacts on our once abundant coastal fisheries, and we have recently extended seaward our fisheries management control.

The Morrill Act, that first of a series of land grant college actions, was a recognition of the need to better focus modern science and technology on efforts intended to systematically improve agricultural practices, and thus give public assistance to our agricultural producers. The results were profound, and today the successes of these actions are legion.

I believe that we have the immediate opportunity to make an even quicker advance in aquaculture. The tremendous base of science and technology in the United States could compress 50 or 60 years of agricultural history into 10 or 15 years of aquacultural development. This could take aquaculture development, before the end of the century, to a place in history comparable with U.S. agriculture during the First World War, when our farmers so ably helped a world in need of their production.

At present, the world supplies of fishery resources predominantly come from the hunting and gathering of wild stock. Whereas the controlled cultivation of such resources, aquaculture, provides about 10 percent of the world's production of fish products, in the United States it provides only about 3 percent of our production.

We have already fished some wild stocks beyond the level of maximum sustainable yields. The cultivation of certain stocks is a necessary and complementary effort to that of increasing production by more efficient fishing. Aquaculture can assist the replenishment or enhancement of common property stocks, in addition to providing increased, or new, private property stocks.

The U.S. demand for fishery products is high and is increasing. The importation of fishery products now exceeds exportation many-fold, both in measures of quantity and of cash value.

We import over half of the fish consumed in the United States. Increased aquaculture production can increase our supplies of food and other renewable resources, add stability to those supplies, and improve our balance of trade.

The legislation I am introducing today has many similarities to aquaculture legislation previously introduced in the Senate, and to H.R. 9370, the National Aquaculture Organic Act of 1978, which has already passed the full House. I am a cosponsor of two bills, S. 1043 and S. 2218, introduced by Senators BENTSEN and STONE, respectively. I offer this legislation as an initiative to effect some compromise between those earlier proposals, and to move us to action during this session of Congress.

I would like to call your attention to four features of the bill. First, it gives emphasis to the congressional action as a statement of a national aquaculture policy. Second, it involves the Office of the President, through the Director of the Office of Science and Technology policy, in the formulation of a national aquaculture plan which is to be implemented by a series of aquaculture development programs in the Department of Agriculture, the Department of Commerce, and the Department of the Interior. Third, it provides a progressive set of incentives for increased private and public investment at the local and State levels. Fourth, the legislation lays stress

on State participation throughout: In planning, in coordinating, and in assisting the development of aquaculture.

These features are intended to strengthen the delivery of Federal help to private producers, on whom the burden for achievement is placed. The Federal plan is not intended to be a heavily structured imposition from above, but rather a network reaching down to the grass-roots level (should I say sea-grass roots?) to receive the signals to which it should respond. I see the future success, or failure, of the National Aquaculture plan as something to be measured by the rate of increase of production by the entrepreneurs in a new industry. I believe this is an industry with a potential to rapidly increase its national significance.

This legislation is not intended to diminish in any way existing programs of the Federal Government. It is intended to augment them by a modest amount while providing structure and purpose to the national endeavor.

This bill does not specify a lead agency. I do not believe that Congress has been provided sufficient knowledge to judge the merits, or demerits, of the existing programs. The Office of Science and Technology Policy is asked to make such a survey and chart an optimum course for scientific and technical activity in support of aquaculture. The Office will also consider the administration of such activity and decide whether departmental programs are sufficiently distinct, or separable, to recommend a horizontal program coordination, or whether the programs need the heirarchical structure of a lead agency designation.

I have considered and rejected the separation of aquaculture programs solely by consideration of fresh water biology versus salt water biology. I am more inclined toward considerations of economic principles: Private goods versus common goods. Within my constituency there are complete aquaculture systems, cultivating aquatic plants and animals, which progress from fresh water to brackish water conditions, and which wholly reside on private land as private property. This is like most U.S. agriculture.

On the other hand, there are aquaculture systems which graze their stock on the commons provided by our coastal waters. An equally significant opportunity for aquaculture is to assist the management or enhancement of common property fishery stocks.

It would appear that the Department of Commerce and the Department of the Interior have good resources and experience for working with wild stock, naturally evolved stock, and for working with management problems of common property goods. The Department of Agriculture has a history of assisting the producer of private goods, and of aiding the development of new strains or varieties of cultivated stock. For these reasons I believe the national aquaculture plan should define responsibilities by both biologic and economic considerations for both private goods and common goods.

The legislation specifically excludes from the definition of aquaculture the open ocean ranching of Pacific salmon for profit. This is a recognition of the importance of international agreements and State laws to the management of that fishery.

Let me explain further some sections of the legislation.

The national aquaculture plan is to be formulated and implemented in an orderly but unobstructed way. The Director of the Office of Science and Technology Policy is to assess the current aquaculture activities in the United States. This should require the merging of information from at least four sources: First, the National Academy of Sciences (which has this year completed the report "Aquaculture in the United States: Constraints and Opportunities"); second, plans and information available in the Department of Agriculture, Department of Commerce, and Department of the Interior; third, information available from State governments; fourth, information from various trade organizations serving the aquaculture industry. The assessment is to be used by the Director in identifying major policy issues, and in considering alternative ways to reformulate these issues into planning objectives.

The national aquaculture plan should be a translation of these planning objectives into management objectives, and a decomposition of the plan into programs which can be implemented by the Federal agencies. Mechanisms for advisory input and for interagency coordination are provided in the legislation.

One section of the bill is specific to the identification of State aquaculture agencies. The National Academy of Science has reported that in many States more than 30 requirements, such as permits or licenses, must be met before a producer may legally commence operations. To address this problem, incentives are provided to encourage the identification of responsibility for aquaculture at the State level in the expectation that this will result in more rational and expeditious regulation. A State aquaculture agency can be of aid to a Federal manager of an aquaculture program element by providing one contact point for establishing consistency with existing laws and regulations. The State agencies would also be expected to assist in the planning and the implementation of the Federal programs.

Three sections of the bill are designed to give incentives and reduce risks for the investment of capital in aquaculture: grants and contracts, demonstration projects, and guarantees of obligation. They are purposefully tiered, by order in the bill, to provide increasing levels of incentives or assistance.

Grants and contracts are mechanisms to assist a Federal manager give support to persons, or institutions, of innovative excellence. They can also be a means of augmenting the applied research being done in Federal facilities.

Demonstration projects represent a mechanism for technology transfer and education, which can reduce risk by providing for such needs as: management information, disease control, or reliable supplies of seed stock. Demonstration projects are to be implemented only with State cooperation as a means of assuring both a sufficient intensity of need and a sufficient number of users.

Guarantees of obligation are intended to permit the Federal Government to be a partner of last resort in the acquisition of capital. I am encouraged in my optimism for aquaculture by evidence that the supply of credit for aquaculture enterprises has been increasing in recent years. Private investment has grown, and will continue to grow, as the purposefulness of our national interest in aquaculture solidifies. Federal assistance is augmenting private lending through such programs as are administered by the Farmers Home Administration in the Department of Agriculture, by the Economic Development Administration or the Small Business Administration in the Department of Commerce, and by the Farm Credit Administration.

There is, though, evidence that some aquaculture enterprises still suffer a lack of opportunities to obtain credit. I believe that these are frequently the most innovative parts of a fledgling industry and the assistance is lacking simply because of the potential lender's inability to assess the risks. Knowledge to improve that assesment may be available to the Federal Government. Many of these attempts at innovation are focused on mariculture (salt water or brackish water aquaculture) and deal with food production systems that have hitherto been underutilized or ignored. For these reasons the bill proposes that a fund be established and guarantees of obligation be authorized for the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior to use in such deserving cases as cannot be served by the other credit instruments those Secretaries have available.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3408

Be it enacted by the Senate and House of Representatives of the United States of American in Congress assembled. That this Act may be cited as the "National Aquaculture Policy Act of 1978".

FINDINGS

SEC. 2. The Congress finds and declares that—

(1) Through intensive applications of science and technology, agriculture has met man's needs for food supplies and for other renewable resources by extensive husbandry of terrestrial plants and animals, but similarly extensive husbandy of aquatic animals or plants has not been achieved.

(2) Many segments of the world population are now facing serious nutritional deficiencies and food shortages due to environmental degradation, adverse climatic conditions, and the steady growth of population. These problems will become more severe, and the resulting demand for increased food production will have to be partially met through the application of scientific and technological advances from research on aquaculture and other hitherto underutilized food production systems.

(3) The world demand for seafood is increasing, but the harvest of some natural

populations of fish and shellfish has exceeded levels of maximum sustainable yield.

(4) Aquaculture is contributing to world food supplies with production equal to 10 per centum of current landings of seafoods, and that production has the potential for significant increase before the end of this century.

(5) Certain stocks of fish and shellfish of importance to the United States are declining, or are depleted, which has had an undesirable impact on both commercial and recreational fisheries.

(6) There is an extensive market for seafood in the United States, but the United States imports in excess of 50 per centum of its fish and shellfish for human consumption (and those imports are ten times the level of exports). This dependence on imports results in balance of payment drains, and the supplies are uncertain and often irregular.

(7) Less than 3 per centum of current United States fisheries production results from aquaculture, but there is good potential for expanding aquaculture production in the United States so that such production can equal or exceed the worldwide average, thereby helping to provide United States consumers with a stable supply of high quality aquatic foods and assisting the United States in its balance of payments.

(8) Growth of aquatic plants is a source of food for human and animal consumption, a source of industrial materials and pharmaceuticals, a potential source of energy, and can be used to assist pollution control and abatement.

(9) The rehabilitation and enhancement of the publicly owned fish and shellfish resources are desirable applications of aquaculture technology as a means to insure the general public benefits to be derived from the utilization of these common property resources.

(10) Aquaculture in the United States has traditionally been concentrated on a few species, but many other aquatic species have a potential for commercial culturing and other uses. While many scientific and technological problems are unsolved, there is sufficient knowledge to further the development of aquaculture production systems for additional species of fish, shellfish, and plants. The Congress recognizes the importance of developing aquaculture of both plant and animal species.

(11) The application of aquaculture technology offers opportunities for the recovery of wasted thermal energy, nutrients, and other resources.

(12) Water areas, whether fresh, brackish, or marine, which are suitable for aquaculture are, in many cases, underutilized, and their total acreage is diminishing as such areas are put to other uses or destroyed.

(13) In those areas of the United States which are suitable for aquaculture but have land-use or water-use management policies that may inhibit the development of aquaculture facilities, consideration should be given to changing those policies so that aquaculture will be considered along with the other possible uses of such areas.

(14) The development of aquaculture in the United States has been inhibited by many economic, legal, and production factors; these include inadequate credit, diffused legal jurisdiction, lack of management information for such stocks as are available, or the lack of reliable supplies of seed stock.

(15) Government programs that help to reduce the risks associated with production of agricultural commodities have not been generally available to producers of aquatic species.

(16) Current efforts to develop aquaculture in the United States are numerous but sometimes diffuse; a strong commitment by the Federal Government will bolster and consolidate these efforts and make aquaculture more viable, thereby stimulating private and public investment and development.

(17) As with agriculture, much knowledge and many initiatives for aquaculture development exist at the State and local levels and should be used to assist any Federal effort in fostering cooperation between individuals and institutions to improve the aquaculture industry.

(18) The principal responsibility for aquaculture development in the United States must rest with the private sector.

PURPOSE

SEC. 3. It is the purpose of this Act to promote aquaculture in the United States by—

(1) declaring a national aquaculture policy;

(2) establishing and implementing a national plan for aquaculture; and

(3) developing programs and encouraging activities, in both the public and private sectors of the economy;

which will result in increased aquaculture, the coordination of domestic aquaculture efforts, the conservation and enhancement of aquatic resources, the creation of new industries and job opportunities, and other national benefits.

DEFINITIONS

SEC. 4. As used in this Act, unless the context otherwise requires—

(1) The term "aquaculture" means the propagation and rearing of aquatic species in controlled or selected environments, including ocean ranching, but not including private ocean ranching of Pacific salmon for profit.

(2) The term "aquaculture facility" means any land, structure, or other appurtenance, if such land, structure, and appurtenance is located within the United States and is used for aquaculture. Such term includes, but is not limited to, any laboratory, hatchery, rearing pond, raceway, pen, incubator, or other equipment.

(3) The term "aquatic species" means any natural species, native or introduced, or any variety of species produced by selective reproduction of finfish, mollusk, or crustacean or other aquatic invertebrate, amphibian, reptile, or aquatic plant.

(4) The term "person" means any individual who is a citizen or national of the United States and any corporation, partnership, association, Indian tribe or other entity (including, but not limited to, any community development corporation, producer cooperative, or fishermen's cooperative) organized or existing under the laws of any State.

(5) The term "Director" means the Director of the Office of Science and Technology Policy as established by the National Science and Technology Policy Organization and Priorities Act of 1976.

(6) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, the Commonwealth of the Marianas, the Trust Territory of the Pacific Islands, and any other commonwealth, territory, or possession of the United States.

(7) The term "United States", when used in a geographical context, means all States.

(8) The term "Fund" means the Federal Aquaculture Assistance Fund established by section 13.

NATIONAL AQUACULTURE POLICY

SEC. 5. The Congress finds and declares that aquaculture has the potential for augmenting existing commercial and recreational fisheries and producing other renewable resources, thereby assisting the United States in meeting its future food needs and contributing to the solution of world resource problems. It is, therefore, in the national interest, and it is the national policy, to encourage the development of aquaculture in the United States.

AQUACULTURE ASSESSMENT AND NATIONAL AQUACULTURE DEVELOPMENT PLAN

SEC. 6. (a) Within one year after the date of enactment of this Act, the Director in cooperation with the Secretary of Agriculture, Secretary of Commerce, the Secretary of the Interior, other Federal departments or agencies, State aquaculture agencies (designated as provided in section 7), and appropriate Regional Fishery Management Councils established under section 302 of the Fishery Conservation and Management Act of 1976 shall make a comprehensive assessment of aquaculture in the United States and shall by regulation establish a National Aquaculture Development Plan (hereinafter in this Act referred to as the "Plan").

(b)(1) The Director shall give interested persons an opportunity to participate in the development and establishment of the Plan in accordance with the provisions of section 553 of title 5, United States Code.

(2) The Secretaries of Agriculture, Commerce and the Interior, shall provide such clerical assistance and staff personnel as may be required by the Director to carry out the provisions of this section.

(3) At the earliest possible time in the development of the Plan, the Director shall hold public hearings; the number and location of such hearings shall be determined on the basis of the following criteria:

(A) geographical proximity of States to one another;

(B) similarity of States in aquacultural activities and potential; and

(C) other relevant factors.

(c) The assessment of aquaculture in the United States required to be made under subsection (a) shall include—

(1) a complete profile of the United States aquaculture industry as to incidence, size, and status of commercial aquaculture enterprises;

(2) identification of private and public institutions and organizations involved in aquacultural research, extension, credit, and market development;

(3) identification of the various aquatic species currently being cultured and a description of the status of commercial development with respect to each such species;

(4) to the extent possible, identification of aquacultural production regions, species, and markets that have significant potential for development;

(5) a catalog and description of all Federal programs and activities which directly or indirectly encourage, support, or assist aquaculture;

(6) a consideration of the need and appropriateness of designating a single Federal lead agency for all matters relating to aquaculture;

(7) identification of legal, regulatory, economic, physical, and social constraints which inhibit the development of aquaculture in the United States;

(8) a determination of the adequacy of Federal guarantees for loans for the construction, repair, expansion, or improvement of aquaculture facilities, disaster loans for persons engaged in aquaculture, and property and stock insurance for aquaculture facilities; and

(9) exposition of the major policy issues which need to be addressed by the Plan and the presentation of policy alternatives in a manner that will facilitate both the formulation and implementation of the Plan.

(d) The Director shall submit a report with respect to the status of aquaculture in the United States to the President and the Congress upon completion of the assessment referred to in subsection (a), but in no event more than 12 months following the date of enactment of this Act.

(e) The Director shall use such assessment as a basis for developing the Plan which shall consist of a series of development pro-

grams for those aquatic species which the Director determines to have a potential for culturing on a commercial or other basis.

(f) The Plan shall set forth those actions which the Director determines should be undertaken, and the period of time within which each action should be completed, with respect to—

(1) the implementation of each development program, including such research and development, technical assistance, demonstration, extension education, and training as may be necessary and appropriate with regard to—

(A) aquaculture facility design and operation;

(B) water quality management;

(C) utilization of waste products (including thermal effluents);

(D) nutrition and the development of economical feeds;

(E) life history, behavior, genetics, psychology, pathology, and disease control (including research regarding organisms which may not be harmful to fish and shellfish but are injurious to humans);

(F) processing and market development;

(G) production management and quality control; and

(H) the development of adequate supplies of seed stock;

(2) research with regard to the effect of acquaculture on estuarine and other water areas, and with regard to the management of such areas for aquaculture;

(3) the identification and analysis of any legal or regulatory constraints which may affect a development program;

(4) the construction, purchase, lease, or acquisition of necessary developmental aquaculture facilities; and

(5) such other actions relating to research and development, technical assistance, demonstration, extension education, and training as the Director deems necessary and appropriate.

(g) The Plan shall include the allocation of funds appropriated pursuant to section 14, in such amounts as the Director deems appropriate, to the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior for implementation of the aquaculture development programs under the respective jurisdictions of such Secretaries.

(h) In preparing an aquaculture development program and in reviewing any such program pursuant to subsection (j), the Director shall, to the extent practicable, take into account any significant action which has been, or which is proposed to be, undertaken by any other Federal agency, any State agency, or any person, and which may affect the accomplishment of the program.

(i) Each action under each aquaculture development program prepared under this section shall be implemented, either individually, jointly, or collectively, by the Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior, as specified by the Director in the program. The Director shall determine which Secretary or Secretaries are to have responsibility for implementing any such action on the basis of—

(1) the responsibilities conferred on the respective Secretaries by law or any executive action having the effect of law (including, but not limited to, Reorganization Plan Numbered 4 of 1970); and

(2) the experience, expertise, and other appropriate resources which each department may have with respect to the action required under the program.

(j) The Plan shall provide a mechanism for its revision, following review on a biennial basis to determine—

(A) if there are any aquatic species not currently identified in the Plan that have potential for aquaculture; and

(B) whether the actions specified in the Plan are being accomplished on a successful and timely basis.

(k)(1) The Director, in consultation with the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior, shall establish and appoint an advisory committee to assist in the assessment and in the development of the Plan.

(2) The Advisory Committee shall consist of fifteen members who shall not be employees of the Federal Government, and at least eight of such members (of whom at least one shall be from each area over which each Regional Fishery Management Council has authority) shall be engaged in private aquaculture enterprises.

(3) The members of the committee, while away from their homes or regular places of business in the performance of services for the committee, shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the government service are allowed expenses under section 5703 of title 5 of the United States Code.

STATE AQUACULTURE AGENCIES

SEC. 7. (a) Any State wishing to participate in any national aquaculture development program pursuant to section 10 or 11 and authorized under this Act shall designate a single agency of such State to carry out such program in such State.

(b) Any State wishing to participate in the formulation of the Plan, as provided in section 6, but wishing to defer designation of an aquaculture agency for the State, may designate an aquaculture planning agency for the State as an interim measure.

(c) Any grants made to, or contracts entered into with, an agency of a State, or any agency of any political subdivision of a State, pursuant to section 10, shall be made only with the approval of the aquaculture agency designated for such State, and such approval shall be an indication to the Federal sponsor of compliance with all State and local regulations that apply to that action.

(d) The Director shall inform the Governors of all the States about the provisions of this section and shall consult as he determines appropriate with representatives of the State aquaculture agencies during the development of the Plan.

FUNCTIONS AND POWERS

SEC. 8. (a) In implementing the aquaculture development program prepared under section 6 for any aquatic species, the Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior, as the case may be, shall—

(1) provide advisory, educational, and technical assistance (including training) with respect to aquaculture of such species to interested public and private organizations and individuals, but in providing such assistance, shall, to the maximum extent practicable, avoid duplication of similar assistance provided by other Federal or State agencies;

(2) consult and cooperate with interested persons, Federal, State, and local government agencies, regional commissions, educational institutions, and Indian tribes regarding the development of aquaculture technology;

(3) prescribe such regulations as may be necessary to carry out such a program; and

(4) encourage the implementation of aquaculture technology in the rehabilitation and enhancement of the publicly owned fish and shellfish stocks, as well as in the promotion of private commercial aquaculture enterprises.

(b) In implementing any aquaculture development program, the Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior, as the case may be, may—

(1) conduct scale tests of any aquaculture system for the purposes of assessing the biological and economic feasibility of the system;

(2) produce, under the authority of section 11, and sell at cost seed stock for commercial aquatic species when privately produced seed stock is unavailable, unreliable, or insufficient in quantity to meet production needs;

(3) develop methods to enhance aquatic species stocks by aquaculture;

(4) carry out such studies and research with respect to aquatic species as may be appropriate regardless of whether such species is or has been identified as a commercial species; and

(5) conduct such other tests or analyses or take such other actions as such Secretary deems necessary and appropriate.

(c) In addition to carrying out such other functions as are required under this Act, the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior shall jointly—

(1) establish and maintain an aquaculture information center which shall function as a national clearinghouse for the collection, selection, analysis, and dissemination of scientific, technical, legal, and economic information relating to each aquaculture development program which is their individual, joint, or collective responsibility;

(2) conduct appropriate surveys, in coordination with other agencies, of public and private aquaculture being carried out in the United States for the purpose of acquiring information on acreages, water use, production, culture techniques, and other relevant matters;

(3) arrange for the mutual exchange of information relating to aquaculture with foreign nations; and

(4) conduct a continuing study to determine whether existing capture fisheries could be adversely impacted by competition from products produced by commercial aquaculture enterprises significantly aided under this Act, and include in such study (A) an assessment of the economic impact by species and by geographical region on such fisheries, and (B) recommended measures to ameliorate any adverse impact.

The Secretaries named above shall report to Congress on the findings made under the study provided for under clause (4) in the biennium status report required by section 9(b)(4).

(d) Any production information submitted under clause (2) of subsection (c) to the Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior by any person shall be confidential and shall not be disclosed except to each other or to the advisory committee which may be appointed under section 6(k) or when required under court order. The Secretaries named in the preceding sentence shall by regulation prescribe such procedures as may be necessary to preserve such confidentiality, except that such Secretaries may release or make public any such information in any aggregate or summary form which does not directly or indirectly disclose the identity or business of any person who submits such information.

(e)(1) The Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior are each authorized to accept any gift, temporary donation, or devise or bequest of real or personal property, or the proceeds from the sale or other disposition of such property or interests therein, for use in carrying out any function that such Secretary may have under this Act. Any such acceptance may be subject to the terms of any restrictive or affirmative convenant, or condition of servitude, if such terms are deemed by the Secretary concerned to be in accordance with law and compatible with the purpose for which acceptance is sought.

(2) Any gift or bequest of money, and proceeds from the sale of other property received as a gift or bequest under this subsection, shall be deposited in a separate account in the Treasury and shall be dis-

bursed upon the order of the Secretary concerned.

COORDINATION OF NATIONAL ACTIVITIES REGARDING AQUACULTURE

SEC. 9. (a) There is established the Interagency Aquaculture Coordinating Committee (hereafter in this section referred to as the "Committee") which shall be composed of the following representatives or their designees:

(1) The Director of the Office of Science and Technology who shall be the Chairman of the Committee unless, after the Plan is established, the President wishes to designate some other official as Chairman.

(2) The Secretary of Agriculture.

(3) The Secretary of Commerce.

(4) The Secretary of the Interior.

(5) The Secretary of Energy.

(6) The Administrator of the Environmental Protection Agency.

(7) The Chief of Engineers.

(8) The Commissioner of the Food and Drug Administration.

(9) The Assistant Secretary of Labor for Occupational Safety and Health.

(10) The Administrator of the Small Business Administration.

(11) The Governor of the Farm Credit Administration.

(12) At least five representatives to be appointed by the Chairman of the Committee from the various State aquaculture agencies designated pursuant to section 7.

(b) The functions of the Committee shall be—

(1) to insure that there is a continuing exchange of information among the agencies represented on the Committee with respect to the nature and status of the programs or projects being carried out by such agencies which relate, or which may relate, to aquaculture in general or to the implementation of the Plan;

(2) to review on a continuing basis the relevant programs and projects of all Federal agencies to determine whether such programs are being carried out in compliance with subsection (c); and

(3) to insure that the aquaculture information center established under section 8(c)(1) is functioning in conformance with the policy expressed in section 5.

(4) to submit biennium report to Congress on the status of aquaculture in the United States; included in that report shall be an explanation of any revision to the plan made pursuant to section 6(j); the first such biennium report shall be completed two years from the date of submission to Congress of the Director's report as specified in section 6 (d).

(c) Each Federal agency which has any function or responsibility with respect to aquaculture or has jurisdiction over any activity which affects, or may affect, the achievement of the purposes of this Act, shall, in consultation with the Committee and to the maximum extent practicable, carry out such function, responsibility, and activity in a manner which is consistent with the purposes of this Act.

(d) Nothing in this Act shall be construed to amend, repeal, or otherwise modify the authority of any Federal officer or any Federal agency to carry out any functions relating to aquaculture which are authorized under any other provision of law.

CONTRACTS AND GRANTS

SEC. 10. (a) The Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior may carry out any function of this Act, other than demonstration projects undertaken pursuant to section 11, relating to any aquaculture development program which such Secretary is directed to implement under the Plan, through grants to, or contracts with, any other Federal agency, any agency of any State, any agency of any political subdivision of a State, any Indian tribe, any regional commission, any educational institution, or any person.

(b) Any contract entered into, or any grant made, under authority of subsection (a) shall contain such conditions and limitations as the Secretary concerned shall by regulation prescribe as being necessary and appropriate to protect the interests of the United States; except that no such contract may be entered into, and no such grant may be made which is in violation of any applicable State or local law.

(c) The amount of any grant made under authority of subsection (a) may not exceed an amount equal to one-half the estimated cost of the project for which the grant is made.

(d) Any State agency, any political subdivision of a State, or any person who receives a grant or contract under this section shall make available to the Secretary concerned and to the Comptroller General of the United States, for purposes of audit and examination, any book, documents, papers, and records that are pertinent to the funds received by such agency, political subdivision, or person under such grant or contract.

SEC. 11. (a) In order to promote the development of aquaculture the Secretaries of Agriculture, Commerce and the Interior are authorized jointly to distribute funds to promote the establishment and operation of aquaculture demonstration projects within each state which has established a State aquaculture agency pursuant to section 7 of this Act, and to carry out the activities described in subsections (b) (c) (d) and (e). Upon a determination by the Secretaries that a proposed demonstration project (1) demonstrates phases of aquaculture which are useful and beneficial to the State and aquaculture producers, and (2) is not duplicative of demonstration projects in the State or region involved, such funds shall be distributed, in the case of any State, to one or more of the following: the State aquaculture agency of such State, the State cooperative extension service of such State, the State agricultural experiment station of such State, and any university of such State eligible to receive funds under the Sea Grant program. The amount of funds distributed in any State for any demonstration project may not exceed an amount equal to one-half the estimated cost of such project.

(b) The recipient in any State of any funds distributed under subsection (a) shall:

(1) establish at least one aquaculture demonstration project which is located within the State;

(2) sell the products of the demonstration project established under clause (1) and pay to the United States that portion of the proceeds as the grants under this section bear to the total cost of operating the project;

(3) provide tours of the demonstration project to aquaculture producers and other interested groups and individuals and, upon request, provide such producer groups and individuals with information concerning the operation of the project;

(4) determine the total income and the total cost of the project; and

(5) annually compile a report concerning income, costs, operating difficulties, and producer interest with respect to the demonstration project, and submit the report to the Secretaries concerned along with any recommendations concerning project changes.

The production of seed stock shall be a permissible demonstration project.

(c) The results obtained from each demonstration project carried out under this section which prove economically practical shall be extended to aquaculture producers in each State through the State cooperative extension service of each State as part of the ongoing education programs of such service.

(d) A Fund shall be established in the Treasury of the United States for the deposit of funds paid to the United States, under subsection (b)(2) and such funds shall be available without fiscal year limitation for use in carrying out the provisions of this section.

(e) Two or more States may cooperate in the designation of a regional project, in which event the sums assignable to all the cooperating States shall be paid to the agency or institution responsible for the operation of the demonstration project.

GUARANTEES OF OBLIGATIONS ISSUED FOR AQUACULTURE FACILITIES

SEC. 12. (a)(1) The Secretary of Agriculture, Secretary of Commerce, and Secretary of the Interior (further reference in this section to the "Secretary" shall mean the Secretary concerned) may, subject to the provisions of this section, guarantee, or make a commitment to guarantee, the payment of interest on, and the principal amount of, any obligation issued by an obligor for any of the following purposes:

(A) The financing of the construction, reconstruction, or reconditioning of any aquaculture facility (including the financing of the purchase cost of any aquaculture facility to be reconstructed or reconditioned); except that no obligation may be guaranteed under this section later than 2 years after the date of the completion of the construction, reconstruction, or reconditioning of the aquaculture facility involved.

(B) The acquisition of stocks of aquatic species in all stages of development necessary to initiate any aquaculture facility.

(C) The financing of the initial operating expenses of any aquaculture facility.

(D) The financing or marketing operations exclusively for aquaculture products.

(E) The refinancing of any existing obligation issued for any of the purposes specified in subparagraph (A), (B), (C), or (D), whether or not guaranteed under this section, including, but not limited to, any short-term obligation incurred for the purpose of obtaining temporary funds for refinancing. Guarantees and commitments to guarantee may be made under this section without regard to section 3679(a) of the Revised Statutes of the United States (931 U.S.C. 665(a)).

(2) The full faith and credit of the United States is pledged to the payment of all guarantees made under this section with respect to both principal and interest, including any interest, if provided for in the guarantee, which may accrue between the date of default under a guaranteed obligation and the payment in full of the guarantee.

(3) Any guarantee, or commitment to guarantee, made by the Secretary under this section shall be conclusive evidence of the eligibility of the obligation for such guarantee, and the validity of any guarantee, or commitment of guarantee, so made shall be incontestable.

(4) The aggregate unpaid principal amount of all obligations guaranteed under this section and outstanding at any one time shall not exceed $100,000,000.

(b)(1) Obligations guaranteed under this section—

(A) shall have an obligor approved by the Secretary as being responsible and possessing the ability, experience, financial resources, and other qualifications necessary for the adequate operation and maintenance of the aquaculture facilities;

(B) shall be in an aggregate principal amount which does not exceed 90 percent of the obligation involved;

(C) shall have maturity dates satisfactory to the Secretary, but not to exceed 25 years;

(D) shall provide for payments by the obligor satisfactory to the Secretary; and

(E) shall bear interest (exclusive of charges for the guarantee and service charges, if any) at rates not to exceed such percentage per annum on the unpaid principal as the Secretary determines to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the Secretary.

(2) In guaranteeing any obligation under this section, the Secretary shall give preference to any person with 40 or fewer employees who, together with his affiliates, is primarily engaged in the business of aquaculture or commercial harvesting or gathering of aquatic species.

(3) No obligation shall be guaranteed under this section unless the obligor conveys or agrees to convey to the Secretary such security interest as the Secretary may require to reasonably protect the interests of the United States.

(c)(1) The Secreary may charge a fee for any obligation guaranteed under this section, the amount of which shall be established by the Secretary by regulation but which may not exceed one-half of 1 percent per annum of the outstanding principal balance of the obligation. Fee payments shall be made by the obligor to the Secretary when moneys are first advanced under a guaranteed obligation and at least 60 days before each anniversary date thereafter.

(2) The Secretary shall charge and collect from the obligor such amounts as he may deem reasonable for the investigation of the application for any guarantee, for the appraisal of properties offered as security for any guarantee, and for the inspection of such properties during construction, reconstruction, or reconditioning; except that such charges shall not aggregate more than one-half of 1 percent of the original principal amount of the obligation to be guaranteed.

(3) All fees and other amounts received by the Secretary under the provisions of this subsection shall be deposited in the Fund.

(4) Obligations guaranteed under this section, and agreements relating thereto, shall contain such other provisions with respect to the protection of the security interests of the United States (including acceleration and subrogation, provisions and the issuance of notes by the obligor to the Secretary), liens and releases of liens, payments of taxes, and such other matters as the Secretary may prescribe.

(d)(1) In the event of a default, which has continued for 90 days, in any payment by the obligor of principal or interest due under any obligation guaranteed under this section, the obligee or his agent shall have the right to demand, at or before the expiration of such period as may be specified in the guarantee or related agreements, but not later than 180 days from the date of such default, payment by the Secretary of the unpaid principal amount of said obligation. Within such period as may be specified in the guarantee or related agreements, but not later than 30 days from the date of such demand, the Secretary shall promptly pay to the obligee or his agent the unpaid principal amount of the obligation and unpaid interest thereon to the date of payment; except that the Secretary shall not be required to make such payment if before the expiration of such period he finds that there was no default by the obligor in the payment of principal or interest or that such default has been remedied before any such demand.

(2) Payments required to be made by the Secretary under paragraph (1) shall be made by the Secretary from the Fund.

(3) In the event of any payment by the Secretary under paragraph (1); the Secretary shall have all rights in any security held by him relating to his guarantee of such obligations as are conferred upon him under any security agreement with the obligor. Notwithstanding any other provision of law relating to the acquisition, handling, or disposal of property by the United States, the Secretary may, under such terms and conditions as the Secretary prescribes or approves, complete, recondition, reconstruct, renovate, repair, maintain, operate, or sell any property acquired by him pursuant to a security agreement with the obligor.

(4) After any default referred to in paragraph (1), the Secretary shall take such action against the obligor or any other parties liable thereunder that, in his discretion, may be required to protect the interests of the United States. Any suit may be brought in the name of the United States or in the name of the obligee and the obligee shall make available to the United States all records and evidence necessary to prosecute any such suit. The Secretary may accept a conveyance of title to and possession of property from the obligor or other parties liable to the Secretary and may purchase the property for an amount not greater than the unpaid principal amount of such obligation and interest thereon. In the event the Secretary receives through the sale of property an amount of cash in excess of any payment made to an obligee under paragraph (1) and the expenses of collection of such amounts, he shall pay such excess to the obligor.

(5) Whoever, for the purpose of obtaining any loan or advance of credit from any person with the intent that an obligation relating to such loan or advance of credit shall be offered to or accepted by the Secretary to be guaranteed, or for the purpose of obtaining any extension or renewal of any loan, advance of credit, or mortgage relating to an obligation guaranteed by the Secretary, or the acceptance, release, or substitution of any security on such a loan, advance of credit, or for the purpose of influencing in any way the action of the Secretary under this section, makes, passes, utters, or publishes, or causes to be made, passed, uttered, or published any statement, knowing the same to be false, or alters, forges, or counterfeits, or causes or procures to be altered, forged, or counterfeited, any instrument, paper, or document, or utters, publishes, or passes as true, or causes to be uttered, published, or passed as true, any instrument, paper, or document, knowing it to have been altered, forged, or counterfeited, or willfully overvalues any security, asset, or income shall be punished by a fine of not more than $5,000, or by imprisonment for not more than 2 years, or both.

(e) The Secretary of Commerce shall promulgate such rules and regulations as may be deemed necessary or appropriate to carry out the purposes and provisions of this section.

(f) For purposes of this section—

(1) The term "actual cost" of an aquaculture facility, as of any specified date, means the aggregate, as determined by the Secretary, of—

(A) all amounts paid by, or for the account of the obligor with respect to such facility on or before that date; and

(B) all amounts which the obligor is then obligated to pay from time to time thereafter, for the construction, reconstruction, or reconditioning of such facility.

(2) The terms "construction", "reconstruction", or "reconditioning" include, but are not limited to, designing, inspecting, outfitting, and equipping of the aquaculture facility involved.

(3) The term "depreciated actual cost" means the actual cost depreciated on a straightline basis over the useful life of the property involved as determined by the Secretary.

(4) The term "obligation" means any note, bond, debenture, or other evidence of indebtedness issued for one of the purposes specified in subsection (a).

(5) The term "obligee" means the holder of any obligation.

(6) The term "obligor" means any person primarily liable for payment of the principal of or interest on any obligation.

FEDERAL AQUACULTURE ASSISTANCE FUND

SEC. 13. (a) There is established in the Treasury of the United States a Federal Aquaculture Assistance Fund. The fund shall be available to the Secretary as a revolving fund for the purpose of carrying out, and administering, sections 11 and 12. The Fund shall consist of—

(1) any sums appropriated to the Fund;

(2) any fees received by the Secretary of Agriculture, the Secretary of Commerce, or the Secretary of the Interior from the sale of products from demonstration projects as provided in section 11;

(3) any fees received by the Secretary of Commerce in connection with any guarantee made under section 12;

(4) recoveries and receipts received by the Secretary of Commerce under security, subrogation, and other rights and authorities under section 12.

All payments made by the Secretary to carry out the provisions of section 12 (including reimbursements to other Government accounts) shall be paid from the Fund, only to the extent provided in appropriate Acts. Sums in the Fund which are not currently needed for the purposes of section 11 or section 12 shall be kept on deposit or invested in obligations of or guaranteed by, the United States.

(b) If at any time the moneys in the Fund are not sufficient to pay any amount the Secretary is obligated to pay under section 12, the Secretary shall issue to the Secretary of the Treasury notes or other obligations (only to such extent and in such amounts as may be provided for in appropriation Acts) in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury prescribes. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of such notes or other obligations. The Secretary of the Treasury shall purchase any notes and other obligations to be issued hereunder and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under such Act, as amended, are extended to include any purchases of such notes and obligations. The Secretary of the Treasury at any time may sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States. Moneys borrowed under this subsection shall be deposited in the Fund and redemptions of such notes and obligations shall be made by the Secretary from the Fund.

SEC. 14. AUTHORIZATION OF APPROPRIATIONS—

(a)(1) For purposes of carrying out the provisions of this Act there are authorized to be appropriated, notwithstanding any authorization for appropriations in any other Act in effect before the date of the enactment of this Act:

(A) $10,000,000 for the fiscal year 1980;

(B) $20,000,000 for the fiscal year 1981; and

(C) $30,000,000 for the fiscal year 1982.

(2) The authorization for the fiscal year 1980 is not to exceed:

(A) $4,000,000 to the Department of Agriculture;

(B) $4,000,000 to the Department of Commerce;

(C) $2,000,000 to the Department of the Interior.

(3) The authorization for the fiscal year 1981 and the fiscal year 1982 shall be allocated as provided in section 6(g).

(4) Not less than 50 percent of the funds authorized to be appropriated to the departments shall be used for the purposes of section 10 and section 11; and of such funds three per centum shall be available to the department for administrative purposes.

(b) There are authorized to be appropriated, without fiscal year limitation, to the Fund such sums as may be necessary and appropriate for purposes of carrying out section 12; but not to exceed $100,000,000.

EFFECTIVE DATE

SEC. 15. This Act shall take effect October 1, 1978.●

● Mr. STONE. Mr. President, I wish to commend my colleague from Hawaii for developing the National Aquaculture Policy Act of 1978 and to express by support as a cosponsor. Earlier this year Senator INOUYE cosponsored the aquaculture bill that I introduced, S. 2218, because of his interest and support of aquaculture. Today, I am joining in his National Aquaculture Policy Act of 1978 because of my firm belief in the future and importance of aquaculture in our country and the world.

Many of us have recognized the unrealized potential of aquaculture and have devoted significant time in looking for the best way to stimulate the development of this industry. We all want to see the potential of aquaculture reach its fulfillment as a food source and as an economic enterprise.

It was with this objective that Senator INOUYE's bill was developed by his staff in cooperation with the staff of the Agriculture Committee, and the staff of the Commerce Committee. It is a compromise statement, but I think it is more than a compromise. The bill is larger than the sum of its parts. It keeps the best of the pending proposals, and eliminates most of the stress factors.

I believe this bill provides a means for us to coordinate our Federal activities without impinging upon existing activities or interests of various departments or agencies. In addition, this bill emphasizes involvement by the States and public in the development of an aquaculture policy for America.

The proposed legislation incorporates grant, contract, and loan authorities, but keeps accountability at a high level. Perhaps most importantly it provides for demonstration projects—a time tested technique we have seen used effectively in agriculture. These demonstration projects in the various States or regions will be able to demonstrate the viability of the industry and the feasibility of aquaculture to the people who count—those on the ground.

Mr. President, the various legislative proposals that have been brought forth all share one common objective—to give leadership, encouragement, and strength to America's aquaculture industry. This is an infant industry but an industry with great potential. I join with my colleague Senator INOUYE, in the hope that this legislative initiative will be able to cut through the morass of narrow interests so we can achieve our common objective.

This bill recognizes the many segments of the industry. I believe we can all support it knowing that it will not detract in any regard from any program, or any interest. Rather, it will lend support and strength to all as well as get on with the job of developing aquaculture in America.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the bill introduced by the Senator from Hawaii (Mr. INOUYE), for himself, Mr. GRAVEL and Mr. STONE, relative to acquaculture, be referred jointly to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Commerce, Science, and Transportation.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. BIDEN:

S. 3409. A bill to establish a program of grants to States and units of local government which have established property tax relief programs; to the Committee on Governmental Affairs.

REAL PROPERTY TAX REDUCTION ACT OF 1978

● Mr. BIDEN. Mr. President, I am introducing today a bill that will provide Federal incentives to State and local governments to ease the ever-increasing burden of the real property tax upon their citizens.

In recent years, States, and to an even greater degree, local governments and school districts, have been forced to rely more heavily on the real property tax. Local governments, faced by soaring costs as a result of inflation, but in many cases, with property tax bases still eroded from the recession, have been forced to increase their property taxes in an ever upward spiral.

"Tax revolts" are an integral part of American history. There is a new tax revolt with us today, in modern form. It is the increasing dissatisfaction with the property tax. People feel not only that it is too high, but also that it is inequitable. In a recent survey taken in Delaware, when people were asked whether—if necessary to continue essential State services—they favored an increase in income taxes, a sales tax, or a statewide property tax, only 16 percent opted for the property tax. Yet on the local level particularly, the property tax is the only major revenue source for providing essential local services.

One usually thinks of the homeowner as bearing the burden of property taxation. The fact is that many of the people who can least afford it pay property taxes through their rent, as the owner passes along tax increases in the rent he charges. Thus no one is immune from the burden which this tax imposes and which together with inflation eats away at the money needed for subsistence.

Last year, property tax relief was enacted in one form or another in 23 States. But such relief is essentially hit or miss and that does not begin to take care of the problem. Based on 1974 figures, average relief from circuit-breaker programs nationally provided tax relief benefits of only $143 per participant. While this has undoubtedly risen some, so have property taxes as the following figures show.

In the decade from 1966 to 1976, State and local property taxes have climbed at an amazing rate of 131 percent. Total revenues from property taxes in 1976 were $57 billion, a staggering sum that is about half of all Federal collections from the individual income tax. The per capita real property tax burden grew from $135 per capita to $266 in the decade.

The two groups often hit the hardest are the elderly who live on fixed incomes in these inflationary times and families of modest incomes seeking to raise and educate a family. In particular, the elderly find that the property tax can threaten a secure future in their own home, no matter how carefully that future was planned. For modest income families it is a barrier to a reasonable standard of living and to our national goal of a decent home for every family.

This reliance on the property tax places a strain on local governments which are the backbone of our Federal structure of our Government. In some ways, the Federal Government, by virtually monopolizing the income tax, has forced this reliance on property taxes. The Federal Government has an obligation to help ease the burden on those unable to bear it and, in fact is in a unique position to do so. However, its help must leave the flexibility to local governments to plan their finances to meet local needs.

The bill I am introducing today is broad in scope and nature. It seeks to give maximum flexibility to State and local governments in designing a program of real property tax relief to homeowners and renters to meet the specific problems or needs of their locality. The bill provides for a Federal grant equal to half of the tax relief granted under the tax relief program, but with maximum amounts per property to assure that reasonable levels of relief are observed. The program can cover property tax relief to homeowners, or renters, or both. Tax relief must be related to income to qualify, but the specific relationships are left to each locality to determine based on local conditions. Finally, to assure fiscal soundness, there is a limit on the total Federal funds to be given to any State based on a per capita amount.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3409

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Real Property Tax Reduction Act of 1978".

FINDING AND PURPOSE

SEC. 2. (a) The Congress finds and declares that—

(1) real property taxes represent an es-

sential source of revenue to State and local governments;

(2) increasing reliance on real property taxation to provide revenue for the support of public services places a heavy burden on many individuals, particularly the elderly and families of low and moderate income;

(3) it is important that the impact of real property taxation be made more equitable for local taxpayers;

(4) preserving the strength and equity of State and local revenue sources is important to a strong Federal system of government;

(5) the Federal Government is in a unique position to take action to encourage State and local governments to both strengthen and equalize the impact of real property taxation; and

(6) any action by the Federal Government to deal with the impact of real property taxation should encourage State and local governments to work out solutions best suited to the circumstances of each individual State and local government.

(b) It is the purpose of this Act to—

(1) encourage the establishment and maintenance of strong and equitable State and local revenue systems;

(2) provide financial assistance to State and local governments which provide tax relief to individuals upon whom real property taxes place the greatest burden;

(3) provide a flexible system of Federal financial assistance so that each State and local government can design a system for property tax relief best suited to the needs of its citizens;

(4) encourage State and local governments to establish property tax relief programs for the elderly, families of low and moderate income, and tenants who pay property taxes as a part of their rent; and

(5) lessen the reliance of State and local governments on real property taxes as a means of support for public services.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) the term "eligible person" means an individual who owns or rents his principal residence;

(2) the term "eligible program" or "eligible program of real property tax relief" means a program established under the laws of a State or local government which provides relief from State or local property taxes for eligible persons in accordance with the provisions of section 5;

(3) the term "household income" means the aggregate annual income, without regard to source or taxable status, of an eligible person and all other individuals occupying as their primary residence the same household as the eligible person;

(4) the term "personal income tax" means a tax imposed by a State or local government on the income of individuals;

(5) the term "real property tax" means an ad valorem tax imposed on real estate by a State or local government;

(6) the term "real property tax relief" includes—

(A) "direct real property tax relief", which means real property tax relief granted to an eligible person who owns his principal residence; and

(B) "indirect real property tax relief", which means real property tax relief granted to an eligible person who rents his principal residence;

(7) the term "Secretary" means the Secretary of the Treasury; and

(8) the term "State" means each State of the United States and the District of Columbia.

PAYMENTS TO STATES

SEC. 4. (a) The Secretary is authorized to make payments to State governments out of funds authorized under section 6, if he determines that a State or a unit of local government within a State has established a program of real property tax relief in accordance with section 5. Payments to a State under this section shall be used by that State in a program of property tax relief established in accordance with section 5 or for grants to units of local government within that State for use in property tax relief programs established in accordance with section 5.

(b)(1) Payments to any State under this section in any fiscal year shall not exceed an amount equal to the product of the population of that State multiplied by $10.

(2) In the case of direct property tax relief, payments under this section shall not exceed 50 percent of the total direct real property tax relief granted by any State or local government to each eligible person, up to a maximum payment of $375 per eligible person.

(3) In the case of indirect real property tax relief, the payments under this section shall not exceed 50 percent of the total indirect real property tax relief granted by any State or local government to each eligible person up to a maximum payment per eligible person of 12.5 percent of the annual rent paid by such eligible person or $375, whichever is less.

(c) In the case where two or more eligible persons reside in the same household and hold co-ownership or co-tenancy rights in their principal residence in the same calendar year, the amount of any payments to the State for such household shall be determined by treating all such persons as one eligible person in such calendar year.

(d) Payments under this section shall only be made for real property tax relief granted to an eligible person by a State or local government for the principal residence of that person.

(e)(1) Whenever a State government and units of local government within that State have established property tax relief programs in accordance with section 5, payments to the State under this section shall be apportioned among such property tax relief programs on the basis of (A) State law or (B) agreements between the State and the units of local government administering such local programs. In the absence of State law or any such agreement, payments under this section shall be determined solely on the basis of real property tax relief granted by the State to eligible persons.

(2) No State shall apportion any part of any payments made under this section to any unit of local government which has not established a real property tax relief program in accordance with section 5.

STATE AND LOCAL PROGRAMS FOR REAL PROPERTY TAX RELIEF

SEC. 5. (a) In order to receive payments under this Act, a State or unit of local government shall establish a program of real property tax relief which provides relief to eligible persons from State and local property taxes.

(b) Each state or unit of local government may select the mechanism by which real property tax may be granted in its eligible program from among—

(1) tax credits against personal income taxes;

(2) tax credits against real property taxes;

(3) refunds or rebates of real property taxes, or comparable cash payments; or

(4) such other mechanisms as the Secretary may prescribe by regulation.

(c) Each State or unit of local government may limit its eligible program to eligible persons within specified age groups, or may modify the real property tax relief provided for different age groups.

(d) An eligible program of a state or unit of local government shall provide that property tax relief shall be provided to an eligible person only if his real property taxes exceed a stated percentage of household income, using a sliding scale where the percentage increases as household income increases.

ADMINISTRATION

SEC. 6. (a) The Secretary shall promulgate such rules and regulations as may be necessary to carry out the provisions of this Act.

(b)(1) The Secretary may not make any payment under this Act to any State unless an application therefor has been submitted to and approved by the Secretary. Such application shall be submitted to the Secretary at such time, in such manner, and containing such information and assurances as the Secretary may by regulation prescribe. Such application shall contain an agreement by the State to provide the Secretary with such additional information, reports, and assurances as the Secretary finds necessary to carry out the provisions of this Act.

(2) If the Secretary disapproves the application of a State under this subsection, the State may take action to obtain judicial review of such action in accordance with the provisions of subsection (d).

(c) Whenever the Secretary, after reasonable notice and opportunity for hearing to the State finds that—

(1) the State or a unit of local government within the State for whom an application was approved under subsection (b) no longer has an eligible program; or

(2) there is a failure by the State or a unit of local government within the State to comply substantially with any regulations promulgated by the Secretary which are applicable to this Act,

the Secretary shall notify such State that further payments will not be made to the State under this Act until the Secretary is satisfied that the State or unit of local government has a program which meets the requirements of this section or until there will no longer be such failure to comply with such regulations. Until he is so satisfied, the Secretary shall make no further payment to the State under this Act.

(d)(1) If the Secretary disapproves the application of any State under subsection (b), or withholds payments from any State under subsection (c), such State may, within sixty days after notice of such action, file with the United States Court of Appeals for the circuit in which the State is located, a petition for review of such action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary. The Secretary thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

(2) The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive, except that the court, for good cause shown, may remand the case to the Secretary to take further evidence, and the Secretary may in such a case make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(3) The court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

AUTHORIZATION OF APPROPRIATIONS

SEC. 7. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.●

ADDITIONAL COSPONSORS

S. 2860

At the request of Mr. MELCHER, the Senator from New Mexico (Mr. SCHMITT)

was added as a cosponsor of S. 2860, the Solar Satellite Research, Development, and Demonstration Program Act of 1978.

S. 3007

At the request of Mr. DOLE, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 3007, a bill regarding certain changes to the treatment of individuals as employers.

AMENDMENTS SUBMITTED FOR PRINTING

DUTY ON POPPY STRAW CONCENTRATE—H.R. 3790

AMENDMENT NO. 3469

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an amendment intended to be proposed by him to H.R. 3790, an act to suspend until the close of June 30, 1980, the duty on concentrate of poppy straw used in producing codeine or morphine.

● Mr. LONG. Mr. President, prior to the Tax Reform Act of 1976, there was no specific rule relating to the allocation of a portion of the total consideration paid to acquire a sports franchise, including depreciable player contracts and other assets, such as nondepreciable franchise rights, which might be acquired at the time of acquisition of a franchise. Generally, this allocation was made on the basis of the estimated fair market values (or relative fair market values) of the various assets.

The 1976 act added a provision (section 1056 of the Internal Revenue Code) providing that, in the case of the sale, exchange, or other disposition of a sports franchise (or the creation of a new franchise), the amount of consideration allocated to a player contract by the transferee is not to exceed the sum of the adjusted basis of the contract in the hands of the transferor immediately before the transfer and the gain (if any) recognized by the transferor on the transfer of the player contract. Additionally, in the case of the sale or exchange of a sports franchise, it is presumed that not more than 50 percent of the consideration is allocable to player contracts unless the taxpayer can satisfy the IRS that under the facts and circumstances of the patricular case, it is proper to allocate an amount in excess of 50 percent. The provisions relating to the allocation of basis to player contracts applying to sales or exchanges of franchises after December 31, 1975, in taxable years ending after that date.

The committee amendment I am submiting today makes the basis allocation limitation rules inapplicable to a sale or exchange of a sports franchise before March 1, 1977 if, prior to December 31, 1975, the person who is the principal shareholder of the transferee at the time of the sale or exchange was committed to and did purchase more than 50 percent of the voting stock of the transferor. The committee believes that if such a commitment had been entered into prior to the effective date of the 1976 Act provision concerning acquisition of sports franchises and if the other conditions of the amendment had been met, it is appropriate to apply the transitional rule provided by the amendment.

The amendment would benefit Mr. William H. Sullivan, Jr., and the New England Patriots Football Club, Inc.●

REVOCATION OF ELECTION TO RECEIVE RETIRED PAY AS JUDGE OF TAX COURT—H.R. 8811

AMENDMENT NO. 3470

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an amendment intended to be proposed by him to H.R. 8811, an act to amend section 7447 of the Internal Revenue Code of 1954 with respect to the revocation of an election to receive retired pay as a judge of the Tax Court.

● Mr. LONG. Mr. President, the Tax Reform Act of 1976 excluded from an employee's income, for Federal income tax purposes, amounts contributed by an employer to a qualified group legal services plan for employees, as well as the value of any services received by an employee or any amounts paid to an employee under the plan as reimbursement for legal services for the employee, his spouse, or his dependents (section 120 of the Internal Revenue Code).

A question has arisen whether these excludible amounts should be subject to payroll taxes under the Federal Insurance Contributions Act (FICA) and the Federal Unemployment Tax Act (FUTA). The 1976 act did not expressly exclude these amounts from the definition of "wages" which are subject to FICA and FUTA payroll taxes.

The committee amendment I am submitting today provides that any contribution, payment, or service which is excludible from an employee's gross income under the qualified group legal services plan provisions also is to be excluded from "wages" for FICA and FUTA payroll tax purposes. The committee believes that it is consistent with the present law income tax exclusion, and the purposes of the legal services plan provisions, to extend the exclusion to cover FICA and FUTA payroll taxes.●

REVENUE LAW TIMING REQUIREMENTS—H.R. 7320.

AMENDMENT NO. 3471

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an amendment intended to be proposed by him to H.R. 7320, an act to revise miscellaneous timing requirements of the revenue laws, and for other purposes.

● Mr. LONG. Mr. President, under present law, Federal gift and estate taxes are imposed upon lifetime and death transfers by nonresident aliens with respect to property which is situated in the United States (sections 2501, 2511, and 2101–2108 of the Internal Revenue Code). For this purpose, nonresident aliens are allowed charitable deductions for transfers to domestic corporations which are organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes, but not for transfers to foreign charities (sections 2106(a)(2) and 2522(b)(2) of the code).

It has come to the Finance Committee's attention that the rule which allows gift and estate tax deductions to nonresident aliens only for transfers to a domestic charity creates a hardship in the special circumstances of the Foundation Josee et Rene de Chambrun. This foundation was created to preserve the home of General Lafayette, near Paris, along with his personal papers, belongings, and correspondence. Because the home of General Lafayette is located in France, it is not convenient for the foundation to be organized as a domestic corporation. However, the foundation, similar to many domestic charities, maintains prperty which is important to the history of this country. The foundation has qualified for income tax exemption in the United States.

In light of the special circumstances of this case, the committee has decided to allow deductions for Federal gift and estate tax purposes to Josee and Rene de Chambrun and their estates for transfers to the Foundation Josee et Rene de Chambrun to the same extent as if the Foundation were a domestic corporation.

The committee amendment would be effective for gifts made in calendar quarters, and for decedents dying, after the date of enactment.●

UNEMPLOYMENT COMPENSATION ELIGIBILITY PERIOD—H.R. 12380

AMENDMENT NO. 3472

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an amendment intended to be proposed by him to H.R. 12380, an act to amend the Federal-State Extended Unemployment Compensation Act of 1970, with respect to an individual's eligibility period for benefits under such act.

● Mr. LONG. Mr. President, I am submitting an amendment on behalf of the Committee on Finance to correct an anomalous situation which occurs in applying the social security retirement test to certain types of income from farming or from renewal commissions based on prior sales of insurance contracts. This amendment has been considered by the Committee on Finance, and the committee voted to direct that it be offered as and amendment to an appropriate House-passed bill. The amendment is necessary to correct an unintended result of the 1977 Social Security Amendments, which eliminated the monthly exception to the social security retirement test.

Under the former monthly exception, full social security benefits were payable for any month in which an individual had no significant employment or self-employment activity even if they would otherwise have been reduced because of his annual earnings. Without this monthly exception, some farmers and self-employed insurance agents will lose social security benefits even though they may be completely retired. This happens

because they technically are considered to have self-employment income on the basis of proceeds from crops produced in a year before retirement or from renewal commissions on insurance policies sold before retirement.

Under the social security program, benefits are payable not on the basis of individual need as measured by an income test but as a matter of social insurance payable in relation to prior earnings upon the occurrence of specified events (disability, death, retirement in old age). The purpose of the provision of the social security law under which benefits are reduced for earnings above a certain amount is to serve as a test of whether one of those events—retirement in old age—has, in fact, occurred. Since that provision is intended as a retirement test and not as a needs test, it is inappropriate to apply it in a manner which results in the reduction of benefits to persons who have actually completely retired but who continue to receive some of the fruits of their earlier labors. For this reason, the amendment modifies the treatment of two types of income. Under the amendment, there would be no reduction in benefits because of farm income from the sale of a crop produced in a prior year provided that, in the year in which the income is actually received, the retired farmer does not engage in any substantial farming activities. An individual could claim this exemption in only 1 year. The amendment also provides that social security benefits will not be reduced because of renewal premiums from prior-year sales of insurance if they are received after age 65 and in a year in which the individual is not engaged in selling insurance. This provision would apply to the self-employed insurance agents who actually made the sale and also to other individuals who qualify for such renewal premiums because of their contribution to the sales effort.

The costs of this amendment are estimated to be approximately $1 million to $2 million in each of the next 5 fiscal years. The amendment will have negligible impact on the long-range costs of the social security program.●

NATIONAL COMMISSION ON UNEMPLOYMENT COMPENSATION—H.R. 12232

AMENDMENT NO. 3473

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an amendment intended to be proposed by him to H.R. 12232, an act to amend the Unemployment Compensation Amendments of 1976 with respect to the National Commission on Unemployment Compensation, and for other purposes.

● Mr. LONG. Mr. President, at the direction of the Committee on Finance, I am submitting an amendment which is designed to provide relief to the Jefferson County, Colo., Mental Health Center in connection with certain social security tax liabilities.

In 1975, the Jefferson County Mental Health Center in response to a survey initiated by the Internal Revenue Service was unable to find any indication that it had waived its taxes. As a result, the IRS directed the center to refund those taxes for the prior 3 years to any employees who did not elect to have their social security coverage continued. The center made the refund and applied to IRS to have the amount of those taxes repaid to it. At that point, the IRS discovered that a valid waiver of immunity had, in fact, been filed and that it was therefore, unable to refund the taxes paid to the center. The center is seeking relief only for the employee share of the social security taxes involved and only for the period prior to the time when IRS notified the center that its previous instructions were in error. (This notification occurred on May 14, 1975, and the amount of employees taxes which had been refunded at that point was $74,128).

The Finance Committee's Subcommittee on Taxation and Debt Management held a hearing on this proposal in October 1977. The administration witnesses indicated agreement that relief to the Jefferson County Mental Health Center is appropriate. However, the administration expressed concern over the possible loss of social security coverage for the affected employees and the possibility that they may not have made an informed choice in opting for the refund.

Under the committee amendment, the Secretary of the Treasury would be directed to refund to the Jefferson Mental Health Center approximately $74,000 representing the employee social security taxes which it had refunded to its employees on the basis of the IRS misinformation. The wages on which those taxes were paid would not be used for determining social security eligibility or benefit amount. However, the affected employees would be given an opportunity to elect to restore the deleted coverage upon repayment of the refunded taxes. Such repayment could be made in installments over a reasonable period of time as determined by the Secretary of the Treasury. The Department of Health, Education, and Welfare would be required to make a reasonable good faith effort to contact the affected employees and to inform them of the consequences of their decision as to whether or not to repay the taxes. (The exact amount to be refunded to the center will be subject to verification by the Secretary of the Treasury of the amount that the center repaid to its employees.)●

TUITION TAX RELIEF ACT OF 1978—H.R. 12050

AMENDMENT NO. 3474

(Ordered to be printed.)

Mr. PACKWOOD (for himself, Mr. MOYNIHAN, Mr. ROTH, and Mr. RIBICOFF) proposed an amendment to H.R. 12050, an act to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

NOTICES OF HEARINGS

SUBCOMMITTEE ON PENITENTIARIES AND CORRECTIONS

● Mr. PAUL G. HATFIELD. Mr. President, I wish to announce that the Subcommittee on Penitentiaries and Corrections of the Committee on the Judiciary will resume its hearings on S. 3227, the Therapeutic Communities Act of 1978, next week. The third day of hearings on this bill is scheduled for Friday, August 18, 1978, at 9:30 a.m. in room 5110, Dirksen Senate Office Building, Washington, D.C.

Persons wishing to testify or to submit a statement for the record should contact the subcommittee staff by writing to the Subcommittee on Penitentiaries and Corrections, A–407 Annex 3, 119 D Street NE., Washington, D.C. 20510, or by calling (202) 224–5461.●

COMMITTEE ON HUMAN RESOURCES

● Mr. WILLIAMS. Mr. President, the Committee on Human Resources will hold a hearing on the nomination of Jerome R. Waldie, Richard V. Backley, Marian Pearlman Nease, Frank F. Jestrab, and A. E. Lawson to be members of the Federal Mine Safety and Health Review Commission. These hearings will be held on Thursday, August 24, 1978, in room 4232 of the Dirksen Senate Office Building, at 9:30 a.m. Persons wishing additional information should contact Mike Goldberg of the committee staff at 224–3674.●

ADDITIONAL STATEMENTS

ISRAELI SETTLEMENTS IN THE WEST BANK

● Mr. ABOUREZK. Mr. President, I am enclosing an article from Time magazine dated August 21, 1978, which describes the inexorable progress of Israeli settlements in the West Bank. This article illustrates one of the most dangerous aspects of Israel's expansionism in the Middle East and why thousands of people have been killed in the past and why thousands more will most likely die before the conflict is ended.

The Time article and the accompanying Washington Post article of August 14, both of which describe settlement activity in the West Bank, should be remembered by everyone concerned as the major cause for future conflict in the Middle East.

Mr. President, someday, hopefully, the U.S. Congress and the Government will stop its financial, military, and political support of one of the two active settler states left in the world, the other being South Africa.

I submit the following articles for the RECORD:

[From the Washington Post, Aug. 14, 1978]

ISRAEL IS CONSIDERING FIVE MORE SETTLEMENTS

(By Yuval Elizur)

JERUSALEM—Israeli officials plan to establish five new Jewish settlements in the occupied West Bank, Israeli Radio and Agriculture Minister Ariel Sharon disclosed yesterday.

The controversial plan—which some observers say could seriously raise tensions in the Middle East as the Sept. 5 summit meeting of Israeli, Egyptian and U.S. leaders nears—first became known here two weeks ago, but military censorship held up its publication until yesterday.

A Cabinet committee headed by Sharon

approved the plan several days ago, Israeli Radio said. Deputy Prime Minister Yigael Yadin said, however, that the plan has not yet come before the full Cabinet or major parliamentary committees, whose approval would be needed.

Cabinet secretary Aryeh Naor noted last night that the committee's decision to approve the plan came before the Camp David summit meeting had been scheduled. He said he expects the full Cabinet to consider the matter at its regular meeting next Sunday.

There were reports, nevertheless, that Sharon is going ahead with preparations for the settlements—three in the northern part of the Jordan Valley and two in the Jericho area.

Sharon, a hawkish member of Prime Minister Menachem Begin's Cabinet and the official responsible for settling occupied territories, has described the most recent plan as "the last chance to intensify Israeli settlement in this strategic area."

A senior source in the government's settlement program was quoted by United Press International as saying, "We have to do it now. Next year will be too late."

Israeli settlement of the occupied territories has been a serious irritant in relations between Israel and the United States, which considers such activities illegal. Egyptian President Anwar Sadat has pointed to such moves in the Sinai and West Bank as major obstacles to a negotiated peace.

[President Carter, who has condemned previous settlements in the occupied territories, was asked about the new plans last night, AP reported.

["Well, I wish they wouldn't create any more settlements," Carter said. He declined to comment on the impact the plans might have on the summit, according to AP.

[Initial Egyptian reaction to the Sharon plan was swift, though low-key, UPI reported.

["If true, this is going to cast a big cloud on the Camp David summit," one government official in Cairo said. "Positions (of Egypt and Israel) are wide apart already and this is why President Carter called the summit. To build new settlements now would complicate matters further."]

Members of the Israeli "Peace Now" movement, composed mainly of young people who oppose Begin's foreign policy, had defied censorship by sticking up posters on billboards and street corners giving details of the plan. Yesterday Sharon gave in and ended the censorship.

The state-owned Israel Radio said Sharon outlined his plan several weeks ago to representatives of the five settlement movements and asked them to organize groups to establish the new communities. Although most of the people at the meeting belong to the opposition Labor Party, four of the five movements promised to cooperate.

The Labor-dominated governments that preceded the present government also advocated the establishment of settlements in the strategically vital but sparsely populated Jordan Valley. Twenty settlements have been established there since 1967, and some have become successful agricultural enterprises.

The five new settlements that Sharon wants to put up actually were planned in principle by the previous government.

Even so, the Peace Now movement, the leftist Mapam movement and certain elements in the Labor Party say that under the present circumstances, with the Camp David talks only three weeks away, Israel should refrain from additional settlement efforts. Sharon, on the other hand, is convinced that before Israel makes a political commitment that might tie its hands, it must strengthen its security in the new settlements from the perspective of security rather than from a political point of view. Sharon demanded and obtained the help of the military censor in keeping the news from leaking to the press.

TWO STANDARDS OF JUSTICE

God's command to Jacob is being obeyed by his Jewish descendants. High on a hilltop above the valleys of the West Bank, 35 families belonging to Israel's ultranationalist *Gush Emunim* are building a new settlement named Beth-El. They claim that 120 Jewish families are waiting to move into the settlement, nine miles north of Jerusalem, in territory that Israel has occupied since the 1967 war. There are plans for schools, a religious study center, an industrial area and even a holiday resort.

One mile south of Beth-El is the Palistinian town of Al-Bireh (pop. 22,000). Last month Israeli military governor issued an order closing 7,000 dunams (1,750 acres) just north of Al-Bireh to Arab development and construction. The order further decreed that all construction work presently under way must be stopped. Al-Bireh officials and residents are angry because the ruling effectively prevents any kind of expansion for the town's growing population.

Al-Bireh, whose slogan is "City on the Move," has always prided itself on its progressive image. In 1972, pressed for more space, townspeople asked Israeli permission to expand municipal boundaries to adjacent lands owned by Al-Bireh residents. The Israelis not only rejected the request but forbade development in two areas, including a site on which Arab businessmen wanted to build a resort.

Israeli officials claim that the latest Al-Bireh order was necessary for security reasons. They point out the disputed land adjoins the military governor's headquarters. As one official explained, "We do not want to be confronted one morning by houses on the borders of our military camps." That may be a valid point, except that Beth-El, meanwhile, is being built on land originally expropriated by Israel solely for military purposes. Abdul Jawad Hussein, a retired businessman who owns part of the land where Beth-El is being built, says that since 1969 the Israelis have fenced off the land and prevented his family from using it. In return, he has been paid one Jordanian dinar ($3) per dunam, or $141 in annual rent for his twelve acres.

Just across the road from Beth-El, a cooperative composed of 62 Arab schoolteachers who organized to buy land and build homes, has also run into trouble. Now much of their land too has been restricted by the Israelis'. Says Ahmad Thalji, a retired schoolteacher: "I bought one dunam 20 years ago. Now I am told I cannot build a house. I hear people always speaking about human rights. Where are the human rights in this injustice?"

To West Bankers, who have sent complaints to the U.N. and to President Carter, the Al-Bireh case is the latest evidence that Israel is pursuing a policy of creeping annexation of the West Bank. Despite protests from the U.S. and elsewhere that Israeli policy contravenes the Geneva convention forbidding civilian settlements in occupied territory, construction at Beth-El continues.●

ZAGORIA NOMINATION

● Mr. BAKER. Mr. President, on Saturday the White House announced that Mr. Samuel D. Zagoria had asked that his name be withdrawn as a nominee to the Federal Election Commission. This development marked the culmination of a lengthy and unfortunate disagreement with the White House over Republican nominees to the FEC.

Mr. President, I am very pleased that this problem has been resolved to the satisfaction of all the parties involved. Sam Zagoria is a decent and honorable man. He is a distinguished public servant and a fine Republican. As I stated at his confirmation hearings, and earlier to him privately, I deeply regret that he was caught up in this disagreement. Sam Zagoria was a victim of circumstances in the truest sense of the phrase. The White House informs me that he will be nominated to another Government position; and should that nomination require the advice and consent of the Senate, I expect that he will have my support.

Mr. President, the course of action initiated by Mr. Zagoria and agreed to by the White House is a fitting and appropriate means of resolving this unfortunate disagreement. Congressman RHODES and I look forward to working with the White House in the selection of the new Republican nominees to the FEC.●

AIRLINE DEREGULATION

● Mr. McGOVERN. Mr. President, the passage of the airline deregulation by the Senate earlier this year—and the consideration being given that concept in the House of Representatives—continues to trouble residents of my State who share my concern with the need for viable commercial airline service in rural America.

The Civil Aeronautics Board, acting in advance of any legislative action on this matter, has already moved to provide increased flexibility to the Nation's airlines in their fare structures. Relaxation of existing CAB rules and regulations on airline routes can be anticipated to the full extent the CAB has the mandate to do so.

Available statistics indicate that the less restrictive CAB policies are substantially increasing load factors for most commercial airlines. This trend should be encouraged.

By the same token, however, it will not benefit smaller States that do not have major airline trunk service, if residents of those areas are denied access to the national airways system by the elimination of local service.

In advance of what many believe will be a completely deregulated airline environment in the years ahead; several airlines are already moving to strengthen their economic position to "do battle" with the major trunk carriers.

Directly affecting South Dakota—Western Airlines is negotiating with Continental—and North Central Airlines has reached an agreement in principle to merge with Southern Airways. At the same time, the CAB is considering its staff proposal that the existing subsidy arrangements be substantially altered. Nothing would trigger the withdrawal of regional carriers from smaller service points faster—than would a major change in the existing subsidy arrangements.

Recognizing these problems—and sharing my deep concern for commercial airline service in South Dakota—Gov. Harvey Wollman of our State has issued

an executive order creating a task force to study the airline problem we face and to come forward with realistic and feasible solutions.

Mr. President, I ask that Governor Wollman's executive order be printed in the RECORD.

The executive order follows:

EXECUTIVE ORDER 78–11

Whereas, the people of South Dakota are faced with the urgent problem of losing scheduled air service; and

Whereas, Federal airline deregulation, loss of subsidy payments, retirement of Convair 580 aircraft, airline mergers, escalating labor, equipment and fuel prices are collectively contributing to the problem of loss of air service; and

Whereas, it is the concern of the State to insure that it's citizens receive adequate air transportation inasmuch as South Dakota has no rail passenger service and limited bus service; and

Whereas, the 1977 legislative assembly did pass House Concurrent Resolution Number 509 expressing concern for the future of airline service in South Dakota,

It is therefore by executive order directed that the Department of Transportation, Division of Aeronautics be afforded the necessary support to study the air service problem by creating a Task Force according to the provisions of this order.

Section 1: Organization.

The duties and functions of the Airline Deregulation Task Force, herein after referred to as a Task Force, shall be performed under the direction and control of the Director of the Division of Aeronautics, South Dakota Department of Transportation; provided, however, that the Task Force shall exercise any advisory and research functions assigned to it by the provisions of this order and shall be responsible for reporting all findings by December 1, 1978 to the Governors Economic Cabinet Subgroup, the State Board of Transportation, the South Dakota Aeronautics Commission, and the Transportation Committees of the State Legislature.

Section 2: Composition.

The Task Force shall be composed of the following members appointed by the Governor:

a. A representative of the Division of Aeronautics, South Dakota Department of Transportation. Such a representative shall also serve as chairman of the Task Force.

b. A representative of the Division of Policy Development, South Dakota Department of Transportation.

c. A legal representative of the South Dakota Department of Transportation.

d. A representative of the Attorney General's office.

e. A representative of the State Planning Bureau.

f. A representative of the State Council on Local Affairs.

g. A representative of the Business Research Bureau, University of South Dakota.

h. A representative of the Public Utilities Commission.

i. A representative of the Airport Managers Association.

j. A representative of the South Dakota Municipal League.

k. Representatives of North Central, Western, Ozark and Frontier Airlines and

l. A representative of the South Dakota Congressional Delegation.

m. Members of the general public.

The Task Force shall be composed of not more than nineteen members appointed by the Governor and, shall broadly represent the nine air carrier municipalities of the state.

Section 3: Responsibilities.

The Task Force shall:

(a) Study scheduled air service to determine the desirable level of future air service.

(b) Inventory air transportation history and future needs in South Dakota.

(c) Work with the Old West Regional Commission and neighboring states to identify alternatives for replacement air service.

(d) Study economic, legal and regulatory conditions pertaining to the airline industry and report any statutory or constitutional changes and prepare legislation or amendments.

(e) Report findings and recommendations by December 1, 1978 to the Governors Economic Cabinet Subgroup, the State Board of Transportation and the South Dakota Aeronautics Commission.

Now, therefore, I, Harvey Wollman, Governor of the State of South Dakota by the virtue of the authority vested in me by the Constitution and the Statutes of this State, do hereby order and direct that a Task Force be created to assist the Department of Transportation, Division of Aeronautics in a study of the problems surrounding scheduled air service in South Dakota.

Be it further ordered, that this executive order shall expire on July 31, 1979.

Dated at Pierre, The Capital City, this 7 day of August, 1978.●

THE ENERGY ISSUE

● Mr. RIBICOFF. Mr. President, one of the most critical issues facing the Nation is the energy crisis and our ability to effectively deal with it. It is not only a reality for the American economy but its solution is a symbol for the rest of the world. The strength of the dollar and our worldwide economic position rest on achieving a solution.

We must make hard decisions on the way we will produce and use various forms of energy. The enactment of a national energy plan is essential. Passage of the various parts of the energy program which have been cleared by the House and Senate will signify that there is a national will to deal with the energy challenges facing the United States.

Mr. President, we in Congress have an obligation to sweep away theory and rhetoric and face reality. We cannot wait any longer in taking final action on the pending energy legislation. An August 13, 1978, editorial in the Washington Post, "Illusions About the Gas Game," is worthy of careful reading and understanding. I ask that the editorial be printed in the RECORD.

The editorial follows:

ILLUSIONS ABOUT THE GAS GAME

The collapse of the natural-gas compromise in Congress—an event that appears very likely—would have dire political consequences. It would signify the demise of President Carter's energy plan. It would tell voters that a disorganized and chaotic Congress wouldn't make up its mind. It would warn other nations that the United States does not care to fashion any sort of an energy policy beyond the status quo. It would be a failure of government.

The immediate responsibility for rescuing the compromise lies with the 42 senators and representatives who serve on the conference committee. Last May the conferees announced an agreement, in principle. Ever since then they have been trying to reduce the principle to legislative language, with the quarrels deepening as time passed. The peculiarly depressing thing about this spectacle is that the negotiators on both sides are being pushed and hounded by constituencies committed to utterly unrealistic hopes and beliefs.

The corridors of the congressional office buildings have lately been crowded with independent gas producers in their tooled boots, demanding that Congress sink the compromise. It's not the big oil companies that carry the political weight when emotions rise. It's the thousands of independents and wildcaters who swing congressional votes—and congressional elections. A good many of those independents have persuaded themselves that, if the compromise loses, Congress will go on to deregulate gas completely next year. That, in our judgment, is absolutely wrong. If the compromise loses, nobody in Congress will touch the issue again for a decade. For the men caught in the middle of this conference, it has been an ugly and bruising experience. None of them intend to repeat it.

On the other side, among the consumers' lobbies, the prevailing spirit is an obdurate and impervious naiveté. It sees the entire issue as purely a moral test—a celestial struggle between the infinite goodness of the consumer and the infinite greed of the producer—in which all considerations of production costs, market conditions and prices of competing fuels are irrelevant. All matters of fact, like the recurrent gas shortages, are brushed aside as products of monstrous conspiracies among the gas and oil companies.

If there is no compromise and no legislation, the prices of natural gas will continue to be set by the federal regulators. Ironically, people on each side are convinced that the regulators will favor them. They can't all be right. Past history suggests strongly that regulation would produce a pattern of irregular rises in prices, but not as fast as the compromise would provide. The Producers who want to gamble on a rapid jump in regulated price ceilings are probably wrong. The consumer lobbyists who are counting on a price rollback are certainly wrong.

What if there's no legislation? To meet the shortages, the United States will begin importing Mexican gas at a price half again as high as the highest permitted to any American producer. Then it will turn to Algerian gas and Alaskan gas, both brought at prices twice as high as the Mexican gas. All those costs will eventually find their way to you-know-who. The idea that continued regulation will protect the consumer, and guarantee him a continued supply of fuel at low prices, is the most expensive illusion of all. Meanwhile, the litigation and uncertainty churned up by the regulatory process will probably keep U.S. production lower than it would have been under legislation.

The gas compromise is nobody's ideal. In the long struggle to accommodate a great variety of conflicting views, it has become enormously complicated, and that kind of complexity always makes trouble. There is only one thing that you can really say for the compromise—but it is the one thing that matters: The legislation would serve everybody, consumer and producer alike, better than the alternative, which is no legislation at all for years to come.●

ALEKSANDR PODRABINEK TO BE TRIED

● Mr. PELL. Mr. President. word has just reached the West that the trial of Aleksandr Podrabinek, a brave and fearless young man, will commence on Tuesday 35 miles east of Moscow. Podrabinek, 25 years old, is to be charged with article 190–1 of the RSFSR Criminal Code, the "circulation of fabrications which defame the Soviet state."

The evidence against Podrabinek, the "defamatory fabrications" Podrabinek is accused of circulating, undoubtedly will be the information he disseminated as

head of the Working Commission to Investigate the Abuse of Psychiatry for Political Purposes, a group which works closely with the Moscow Helsinki monitors. Podrabinek took it upon himself to draw attention to the fate of men and women incarcerated in psychiatric hospitals in the U.S.S.R. for their political or religious beliefs. Information about these abuses of psychiatry—facts which are extremely difficult to come by—was compiled and distributed in the form of bulletins issued by the group. For example, bulletins Nos. 3, 4, and 7 provided information on the case of Yosep Terelya, the 35-year-old Ukrainian poet, who has spent over 14 years in Soviet prisons and psychiatric hospitals for refusing to renounce his beliefs. Podrabinek's group reported that Terelya suffers from a heart ailment, that letters from his wife are not delivered to him, that she has appealed to the World Psychiatric Congress for assistance in freeing her husband, and that he had recently been transferred to Dnepropetrovsk Special Psychiatric Hospital. For selflessly reporting on the facts of Terelya's situation, and others like him, Podrabinek faces a possible 3 years in labor camp.

We in the Congress must speak out against the injustice of prosecuting a courageous and noble young man who sought only to relieve the suffering of those around him. I vehemently protest the trial of Aleksandr Podrabinek and, once again, remind the Soviet authorities that the continued persecution of men and women like Podrabinek will have serious implications on the climate of United States-Soviet relations.●

RULE CHANGE URGED BY STOP ERA ORGANIZATION

● Mr. ABOUREZK. Mr. President, I was amused recently when I received a letter from Phyllis Schlafly's STOP the ERA organization. The letter states:

That extending the time limit for ratification is just plain unfair.

The letter then goes on to quote numerous editorial statements concerning the proposed extension for ratification of the equal rights amendment including the following: "Manipulating the rules," "Don't rig the rules for ERA," and "Changing the rules in the middle of the game."

I find this amusing in light of the fact that Ms. Schlafly has long been in the business of "changing the rules in the middle of the game."

So that my colleagues may share the joke, I submit the following letter Ms. Schlafly sent to former Virginia Congressman Jim Thomson in 1976.

The letter follows:

STOP EQUAL RIGHTS AMENDMENT,
January 5, 1976.

HON. JAMES THOMSON,
Virginia House of Delegates,
Richmond, Va.

DEAR DELEGATE THOMSON: This is a confidential letter which I am writing to you because our friends look to you as the principal leader in the Virginia Legislature in the effort to defeat the Equal Rights Amendment. We are most grateful for your successful work in this regard in the past, and I personally requested all my Virginia friends to give you full support in the recent election.

The purpose of this letter is to apprise you of a plan of action which, in your capable hands, could, I believe, bury ERA permanently and give your Legislature the opportunity to give attention to other pressing issues.

This plan involves the adoption of a Rule in your Legislature requiring a three-fifths majority for ratification of a Federal constitutional amendment—a device made practical by the appointment and confirmation of John Paul Stevens as Associate Justice of the U.S. Supreme Court. Please bear with me while I explain.

In 1970 the people of Illinois adopted a new State Constitution, which went into effect in 1971. Article XIV, Section 4 provided (and this was a change from our old Constitution):

"The affirmative vote of three-fifths of the members elected to each house of the General Assembly shall be required . . . to ratify a proposed amendment to the Constitution of the United States. . . ."

Our Legislature has wrangled about the three-fifths rule each of the four years that ERA has been considered. For the first couple of years, the President of the Senate stuck by the Illinois Constitution and ruled that ratification requires a three-fifths majority. The Speaker of the House tried to rule for a simple majority, but was overruled by the members.

During this period, ERA received a simple majority vote in both Houses, but not a three-fifths majority. So the pro-ERAers in the Legislature went into Federal Court to try to get Article XIV, Section 4 of the Illinois Constitution declared unconstitutional so that ERA could be declared already ratified.

Meanwhile, in the election of 1974, the leadership of our Legislature changed completely, and the new President of the Senate was announced as favoring the simple majority. So, one day in 1975, the Senators, from the floor, without any advance notice of any kind, proposed and passed a Senate Rule requiring a three-fifths majority for ratification of Federal constitutional amendments. This Rule read:

"Be it resolved by the members of the Illinois Senate of the 79th General Assembly that, in voting to ratify a proposed amendment to the United States Constitution, the required vote for ratification shall be the affirmative vote of three-fifths of all the members of the Illinois Senate in the 79th General Assembly."

A three-judge Federal Court considered this case a long time. When the decision was finally handed down on February 19, 1975, it was written by none other than Judge John Paul Stevens. He wrote a scholarly 16-page opinion, (reported in *Dyer v. Blair*, 390 F. Supp. 1291) the gist of which is:

(1) The Illinois Senate and House each has full power to require a three-fifths majority in voting on Federal constitutional amendments. "We have concluded that Article V [of the U.S. Constitution] delegates to the state legislatures . . . the power to determine their own voting requirements."

(2) The three-fifths requirements in the 1970 Illinois Constitution is not mandatory on the Illinois General Assembly, but it is "precatory" and may be accepted by the Illinois General Assembly.

(3) The Court specifically upheld the three-fifths requirement of the Illinois Senate at the time of the ERA vote.

Please note that the Rule upheld was three-fifths of the total number of Members of the Legislature (not three-fifths of those present and voting).

The theory behind Justice Stevens' opinion is that the U.S. Constitution gives the power of ratification to the State Legislatures, and they have full authority to set their own rules under which they exercise this power. Thus, either House can adopt a simple two-thirds or three-fifths rule—and it is binding. Both Houses do not have to have the same rule, and neither House need answer to any other authority for the adoption of its rule.

I am sure you see the implications of this. In our Legislature (as I am sure there are in every Legislature), there are a certain number of members who can be persuaded to vote for a three-fifths rule who are nevertheless committed to vote for ERA. There could be many different reasons for this. They may be strict constructionists. They may believe that a constitutional amendment is of such importance that it should require a super-majority. They may even welcome the chance to vote on both sides of a hot issue.

The spread between the vote on the Rule and the vote on ERA can make the crucial difference. In the Illinois Senate, for example, we passed the three-fifths rule by a simple majority of 50 votes (including a couple of pro-ERA Senators), and *then* it took 36 votes to ratify ERA, which the proponents could not achieve.

I highly recommend this procedure to get rid of the ERA issue in your Lesiglature so that you can move on to other pressing business. In your Legislature, if the proponents knew they had to get a three-fifths majority instead of a simple majority, they might abandon their efforts and give you some peace.

Now that Justice Stevens is on the U.S. Supreme Court, no one can say that such a Rule is something irregular or unconstitutional.

Enclosed is a newspaper column I wrote that gives the heart of the argument in favor of requiring a super majority.

If you would like me to provide you with a xerox copy of Justice Stevens' 16-page opinion, I can do so. If you have any other questions, feel free to write me or phone me at 618-462-5415, or to phone my lawyer husband Fred Schlafly at his office 618-465-7733. Fred was in this case an amicus curiae representing some of our anti-ERA legislators.

With all best wishes, and thanking you again for your defeat of ERA in your Legislature,

Faithfully,

PHYLLIS SCHLAFLY.●

TAX BASED INCOMES POLICY

● Mr. McGOVERN. Mr. President, many thoughtful economists, in searching for ways to slow the inflationary pressures that are ever more quickly sapping the strength of our economy, are discussing the possibility of adopting a tax based incomes policy (TIP). Recently I had the opportunity to exchange views on this subject with Dr. Barry Bosworth, who appeared before the Joint Economic Committee. While obviously cautious in his estimate of the ultimate usefulness of this approach, which claims to combat inflation by holding down wage increases, he did list it as one of the alternatives under consideration by the Administration.

This recent article, in the August issue of Dun's Review, contains a very clear explanation of how the various TIP proposals would work. As we all search for ways out of the swamp of stagflation, I am certain this proposal will receive increasing attention. Because it contains such a fine overview of the issues and options involved in a tax based incomes

policy, I ask that it be printed in the RECORD.

The article follows:

TIP: THE ANSWER TO INFLATION?

(While organized labor is balking and the Carter Administration is chary about the political pitfalls, a tax-based incomes policy is the only new idea that has come to the fore.)

"We're going to play more rounds of this silly game unless we come up with a new policy."

That's the gloomy view of Brookings Institution economist Arthur Okun as he assesses current attempts to beat back inflation. Okun's "silly game" is nothing more nor less than the old boom-bust cycle, and he sees it resulting from the application of traditional methods of fighting inflation: Tight budget and monetary policies that bring on a recession, at which time the Administration and the Federal Reserve start to pump things up again, leading to a new round of inflation, and so on. As an alternative to such start-stop policies. Okun is among a handful of economists pressing hard for the adoption of a tax-based incomes policy (TIP), and it's conceivable that a hard-pressed Carter Administration will opt for just such an approach.

TIP aims to combat inflation by holding down wage increases. For as University of Pennsylvania economists and TIP pioneer Sidney Weintraub puts its: "In the long run, the price level largely reflects wage increases in excess of productivity increases."

THE OTHER CAUSES

True, there are other reasons for the current inflationary surge—huge federal deficits, the high cost of government regulation and the minimum wage and Social Security tax hikes, for example. But wage pressures contributed significantly to the situation, and those pressures could become just about unbearable next year. A big round of labor negotiations in key industries is due, and the White House is deeply concerned that there may be a repeat of the 1976 bargaining pattern, in which settlements in those industries ranged from 30 percent to 34 percent in wages and fringes over three years. The Administration is determined to limit next year's contracts to a 20 percent to 25 percent ban, but it will not be easy.

Thus far, big labor has turned a deaf ear to White House pleas for restraint. It pressured the White House, which in turn pressured the coal industry last winter to give the mineworkers a 39 percent, three-year package, and the other big unions are determined to do as well. Teamster President Frank Fitzsimmons has already announced that he will settle for nothing less when truckers' contracts expire next March. The recent railroad labor settlement of some 35 percent, in the face of Administration pleas to take less, indicates how difficult the White House job will be. Overall labor settlements in the first quarter rose to 8.5 percent from 1977's 7.5 percent despite White House exhortations to "deescalate" them.

TIP would try to get the heart of the wage-push problem with either a carrot or stick approach—rewarding through tax cuts those workers and companies that hold the wage line or penalizing with a tax increase those firms that grant inflationary wage hikes. TIP was conceived about seven years ago by Weintraub and Yale economist Henry C. Wallich, now a member of the Federal Reserve Board, and it was based on the penalty approach.

Under Wallich-Weintraub, TIP would be confined to the nation's largest companies—either the top 1,000 or 2,000—which would be required by new legislation to limit their total wage and benefits increases to the recent long-term productivity rate plus half the current inflation rate. Right now, that would mean about 2 percent or 1.5 percent for productivity plus 3.5 percent or 4 percent for inflation, according to Wallich. This would be a maximum wage gain of about 6 percent compared with the 8.5 percent rate in the first quarter and the 10 percent-to-11 percent some of the big unions garnered in the last big round of bargaining in 1976. Companies exceeding the 6 percent guideline would be penalized with a 5 percent corporate income tax surcharge.

A plan covering the 2,000 largest companies would encompass 85 percent of the output of the private sector and about 25 percent of the wages and fringes paid in the entire economy, according to Weintraub. Various levels of government would probably be included as well, bringing the wage total to 35 percent. "These are the economy's pacesetters. Everybody else would soon fall into line," says Weintraub. And Wallich believes that adoption of this form of TIP would bring the current inflation rate of about 8 percent down to 4 percent in two to six years.

REWARDING COOPERATION

Arthur Okun gives full credit for the TIP idea to Wallich and Weintraub, but he insists that their stick version is not politically feasible. Says Okun: "The penalty approach looks anti-labor and will be impossible to get through Congress." Okun has come up with his own version, rewarding both companies and workers that hold the wage line. Under Okun's plan, workers in a company that holds wage hikes to 6 percent would receive a tax credit equal to 1.5 percent of their pay up to $20,000—for a maximum of $300. At the same time, the company would receive a tax credit equal to 25 percent of the total granted its employees. For the average worker, the combination of a 6 percent wage hike and a 1.5 percent tax credit would work out to about an 8 percent package because the 1.5 percent credit equals 2 percent before taxes.

Okun estimates that the plan would cost the Treasury about $10 billion-to-$12 billion annually and would knock one percentage point off the inflation rate in each of the next three years. "It could always be renewed for another three years, but I think that one round of labor negotiations under the plan would break the wage spiral," says Okun.

In contrast to the Wallich-Weintraub limited approach, Okun's TIP would be voluntary, but open to all companies. As Okun envisions it, on October 1 prior to the year in which TIP would take effect, the Internal Revenue Service would mail forms to all employers asking them to enlist in the program. Those workers whose employers signed up would find the tax credit reflected in their January 1 paychecks in the form of lower withholding. Firms would be free to grant promotions and merit increases as long as their overall payroll increase remained within the guideline.

Each company would also be required to state how it intended to measure its average wage increases—for example, it could choose to do it by the entire payroll, by individual plants or subsidiaries or by occupational groups. But once a company opted for a particular yardstick, it would have to stay with it for one year. Companies that did not elect to sign up immediately could take the pledge later on. But their employees would not receive their tax benefits until they filed their returns at the end of the year.

Okun says that his plan would contain inflation more quickly than the Wallich-Weintraub approach because of its universality. Among his reservations about Wallich-Weintraub: Limiting TIP to the biggest companies would not solve inflationary settlements in construction and trucking, which are dominated by smaller companies. Okun also argues that his version would achieve widespread acceptance because workers would see their standard of living rising as inflation receded from the current 8 percent level while they continued to receive annual increases of roughly that amount.

ADMINISTRATIVE DIFFICULTIES

Henry Wallich concedes that the Okun plan is far more feasible politically than his approach. But both Wallich and Weintraub maintain that a universal system that involves monitoring tens of millions of individual taxpayers would be extremely difficult to administer. The penalty approach involving 1,000 or even 2,000 corporations would be relatively easy for the Internal Revenue Service to handle without taking on a new army of bureaucrats, according to Weintraub. The University of Pennsylvania economist insists that under his plan only half a dozen lines would have to be added to the corporate tax form and that the monitoring of the nation's major companies would require the hiring at most of twenty more auditors at the IRS.

But Weintraub is virtually alone in his insistence that the stick plan could be implemented with such a small addition to the bureaucracy. Emil Sunley, Deputy Assistant Secretary of the Treasury for tax policy, maintains that there are "tremendous administrative complexities" in either approach, but that they could be handled. Okun admits that his carrot plan would require many more bureaucrats to administer the tax laws, but he insists that it would be worth the price.

How do other economists react to the idea of TIP?

There is a good deal of opposition. For example, Joseph Pechman, Okun's longtime Brookings colleague and one of the nation's leading tax experts, opposes both versions of TIP because they run counter to the goal of simplifying the tax system. He argues that the more social and economic goals the nation tries to implement through the tax system, the more complicated the system is bound to become. Probably the most negative view of TIP is expressed by Washington University economist Murray Weidenbaum, who believes that it would become "an administrative nightmare." The former Nixon Administration Treasury aide maintains that if inflation is found to stem from the wage side, then Congress should amend the labor laws to rein in the unions; if it is determined that inflation comes from price rigidities, then new antitrust statutes should be passed. Weidenbaum might have a case, but the politics of that approach are even more impossible than the politics of TIP.

But between those who are strongly for or against TIP is a wider spectrum of economists such as Arnold Weber of Carnegie-Mellon University, who says: "I'm not wild about the TIP idea, but there are few alternatives." Weber notes that the U.S. uses the tax system to encourage firms to hire the hard-core unemployed or invest in new plant and equipment, so there is no valid reason why it shouldn't use it to fight inflation.

Nothing like the TIP plan has ever been tried in the United States or anywhere else, although Henry Wallich points out that there is a precedent in the Korean War controls program that denied any corporation a tax deduction on that portion of a wage increase deemed to be "excessive." But the definition of excessive was very subjective and the power was rarely invoked. While it is unlike TIP, recent British experience indicates that getting a hold on wages is certainly a major solution to the inflation problem. Three years ago, with wages and prices soaring at rates of 26 percent and 27 percent respectively, a frightened Labor Government entered into a social compact with the trade unions. In exchange for a small tax cut for

lower income workers, the unions agreed to limit their wage demands to the equivalent of $13 a week. Within a year, price and wage increases were down to around 14 percent.

The compact was renewed the following year and again in 1977. The 10 percent wage target set last year has now brought Britain's inflation rate down to around 7.5 percent. The Labor Government is now negotiating with the unions for a new wage target of 5 percent, which could reduce the inflation rate still further. While moral suasion surely played a role in the government's effort, its ultimate weapon was the trade union movement's fear that a continuation of galloping inflation would bring the Conservatives to power.

The Carter Administration last winter seriously considered recommending the Okun version of TIP to Congress. Both top White House economist Charles L. Schultze and Council on Wage and Price Stability Director Barry Bosworth were strong advocates of the idea. But the Treasury was opposed. It didn't want to shoulder the burden of administering the program through the Internal Revenue Service, and it was afraid that TIP would bury once and for all the longtime drive towards tax simplification.

In the end, President Carter backed away from TIP for two reasons: the implacable opposition of organized labor and the fear that as TIP wended its way through the legislative process, it would become filled with loopholes and exemptions demanded by powerful pressure groups. Even Arthur Okun, a politically savvy Washington operator who has close ties with many key Senators, admits that "if I had been sitting next to the President, I couldn't have advised him to send it up to the Hill last year because the politics were impossible."

But that was before inflation began to heat up again. Okun concedes that the politics of recommending TIP are still very difficult, but maintains that labor might grudgingly conclude that it is worth a whirl in preference to tight monetary and fiscal policies that will only send the unemployment rate soaring again. Weintraub, who will go for the Okun version if he can't get his own, is impatient with arguments that such government intervention in the wage mechanism would be still another blow to the free-market economy. Says Weintraub: "Those who resist this moderate intervention into the market system are insuring its demise, because the government will end up taking even stronger measures to fight inflation. TIP would improve the market system, not dethrone it."

NO ALTERNATIVE

While the chances of getting TIP in place before the Teamsters' contract runs out next March are not very good, the possibility should not be ruled out entirely. As inflation ratchets up month after month, the White House is becoming increasingly desperate for a new idea and it is very fearful that monetary and fiscal restraint will push the economy into still another recession next year.

Even Treasury Secretary W. Michael Blumenthal now says the TIP idea "is worthwhile pursuing," although it faces many practical problems. And for all its political pitfalls, TIP would be far easier for a Democratic Administration to push through than a Republican one. Much like the British experience, labor could take something from the Democrats that it could never accept from the Republicans. "Nobody really likes TIP, but we don't have anything else," says a top White House policymaker. That may be a hard way to sell a new idea, but like the idea of growing old, the alternative may be worse.●

PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I submit for the RECORD the notification I have just received.

The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., August 9, 1978.

In reply refer to I-5669/78ct
Hon: JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78-69, concerning the Department of the Air Force's proposed Letter of Offer to Israel for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $19 million and support costs of $.6 million for a total estimated value of $19.6 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Lieutenant General, U.S.A.

Attachments.

[Transmittal No. 78-69]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Israel.
(ii) Total Estimated Value:

[In millions]

Major Defense Equipment*	$19.0
Other	.6
Total	19.6

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: One hundred (100) GBU-15(V)4/B electrical optical glide bomb kits (less warhead), 200 FMU-124A/B fuzes, modification kits, technical data and spare parts.

(iv) Military Department: Air Force.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: August 19, 1978.

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

Mr. President, Section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that Act in excess of $25 million or, in the case of major defense equipment as defined in the Act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the Chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the Committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the record in accordance with previous practice.

I wish to inform Members of the Senate that such a notification was received on August 9, 1978.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, Room S-116 in the Capitol.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., August 9, 1978.

In reply refer to I-7052/78ct
Dr. HANS BINNENDIJK,
Subcommittee on Foreign Assistance, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Northeast Asian country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA.●

PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I submit for the RECORD the 19 notifications I have just received.

The notifications follow:

(vi) Date Report Delivered to Congress: August 11, 1978.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., August 11, 1978.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

herewith, Transmittal No. 78-85, concerning the Department of the Navy's proposed Letter of Offer to Israel for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $22.5 million and support costs of $1.7 million for a total estimated cost of $24.2 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA.

[Transmittal No. 78-85]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Israel.

(ii) Total Estimated Value:
Major Defense Equipment*, $22.5 million.
Other $1.7 million.
Total, $24.2 million.

(iii) Description of Articles or Services Offered: One hundred seventy (170) AIM-7F Sparrow missiles.

(iv) Military Department: Navy.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: August 11, 1978.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., August 11, 1978.

In reply refer to I-4918/78ct

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78-86, concerning the Department of the Army's proposed Letter of Offer to Korea for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $52.8 million and support costs of $2.1 million for a total estimated cost of $54.9 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA.

UNITED STATES-JAPANESE ECONOMIC STATUS

● Mr. GLENN. Mr. President, recent discussions of the United States-Japanese economic situation have focused on the decline of the dollar's value as it relates to the yen. The growing attention that is being paid to the exchange rate is obviously warranted and developments must be monitored. Of much greater concern than the quantitative dollar-yen relationship, however, is the apparent disharmony caused by American and Japanese efforts to bolster the respective economies. Ambassador Mansfield correctly identified as a major problem the perception that the Japanese market is less open to our goods than is our market to Japan's product. Certainly there are examples of "administrative guidance" and quotas that support this interpretation. On numerous occasions, as chairman of the East Asian Subcommittee of the Foreign Relations Committee, I have enunciated my conviction that diligent, cooperative efforts are the only means of easing the growing frictions between the United States and Japan.

Mr. President, it is with these concerns that I shall submit for the RECORD an insightful article written by James N. Wallace which appeared in the U.S. News & World Report of August 14, 1978. His observations are persuasive evidence of the critical need to intensify our commitment to spanning the gap which the current economic imbalance has widened. The health of the international economic system, as well as that of our domestic economy, demands that we continue to tackle these problems in a cooperative spirit underpinned by patience and understanding.

The article by Mr. Wallace follows:

[From News & World Report, Aug. 14, 1978]

WHY U.S. AND JAPAN ARE DRIFTING APART

(By James N. Wallace)

TOKYO.—Japan's surging exports and America's sagging dollar are fast undermining a quarter-century-old partnership between the two Pacific powers.

Behind the tension: a dollar that buys only about 190 yen—the lowest exchange rate since a 360-to-1 rate was set in April, 1949—and Japan's record 6.3-billion-dollar surplus in trade with the U.S. over the past six months.

The average Japanese still is fascinated with offshoots of U.S culture—McDonald's hamburgers, "Star Wars" movie-fan clubs and suggestive T-shirt slogans. Only foreign visitors see anything odd in preteen Japanese girls practicing baton twirling in a Buddhist temple courtyard while a phonograph blares "On Wisconsin."

Yet just below this East-meets-West surface, economic conflict is creating major problems for the future. It is generating serious frustrations among politicians and businessmen of both nations and is eroding Japanese respect for U.S. leadership that turned former enemies into close, dependent allies.

Above all, there is a sharp reduction of Tokyo's confidence in the capability of President Carter's administration to manage the U.S. economy and maintain America's No. 1 position as leader of the Western world.

Charges, countercharges. A new note of animosity is edging into trade disputes. Some Japanese claim that "racism" accounts for what they insist is greater U.S. pressure on Tokyo than on white European nations to make trade concessions. And many U.S. officials here in the capital say Japan drags its heels when urged to reduce the huge trade imbalance. "It's time," says one American, "that our friends in Tokyo do more than just talk."

This growing bitterness reflects the inability or unwillingness of each nation to keep promises that were made earlier. Some Americans insist that Japan never intended to fulfill its January pledge to cut this year's trade surplus with the U.S. in half. Japanese counter that Washington reneged on a promise, which was made at the same time, to have an effective energy bill in force within 90 days.

Japanese openly complain that the U.S. wants to penalize them for their years of hard work and sacrifice. Instead of worrying about the declining dollar, one prominent commentator says, Japan should declare "strong yen" holidays so workers can "calmly look back at over 30 years of high-growth toil that has put the Japanese economy where it stands today."

Ironically, U.S. postwar policies and nearly 2 billion dollars in economic aid through 1950 played a primary role in transforming a devastated Japan into America's major economic competitor.

After the war, U.S. food kept millions of Japanese from starving. In the early 1950s, American farm products—sold for yen that then were returned to the Japanese government—provided the initial capital for rebuilding and modernizing Japan's industry.

Defense umbrella. Just as important, U.S. promises to defend a demilitarized Japan spared the nation the burden of maintaining its own military forces and enabled Tokyo to concentrate its vast energies on economic expansion. Even today, Japan spends less than 1 percent of its gross national product on its military forces.

Every Japanese over 40 is well aware of America's role in the nation's recovery. But there is very little public acknowledgment of how much is owed to U.S. support. And because most political leaders avoid discussing military matters, there is even less recognition among Japanese that they depend on the U.S. for their defense.

From Prime Minister Takeo Fukuda on down, Japanese blame America's massive trade deficit and weakened dollar almost solely on the failure to curb oil imports and control inflation. They insist that unless this is done, any easing of Japan's restrictions against imports would be valueless.

Tokyo analysts emphasize that between 1973 and 1977 Japan's economy grew 13 percent, with almost no increase in oil consumption. During the same period, they say, the U.S. economy expanded only 7.9 percent, while oil consumption rose 7.2 percent. Japanese also claim that their annual inflation rate is only 4 percent, less than half America's double-digit rate.

Most Japanese officials blame U.S. woes more on weak Carter leadership and congressional politics than on erosion of the American character.

Tokyo experts are uncertain whether Washington is practicing "benign neglect" of the dollar or is deliberately driving down its value to reduce the trade deficit by cheaper prices for U.S. exports. Either way, they are baffled by a government that, in Japanese eyes, seems unconcerned about maintaining the worth of its currency.

Some Japanese are beginning to detect even broader weaknesses in American society. They are puzzled, for instance, by trade unions' demanding large wage increases that risk setting off both inflation and recession.

They contrast this "confrontation attitude" unfavorably with the more cooperative attitude of Japanese labor in times of economic difficulty. Last spring, Japan's unions accepted business and government arguments that the national economy could afford pay hikes of only 5 to 6 percent and settled for raises slightly below price increases of the preceding year.

Signs of declining "discipline" in America also bother some Japanese, particularly those in their 40s and 50s who worked 60-hour weeks at low pay to create Japan's economic miracle two decades ago. Such Japanese are dismayed by newspaper reports about those Americans who would rather receive $400 a month on welfare than work for $600.

Tokyo's immediate worry, however, is not American mores, but the threat of American protectionist pressures after congressional elections in November, especially if the new Congress meets just as the U.S. may be heading into an economic slump. The biggest fear is the imposition of surcharges on all imports from Japan. Some congressmen are urging Carter to do just that under legislation already on the books.

Limiting exports. Partly to head off across-the-board restraints, Japan agreed last April to regulate or discourage some key exports. The goal is to hold overseas sales—but not their dollar value—slightly below totals for the fiscal year that ended last March. Special attention is being paid to products that made up 45 percent of Japan's 84.6 billion dollars in exports and accounted for an overwhelming share of the country's lopsided surplus in trade with the United States.

Automobiles, the largest export to the U.S., are restricted under a uniquely Japanese system of "administrative guidance." The power-

ful Ministry of International Trade and Industry has told manufacturers to hold down auto shipments to about 2 percent below levels of the previous year.

This action may have limited impact on 1978 trade totals. Auto exports are expected to fall significantly in the coming months, but for the first half of the calendar year they were 31.5 percent above the same period in 1977.

Exports of color television sets to the U.S. dropped 37 percent to 627,000 units in the first five months of the year, mainly because of the three-year "orderly market agreement" adopted at U.S. insistence in May, 1977. But competition from South Korea and Taiwan also cut into Japanese sales.

Steel exports were slashed nearly 22 percent during the first six months of 1978 by an American-instituted "trigger price" that last February raised the price of Japanese steel sold in America by about 10 percent.

Other major exports, including motorcycles, watches, cameras and copying machines, are restricted only by government promises to limit overseas sales. Some Western trade specialists say that these items—not subject to specific quotas—will be the best indicator of Tokyo's determination to reduce its still-growing trade surplus.

Complicating this Pacific trade conflict is Japan's seeming immunity from classic economic laws governing what happens when a currency soars in value. Although Tokyo's top trade negotiator, Nobuhiko Ushiba, warned that a 200-yen-to-$1 exchange rate can badly impair Japan's economy by raising the price of its exports, there has been little evidence of damage so far.

Each rise in the yen's value from about 290 to the dollar 19 months ago to the 190-to-1 level in early August has brought predictions that Japan would lose its export competitiveness. Yet nothing of that sort has happened.

Makers of toys, stainless steel flatware, china, scarves, mosaic tiles, eyeglass frames and some textiles have lost up to half their overseas orders. But these are small, labor-intensive or technologically outmoded industries. Except for shipbuilding, which has been hit by a worldwide slump, Japan's big industries are increasing exports not subject to specific controls.

One major reason for Japan's ability to cope with the yen's rapid rise is its basic trade structure. Food and raw materials make up about 80 percent of all imports, and most are paid for in dollars. As the dollar declined, so did costs to Japanese manufacturers.

Most industries also can squeeze more productivity from facilities that frequently were working below capacity after the 1973 oil crisis. Also of help: dedication of Japanese workers to their jobs, and such technical innovations as assembly lines, controlled by punched tape, that turn out hi-fi components.

Inflation in the U.S., Japan's biggest single market, is a major plus for this country's exporters. Auto sales provide a dramatic example of how this works.

To cope with the yen's swift rise, Japanese auto makers have raised dollar prices in the U.S. seven times since May, 1977—an average boost of 25 percent across the board. But U.S. auto companies, facing inflation and seeking bigger profit margins, also were raising prices. This kept the price spread between domestic and imported cars narrower than analysts had expected.

The spread is beginning to widen, however, and now ranges from $400 to $1,000 on comparable models.

Japanese manufacturers say sales in America are dropping slightly but that they do not expect any sharp decline. They are confident that many American buyers will continue to be willing to pay premium prices for the fuel economy and relatively trouble-free performance of Japanese-made autos.

Little impact at home. Except for reducing the cost of imported raw materials, the change in the dollar-yen rate has had little impact on Japan's domestic economy. There has been no big increase in imported consumer goods, and only a handful of retail prices have been trimmed because of cheaper dollars.

Japanese welcome price cuts on such items as phonograph records, fountain pens, color film, refrigerators, lemons and instant coffee, but these goods account for only a tiny fraction of consumer spending in one of the world's highest-priced economies.

In Tokyo, along with the jump in the yen's value, there is an unmistakable rise in the number of Americans and Japanese who fear that the two nations are on an economic collision course and that relations over all will suffer.

Ideas differ on what might set off a crisis; another 25 percent drop in the dollar's value; new U.S. restrictions on Japanese imports, and blunt American insistence that the Japanese market be thrown open to more U.S. imports—a move Tokyo officials have restricted.

What most people agree on is that conflict is inevitable unless trade and monetary problems are tackled with considerably more good will and imagination than leaders in either capital have shown in recent months.

Says U.S. Ambassador Mike Mansfield: "We have some tough days ahead of us. And if we don't succeed this year in achieving at least a strong beginning toward fundamental solutions to the imbalance in our economic relationship, we are going to have even tougher days further down the road."●

SUNSET PLAN WOULD REVIEW FEDERAL SPENDING PROGRAMS

● Mr. KENNEDY. Mr. President, I would like to call the attention of my colleagues to an article which appears in the August 21 issue of Forbes magazine, "Kemp-Roth and Proposition 13: The Cart Before the Horse?" It discusses an important alternative to the drastic tax-cutting proposals which are now before the Congress.

The alternative I speak of is the "Sunset" plan proposed by my distinguished colleague from Maine, Senator ED MUSKIE. The plan would provide for review of about one-fifth of Federal spending programs every 2 years. Under the Sunset plan, Congress would have a chance to evaluate the worth of existing programs and eliminate those which it found to be wasteful or ineffective. It could also reduce duplication of programs in different agencies of the Government.

This proposal would enable us to reduce Federal spending in a far more rational, sensible manner than would be possible under proposals like proposition 13 or the Kemp-Roth tax cut bill. Kemp-Roth type proposals constitute "meat ax" legislation: they would have us take a wild chop at Federal spending, rather than permit the kind of skillful surgery which is really needed. Tax cut plans encourage the Government to increase deficit spending or cut back programs at random. It would be far better for the Congress to review the laws and programs it has already established, making rational and careful judgments about which programs need to be cut or reduced in spending, as Senator MUSKIE has proposed.

I support Senator MUSKIE's Sunset bill. I urge my colleagues to give it careful consideration. In order that Members of the Senate may read about it, I ask that the Forbes article be printed in the RECORD.

The article follows:

KEMP-ROTH AND PROPOSITION 13: THE CART BEFORE THE HORSE?

(By James S. Byrne)

The very politicians who have given us our marvelous tax system are now vying with one another to persuade the voters that they sincerely believe in *lower* taxes. Even before California's Proposition 13, the message was slowly getting through that—much as they like government services—American citizens do not enjoy paying for them.

The latest entry in the tax-cut derby is Senator Edmund Muskie (D–Me.). This one-time presidential hopeful is pushing hard for what he calls a "Sunset" bill. This bill hasn't gotten the attention that Proposition 13 has received, nor that the press has lavished upon the Kemp-Roth bill (*see* John Berry article below), which would cut income taxes by 30 percent over three years. The Muskie bill, however, is by far the most honest and realistic approach to the matter. It puts first things first by focusing on government spending rather than on government taxing.

"Dammit," thunders Muskie, "the Republicans are going to use the government spending issue. We shouldn't give it away." In Muskie's view that's exactly what the Democratic leadership in Congress is doing.

Muskie is frustrated precisely because he thinks he had just the thing for all the Democrats who will be scratching this fall for an election response to the public sentiment that turned California government on its ear with Proposition 13. The Sunset bill's concept is excruciatingly simple: All federal spending programs would automatically close down within ten years unless Congress specifically votes to extend them.

In both Proposition 13 and the Kemp-Roth bill there are big measures of wishful thinking: Cut taxes and, somehow, government spending would be reduced. But this ignores a little thing known as deficit spending. It also ignores off-balance-sheet government spending. There is no guarantee that faced with lower tax revenues government wouldn't simply step up deficit financing. Given the ways politicians behave this is almost a certainty.

Much as businessmen may feel sympathy for Proposition 13 and the Kemp-Roth bill, they would do well, too, to realize that such drastic tax-cutting measures pose a threat to the business community. If you cut personal income taxes and property taxes without cutting government spending, you create tremendous pressures to raise taxes elsewhere—and business becomes an obvious target. Already voices are being heard in the land suggesting that legislatures should replaces the money by taxing the "fat cats."

In sharp contrast, Muskie, chairman of the Senate Budget Committee, has picked the right target. His motives may be political but his reasoning is sound. The biggest problem with federal spending, as almost any budget expert will tell you, is not that new programs get added but that few ever get dropped. The current budget process, Muskie argues, doesn't ask whether a program is worth keeping, but merely how much it should get each year.

The Sunset bill would require that about one-fifth of the spending programs in the budget be reviewed every two years, "and," says Muskie, "like programs would be recon-

sidered simultaneously, with an eye toward minimizing duplication and waste." The bill would ensure that no program could slip through by focusing on what the budget technicians call "subfunctions." There are 66 of these groupings within the federal budget, each of which includes all of the spending for a particular purpose regardless of which program it falls under or which department actually runs it. (Examples: Subfunction 272 is energy conservation, and 501 is elementary, secondary and vocational education. Both of these would be reviewed by September 1982 under Muskie's bill.)

There are a host of notable examples of old programs that refuse to die. These, now virtually invulnerable to cuts, would become extremely vulnerable under Muskie's bill. Examples:

Medicaid. Passed in 1965, and costing the federal government about $11 billion this year, has never had a top-to-bottom review by Congress. Medicaid's purpose is to help low-income families pay their medical bills, but there are those who believe it has done more to help doctors line their pockets. In any event, its existence in its present form constitutes a major stumbling block to rationalization of the nation's health-care financing.

Rivers and Harbors. Some laws under which millions of dollars are spent each year for improvements to rivers and harbors date back to 1899 and have never been reviewed, according to the Congressional Budget Office.

Countercyclical Revenue Sharing. Muskie himself was the author of a bill passed over a veto in 1976 to provide up to $1.4 billion a year to recession-hit state and local governments. Along with conservative supporters; such as former Senator Bill Brock (R-Tenn.), Muskie insisted that it include a provision to turn off the federal money tap when the national unemployment rate fell below 6%. (The June rate was 5.7%.) Now the Carter Administration has proposed continued funding of the program by focusing it solely on cities—adding about 10,000 new recipients. Muskie says he is sympathetic to the goal of aiding cities where unemployment still is high, but he thinks this is the wrong way to go about it. Rather than renege on the phase-out, design a special program for cities that are in need, he argues.

In sum, the political virtue of Sunset legislation is clear. It would give an opportunity to challenge the premises of existing programs, the backers of which often hide behind two Capitol Hill verities: 1) that it is far easier to keep an old program going than to enact a new one; and 2) that it is far, far easier just to get money for one more year of an old program than to have to answer searching questions about a program's true worth.

Muskie has rounded up a diverse group of supporters for Sunset. The White House loves it, and so do such unlikely allies as the Chamber of Commerce of the U.S. and Senators Edward M. Kennedy (D-Mass.) and Robert P. Griffin (R-Mich.).

It has its opponents, too.

The National Association of Manufacturers and the Business Roundtable, outspoken champions of reducing federal spending, will be in the trenches fighting the Sunset bill if there is the least chance that tax incentives—such as the investment tax credit and deduction of intangible drilling costs—would be subject to it. Senator Kennedy plans to lead a floor effort to require exactly such reviews of tax incentives.

Powerful senators like Russell Long, chairman of the Finance Committee, are no fans of Sunset. Congressional committee chairmen know their precious turf will be invaded and their constituent groups possibly pushed out into the cold by the forced program reviews. And that's part of the reason, too, why both the Senate and House leadership is so lukewarm to Sunset.

The opponents mount two arguments. First, they claim, most programs get reviewed anyway each year or so. Second, operation of the bill would require an enormous increase in congressional staff. Muskie disputes both points, ticking off some programs that have not been reviewed. As for the latter, he snorts, "Congress has built a tremendous staff, without Sunset, to write new laws. I think that part of the staff responsibility should be to spend some time reviewing those laws."

The Sunset bill has been reported out of committee, and Muskie is confident that, one way or another, he will get it onto the floor in spite of filibusters on energy and several other issues. It should pass if he can get it to a vote. Given Speaker Thomas P. O'Neill's lack of interest, Sunset legislation has not been moving in the House. But the Chamber of Commerce is trying to stir up support there, too.

Unfortunately, Sunset lacks the sex appeal of Proposition 13 or the Kemp-Roth bill. But where the latter two involve, essentially, symptom therapy, the former attacks the root causes of unnecessarily high taxes: excessive and unnecessary government spending.●

THE SOVIET BATTLE AGAINST ITSELF

● Mr. STONE. Mr. President, could you, in all good conscience, keep silent if you knew of a physicist, Lev Ubozhko, who was first arrested for distributing samizdat—unofficial—literature and then sent to a psychiatric hospital for 6 years because of that distribution? Could you, in all good conscience, keep silent if you knew this was only one small case out of over 200 documented cases of psychiatric internment of political dissidents? Could you keep silent if you knew that silence helps condemn them? Most people in the Soviet Union prefer to turn the other ear because of the remarkable efficiency and brutality of the Soviet internal security organs, and the remarkable price those organs demand for any kind of insubordination.

For a rare few, however, the burden of the fate of those hundreds of people is too great to be dismissed and ignored. For some, like Aleksandr Podrabinek, the moral impulse to speak out and help is stronger than the powerful threat of the deadly risks involved. The time has unfortunately come for Podrabinek to pay his price to the Soviet state. His trial has been set for early this week and he faces the maximum sentence of 3 years imprisonment for circulating "fabrications known to be false which defame the Soviet state and the social system." These "fabrications" involve detailed descriptions of over 200 cases of perfectly sane individuals throughout the Soviet Union who found themselves in psychiatric wards because they were crazy enough to defy the state. His most reprehensive crime, however, was refusing to cooperate with the KGB during their investigation of the case of a fellow dissident, Yuri Orlov. During that investigation, the KGB warned Podrabinek that he would be arrested and convicted if he did not cooperate and, true to their word, the Soviets arrested Podrabinek the opening day of Orlov's trial.

Podrabinek's courage and sense of morality stand in marked contrast to the cowardice and brutality of the Soviet authorities, against whom Aleksandr has been waging his own quiet battles. The Soviets, too, like to wage their battles quietly so that they can mask the true nature of the destruction they bring. But to quiet a battle requires the muffling of its bombs, and so the Soviets have been painstakingly muting all sounds which reverberate from their little wars with their own people. What the Soviets are finding difficult to comprehend, however, is that those sounds become harder to stifle as the battles grow larger and more people are attentively listening for the smallest echoes.●

SEABROOK: REGULATORY DELAY MAY BE OVER

● Mr. DOLE. Mr. President, an editorial in the Washington Star on August 13 demonstrated the core of the controversy over building the Seabrook Nuclear Generating Station. The regulatory red-tape involved in construction and licensing of nuclear powerplants has needlessly delayed a worthwhile project.

Because of Government regulations, it now takes 10 to 12 years to license and construct a nuclear plant in the United States, roughly twice the length of time it takes in other countries. For each year that completion is delayed, an additional $120 million is added to the cost of a nuclear plant. A reduction in licensing and construction time from 11 years to 8 years would reduce the average family's electric bill by $40 per month over the life of the reactor.

Mr. President, due in large part to the efforts of Governor Thomson of New Hampshire, the delays in construction at Seabrook may be over. The Senator from Kansas hopes that the tribulations of Seabrook will persuade Congress to correct the bureaucratic mess that threatened to prevent construction of the Seabrook plant.

Mr. President, I ask that the editorial from the Washington Star be printed in the RECORD.

The editorial follows:

THE BLEAK COMEDY OF SEABROOK

After two costly government-ordered work stoppages since 1976, the Nuclear Regulatory Commission has approved the resumption of construction on the ferociously controversial Seabrook nuclear generating station in New Hampshire.

But we'll bet you 20 candles against a 40-watt bulb that this will be a far from conclusive decision in the Seabrook issue. The $2.3 billion plant has become a crusade for anti-nuclear forces banded together as the Clamshell Alliance. Since the Environmental Protection Agency on August 4 sanctioned the Seabrook cooling system—a decision that cleared the way for Thursday's NRC action—the Clamshell Alliance has declared it intends to renew its campaign of civil disobedience.

An attorney for the anti-nuclear troops said he has already filed suits against the decisions by the NRC and the EPA, clearly indicating that the legal assault—"legal harassment," in the view of Public Service of New Hampshire, the utility building the 2,300-megawatt facility—will not abate.

What a bleak, black regulatory comedy the Seabrook affair has been.

The utility more than five years ago submitted its application to the Nuclear Regulatory Commission, and construction finally began in July 1976 after the EPA gave tentative approval to cooling the plant with ocean water and discharging it back into the sea. But environmentalists raised a hoohah: EPA withdrew approval in November 1976, and NRC suspended the construction permit.

The utility then appealed to Douglas Costle, the EPA administrator, who eventally ruled in the plant's favor; NRC reinstated the construction permit. But Mr. Costle's decision was challenged and earlier this year a federal court of appeals overturned it on procedural grounds; the NRC again suspended construction pending EPA's review of the cooling system.

Another element in the Seabrook jumble involves the matter of alternate sites. Initial construction was allowed to begin without a study of other locations, required under the National Environmental Policy Act. That item was also before the Nuclear Regulatory Commission Thursday and the NRC said it has "deferred decision" on whether to suspend studies of other possible sites. Whatever in the world that means.

The entire issue of nuclear generation, symbolized by the Seabrook dispute, can be taken to illustrate the sore divisions among us about technology and its application. Nuclear generation is coming—the clean-collar, middle-class Luddites of the Clamshell Alliance are but a rear-guard action, their overheated rhetoric emblematic perhaps as much about our apprehension of the future as about nuclear power generation. The opposition of the anti-nuclear legions has probably had a constructive quotient, forcing more intense consideration of the technology involved.

However, the time is coming, if not already here, when such opposition turns into zealotry and confers no benefit on anyone—except the activists cuddling with their cause.

President Carter in March proposed streamlining licensing for nuclear power plants. There have been hearings in both Senate and House, but it appears unlikely that a bill will emerge from this waning Congress. If the ridiculous case of Seabrook illustrates nothing else, it should clearly and loudly tell the feds that the critical issue of licensing must be resolved.●

POPE PAUL VI

● Mr. EAGLETON. Mr. President, with the death of Pope Paul VI, the world mourns the passing of a gentle and peace-loving man.

When Paul assumed the papacy in 1963, his tenure began in the midst of a time of self-examination by the church. Pope Paul continued with the Second Vatican Council begun by Pope John XXIII, a gathering which resulted in reforms for the Catholic Church. Paul implemented those reforms he found essential for the modernization of the church and rejected those he felt were not in keeping with the church's strong traditions.

Pope Paul's keen insight and forward thinking enabled him to guide the Catholic Church into a changing society without breaking with centuries of tradition.

Chief among Pope Paul's attributes was his commitment to peace. He traveled to every continent but one during his papacy carrying this message. And his struggle for peace and justice extended to a wide range of situations. Paul was equally at home with factory workers and heads of state as he sought to overcome the ills that plague society. No burden was too great for His Holiness. He accepted each challenge with equanimity.

Pope Paul's stature and compassion as a church leader and as a world leader will not easily be matched. He will be missed, but the presence he brought to bear during his days on Earth will remain with us.●

ALASKA "D–2" LANDS

● Mr. LAXALT. Mr. President, this year Congress will be dealing with the permanent disposition of public lands in Alaska, withdrawn in section 17(d)(2) of the Alaska Native Claims Settlement Act for study as potential additions to the national park, wildlife refuge, forest, and wild and scenic river systems. Several bills for the settlement of these so-called "d–2" lands are now before Congress.

Mr. President, as the senior Senator for Alaska has pointed out on many occasions, Alaska is a special kind of State—a State where the lifestyle of the people is closely tied to the use of the land. Alaskans have consistently sought to protect Alaskan wildlife species and scenic wonders of national importance. In fact, two-thirds of the wildlife refuges in the United States and 24 percent of the Nation's national parks are already located in Alaska. But, in the face of legislation which would create over 100 million acres of park systems and include 75 million acres of wilderness, Alaskans rightly fear that the traditional uses on which their lifestyles have depended will be severely restricted. It is hard for us here to understand the vast amounts of land in question or the magnitude of the decision before us. The area considered by some of the legislation is one-fifth of the State of Alaska—15 times the total land area of the State of Maryland.

As Senator STEVENS stated in a recent article in the Baltimore Sun, the decision on numbers of acres is far less important than the decision on what activities will be allowed on these lands. We must allow flexibility of management for this vast amount of land.

These lands are de facto wilderness and we do have a chance to do some real planning to accommodate all of the interests. As Senator STEVENS pointed out, "We must strike a balance—environmental protection and enough flexibility to allow development for recreations and other uses and to permit decisions about use in the future to be made as circumstances require."

I ask that the recent article by Senator STEVENS be printed in the RECORD.

The article follows:

ALASKA'S WILDERNESS

Congress is endeavoring to resolve a significant environmental issue affecting the status of millions of acres of federal-public land in Alaska. The area is equivalent in size to 15 times the total land area of the state of Maryland. The decision to designate certain amounts of this vast Alaskan acreage as national parks, wildlife refuges and wilderness areas will be very important for all Americans of this and future generations. As can be imagined, the progress of the legislation as it moves through Congress is of particular importance to the citizens of my state.

Alaska is a special kind of state. Alaskans have a traditional life-style which is tied particularly to the use of these federal-public lands. We in Alaska join conservationists everywhere in the efforts to protect Alaskan wildlife species and scenic wonders of national importance. Because of the interest of Alaskans, two-thirds of the wildlife refuges in the United States and 25 per cent of the nation's national parks already are located in Alaska.

One area alone, the Arctic Wildlife Range, is 9 million acres in size—almost one and-a-half times the size of Maryland. The immense size of these areas makes it difficult for Congress to grasp the implications of this legislation. The decision on numbers of acres is far less important than the decision on what activities will be allowed to occur on these lands. Alaskans fear these areas may be closed or restricted, preventing traditional uses on which their life-styles have depended.

For instance, in Alaska, which has fewer miles of paved roads than the combined total of Baltimore and Montgomery counties, the use of the airplane and motor boats is essential. Travel to the remote parts of Alaska is almost exclusively by air or water, but provisions in the proposed legislation do not guarantee that airplane and motorboat use will be allowed. As a rule, motorized transportation is prohibited in areas designated by Congress as wilderness. It has been proposed by some that a specific exception be made for Alaska, but the history of such exceptions is not comforting to us. In 1964, Congress designated the Boundary Waters Canoe Area in Minnesota as wilderness and specifically allowed motorized transportation. Legislation is now pending before Congress (under consideration by the same committees which are considering Alaska lands legislation) which would prohibit motorized transportation in the Boundary Waters area. Consequently, Alaskans believe that special provisions inserted in this legislation now would only be eliminated by future Congressional action.

Alaska is a *de facto* wilderness; by that I mean, fully 99 per cent of its land qualifies for designation as wilderness under present congressional guidelines. Because of this unspoiled state, Alaska represents a chance to provide for real planning to accommodate the different national interests involved, particularly from a recreational standpoint. If these areas are to be established for use and enjoyment by the American public, Congress must ensure that adequate provision is made for a wide range of visitor activities.

Legislation presently before Congress would create areas of enormous size without providing for the planning and development of necessary visitor and interpretive facilities. For example, the House bill, H.R. 39, would create an 8-million acre wilderness park in which no visitor facilities would be permitted. In fact, the legislation requires that visitor use be limited to ensure that visitors' facilities would not be needed. This wilderness park is larger than the combined size of Maryland, Delaware and the District of Columbia. Consequently, only those wealthy enough to be able to reach the area by chartered aircraft, and strong and fit enough to camp, hike, and canoe for an extended period of time, would be able to enjoy this area. Legislation creating new parks and refuges in Alaska must ensure that a variety of recreational uses is allowed. H.R. 39, now pending in the House of Representatives, does not do that.

What is needed for the public lands in Alaska is a planning mechanism that will allow flexibility in management. Up to now, Congressional debate has centered on an all-or-nothing approach. Congress must strike

a balance which provides a high level of environmental protection particularly for wildlife and wildlife habitat and still provide enough flexibility to allow development for recreational and other uses and to permit decisions about the use in the future to be made as circumstances require.●

ALLISON CHUN WINS NATIONAL ESSAY COMPETITION

● Mr. INOUYE. Mr. President, recently Miss Allison Chun, a student at Kalani High School in Hawaii, won first prize in a national essay competition sponsored by the Propeller Club of the United States. That prize was a $250 savings bond.

Of greater significance is the fact that Allison Chun and the other participants in this contest learned a lot about the subject of the contest, "The American Merchant Marine: Its Vital Role in the World of Commerce." And in writing her essay, Allison Chun also helped others gain an increased appreciation of the role of the American merchant marine and its important contributions to our welfare.

Mr. President, for the purpose of sharing Miss Chun's excellent prize-winning essay with my colleagues, I request that it be printed in the RECORD.

The essay follows:

THE AMERICAN MERCHANT MARINE: AMERICA'S "FIRST ARM OF ECONOMIC SECURITY"

The American Merchant Marine is described as all vessels in commercial service under the American flag. It is important to the United States in many ways and is nicknamed the "First Arm of Economic Security." The Merchant Marine is one of the key ingredients in the survival of Americans and of America's economy.

The benefits which the United States receive from the Merchant Marine are divided into two major areas: military preparedness and economic value. In turn, the economic benefits can be divided into four areas: services provided by the Merchant Marine, numbers of people employed by it, amount of resources purchased by it, and its contribution to the growth and development of America's foreign trade.

Among the most important benefits that the U.S. receive from the Merchant Marine are the shipping services which it provides for America. The main purpose of shipping is to transport goods from a place where they are of relatively little use to a place where they are needed or of much value and use. Shipping services provide Americans with many of the essential things that they need in order to survive. It provides Americans with foods and goods such as clothing, oil, gas, and medical supplies. Lumber, cement, glass, plumbing fixtures, appliances, paper products, other construction materials, cars, buses and other bulky goods are all shipped to us because they are too bulky to be carried by air. Flammable goods such as fuel, oil, gas, petroleum and petroleum products, explosives, and nuclear products are also shipped because of their potential danger of catching fire on air freighters. Shipping is also cheaper than air transport. A merchant ship can carry larger quantities of any product than an airplane can although air freight services are swifter.

Shipping also provides people with other services in addition to shipping of goods. One such service is the movement of passengers. Examples of this are pleasure cruises or holiday travel on passenger liners, or charters for military and recreational purposes.

In addition to moving of goods and people the Merchant Marine is also a large and important employer. It employs 50–60,000 workers on ships, 20,000 of which are subsidized workers. These subsidized workers are used on the reserve fleet for military purposes in case of a war or some other crisis. Support services such as the shipbuilding and repair industry, employ roughly 100,000 workers, twenty percent of which are involved with construction of just one type of merchant ship.

Thirdly, following services and employment, comes the area of resources bought by the Merchant Marine. The resources referred to are those such as goods and supplies which the Merchant Marine finds essential for maintenance of the vessels and building of ships. Forty million dollars were spent in one year for supplies and stores necessary for the survival and maintenance of the crews and for upkeep of the vessels. Forty-nine million dollars were spent on fuel alone. The Merchant Marine has other operating expenses such as insurance and repairs which cost forty million and thirty-two million dollars respectively. There are also fees and charges to pay while in certain ports. The Merchant Marine also spent two billion dollars in ten years for the purchase of equipment, supplies, and raw materials essential for the construction of ships. So much is spent on the buying of resources and stores that it contributes greatly to the economy. It is also important to industries that sell these goods to the Merchant Marine. Steel companies that provide the steel needed for shipbuilding are heavily dependent on the business it receives from the Merchant Marine. The amount of money spend on resources also helps to keep up the naval stores industry which sells the Merchant Marine a lot of supplies.

In the fourth area, American foreign trade, the Merchant Marine benefits the U.S. in two ways: first, the U.S. can purchase a product that it needs from a country which has an abundance of it at a low cost because there is no demand for that product in that country. Secondly, once the U.S. starts importing this product, there is no need to work as hard at producing it as was necessary prior to the start of the trading. More effort can be put into increasing the production of other U.S. products in order to gain more excess of it for foreign trading.

The United States economy also benefits in other way from the Merchant Marine. One of the other ways the U.S. benefits is from the taxes the Merchant Marine pays. It pays federal taxes such as corporate income and income tax on wages. The estimated amount paid on these taxes by the Merchant Marine comes out to roughly forty to fifty million dollars a year. The Merchant Marine also pays ten million dollars in taxes for purchased goods.

The aforementioned benefits are very important to the United States economy and to the well-being and security of U.S. citizens. The Merchant Marine services, however, are not entirely without their problems. There are a number of things which affect the Merchant Marine in such a way that its services are lost. Dock strikes are one of the major difficulties which affect the Merchant Marine. When dock workers strike, there is no one to load and unload the shipping vessels. As a result, the Merchant Marine's most important service, shipping, is halted. The resulting effects on the economy and citizens is illustrated by an actual occurrence, the 1971–1972 ILWU dock strike.

During the 1971–72 dock strike, 15,000 ILWU workers walked out of twenty-four ports on July 1, 1971 in protest against the Pacific Maritime Association. On Oct. 9, they were forced back to work by a Taft-Hartley injunction. On Dec. 25, the injunction expired. Negotiation broke down and the strike resumed on Jan. 17, 1972. The strike lasted for over 123 days and was the longest of its kind in maritime history.

The results of this strike were felt just about everywhere in the U.S. The places hit the hardest were the West Coast States and Hawaii. The loss of the services caused by the shipping halt resulted in shortages of vital supplies like gas, food, and bulk products such as toilet paper. The shortages caused hoarding of these goods and the inflation of prices, especially that of foods. To make up for the shortages, relief ships were chartered and goods were flown in by air. Due to limited cargo space, air freight was unable to transport a sufficient amount of supplies, necessitating more trips therefore making the cost more expensive.

Foreign trade also suffered. The losses on imports and exports were approximately $1.4 billion. Export crops and goods were blocked and hundreds of millions of dollars were lost. The U.S. became afraid that because of this, foreign purchasers of U.S. exports would take their business elsewhere thinking that U.S. exporting was too unstable. Foreign imports were also blocked from coming in or were left unloaded. This resulted in a significant loss in foreign trade benefits.

If such effects were to be prolonged indefinitely, the economy would be severely affected. The U.S. would have to transport all its goods by other means which would not be as efficient or as cheap. Both prices and shortages would increase. There would be drastic food and fuel shortages. Alternate transport methods would not be able to fill all the peoples' needs and the nation would suffer. Hawaii would be among the first to be affected because of their dependence on shipping for 97.3 percent of all their supplies.

Many companies would go out of business from lack of supplies and many of their workers would become unemployed. Thousands of people whose jobs are connected with shipping would be laid off. The entire shipbuilding industry would collapse. Steel companies and other suppliers of resources to the Merchant Marine would suffer huge losses in business. There would be mass poverty throughout the country. The government would lose a large amount of money in the form of taxes from the Merchant Marine. Lastly, foreign trade would become almost non-existent and all of its benefits would be lost. United States foreign relations would doubtless deteriorate as a result.

In view of these evidences, it may be said that we cannot survive without the Merchant Marine. Its contributions to the United States are too essential for us to do without. The United States is dependent on these services. Without them the United States is a lost, poverty-stricken, and dying nation. The Merchant Marine is essential for our survival.

THE TRIAL OF ALEKSANDR PODRABINEK

● Mr. DOLE. Mr. President, we have just learned that Aleksandr Podrabinek, a 25-year-old medical attendant and human rights activist will be put on trial Tuesday, in a small town 35 miles east of Moscow, for alleged violations of article 190–1 of the RSFSR Criminal Code involving "the circulation of fabrications which defame the Soviet State."

ANOTHER IN A SERIES OF TRIALS

This is yet another in a whole series of recent repressive actions by the Soviet authorities against citizens involved in the investigation of the abuses of basic human rights in that country. Aleksandr Podrabinek's particular offense is that for several years, as the head of the working commission to investigate the abuse of psychiatry for political purposes, he has been collecting documents on cases of psychiatric abuse, involving the forced detention of political and religious dissidents in psychiatric hospitals in the U.S.S.R. His book "Punitive Medicine," which appeared in Samizdat in 1977, detailed examples of these political prisoners in psychiatric hospitals.

ONE EXAMPLE OF PSYCHIATRIC ABUSE

One such example, is the case of Arvidas Chekhanavichus, (Ar-vée-das Chek-a-ná-vi-chus) a Lithuanian, arrested in April, 1973, for "anti-Soviet agitation and propaganda." In other words, Chekhanavichus defended the rights of Lithuanians to express themselves through the medium of their own language and culture. Declared not responsible for his actions, Chekhanavichus was sent for compulsory treatment to the Kaunus Psychological Hospital from which he twice escaped. He has been recently transferred to the Republic Psychoneurological Hospital in Vilnius.

Last September, the World Congress of Psychiatrists meeting in Hawaii passed a resolution condemning this kind of abuse in Soviet psychiatry and called for stop to any further abuses. Aleksandr Podrabinek took the first step in that direction. Apparently, his government has not yet gotten the message.

SOVIETS CONTINUE TO VIOLATE AGREEMENT

The trial of Podrabinek, who faces a possible sentence of 3 years in a labor camp, is unfortunately another indication that the Soviet Government intends to continue to ignore its obligations as a signatory of numerous international agreements dealing with human rights, including the Helsinki Final Act. We, on the other hand, cannot ignore these international obligations and pretend not to see the Soviets violating them. We must point them out every time and insist on compliance with each and every paragraph of every agreement we sign with the Soviets.

In condemning the trial of Podrabinek, therefore, I wish to note that such lack of good faith in implementing the provisions of international agreements raises legitimate doubts about the extent the Soviets can be trusted in other areas and places further burdens on the improvement of our mutual relations. And, of course, we must not forget the very real tragedy of a man whose life is ruined for supporting a philosophy of decency, kindness and caring. We owe it to Aleksandr Podrabinek to recognize his very real courage in fighting for truth and human rights and protest his mistreatment at the hands of his government.●

ASEAN-U.S. MINISTERIAL MEETINGS

● Mr. GLENN. Mr. President, on August 2–4, I, along with my distinguished colleagues, Senator STONE of Florida, and Senator ROTH of Delaware, and distinguished Members of the House of Representatives Mr. WOLFF of New York, and Mr. BURKE of Florida, participated as official members of the U.S. delegation with senior government officials representing the Association of Southeast Asian Nations (ASEAN). These meetings marked the first ministerial level discussions between the United States and ASEAN and provided an opportunity for an open and worthwhile exchange of views on a variety of political and economic topics of mutual and worldwide concern.

The five ASEAN member countries, Indonesia, Malaysia, the Philippines, Singapore, and Thailand established their organization in 1967 with the purpose of accelerating economic growth, social progress and cultural development and to promote peace and stability throughout the Southeast Asian region. The establishment of ASEAN marks the sole successful attempt at regional cooperation and integration in Southeast Asia since the end of colonial control. ASEAN, conscious of past failures and political divisions among themselves as well as the fact that in many respects their countries were economically competitive, chose a careful and deliberate course during its early years of development. More recently, with the establishment of a solid basis for cooperation, the organization has shown a marked increase in momentum. While many concrete and important decisions on future cooperation have yet to be made, ASEAN has, nonetheless, become a firmly established entity—symbolic of regional cooperation and stability.

ASEAN represents a large and diverse group of people. The combined population of the five countries is 245 million, larger than Western Europe, Africa, or South America. Annual per capita income ranges from $300 in Indonesia, a country with vast reserves of largely untapped natural resources, to $2.850 in the industrialized island state of Singapore. ASEAN is becoming an increasingly important trading partner for the U.S. In 1977 international trade between ASEAN and the United States totaled $11 billion, up 15 percent from 1976. Exports from ASEAN countries account for 90 percent of U.S. imports of natural rubber, 72 percent of tin, and 10 percent of all U.S. imports of crude petroleum. ASEAN economic growth rates ranging from 6 to 11 percent over the past 6 years have exceeded world averages. U.S. private investment in the area amounts to $4.4 billion or approximately 15 percent of all U.S. investment in the developing world.

The past 3 years have been the most active period for ASEAN. Summit meetings in 1976 and 1977 led to the formal establishment of a Secretariat, a more defined organizational structure, agreement to establish five industrial projects and an intra-ASEAN trade preference scheme. ASEAN ministers met for the first time with the U.S. in Manila in September of 1977. Under Secretary Cooper of the State Department headed the U.S. delegation to those talks. In addition to its consultations with the U.S., ASEAN holds regular consultations with Japan, Australia, New Zealand, Canada, and the EEC.

A total of 13 foreign and senior economic ministers were in Washington for the recent meetings. The spokesman for ASEAN and leader of the Philippine delegation was Foreign Minister Romulo. Other delegation heads were: Minister Widjojo, Coordinating Minister for Economics, Finance, and Industry for Indonesia; Minister Rithauddeen, Foreign Minister for Malaysia; Minister Rajaratnam, Foreign Minister for Singapore, and Minister Upadit, Minister of Foreign Affairs for Thailand.

The Ministers met with both President Carter and Vice President MONDALE. The U.S. delegation was led by Secretary of State Vance and included Secretary Kreps of the Department of Commerce, Treasury Secretary Blumenthal, Agriculture Secretary Bergland, and Secretary of Energy Schlesinger as well as AID Administrator Gilligan. Other senior U.S. Government officials participating were Chairman Moore of the Export-Import Bank, Ambassador Wolff of the President's Office of the Special Trade Representative, Acting President Poats of the Overseas Private Investment Corp., and International Communications Agency Director Reinhardt.

The meeting began on the afternoon of August 2 with a meeting hosted by myself and Senator SPARKMAN and including six other members of the Foreign Relations Committee. Our discussion focused primarily on economic issues. ASEAN outlined its achievements and asked for a more visable U.S. economic role in the ASEAN region, underlining its concern that the United States take a more responsive attitude on North/South issues, especially on commodity policies.

Later in the evening the ASEAN delegations attended a reception hosted jointly by Commerce Secretary Kreps and Richard L. Lesher, president of the U.S. Chamber of Commerce. This reception provided a forum for business executives from around the country to meet and discuss business issues and policies with the ASEAN officials. Some of the ASEAN ministers participated in further meetings with American businessmen held August 8 in New York.

Wednesday morning the ASEAN delegations attended a breakfast hosted by Representatives ZABLOCKI and WOLFF of the House International Relations Committee to discuss a full range of issues on such topics as normalization of relations with the People's Republic of China and the growing problem of Indochinese refugees.

The Thursday session was chaired by

Secretaries Vance and Kreps and began with an exchange of views on recent developments affecting ASEAN and the United States including consideration of the refugee problem. The afternoon session dealt primarily with economic matters beginning with an exchange of views on North/South issues with particular reference to commodity policy issues. Under Secretary Cooper stated that he felt there had been some narrowing of differences in regard to the Common Fund but much hard work remains to be done. Secretary Vance pledged active U.S. pursuit of an agreement, recognizing both the practical and symbolic importance of a successful negotiation. Deputy Special Trade Representative Wolff answered ASEAN requests for improvements in GSP.

The United States announced its support for the enabling clause in GATT which would make GSP a permanent part of the world trading system. Chairman Moore and Mr. Poats outlined the expanded role of Eximbank and OPIC in the region and announced intended visits by the Eximbank Chairman and an OPIC organized investment mission for the autumn of this year. Other activities included an address to the National Press Club by Minister Rajaratnam and a dinner hosted by Secretary of State Vance.

Friday morning Treasury Secretary Blumenthal gave an overview of economic trends relevant to United States-ASEAN relations including a discussion of U.S. tax policies. The afternoon session dealt with United States-ASEAN development cooperation and the results of a recent meeting of technical experts from both sides in Manila. There was an exchange of views on food, energy, science, and technology and narcotics and agreement to establish the framework for further cooperation in those areas. There was also an agreement to establish a working group for expanded regional education and cultural exchange programs. In the meeting with President Carter the ASEAN ministers heard a reaffirmation of an abiding U.S. interest in Southeast Asia and recognition of the strength and viability ASEAN. In an afternoon press conference Minister Romulo emphasized that ASEAN came with a hand extended in friendship rather than begging for a handout. The ASEAN countries, he said, had effectively disproved the "domino" theory of the eventual collapse of free enterprise economies in Southeast Asia. Following the meetings on Friday ASEAN hosted a dinner at which Vice President MONDALE was the guest of honor.

The meetings were successful both practically and symbolically. There was visible progress toward the facilitation of U.S. private investment in the area as well as advances in the field of development cooperation. ASEAN representatives were able to meet with leaders of Government, labor, and business as well as present their achievements and aspirations to the media. Most importantly, both sides left with a heightened understanding of each other's concerns and goals for the future. I hope that this meeting marks the beginning of a continuing dialog between the United States and the five key nations of Southeast Asia comprising ASEAN.●

RANGE CONDITIONS OF PUBLIC GRAZING LANDS

● Mr. LAXALT. Mr. President, I recently had the privilege to testify concerning S. 2475 and H.R. 10587, bills to improve the range conditions of the public grazing lands. I ask that my statement be printed in the RECORD.

The statement follows:

STATEMENT BY SENATOR PAUL LAXALT

Mr. Chairman, I wish to commend the Committee for holding these hearings on S. 2475 and H.R. 10587. As we all are aware, this is an effort to address in a single bill several issues that effect the future of the Western public lands, and I might add, that this is a historic opportunity for Congress to assert a clear and deliberate policy toward resolution of many of the problems involving the management and improvement of the public lands administered by the Bureau of Land Management and the Forest Service. I was pleased to be able to join my distinguished colleague from Idaho, Senator Church, in introducing this legislation in the Senate.

As you are aware, Mr. Chairman, this proposal addresses the following matters: problems with levels of range improvement funding; an over population of free roaming wild horses and burros, which is of particular concern in Nevada; uncertainty as to what scale and type of range improvements projects may proceed under current law and court decisions; the potential hardship to the ranching community throughout the West, and particularly in my State of Nevada, from proposed increases in grazing fees; and several other matters of serious concern.

I believe everyone agrees with the comprehensive approach to range improvements that S. 2475 and H.R. 10587 represent. The range land improvement funding provisions, in my view, represent a serious commitment that has been long overdue.

With your indulgence, Mr. Chairman, I would like to point out that I have been more than disturbed by the series of misleading reports which have colored the opinion of Congress, the media, and the public nationally on the problems and conditions of the Western public lands. In this context, I call your attention to the BLM report "Effects of Livestock Grazing on Wildlife, Watershed, Recreation and Other Resource Values in Nevada".

Now known as the "Nevada Report", this document became a key piece of evidence in the *Natural Resources Defense Council* vs. *Morton* suit, which resulted in a landmark judgment which has had a serious impact on Nevada and the West, and will continue to have an impact into the unforseeable future. In my view, Mr. Chairman, the reports purposes were obviously preconceived. It was prepared by five Washington BLM "experts" who spend eleven days in Nevada in 1973, and, despite severe scarcity of basic information on the range at that time, managed to survey over 47 million acres and determine the conditions on them. I think it is important to note that the BLM team, while in Nevada, made no contact with local, state, or University personnel or repositories of competent and pertinent information, and the team said they were not charged with reporting BLM's past accomplishments in Nevada in range management. An obvious oversight after BLM's 40 years in my State of Nevada. After recommending steps to be taken to compensate for certain purported deficiencies, on the basis of the report, BLM in Washington came to the conclusion ". . . the evaluation report points to a critical resource condition on BLM lands . . ." and attributes this to livestock overgrazing.

At this point, I would like to point out that federal statistics and knowledgeable observation, paint a far different picture. For example, Nevada's sheep counts for 1920 show 1,340,000 head, and this steadily diminishes each decade to 1973, the year of the previously mentioned BLM evaluation which shows over one million less—171,000. Now, in 1978, the sheep industry in Nevada is in effect wiped out. Mr. Chairman, I think this speaks for itself.

Mr. Chairman, the provisions of S. 2475 and H.R. 10587 that spell out those range improvements that can be made before completion of an Environmental Impact Statement are most important and indeed necessary. These include such range improvements as fencing, small water developments, fish and wildlife projects, restoration of native vegetation, and vegetative manipulation through grazing management. These improvement efforts should speed the process of getting on with the important business of maintaining and upgrading our public lands in the West.

Mr. Chairman, the results of passage of the Wild Free Roaming Horse and Burro Act of 1971 has far surpassed anyone's wildest imagination. Populations of wild horses and burros now pose a serious problem in my State of Nevada, and I might add, that we have approximately 60 percent of the wild horse and burro population in the nation. In certain areas of Nevada, these wild horse and burro populations now pose a serious threat to wildlife, livestock, over all range conditions, and even to the horses and burros themselves. Consequently, I support the provisions of S. 2475 and H.R. 10587 relating to wild horses and burros which would allow the Secretary additional discretion and control over these animals.

Mr. Chairman, I understand that the major area of controversy with the Administration appears to be the Sections of S. 2475 and H.R. 10587 dealing with grazing fees. I believe it is important to recognize that grazing fees paid by permittees for grazing on public lands can, at certain times, make or break a ranching operation. Even a small increase in grazing fees can have serious impacts on some ranchers even to the extent of forcing some ranchers out of business. Mr. Chairman, I cannot support this as public policy. I support the grazing fee formula recommended by the Grazing Fee Technical Committee. I introduced this recommendation in the form of legislation (S. 2458) on January 30, 1978, and I am pleased that this same formula is included as part of this comprehensive legislation.

Mr. Chairman, the Administration continues to press for a fair market value basis for a grazing fee based upon the results of the Private Land Lease Survey. I must express doubts about the reliability of the Private Land Lease Survey. For example, Mr. Chairman, my staff informs me that for years 1976 and 1977, there were no responses from Arizona or Nevada to the Private Lands Lease Survey. Up to 25 percent of the public land permittee are from these two states. Given this fact, how can we accept that a fair market value has been determined for grazing fees for these two states.

In my view, the Technical Committee's recommended formula is far more equitable because it takes into consideration the short term cost of production and beef prices, while at the same time being sensitive to the long range forage valeus. Mr. Chairman, this formula will have minimum adverse economic impact upon our Western livestock industry. The public land grazing land fee issue has

been with us for many years. I hope we can once and for all settle this issue by establishing statutorily this grazing fee formula.

This concludes my statement, Mr. Chairman, and thank you for the opportunity. I look forward to participating in the discussions during the hearing procedures.●

GENOCIDE CONVENTION SHOULD BE RATIFIED EARLY IN THE NEXT SESSION

Mr. PROXMIRE. Mr. President, in the past 30 years, the Senate Committee on Foreign Relations has considered the United Nations Genocide Convention five times. And five times—in 1950, 1970, 1971, 1973, and 1976—the committee favorably reported the treaty to the Senate.

How did the Senate respond to the committee's recommendation? On each of these occasions, the Senate refused to ratify the Genocide Treaty. We have not joined the 83 nations that have outlawed the crime of genocide.

For 11 years, I have urged my fellow Senators to ratify the Genocide Convention. Last month, when I concluded my July 31 speech, I was pleased and proud to learn that my friend, Senator JAVITS, will attempt to place the treaty on the Foreign Relations agenda early in the next session. I salute the distinguished Senator from New York for his strong and consistent support of the Genocide Convention. His announcement has renewed my commitment to the treaty. I am even more determined to see it ratified in the next session.

Mr. President, this will be the sixth time that the committee has taken up the Genocide Convention. What can we expect from the committee's deliberations? Will they again favorably report the treaty?

Undoubtedly, they will. The case for the Genocide Convention is stronger than ever. Daily we are reminded of atrocities perpetrated against many of the world's citizens. Need I mention Cambodia, Uganda, or Nicaragua. President Carter strongly supports the convention, as do many major interest groups, including the American Bar Association. We continuously reaffirm our official commitment to human rights, yet we have failed to ratify this crucial human rights document. Our support for the Genocide Convention has never been more important.

The Foreign Relations Committee will undoubtedly agree with me. But what about the Senate? Will the Senate oppose the committee a sixth time? Will we again fail to protect the most fundamental of human rights—the right to live?

I sincerely hope not. Mr. President, I call upon my colleagues to reflect seriously upon the Genocide Convention. In the coming months, I trust that each and every Senator will ask what he or she can do to further the cause of human rights.

What can we do, Mr. President? We can act quickly in the next session to ratify the Genocide Convention.

SENATE RESOLUTION 464, REORGANIZATION PLAN NUMBERED 2 INDEFINITELY POSTPONED

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Calendar No. 972 be indefinitely postponed—that is a resolution relating to Reorganization Plan Numbered 2—the time having expired on Friday last.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The following proceedings occurred earlier:)

Mr. PERCY. Mr. President. will the Senator yield?

Mr. MOYNIHAN. I am happy to yield to the Senator from Illinois for a unanimous-consent request.

HOW TO SAVE ENERGY BY SAVING ENERGY

Mr. PERCY. Mr. President, I express deep appreciation to my distinguished colleague and it is quite fortuitous that he is one of the founders of the alliance to save energy from New York and is floor managing the bill today.

Mr. President, beginning at 4 o'clock today John deButts, a distinguished constituent of Senator MOYNIHAN and Senator JAVITS, and chairman of the board of A.T. & T., will accompany me to the special exhibit set up by A.T. & T. that will be available for all Senators, members of their families, members of the staff, to see an exhibit truck and trailer how the American public can save energy in every single home in America and save money at the same time.

Mr. President, energy conservation must play a more prominent role in the Nation's energy program. Conservation is something we can do right now, both in our industries and as individuals. But conservation should not mean drastic setbacks in our varied way of life and standards of living. Rather, the focus of conservation can and should be on how to live better using energy more efficiently.

We need to raise the consciousness of American people about conservation. Too many homeowners have heard the saying, "Energy conservation begins at home," looked around their houses, and have not known what to do. Often, they inquire of their Congressmen. It is important for Senators and Representatives to know specific energy conservation modifications and improvements so we can suggest them to constituents and, incidentally, so we can install them in our own homes.

John deButts, chairman of the board of A.T. & T. and board member of the Alliance to Save Energy, recently told me about a portable exhibit demonstrating in miniature a variety of household energy conserving devices. They range from insulated walls to water-saving toilets. The devices are demonstrated in such a way—with digital readouts showing the amount of energy saved and used, and taped messages on telephone receivers explaining the techniques—that people can immediately see the dollars and cents rationale behind energy conservation. It is a very impressive exhibit, of immediate practical relevance to almost everybody. The exhibit, housed in a house trailer, was constructed by C. & P. Telephone Co.

ARCO Solar, a subsidiary of Atlantic Richfield, has graciously loaned the alliance a solar panel operating a small television which will be on display outside the trailer. Robert O. Anderson, chairman of the board of Atlantic Richfield, serves on the board of advisors of the Alliance to Save Energy.

The Alliance to Save Energy, of which Senator CRANSTON and myself are cochairmen, and several hundred Members of Congress are Members, has arranged for the exhibit to be on the Capitol grounds, on the Senate side of East Capitol Street extended, August 14 through the 16 from 8 a.m. to 4 p.m. so that Senators, Representatives, staff members and other interested people can see it and learn from it.

John DeButts and I will be there at 4, Monday, August 14 to walk through the exhibit and I invite all my colleagues to be there too.

The success of increased energy conservation will depend, to a large extent, on the development of attitudes and habits which foster an efficient use of energy; and we can help develop those attitudes and habits by being more responsive to the homeowners of this country.

In order to be more responsive and effective in answering constituent inquiries as to how they can help conserve energy in their homes, I urge you to make every effort to visit the exhibit during those 3 days.

Mr. President, I wish to express appreciation to my distinguished colleague and again commend he and Senator JAVITS on the leadership role that they have played in the field of conservation energy which I think is very much in the national interests, and if we pass no other bill, as a part of our energy package—the natural gas bill, we just cannot deliver it—I hope we will go right ahead with the utility rate bill, with the conservation bill, and coal gasification, which are so important. They constitute a package that is important enough and impressive enough for us to move forward and begin to say we are developing a national energy policy because the greatest source of energy available to this country, immediately, low cost, highly efficient and ecologically sound, is conservation energy.

I commend again my distinguished colleague for his leadership in this field and for yielding at this time.

Mr. MOYNIHAN. Mr. President, I think that this interlude should not pass without it being stated what is so patently the case, that is, the Senator from Illinois who has given the leadership of the Nation in the national alliance to conserve energy of which New York State is but one component. It has been a remarkable task of organization which could easily have consumed the energies of one executive of extraordinary ability, which he certainly is, doing nothing else, and he has managed to do that and yet

remain, be the active and informed and innovative legislator in so many other fields, is a measure of not just ability but devotion in this area, and we are much in his debt.

Mr. PERCY. I thank my distinguished colleague.

CHICAGO CITY COUNCIL URGES HALT TO SURPRISE MEDIA SEARCHES

Mr. PERCY. Mr. President, on May 31, the Supreme Court ruled in Zurcher against Stanford Daily that the police, armed with a warrant, could conduct surprise searches of newsrooms for evidence of a crime, even though no newsperson is suspected of any complicity in that crime. Since that decision, there has been grave concern expressed throughout the country about the potential power that this court decision places in the hands of the police. There is a growing fear that this decision may have a profoundly harmful impact on freedom of the press, and, indeed, on every citizen's right to privacy.

The idea of policemen rummaging around a newsroom—opening drawers, rifling files, searching through wastebaskets—is totally contrary to our fundamental belief in a free press. It is an image drawn from a police state.

A reporter's stock in trade is the ability to gather information, often from confidential sources. If we permit these police searches, such sources will soon dry up and, with them, the public's access to information independent of government.

In response to the Supreme Court's ruling, the Chicago City Council Committee on Federal and State Legislation, under the distinguished chairmanship of our former colleague, Roman Pucinski, recently held hearings to examine the ominous implications of Zurcher. The committee received testimony from Clayton Kirkpatrick, editor of the Chicago Tribune, Paul Beavers, news director of WMAQ–TV, Don Reuben, attorney for both news operations, and Anthony Damato, professor at Northwestern Law School. The committee approved a resolution on freedom of the press which the city council passed unanimously on July 7. The resolution strongly asserts that the Supreme Court's decision endangers the first amendment guarantee of freedom of the press. Furthermore, it urges Congress to pass legislation that would preserve freedom of the press, and to review present standards for search and seizure as they affect all citizens of the United States.

I congratulate Chairman Pucinski and his colleagues on their swift response to this very troubling decision by the Court.

Zurcher should not remain the law of the land. It is not only a blow to freedom of the press but also a serious infringement of our right to privacy. Reporters are not the only ones threatened by this decision. This ruling unlocks the doors of innocent citizens' homes and offices for surprise searches for evidence. It renders almost meaningless the confidentiality promised by clergymen, doctors, psychiatrists, and lawyers. As Justice John Paul Stevens noted in his dissent in Zurcher:

> Just as the witnesses who participate in investigation or a trial far outnumber the defendants, the persons who possess evidence that may help to identify an offender, or explain an aspect of a criminal transaction, far outnumber those who have custody of weapons or plunder. Countless law abiding citizens—doctors, lawyers, merchants, customers, bystanders—may have documents in their possession that relate to an ongoing criminal investigation. The consequences of subjecting this large category of persons to unannounced police searches are extremely serious. The ex parte warrant procedure enables the prosecutor to obtain access to privileged documents that could not be examined if advance notice gave the custodian an opportunity to object. The search for the documents described in a warrant may involve the inspection of files containing other private matter. The dramatic character of a sudden search may cause an entirely unjustified injury to the reputation of the person searched.

The Citizen's Privacy Protection Act, S. 3164, introduced on June 5, 1978, by Senators BIRCH BAYH, HOWARD METZENBAUM, and myself would put a halt to surprise searches of innocent people. It would require Federal, State, and local law enforcement officials to forego a search warrant and, instead, obtain a subpena for evidence of a crime when that evidence is in the hands of someone not suspected of the crime. The measure would still allow police to obtain a search warrant if there is probable cause to believe that the evidence would be destroyed, hidden, or removed. I urge my colleagues to act quickly on this legislation, and protect these fundamental rights.

Mr. President, I ask unanimous consent that the text of the Chicago City Council's resolution on freedom of the press and the accompanying letter from Roman Pucinski, the chairman of the council's Committee on Federal and State Legislation, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CITY COUNCIL,
Chicago, Ill., July 12, 1978.

Hon. CHARLES H. PERCY,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR PERCY: As Chairman of the Chicago City Council Committee on Federal and State Legislation I am enclosing for your information a copy of a resolution on "Freedom of the Press" unanimously passed by the City Council of the City of Chicago on July 7, 1978. This resolution memorializes the U.S. Congress ". . . to enact legislation which would protect newspapers and other media from governmental search where there is no reasonable basis for belief that the parties involved in the media have been guilty of any crime." This resolution further urges ". . . Congress to review present standards for search and seizure as they affect all citizens of the United States."

Sincerely,

ROMAN PUCINSKI,
Chairman, Committee on Federal and State Legislation.

RESOLUTION ON FREEDOM OF THE PRESS

Whereas the freedom of the press has been one of the tenets of American beliefs; and

Whereas newspapers and other media publicly disseminating information have historically been active and often essential in protecting our people from excesses and improprieties whether by a private or governmental body; and

Whereas to preserve freedom of the press and to protect media investigation and analyses in our country it is essential that newspapers and other media publicly disseminating information be protected from governmental review of their files and records or governmental harrassment where there is no reasonable basis for belief that the parties involved in the media have been guilty of any crime; and

Whereas Congress has the obligation to uphold the principal of freedom of the press; and

Whereas the right of the various media to be protected in the confidential nature of their investigations has been endangered by a recent decision of the United States Supreme Court to the effect that the Constitutional guarantees of freedom of the press do not protect the media from governmental search and that a warrant for such search can be issued even though the party involved is not presumed guilty of or involved in any crime;

Now Therefore be it resolved that the City Council of the City of Chicago memorialize the Congress of the United States to enact legislation which would protect newspapers and other media from such governmental searches;

We further urge Congress to review present standards for search and seizure as they effect all citizens of the United States.

SOLOMON GUTSTEIN, 40th,
MARIANE HUMES, 8th,
GEORGE J. HAGOPIAN, 30th,
ROBERT T. KELLAM, 18th,
ESTHER SAPERSTEIN, 49th,
TIMOTHY C. EVANS, 4th,
WILLIAM O. LIPINSKI, 23d,
EUGENE C. SCHULTER, 47th.

NEW ACCIDENT FIGURES CONFIRM NEED FOR IMPROVING TRUCK SAFETY

Mr. PERCY. Mr. President, truck safety is a pressing concern for every American who drives a car. In Illinois alone, in 1976 there were over 92,000 truck accidents which killed 527 people and injured 18,885 more.

The figures from across the Nation are similarly grim. Last week the National Highway Traffic Safety Administrator, Joan Claybrook, advised me that over 6,600 Americans died in truck accidents in 1977. This is a 7.9-percent increase over 1976, and a startling 20.8-percent jump over 1975. NHTSA's figures show that in a car/heavy truck collision, the car occupant has only a 43-percent chance of living.

Mr. President, I ask unanimous consent that the complete text of Administrator Claybrook's letter to me may be printed in the RECORD at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PERCY. I am pleased to announce today that my distinguished colleague from Massachusetts, Senator KENNEDY,

is joining me as a cosponsor of S. 2970, the Truck Safety Act of 1978. Senator KENNEDY is a respected leader on trucking matters, and has held extensive public hearings on trucking regulation. He is the principal sponsor of legislation to reform truck length limits, which I am pleased to cosponsor. I am happy to have the benefit of Senator KENNEDY's expertise on the Truck Safety Act.

I spoke of this much-needed legislation in this Chamber in April when I introduced the bill. Since then, I have been pleased with the comment it has received. I plan to continue to consult with interested groups on the measure.

Specifically, S. 2970:

Raises civil fines from $500 maximum to $2,500 maximum for each substantial violation and $10,000 for extremely serious safety violations.

Enlarges the scope of Federal safety regulation by including any truck over 10,000 gross vehicle weight rating in interstate commerce—interstate trucks—and affecting interstate commerce—intrastate trucks.

Authorizes the Secretary of Transportation to regulate the working conditions and operating practices of employees, to insure that trucks are so maintained as to prevent accidents, and to conduct research into new enforcement techniques and training programs.

Authorizes the Secretary to arrange to conduct on-the-job inspections and investigations.

Gives trucking employees the right to require DOT investigations of violations of safety regulations.

Requires the DOT to serve citations upon alleged violators of safety laws who are then given 15 days to notify DOT of their intent to contest the citation.

Authorizes an administrative adjudicatory hearing before the National Transportation Safety Board (NTSB) in cases of contested citations.

Provides for judicial review and enforcement of NTSB decisions and orders.

Protects trucking employees from discharge or discrimination for their attempts to promote greater trucking safety.

Authorizes DOT to establish penalty schedules designed to induce timely compliance with the law.

Authorizes moneys to be appropriated from the highway trust fund for the purpose of offering financial incentives to States for implementing truck safety programs which have been approved by the Secretary.

Requires the Secretary to write a yearly report to Congress outlining his progress in increasing truck safety on the Nation's highways.

The Truck Safety Act is aimed at reducing needless carnage on the Nation's highways. Whereas people used to be afraid to fly in airplanes, today many are too often afraid to drive to the airport.

Senator KENNEDY and I may soon be offering S. 2970 as a floor amendment to other legislation. But whether it is dealt with as an autonomous bill or an amendment, the purpose is the same: saving lives.

EXHIBIT 1

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION,
Washington, D.C. 12, 1978.

Hon. CHARLES PERCY,
Ranking Minority Member,
Senate Governmental Affairs Committee,
Washington, D.C.

DEAR SENATOR PERCY: In response to your request, we have prepared the following data on truck accident fatalities for the last three years.

	1975	1976	Percent change	1977	Percent change
Vehicle miles traveled (in millions)	274,454	306,950	11.8	(1)	
Registrations	25,775,700	27,719,600	7.5	[2] 29,218,000	5.4
Total fatalities	5,477	6,130	11.9	6,614	7.9
Pickup/vans	4,332	4,893	13.0	5,215	6.6
Heavy trucks [3]	717	859	19.8	950	10.6

[1] Figure unavailable.
[2] Estimate.
[3] Single Unit Trucks over 26,000 Gross Vehicle Weight (GVW) and articulated trucks.

I am also enclosing a copy of the "Heavy Trucks—Special Report" that has other pertinent information about heavy truck involvement in fatal accidents.

Please let us know if there is any other information we can provide for you and your staff on this issue.

Sincerely,

JOAN CLAYBROOK.

SCIENTIFIC EVIDENCE CONFIRMS NEED TO BAN LIQUID PROTEIN: WARNINGS INSUFFICIENT

Mr. PERCY. Mr. President, scientific evidence continues to mount documenting the apparent dangers of predigested liquid protein diets used in conjunction with a total fast. Fifty-eight known deaths have now been associated with the use of liquid protein. Eleven were women between 25 and 44 who had no pre-existing health condition which might have contributed to the deaths.

On November 22, 1977, in a letter to Donald Kennedy, Commissioner of the Food and Drug Administration, I urged that liquid protein be immediately removed from the Nation's markets pending proof of its safety and efficacy. No action was taken, other than merely to warn potential users of the danger.

Several new scientific studies substantiate my earlier position. I have attached to my statement several of these studies.

The first, by the FDA, concludes that over one-third of the women who used liquid protein reported illness and that one-quarter of those who became ill said they had to seek medical care. Twenty-five percent of those who fell ill were hospitalized. I have attached for the RECORD copies of letters from Commissioner Kennedy dated June 23, 1978, and July 17, 1978. These letters outline the contents of the national survey. I have also included a management summary.

This new scientific information regarding liquid protein diets is alarming. How much longer will it be before this dangerous health hazard is banned from our Nation's pharmacies, health food stores, and supermarkets? How many more people will die lacking awareness of the seriousness of the risk or from desperate crash dieting?

Additional scholarly studies in this regard are contained in the July 14, 1978, issue of the Journal of the American Medical Association. One of these studies, "Liquid Protein Diets and Torsade de Pointes" by Bramah M. Singh, M.D.; Thomas D. Gaarder, M.D.; Thomas Kanegae, M.D.; Mark Goldstein, M.D.; John Z. Montgomerie, M.D.; Harold Mills, M.D.—all from Los Angeles area institutions—concludes:

Our data leaves little doubt that the observed electrocardiogram abnormalities must be attributed to the liquid protein diet.

The same issue contains the article, "Cardiac Complications of Protein-Sparing Modified Fasting" by four Army physicians stationed at the William Beaumont Army Medical Center in El Paso, Tex. The authors, Capt. Jerry M. Brown, Maj. Joseph F. Yetter, Lt. Col. Melvin J. Spicer, and Capt. Jack D. Jones, conclude:

Strict protein-sparing modified fasting is not without immediate attendant risks, and potential cardiac sequelae (abnormal conditions) may not yet be recognized.

An editorial in the same issue, "Liquid Protein Mayhem" by Dr. Theodore B. Van Itallie, an authority on nutrition at St. Luke's Hospital Center in New York City, stated:

It is simply not possible to ignore the growing implications that prolonged use of liquid protein diet is hazardous and potentially fatal. The liquid protein diet has never been adequately studied, either in laboratory animals or in human volunteers. Its potential for causing harm short of death is poorly understood. In light of these facts, its use in the treatment of obesity cannot be justified.

Another critical conclusion was reached in the May 4, 1978, issue of the New England Journal of Medicine in an article entitled "Sudden Death in a Patient on a Liquid Protein Diet" by Robert R. Michiel, M.D.; Jeffrey S. Sneider, M.D;. Richard A. Dickstein, M.D.; Harvey Hayman, M.D.; and Robert H. Eich, M.D. The article is associated with the Department of Medicine

in the Division of Cardiology, the State University of New York, Upstate Medical Center, Syracuse, New York. The authors wrote:

Our patient had evidence of loss of lean body mass attributable to the diet that she pursued as recommended in the Last Chance Diet. Her clinical course and pathological findings suggest that her death was related to the cardiac effects of starvation resulting from the diet.

Lastly, in a letter to Commissioner Kennedy, Dr. Philip Felig, vice chairman of the Department of Internal Medicine at Yale University School of Medicine, wrote:

Until the efficacy of the protein-sparing modified fast has been established and the cause of deaths in patients on liquid protein has been clarified, all forms of diet therapy consisting solely of protein should be viewed as potentially hazardous. The liquid diet should consequently be restricted to investigational use. I believe that the public's interest is best served if this course of action is taken by the Food and Drug Administration.

In view of this accumulated and growing scientific evidence, I again urge the Food and Drug Administration to remove liquid protein from consumer sales, pending proof of its safety and efficacy. I understand that the FDA will soon propose new warning labels for liquid and powdered protein substances. Warning labels are not enough in view of the real dangers to human health associated with the use of liquid protein. Rather than leading to a healthier, happier life, for many persons liquid protein has led to the hospital and to the grave.

Mr. President, I ask unanimous consent that the materials I have referred to be printed in the RECORD

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FOOD AND DRUG ADMINISTRATION,
Rockville, Md. June 23, 1978.

Hon. CHARLES H. PERCY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PERCY: The cooperative Center for Disease Control-Food and Drug Administration investigation into deaths associated with the use of liquid protein diets is continuing. A nationwide telephone survey was recently completed to develop data on the number of women between the ages of 25 and 44 who have used liquid protein diets for a month and more during 1977. I will send you a full report of the survey; however, preliminary information allows us to more accurately calculate estimates of the mortality rates for users of these diet regimens. In general, the survey results confirm the earlier crude estimates presented in Los Angeles last December by Dr. Foege, Director of CDC, to the House's Subcommittee on Health and the Environment of the Committee on Interstate and Foreign Commerce.

At the present time, we have reports on the deaths of 16 women whose clinical history fits the distinctive pattern previously described to you. One of the 16 deaths was a Canadian citizen, and 4 of the deaths were women not in the 25 to 44 age group. The remaining 11 deaths were American women 25 to 44 years of age. Data from the telephone survey allowed an estimate of the number of women on the diet for a month or more in 1977. Taking into account the fact that death data are available for less than a full year, we have an estimated adjusted annual mortality rate of 22 deaths per 100,000 women in this age group on the diet for more than a month. Using the survey data for women on the diet for 2 months or more (all of the deaths having occurred in women who were dieting for more than 2 months), the estimated mortality rate is 59 deaths per 100,000 white women 25 to 44 years of age. As Dr. Foege stated at the hearing in Los Angeles, the estimate of the death rate for cardiac deaths of similar character, not associated with use of a diet, in women in this age group (an estimate still to be confirmed by studies now in progress) is about 2 per 100,000 women per year. The liquid-protein dietary regimen, if followed exclusively for more than 2 months, would appear to account for almost a 30-fold increase in mortality.

To put these figures into better perspective, the following table lists mortality rates of the most frequently recognized causes of death for white women in these age groups.

Age, 25–29. Annual mortality rate/100,000 for most common cause, 12.7. Most common cause of death, motor vehicle accidents.

Age, 30–34. Annual mortality rate/100,000 for most common cause, 11.9. Most common cause of death, motor vehicle accidents.

Age 35–39. Annual mortality rate/100,000 for most common cause, 20.3. Most common cause of death, breast malignancy.

Age, 40–44. Annual mortality rate/100,000 for most common cause, 35.5. Most common cause of death, atherosclerotic heart disease.

We will keep you apprised of further developments as they become available.

Sincerely yours,

DONALD KENNEDY,
Commissioner of Food and Drugs.

FOOD AND DRUG ADMINISTRATION,
Rockville, Md., July 17, 1978.

Hon. CHARLES H. PERCY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PERCY: In my letter of June 23, 1978, concerning the cooperative investigation by the Food and Drug Administration (FDA) and the Center for Disease Control (CDC) of deaths associated with the use of liquid protein diets, I discussed a nationwide telephone survey we had conducted and promised to send you a copy of the survey report. This is enclosed.

The telephone survey was performed under contract to develop data on the number of women between the ages of 25 and 44 who were dieting to lose weight during calendar year 1977. The primary purpose for the survey was to determine the incidence of use of protein products, particularly liquid protein-derived products, by women dieters in the age range of interest. By combining this information on product usage with data for deaths that we are aware of which occurred during the latter half of 1977, a more precise estimate could be made of the mortality rate among women dieters.

My letter of June 23 indicated that the estimated mortality rate due to cardiac arrhythmias and related cardiac abnormalities among liquid protein users dieting for two or more months is 59 deaths per 100,000 white women 25 to 44 years of age. This rate is in contrast to the estimated rate for cardiac deaths of similar character, not associated with use of a diet to lose weight, of about 2 per 100,000 per year in women in this age group. A study by CDC and the National Center for Health Statistics to more accurately determine this latter rate is still in progress.

We will be glad to respond to any questions you or your staff may have regarding the enclosed report.

Sincerely yours,

DONALD KENNEDY,
Commissioner of Food and Drugs.

A NATIONAL SURVEY OF THE USE OF PROTEIN PRODUCTS IN CONJUNCTION WITH WEIGHT REDUCTION DIETS AMONG AMERICAN WOMEN

(By Raymond E. Schucker, Ph.D., Office of the Associate Director for Nutrition and Consumer Sciences, Bureau of Foods, Food and Drug Administration, Washington, D.C., and Walter J. Gunn, Ph.D., Chief, Research and Evaluation, Bureau of Health Education Center for Disease Control, Atlanta, Ga.)

I. MANAGEMENT SUMMARY

In December 1977, Dr. Julius Richmond, Assistant Secretary for Health, named a protein diet task force in the Public Health Service to investigate a number of sudden deaths reported among young and middle aged women who had been using protein products in strict dieting programs. As a part of their investigation, the Task Force requested scientists of CDC and FDA to design and direct a joint nationwide study of the prevalence and manner of use of such products by women in the range of 25 to 44 years of age. The most important findings are summarized below:

1. While fewer than 10% of the women interviewed claimed to have used some form of protein product as part of the diet or fasted in 1977 as a means to lose weight, these practices were reported at all income levels in the population.

2. Including an allowance for uncertainty due to sampling, an upper limit estimate (.95 confidence) of 98,000 white females aged 25–44 in the United States used a liquid protein-derived* product in 1977 for a minimum of one month or more as a principal or sole source of nourishment. Of these, an estimated 37,000 used the liquid product form for two months or more.

3. The reported users of protein products were generally above average on a weight/height obesity index relative to a normative random sample of adult women of the same age from the Health and Nutrition Examination Survey (HANES). The median obesity index for white female liquid protein users fell within the eighth decile of the HANES sample.

4. Of those who used liquid protein *alone*, on a daily basis without taking any other food, 64 percent said they were taking a potassium supplement and 86 percent said they were taking vitamins and/or minerals as a supplement. In the case of powdered protein users, only 26 percent were taking potassium and 79 percent were taking vitamins and/or minerals. For those who were using a total fast to lose weight, only 17 percent said they were taking supplemental potassium and 59 percent were taking vitamins and/or minerals.

5. Three-quarters or more of those dieting for less than one month, whether using protein products or not, were receiving *no* medical supervision at all, and only 5 to 10 percent were under continuous medical supervision. While a higher percentage of long-term dieters sought continuous medical supervision, no more than 25 percent of the liquid protein product users did so.

6. About one-third of all liquid protein users said they had become ill as a result of the product. One-quarter of these said they had to seek medical care, and of these, one-fourth said they were hospitalized.

7. Although the number of women using liquid protein has fallen off (but not completely ceased) since November 1977, the use of powdered protein appears to be increasing. There is an increase in the number

---

*The shorter terms liquid or liquid protein used throughout this report refer to liquid protein-derived products, which typically are aqueous solutions of partially hydrolyzed gelatin.

of women who are using total fasts as a means of losing weight.

8. The majority of former liquid protein users said they were not willing to use these products again in the future, and most often cited adverse physical and/or emotional reactions, illness, and concern about safety as the reasons.

[From the Journal of the American Medical Association, July 14, 1978]

LIQUID PROTEIN DIETS AND TORSADE DE POINTES

(By Bramah N. Singh, MD; Thomas D. Gaarder, MD; Thomas Kanegae, MD; Mark Goldstein, MD; John Z. Montgomerie, MD; Harold Mills, MD)

(From the Division of Cardiology (Drs. Singh and Mills) and Department of Medicine (Dr. Goldstein), Cedars-Sinai Medical Center, Department of Medicine (Drs. Singh and Mills), University of California Los Angeles School of Medicine, Department of Medicine, (Drs. Gaar and Montgomerie), Univerisity of Southern California School of Medicine, Cardiology Division (Dr. Kanegae) Roos Loos Medical Center, and Department of Medicine (Drs. Gaarder and Montgomerie), Rancho Los Amigo Hospital, Los Angeles.)

[Figures not printed in RECORD.]

(Three women, aged 27, 33, and 35 years, experienced recurrent syncope five months after losing 36 to 41 kg using liquid protein diets. No abnormalities were noted during physical examination except in one who was hypothyroid. Serum potassium levels varied between 2.9 and 3.9 mEq/liter. The ECGs demonstrated prominent U waves, QU prolongation, and ST and T wave abnormalities, with left axis deviation in two patients. Syncopal episodes were due to ventricular tachycardia and fibrillation, which were not responsive to conventional antiarrhythmic agents used in two patients. Patients using liquid protein diets may thus experience reversible QU prolongation giving rise to serious arrhythmias that are probably best treated with drugs that shorten the QT interval. Caution should be exercised in the use of liquid protein diets for weight reduction in obesity. (*JAMA* 240:115–119, 1978))

Most cases of fatal and recurrent ventricular arrhythmias occur in patients with organic cardiac disease. However, sporadic cases of sudden death and recurrent ventricular tachycardia (VT) have been associated with gross QT prolongation in patients without clinical evidence of heart disease. Of particular interest is the atypical VT (*torsade de pointes*) causing sudden death or recurrent syncope that may be aggravated by conventional antiarrhythmic agents. *Torsade* may occur in the setting of a toxic reaction with quinidine and quinidine-like agents, phenothiazines, notably thioridazine, tricyclic antidepressants, and in the hereditary syndrome of QT prolongation with and without deafness. Recent reports have indicated that severe electrolyte deficits such as hypokalemia and hypomagnesemia may also induce *torsade*.

The possibility that severe metabolic and electrolyte derangements may produce *torsade* or other ventricular arrhythmias has recently been raised from reports of sudden death in young women using weight-reducing liquid protein diets. Recently, three such patients were admitted into hospitals in the Los Angeles area for the investigation of recurrent syncope. All had many of the ECG features of *torsade de pointes*, with abnormal QU prolongation. Two died of intractable arrhythmias; the patient who survived was treated with phenytoin sodium, which appeared to control the recurrent *torsade*. We suggest a tentative antiarrhythmic approach for other cases that might be encountered.

REPORT OF CASES

CASE 1.—A 27-year-old woman entered the hospital on Oct. 13, 1977, for the evaluation of recurrent syncope. Five months previously when she weighed 121 kg, she was given a liquid protein diet (15 ml/day, with potassium supplements) for weight reduction. She lost 41 kg and remained well until Oct. 11, 1977, two days before admission into hospital, when she experienced a transient syncopal spell with apnea. When seen at an emergency room of a local hospital, the question of a hysterical reaction was raised. On the following day, four similar episodes of syncope with apnea supervened.

At the time of admission, the patient weighed 76 kg. Her heart rate was 95 beats per minute and regular, her blood pressure (BP) was 85/54 mm Hg (supine without postural fall), her respirations were 20/min, and her temperature was 37.4 °C rectally.

Results of routine laboratory investigations were all normal, with a serum potassium value of 3.9 mEq/liter; calcium, 8.4 mg/dl; and magnesium, 1.8 emEq/liter. Toxicological tests for hynotics, sedatives, and amphetamines were negative. The chest roentgenogram and an echocardiogram were normal. An ECG taken 24 hours after hospital admission (Fig. 1) showed low-voltage T waves, prominent U waves, prolonged QU interval, and left anterior fascicular block.

In the hospital, the patient experienced two further syncopal spells, the first of which was short-lived; for the second, caridopulmonary resuscitation (CPR) was required to restore sinus rhythm. An ECG taken during CPR showed VT (Fig. 2). The patient was transferred to the Medical Intensive Care Unit after intravenous administration of 200 mg of phenytoin sodium. During the next 24 hours, no further episodes of syncope occurred, and the patient was given an 800-calorie diet. On Oct. 16, 1977, a further episode of self-terminating VT (Fig. 2) was reported. The following day, three episodes of VT were reported during continuous ECG monitoring, each episode was associated with apnea and loss of consciousness.

Administration of phenytoin sodium was commenced with 300 mg and continued with 100 mg every six hours thereafter. However, before therapy with phenytoin could be completed, the patient had further episodes of VT, one of which became sustained and refractory to electrical shocks with maximal energy defibrillation. Successful defibrillation was finally achieved after intravenously injected epinephrine. Lidocaine hydrochloride infusion, 2 mg/min, was then commenced, and therapy with phenytoin was completed within 24 hours, at which time, lidocaine infusion was stopped. Oral phenytoin sodium, 100 mg three times a day, was given, and no further episodes of ventricular arrhythmias supervened. Twenty-four hours after the commencement of therapy with phenytoin (Oct. 18, 1977), there was a substantial improvement in the appearances of the ECG (Fig. 2).

The patient continued to lose weight on an 800-calorie diet. Continuing this diet, she was discharged on Oct 27, 1977. Two days later, she was readmitted with a left-sided pleural effusion and pyrexia, which were attributed to phenytoin therapy. Therefore, the latter was discontinued, and a complete regression of symptoms occurred. Five days after the discontinuance of therapy with phenytoin, an ECG showed no abnormalities. The patient remains well.

CASE 2.—A 33-year-old woman was admitted to the hospital Oct. 27, 1977, with a one-day history of three syncopal episodes during brief periods. On one occasion, a seizure-like activity was present. The patient had been adhering rigidly to a liquid protein diet for six months before admission, commencing in March 1977, during which time she lost 41 kg. She felt weak and tired following exercise for two weeks before admission but was not short of breath. She become intolerant of cold and was aware of mental sluggishness for a month before admission. Her menses had been regular.

The patient had lifelong obesity, without history of diabetes mellitus, hypertension, or heart disease. In March, before commencing the diet, findings of thyroid tests and the ECG were normal (Fig 3). Ten days before admission, her serum potassium level was 4.2 mEq/liter, and uric acid value was 7.2 mg/dl. The liquid protein diet consisted of 30 ml four times daily, supplemented with potassium chloride, 1-g tablet four times a day, and prenatal vitamins, which contain calcium, magnesium, and other vitamins including vitamin C. Fluid intake consisted mainly of diet soft drinks. She received no thyroid medication at the time of admission, and she denied drug or alcohol abuse. She had discontinued the diet four days before admission and had started eating a light diet.

At the time of admission, her BP was 90/60 mm Hg, respirations were 18/min, and her temperature was 35.8 °C orally. Except for the clinical evidence of hypothyroidism, other findings were normal. Thyroid function tests shower a thyroxine test value of 1.6 g/dl (normal, 5.0 to 13 μg/dl), and triiodothyronine test resin uptake was 25%. Free thyroxine index was 0.40, and thyroid-stimulating hormone was 90 units (normal, 0 to 12 units). The serum potassium value was 3.6 mEq/liter; magnesium, 1.7 mg/dl; and calcium, 8.8 mg/dl. Results of other routine laboratory tests, including a chest roentgenogram, were within normal limits. The ECG (Fig 3) showed low-voltage QRS, flat or inverted T waves, and prolonged QT_c interval, minute R waves. On the day after admission, the ECG showed QT_c of 0.43 seconds and prominent U waves, with notably prolonged QU_c interval (Fig 3).

In the intensive care unit, the patient received a 1,000-calorie low-sodium diet and 5% dextrose intravenously, as well as multivitamins, thiamine, and magnesium orally. She complained of cold intolerance but felt well otherwise. The next morning she became unconscious during an episode of VT that was defibrillated successfully. The VT demonstrated the changing QRS axis typical of *torsade de pointes*. After reversion to sinus rhythm, the ECG still showed grossly abnormal inverted T and U waves. Lidocaine infusion was begun, and because her serum potassium level was 3.0 mEq/liter, she was given potassium intravenously. An echocardiogram showed no pericardial effusion or mitral valve prolapse.

Throughout the day, the patient had severe, repeated episodes of VT, each episode responding to electrical cardioversion. In the afternoon of the day after admission, the patient had another episode of VT that deteriorated into ventricular fibrillation (VF). Cardioversion was initially unsuccessful. Cardiopulmonary resuscitation was maintained for 45 minutes, during which time the patient had periodically an almost flat line on the ECG. Her heart rhythm was electroconverted on more than ten occasions. Dopamine hydrochloride drip was started, endotracheal intubation was performed, and the patient received respiratory assistance. She received several ampuls of calcium chloride, three injections of 100 mg of procainamide hydrochloride, 500 mg of phenytoin sodium, 500 μg of triiodothyronine, and 125 mg of methylprednisolone sodium succinate. Sinus rhythm was restored, and BP returned to normal. She also received a rapid infusion of 500 ml of 20% glucose, with 30 mEq of potassium and 5 units of soluble insulin.

The patient regained consciousness and appeared well oriented. However, two hours

later, she experienced another episode of VT followed by VF that was refractory to treatment. Autopsy demonstrated a normal-sized heart, with round cell infiltration of the myocardium and of the thyroid gland that was moderately enlarged.

CASE 3.—A 33-year-old woman was hospitalized because of recent symptoms of headache, fatigue, and recurrent syncope. She was well until five months previously when she had begun taking a liquid protein weight-reducing diet. During this period, she lost 36 kg.

On admission (Aug. 23, 1977), the patient appeared well, with evidence of recent weight loss. Her BP was 88/50 mm Hg, and her pulse rate was 110 beats per minute. Results of laboratory tests were normal. Serum electrolyte levels were as follows: sodium,. 140 mEq/liter; potassium, 2.9 mEq/liter; bicarbonate ion, 34 mEq/liter; chlorine, 91 mEq/liter; calcium, 8.9 mg/dl; magnesium, 1.5 mg/dl. There were no abnormalities on the chest roentgenogram; the ECG demonstrated left axis deviation, sinus rhythm, intraventricular conduction defect, ST–T wave abnormalities, prominent U waves, and prolonged QU interval.

Eight hours after entry into the hospital, the patient experienced rapid tachycardia that reverted spontaneously to sinus rhythm. The serum potassium level at the time was 4.0 mEq/liter. An ampul of magnesium sulfate and an ampul of calcium chloride were given by slow intravenous infusion, the patient having had intravenous potassium administered at the time of admission. About 12 hours after admission, further QRS prolongation to about 120 msec was noted on the ECG; the patient was hypotensive and obtunded. Two hours later an episode of tachycardia (150 per minute) with wide QRS complexes was noted on the ECG. Reversion to sinus rhythm occurred spontaneously.

Dopamine infusion was instituted with the placement of a Swan-Ganz triple-lumen catheter and a percutaneously inserted intraarterial cannula for continuous monitoring of the arterial pressure. The patient became alert and orientated and remained stable for the next 12 hours. However, 30 hours after admission, VT occurred, which reverted to normal sinus rhythm after electrical cardioversion. Lidocaine infusion was then instituted.

Thirty-seven hours after entry into hospital, recurrent episodes of VT deteriorating into a sine-wave pattern with total electromechanical dissociation was noted. During approximately three hours of CPR, multiple electrocardioversions, as well as multiple drug regimens, including intracardiac epinephrine, intravenous lidocaine, procainamide, glucagon, bicarbonate, and calcium, as well as digoxin were sequentially administered. Unexpectedly the rhythm converted spontaneously to sinus tachycardia with narrow QRS complexes, with a BP of 130/80 mm Hg. The left axis deviation noted at the time of admission regressed to normal limits. Large doses of intravenous dexamethasone, 4 mg/day, were started, therapy with digoxin and lidocaine was continued, and a small-dosage dopamine infusions was maintained. However, 60 hours after admission, bradycardia with associated wide QRS complexes set in suddenly. It rapidly progressed to asystole. Multiple drug administrations and CPR were unsuccessful in restoring cardiac rhythm during the next three hours. Autopsy disclosed prominent round cell infiltration in the myocardium, with no other abnormalities.

COMMENT

All our three patients were young and obese, and each had lost 36 to 41 kg during three to five months using a liquid protein diet before the onset of syncope. However, the most important finding was the striking similarity in the ECG appearances with notably prolonged QU_o interval and nonspecific T wave abnormalities associated with paroxysmal VT. This observation is of particular importance in the light of the increasing number of unexplained sudden deaths in young patients using liquid protein diet reported to the Center of Disease Control.

Our data suggest that the mode of death is VT or VF due to gross repolarization abnormalities in the heart. The mechanism of the QU_c prolongation in these patients is, however, unclear, but a causal relationship between delayed repolarization and serious ventricular arrhythmias here appears inescapable. On the other hand, it is not known what proportion of patients using various liquid protein diets have such ECG abnormalities and whether all such patients are at risk for the development of serious arrhythmias.

A variety of clinical conditions with abnormally long QT_c or QU_c interval of the ECG have been associated with VT or sudden death. However, none of the recognized syndromes with such abnormalities could be identified to account for the observed ECG abnormalities in our three patients. In one of our patients, an ECG taken before the diet was commenced showed normal QT_c or QU_c intervals. Furthermore, in the patient who survived (case 1), there was a complete regression of the ECG abnormalities present at the time of hospital admission. The change in the ECG appearances was unlikely to be related to phenytoin therapy since the improvement persisted after the drug therapy was discontinued.

Similarly, the ECG disturbances found in our cases could not be attributed to the chronic ingestion of arrhythmogenic drugs, nor could they reasonably be related to the derangement of serum electrolytes even though severe hypokalemia, hypocalcemia, or hypomagnesemia are known to produce life-threatening ventricular arrhythmias. In all three patients, the serum electrolyte levels were normal; in two, the serum potassium value was in the lower range of normal, and the lowest recorded level was 2.9 mEq/dl in the third patient. Despite these marginally depressed serum potassium and magnesium levels, the ECG appearances were compatible with hypokalemia, but the presence of the left axis deviation in two of the three patients is unusual. Although it is not a well-known complication of hypokalemia, it has been reported in cases of severe hyperkalemia. It should be emphasized that a precise quantitative relationship between serum potassium levels and the evolution of ECG changes is, of course, not always found, and the possibility that profound electrical abnormalities in the myocardium may well exist without a comparable reduction in the serum potassium concentration cannot be excluded.

Our second patient had clinical and biochemical evidence of hypothyroidism during the period that she was using the liquid protein diet. Hypothyroidism is, however, an unlikely mechanism for VT or VF in this patient in the light of the findings reported by Feedberg et al., who showed that hypothyroidism is associated with a uniform prolongation of the absolute refractory period, whereas thyrotoxicosis produces the converse, thus accounting for the well-known propensity for associated atrial arrhythmias.

Our data leave little doubt that the observed ECG abnormalities must be attributed to the liquid protein diet. The mechanism through which these changes might arise is uncertain. Sudden death during therapeutic starvation for obesity has previously been verified in a few patients in whom it was attributed to acidosis.

The arrhythmias in our three patients exhibited many of the features of *torsade de pointes*, the recognition and management of which has recently been reviewed by Krikler and Curry. They emphasize the recurrent and often self-terminating nature of the VT occurring in association with QU_c interval prolongation in most but not all patients, each episode being initiated by an ectopic ventricular beat occurring late rather than early in diastole in contrast with the classic form of ventricular tachycardia found in ischemic or other types of cardiac disease. Another difference relates to the further lengthening of the QT_c or QU_c intervals by conventional antiarrhythmic drugs, which may thus aggravate rather than control the ventricular arrhythmias. It is notable that the two of our patients who died were treated with a variety of conventional antiarrhythmic agents, including procainamide. The only patient who survived was given phenytoin as the sole antiarrhythmic drug, except for a brief period of lidocaine infusion. A further point emphasized by Krikler and Curry is that, barring the correction of the underlying disorder and the repletion of electrolyte deficits, isoproterenol infusion may be effective in preventing recurrent *torsade* since catecholamines may rectify repolarization abnormalities in this setting.

While experience is limited, it is difficult to make recommendations regarding the correct approach to arrhythmias that may be encountered in patients using low protein diets. However, since the diet may induce ECG-repolarization abnormalities, from theoretical and initial clinical considerations, drugs that prolong the QT_c or QU_c intervals should be avoided in the treatment of ventricular arrhythmias associated with this disorder. The role of drugs like propranolol and lidocaine, which do not alter QT_c or QU_c interval substantially, remains uncertain, as does that of ventricular pacing. However, until the mechanism of these cardiac complications apparently resulting from the use of liquid protein diets in some patients has been clarified, caution should be exercised in promulgating this mode of therapy for weight reduction.

CARDIAC COMPLICATIONS OF PROTEIN-SPARING MODIFIED FASTING

(By Capt. Jerry M. Brown, MC, USA; Maj. Joseph F. Yetter, MC, USA Lt. Col. Melvin J. Spicer, MC, USA; Capt. Jack D. Jones, MC USA)

(From the Departments of Medicine (Drs. Brown and Spicer) and Pathology (Drs. Yetter and Jones), William Beaumont Army Medical Center, El Paso, Tex.

The opinions expressed herein are those of the authors and do not necessarily reflect those of the US Army or Department of Defense.)

[Figures not included in RECORD]

Cardiovascular abnormalities developed in a patient during a protein-sparing modified fasting diet. Syncope was the complaint at the time of examination. Hypotension, persistent QT interval prolongation, and a low QRS voltage were observed before the development of refractory ventricular tachycardia. At autopsy, antemortem thrombi were attached to the left ventricular endocardium and a fenestrated aortic valvule. Strick protein-sparing modified fasting is not without risk of sudden death even with close medical supervision. (JAMA 240: 120-122, 1978)

The Last Chance Diet[1] has popularized protein-sparing modified fasting[2]; remarkable weight losses with relatively minor

side effects are reported. At our institution, close medical follow-up includes attention to vitamin, mineral, and potassium supplementation and screening for uric acid elevations. However, death occurred in a patient who adhered strictly to this diet and lost weight rapidly.

REPORT OF A CASE

A 34-year-old woman was transferred to William Beaumont Army Medical Center for evaluation of a syncopal episcode. The patient previously enjoyed good health and was being followed up closely by a physician, with physical examination and laboratory determinations every two weeks. She had lost a total of 40.5 kg. (from 107.7 to 67.2 kg) in five months on a diet consisting of 300 calories/day exclusively derived from a liquid protein hydrolysate. Her medications were vitamins and potassium chloride (20 mEq/day); she had taken no oral contraceptives for six years.

Medical History.—The patient had no complaints during her visits, and there was no history of prior syncopal episodes. Laboratory determinations (automated multiple analysis system, electrolyte value) remained normal during the interval of weight loss. Moderate physical exertion on a hot, arid day appeared to be the only factor contributing to her syncopal episode. The patient did not smoke cigarettes or consume alcoholic beverages. There was no family history of sudden death or cardiovascular disease. Past medical history included adolescent onset of obesity and borderline hypertension that had normalized with dieting.

Examination Findings.—At the time of examination, the patient was disoriented and stuporous, with a blood pressure of 65/0 mm Hg. Complete mental clearing occurred after the infusion of approximately 2 liters of 5 percent dextrose in normal saline with 20 mEq of potassium chloride per liter. Her blood pressure had risen to approximately 90/60 mm Hg, with no orthostatic changes. Findings from the remainder of her physical examination were normal except for redundant folds of skin over the torso and proximal extremities.

Laboratory evaluation showed a normal complete blood cell count except for 18 percent bands. Platelet count, ESR, prothrombin time, activated partial thromboplastin time, electrolyte, creatine phosphokinase-MB isoenzyme, and blood chemistry values were all normal, except for total protein of 5.5g/dl. The serum potassium and calcium values were normal on multiple determinations, as was the serum magnesium level. Urine specific gravity was increased (1.028), but analysis results were otherwise normal. Three sets of anaerobic and aerobic blood cultures were sterile. Findings from serum protein electrophoresis and thyroid function studies were normal. Rapid plasma reagent and antinuclear antibody tests were negative. Arterial blood gas levels were normal.

Initial chest roentgenogram showed pulmonary interstitial markings with B lines of Kerley, and it remained unchanged eight hours after admission. There was no cardiomegaly (Fig. 1) The initial ECG (no other available for comparison) performed with the patient notably hypotensive showed low QRS voltage. The QT interval, corrected for heart rate (QT_c), was striking prolonged (QT_c, 0.58 seconds; normal, by <0.44), with both prolonged Q to onset of the T wave and increased T-wave duration.

Rhythm strips demonstrated a low atrial focus in leads I, II, and III, but in a V_1, an accelerated junctional focus was transiently dissociated from the atrial impulse (Fig. 2). In lead V_6, sinus-node activity appeared after an atrial fusion beat (Fig. 2). No ventricular ectopy was noted during continuous monitoring, and a repeated ECG eight hours after admission was normal except for unexplained low QRS voltage and QT interval prolongation (QT_c, 0.59 seconds).

Although the patient remained hypotensive, urinary output was adequate. Cosyntropin stimulation elicited a normal adrenal response from a normal baseline serum cortisol level. The patient felt well and had no signs of distress while remaining in an intensive care unit. Abruptly, approximately 24 hours after admission, refractory ventricular tachycardia developed without premonitory signs of ventricular ectopy. Lengthy cardiopulmonary resuscitory maneuvers were unsuccessful.

Autopsy findings.—An autopsy, aside from mild passive congestion of the lungs, abnormalities were confined to the heart. The heart weight was normal (300 g) and showed no dilation; valve circumferences and chamber sizes were within normal limits. The coronary arteries were free of identifiable atherosclerosis, thrombi, or emboli. Adherent to the anterior left ventricular endocardium was a 15×10×5-mm irregularly shaped, firm, dull-red thrombus. The right cornary cusp of the aortic valve was fenestrated. Entwined with the more distal fibrous cord of the fenestrated cusp was a firm, gray, 3×3×12-mm elongated thromboembolus (Fig. 3). All other valve leaflets, the epicardium, myocardium, and endocardium showed no abnormalities.

Microscopic examination of both thrombi confirmed them to be antemortem. Histologically, the left ventricular endothelium and myocardium showed no abnormalities. No systemic emboli or venous thrombi were demonstrated. Examination of the brain was excluded.

COMMENT

The literature on fasting generally regards it as a relatively safe and acceptable alternative in dieting. However, Garnett et al described refractory ventricular fibrillation in an otherwise healthy 20-year-old woman following a 30-week near-starvation diet supplemented with vitamins, potassium, and limited amounts of protein supplements. Their patient had completed the modified fast and did well until approximately seven days after a refeeding regimen was instituted.

New ECG abnormalities, substantive QT interval prolongation (QT_c, 0.56 second), and low QRS voltage were noted subsequent to syncope, ventricular fibrillation, and immediate successful resuscitation. The ECG changes persisted for 1½ days before the terminal episode of fibrillation. Electron microscopy of the mycoardium showed an apparent increase in sarcolemmic mitochondria and disruption and a small number of myofibrils.

The clinical findings of Garnett et al—QT_c, interval prolongation with no biochemical or metabolic explanation, ventricular ectopy, and ventricular fibrillation—are similar to those of our case. In addition, surveillance by the Center for Disease Control has accumulated data on ten patients, including our patient, who died suddenly while dieting or refeeding after prolonged protein-sparing modified fasting. The QT interval prolongations, low ECG voltage, and refractory ventricular tachycardia were the dominant clinical findings. These common findings suggest that QT_c, interval prolongation heralds an unpredictable period of ventricular instability in patients who semistarve.

Thurston and Marks reported ECG abnormalities in seven of nine patients who met Dally's criteria for the diagnosis of anorexia nervosa. Five of these nine subjects had minimal QT interval prolongations. Spencer thought the cause of sudden death in two patients who fasted and had congestive heart failure was ventricular fibrillation.

The association of QT interval prolongation and sudden death is well known. The hereditary syndromes of QT interval prolongation with deafness (Jervell and Lange-Nielsen) and without deafness (Romano-Ward) are characterized by a recurrent syncopal episodes secondary to ventricular tachycardia and sudden death without low low QRS voltage. These patients respond best to propranolol hydrochloride, phenytoin sodium, and stellate ganglion blocks, all of which may shorten the QT interval. In our case, we have no controlled experience with antiarrhythmics but noted refractoriness to lidocaine hydrochloride, procainamide hydrochloride, propranolol, and phenytoin.

Classically, thrombosis occurs in the following three circumstances: endothelial damage, increased coagulability of blood and conditions of abornmal (slow) flow. Perhaps myocardial dysfunction, as reflected in a low QRS voltage, hypotension, and pulmonary edema, accounted for the development of a left ventricular mural thrombus in our patient. Evidence supporting a hypercoagulable state or endothelial damage is lacking. Apparently, a portion of this thrombus broke away and became entwined with the cords of the fenestrated right coronary cusp. Because of this attachment, intermittent occulsion of the right coronary artery could be postulated as a cause of cardiac arrythmias; however, in the cases detected by the Center for Disease Control, no similar findings were indentified.

Physicians and the public are becoming aware of sudden deaths occuring during the protein-sparing modified fast and in the immediate refeeding period. The high incidence of low QRS voltage and QT_c interval prolongation and the reported association of ventricular ectopy to include ventricular tachycardia in the cases of prolonged near starvation reviewed provide the most plausible cause for these deaths.

An antemortem thrombus originating on a normal left ventricular endocardium is a distinctly unusual pathological finding; ventricular dysfunction may exist in patients undergoing strict prolonged protein-sparing modified fasting. Strict protein-sparing modified fasting is not without immediate attendant risks, and potential cardiac sequelae may not yet be recognized.

[From the Journal of the American Medical Association, July 14, 1978]

LIQUID PROTEIN MAYHEM

In this issue of The Journal, Singh et al (p 115) and Brown et al (p 120) report a total of three deaths of female patients who had adhered faithfully to a liquid protein diet (providing about 300 kcal/day in the form of protein hydrolysate) for five to six months. The immediate cause of death in every case was refractory ventricular tachycardia and fibrillation. A fourth patient experienced repeated episodes of ventricular tachycardia, but, after a stormy course, her condition was controlled with phenytoin sodium. The patient subsequently recovered. The ECGs of all four patients showed gross abnormalities of repolarization characterized by prominent U waves and QT prolongation. All of the patients were relatively young women aged 27 to 35 years, and, except for their obesity, all had been in good health before undergoing supplemented fasting.

At the time the cardiac complications were first observed, the patients had lost 36 to 41 kg (about 0.27 kg/day) but had not yet reached their desirable weight. All had been taking potassium supplements (20 to 40 mEq/day), and all received some degree of medical supervision. Laboratory data obtained soon after hospital admission showed the serum potassium levels to be normal in three of the patients and low (2.9 mEq/liter) in the fourth. None of the other laboratory tests appeared to throw light on the mechanism of the arrhythmias. At autopsy, no gross abnormalities of the coronary arteries or myocardium were noted. However, on histological examination, prominent round-cell infiltration of the myocardium was demonstrated in two of the patients. In the third patient who died, electron microscopy of the myocardium disclosed an apparent increase in sarcolemmal mitochondria and disruption and fewness of myofibrils.

Officials of the Food and Drug Administration and the Center for Disease Control are currently investigating 46 deaths associated with the use of liquid protein diets.[1] At last count, 15 of the fatalities were in women without serious underlying disease who died from cardiac arrhythmias after prolonged and exclusive use of liquid protein products. These unnecessary deaths are a somber reminder of the tragic consequences that can occur when therapy outstrips its research base. It appears that the liquid protein materials were never tested in appropriate laboratory animals to determine their safety for prolonged use for weight reduction.

Moreover, there is a serious dearth of detailed clinical studies of the metabolic effects of the liquid protein diet. It is also disturbing that the principal ingredient of the liquid protein mixture is a hydrolysate made largely from collagen or gelatin obtained from cowhides and other sources of connective tissue, materials of notoriously poor protein quality. Indeed, laboratory assays of some of these dietary producers have shown them to possess a protein efficiency ratio of less than zero. The same products have also been shown to be grossly deficient in essential trace element.

The liquid protein diet derives from a relatively new approach to weight reduction that was described by Apfelbaum et al[2] in 1967 and further developed by Blackburn et al,[3] Genuth et al,[4] and Baird et al.[5] This approach, which has been variously described as supplemental, protein-supplemented fasting, and protein-sparing modified fasting, involves adherence to a diet with a low energy content (300 to 600 kcal) and is composed almost entirely of protein or a mixture of protein and carbohydrate. In his original three-week study of moderately obese women, Apfelbaum et al[2] fed 55 g of protein (as casein) per day and reported that, although nitrogen balance was negative during the first week, it subsequently came into equilibrium. Bistrian et al[6] have used a diet consisting of 1.5 g of high quality protein per kilogram of desirable weight, while Genuth and his associates[4] used 45 g of egg albumin and 30 g of sucrose per day together with supplementary vitamins and minerals.

Although some disagreement remains as to whether such diets are completely and indefinitely effective in sparing body protein, there is little doubt that they decrease the overall nitrogen losses associated with total caloric starvation. However, it must be noted that the variants of supplemented fasting briefly described above all use food sources that yield proteins of high biologic value. Also, the regimen of Blackburn et al[3] provides a sufficiently high protein intake to make it likely that some of the amino acids are available to meet essential carbohydrate needs.

Even the supplemented fasting regimens that make use of protein of high quality are not always benign. The ones that are ketogenic are poorly tolerated by many patients with only mild obesity; moreover, a variety of distressing side effects have been reported by many patients; these include fatigue, dehydration, orthostatic dizziness, hair loss, skin dryness, cold intolerance, muscle cramps, amenorrhea, and decreased libido. Although these side effects are common, they are generally minor and well tolerated by the massively obese subject.

As regards the liquid protein diet, described in the popular press as the "last chance" diet,[7] it is difficult to find an excuse for using protein products of poor quality in regimens that, in any case, tend to deplete body protein. Although the role of the biologic quality of the protein used in such regimens has not been determined, it is conceivable that the ingestion of an unbalanced mixture of amino acids to supplement a fast will exacerbate rather than reduce the stress of starvation.

The precise mechanism of the fatal cardiac arrhythmias associated with prolonged adherence to the liquid protein diet remains to be worked out. It is possible that, despite serum potassium values, which are often in the normal range, and in spite of some potassium supplementation, an intracellular potassium deficiency, which is known to be capable of damaging the myocardium, slowly developed in patients who exhibited cardiac arrhythmias.[8] Thus, it is not clear whether the deleterious effects of liquid protein diets occur because of some insidious dietary deficiency, eg, of protein, potassium, or a trace element, because of the presence of a toxic agent of some sort in the preparation, or because of some totally unexpected cause.

The few remaining proponents of the liquid protein diet argue that, in spite of the reported fatalities associated with its use, this dietary approach is still acceptable because it is uniquely effective in the treatment of resistant obesity and will, therefore, be invaluable in reducing the morbidity and mortality associated with this disorder. Such reasoning is fallacious; there are safer alternatives to the liquid protein diet that are equally effective and nutritionally more rational. But, in any case, no drastic weight reduction regimen makes sense unless adequate provision is made for subsequent maintenance of weight loss. Nor is there any basis for using protein-supplemented fasting in the treatment of mild obesity. Physicians should be aware that even supplemented fasting regimens that use proteins of high quality are still considered to be at the investigational stage by workers at several medical centers in the United States.

More to the point, it is simply not possible to ignore the growing indications that prolonged use of the liquid protein diet is hazardous and potentially lethal. The liquid protein diet has never been adequately studied, either in laboratory animals or in human volunteers. Its potential for causing harm short of death is poorly understood. In light of these facts, its use in the treatment of obesity cannot be justified.

SUDDEN DEATH IN A PATIENT ON A LIQUID PROTEIN DIET

(By Robert R. Michiel, M.D., Jeffrey S. Sneider, M.D., Richard A. Dickstein, M.D., Harvey Hayman, M.D., and Robert H. Eich, M.D.)

(From the Department of Medicine and the Division of Cardiology, State University of New York, Upstate Medical Center.)

Sudden death in adults without serious underlying heart disease has emerged as a major complication of the liquid protein diets.[1,2] Fifteen such cases have been reported to the Center for Disease Control and the Food and Drug Administration since July 1, 1977. This communication describes the course of one of these patients who was admitted to the Upstate Medical Center with intractable ventricular arrhythmias. The findings on post-mortem examination of the heart, skeletal muscle and liver are compatible with starvation.

CASE REPORT

A 38-year-old woman was admitted to Crouse-Irving Memorial Hospital on October 22, 1977, complaining of syncopal episodes. In February, 1977, she had weighed 153 kg and, against her physician's advice, had begun "The Last Chance Diet" based on Dr. Robert Linn's book of the same name.[3] According to the patient and her family she adhered to the diet rigidly. She took 600 kcal of liquid protein (beef-hide extract) daily. She also received supplements of multivitamins, calcium, folic acid and potassium, 24 meq daily in the form of a slow-release tablet (Slow K). During the eight months on this diet, up to the time of admission, she felt well and was able to continue her regular job as a secretary. A 63-kg weight loss was documented during these eight months. Serial laboratory tests, including serium electrolytes, uric acid, calcium, complete blood count and liver-function tests, were normal except for a transiently elevated serum glutamic oxalactic transaminase.

One week before admission thyroid tests were obtained as part of her routine follow-up observation. The serum level of thyroxine by radioimmunoassay was 3.6 μg per deciliter (normal, 4.6 to 11.6), free thyroxine 0.9 ng per deciliter (normal, 0.9 to 2.3) and thyrotropin 40 μU per milliliter (normal <10). She was clinically euthyroid at that time.

Two days before admission she had an episode of dizziness while driving. Several minutes later she had a syncopal episode in a gas station. Over the next few hours, she felt unwell and vomited several times. On the next day she felt well. On the morning of admission she was found at home in an unresponsive state with her eyes rolled back and her arms moving stiffly. She was not incontinent. There was no history of recent head trauma or alcohol use. She was then transported to the emergency room.

The pertinent past medical history included a hospitalization for a perirectal abscess in 1973, when the serum levels of thyroxine (Murphy-Pattee method) were 4.5 and 5.5 μg per deciliter (normal, 6.0 to 11.8) and the free thyroxine 0.4 ng per deciliter. She was clinically euthyroid and was not treated. A routine electrocardiagram obtained at that time revealed sinus rhythm, a prolonged QTc interval (0.50 second) and minor nonspecific polarization abnormalities. There was no history of cigarette smoking.

In the emergency room, the patient was awake and alert. Physical examination revealed an obese, oriented female with a blood pressure of 110/70 mm Hg, pulse of 80 beats per minute and regular, and respirations at a rate of 12 per minute. The pupils were equal and reactive to light, and the fundi were normal. There was no jugular venous distention, and the carotid pulses were normal. A nodule 2 cm in diameter was palpated in the left lobe of the thyroid gland. The lungs were clear to percussion and auscultation. Cardiac examination revealed a nonpalpable apical impulse, normal heart sounds and no murmurs, gallops or rubs. The abdomen was obese, without organomergaly by

palpation. The peripheral pulses were normal, and there was no clubbing, cyanosis, edema or calf tenderness. Neurologic examination gave entirely normal results.

The initial electrocardiogram (Fig. 2) revealed sinus rhythm, low voltage, a prolonged QTc interval (0.56 second) and nonspecific repolarization abnormalities. X-ray study of the chest gave normal results. The initial laboratory-test values included a serum sodium of 144, potassium of 4.2, chloride of 109 and bicarbonate of 15 meq per liter, calcium of 10.1 (normal, 8.5 to 10.5), magnesium of 1.8 (normal, 1.8 to 2.5), phosphorus of 2.3, creatinine of 1.3, uric acid of 7.5 and cholesterol of 220 mg per deciliter, glutamic oxalacetic transaminase of 72 mU per liter (normal, 8 to 40) and creatine phosphokinase of 45 U per liter (normal <80) and albumin of 3.8 g per deciliter. The urea nitrogen was 11 mg per deciliter, and a complete blood count was normal. Areterial-blood gases drawn while the patient was breathing room air revealed a pH of 7.45, with oxygen tension of 108 and carbon dioxide tension of 24 mm Hg.

Shortly after arrival in the emergency room an episode of ventricular tachycardia occured, with loss of consciousness after one minute. Electrical cardioversion was required. The patient was given 100 mg of lidocaine by rapid intravenous injection and started on a constant infusion of 4 mg per minute. She was transported to the Coronary Care Unit, where she had recurrent episode of ventricular tachycardia. Intubation was performed shortly after arrival in the Coronary Care Unit. Numerous electrical cardioversions and multiple drug regimens were used in efforts to control the recurrent venticular tachycardia. Concurrently, a transvenous pacemaker was inserted into the right ventricle in what proved to be an unsuccessful attempt to control the rhythm with overdrive suppression.

When the lidocaine infusion was seen to be ineffective, procainamide, 500 mg, was given intravenously over 25 minutes, and an infusion of 4 mg per minute was started. The QRS interval markedly widened, and the procainamide was stopped, with subsequent narrowing of the QRS interval. Intravenous propranolol was given in 0.5-mg increments to a total of 15 mg over a one-hour period, with little effect. Phenytoin, 500 mg given intravenously over 15 minutes, and magnesium sulfate, 3 g given intravenously followed by a constant infusion at a rate of 15 to 30 mg per minute, appeared to be most effective in controlling the ventricular arrhythmias, providing a two-hour period of predominantly sinus rhythm. Despite the constant infusion of magnesium, the serum magnesium never rose above 2 mg per deciliter. The serum potassium fell to 3.5 meq per liter, and a potassium chloride infusion was begun. A left-stellate-ganglion block was attempted, but was not accompanied by Horner's syndrome, and had no effect on the cardiac arrhythmias. Approximately 12 hours after admission, the cardiac rhythm degenerated to ventricular fibrillation, and defibrillation was unsuccessful.

On gross post-mortem examination the lungs were mildly congested. The heart weighed 325 g. There was 5 ml of straw-colored pericardial fluid. The left ventricle was mildly dilated. The coronary arteries were widely patent and showed no atherosclerotic changes. The heart valves were normal. The liver was mildly congested, the adrenal glands were normal, and a 2-cm cyst in the left lobe of the thyroid was present. The brain was not examined. Microscopical sections of the heart revealed diffuse reduction in size of myofibers, fragmentation of fibers and lipofuscin deposition. There was focal reduction in size of skeletal-muscle fibers, moderate fatty change in the liver with reduction in size of hepatocytes and intracytoplasmic periodic-acid-Schiff-positive inclusions, and chronic nonspecific fibrosing thyroiditis, with a fibrous calcified cyst.

DISCUSSION

Sudden death has been reported in starvation, being noted in times of famine, as in the unoccupied zone of France during World War II.[4] It has also been reported as a consequence of therapeutic starvation for obesity. Two such cases were reported by Spencer and Durh[5] in women with pre-existing heart disease and congestive heart failure. At autopsy, one patient had coronary-artery disease with a previous myocardial infarction and left ventricular dilatation and hypertrophy. The other patient had patent coronary arteries and hypertrophy of all cardiac chambers. More pertinent is a well documented case reported by Garnett et al.[6] of a 20-year-old woman with no history of cardiac disease and with a normal electrocardiogram except for a prolonged QTc interval during a period of hypokalemia. This patient underwent a 30-week fast during which studies of potassium exchange revealed loss of lean body mass. On the seventh day of refeeding intractable ventricular arrhythmias developed, and she died. Her electrocardiogram after the initial cardiac arrest and resuscitation showed low QRS voltage and a markedly prolonged QTc interval. At post-mortem examination the heart was dilated, and the coronary arteries were normal. Microscopical examination of the myocardium revealed small myofibers and an increased amount of lipofuscin. Paucity and disruption of myofibrils and increased numbers of mitochondria were seen on electron microscopy.

Similar pathological findings on light microscopy have been reported in animal studies and in autopsies of famine victims.[7] Gross cardiac atrophy was found in 85 per cent of the autopsies of 492 victims of pure starvation from the Warsaw Ghetto, with a mean estimated loss of 19.3 per cent of heart weight. Most studies show that the degree of cardiac atrophy with pure starvation is nearly proportional to the whole-body weight loss.[7]

The liquid protein diets are based on the protein-sparing modified fast, which is said to result in weight loss with preservation of lean body mass by providing 1.2 to 1.4 g of protein in the form of lean beef or egg albumin per kilogram of ideal body weight.[8, 10] In the commonly used version of the liquid protein diet, a liquid extract of beef hide is employed as the protein source.[3] Our patient had evidence of loss of lean body mass attributable to the diet that she pursued as recommended in *The Last Chance Diet*.[3] Her clinical course and pathological findings suggest that her death was related to the cardiac effects of starvation resulting from the diet. On admission her serum levels of potassium, magnesium and calcium were normal. She was chemically hypothyroid, but her hospital course and the post-mortem findings could not be explained on that basis. The prolonged QTc interval was recognized initially at admission, but the ventricular arrhythmias could not be controlled by agents that shorten the QT interval—lidocaine, propranolol and phenythoin—or any other agents.

The actual cause of death in patients on the liquid protein diet remains a mystery. However, on the basis of this case and the other cases reported by the Center for Disease Control and the Food and Drug Administration,[1,2] a number of generalizations can be made regarding patients on the liquid protein diet. First of all, refractory ventricular tachycardia in women without apparent underlying heart disease is a problem associated with the diet. Secondly, syncope can be a premonitory symptom of these arrhythmias. Thirdly, hypokalemia is present in some but not all the patients with refractory ventricular arrhythmias. Fourthly, QTc prolongation and low QRS voltage are frequent in patients having refractory ventricular tachycardia. Fifthly, starvation, with loss of lean body mass, can occur on the diet. And, finally, good medical supervision of the liquid protein diet affords no protection against refractory ventricular arrhythmias.

The actual frequency of sudden death among people on the liquid protein diet is unknown. However, until the mechanism of sudden death is understood, the above case should serve as a caveat to those interested in this diet and to the physicians entrusted with their care.

(We are indebted to Eugene H. Kagan, M.D., Department of Pathology, Crouse-Irving Memorial Hospital, Syracuse, who cooperated in the preparation of this case report.)

DONALD KENNEDY, Ph.D.
Commissioner,
Food and Drug Administration,
Washington, D.C.

DEAR COMMISSIONER KENNEDY: I have been requested by Dr. Harold Sours of the CDC to evaluate the background material with regard to deaths associated with liquid protein diets. A copy of my report is enclosed. My reason for writing to you relates to the article on protein diets in the FDA Drug Bulletin of January-February, 1978. I believe that in meeting its obligations to warn the medical community of a potentially dangerous mode of therapy, the FDA should take note of the following:

1. There are inherent dangers in any protein-sparing modified fast (PSMF) whether it consists of liquid or solid protein. These include increased losses of calcium and magnesium, as well as potassium.

2. There is a lack of any published short term or long term studies comparing PSMF with conventional, ("balanced") hypocaloric diets with respect to efficacy in compliance, protein-sparing or reduction in mineral losses.

3. In view of the potential risks and unsubstantiated benefits, liquid protein diets should be considered investigational in all patients, not just pregnant women, children and adolescents as indicated by Dr. Blackburn in your Bulletin. Conventional medical supervision and/or the administration of potassium supplements cannot be considered adequate safeguards since in thirteen of the fifteen deaths the women were under medical treatment and did receive supplemental potassium.

Until the efficacy of PSMF has been established and the cause of deaths in patients on liquid protein has been clarified, all forms of diet therapy consisting solely of protein should be viewed as potentially hazardous. The liquid diets should consequently be restricted to investigational use. I believe that the public's interest is best served if this course of action is taken by the FDA.

Sincerely yours,

PHILIP FELIG, M.D.

CORRECTION IN THE ENROLLMENT OF H.R. 10732

Mr. STEVENS. Mr. President, there is a concurrent resolution at the desk that I ask the clerk to report.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

House Concurrent Resolution 687 directing the Clerk of the House of Representatives to make a correction in the enrollment of H.R. 10732.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the concurrent resolution.

Mr. STEVENS. Mr. President, let me state that this is a clerical correction that we previously attempted to correct with a Senate resolution. There has been some dispute about the effectiveness of what we did, so the House has sent us its own concurrent resolution.

I ask unanimous consent that it be considered immediately and agreed to.

The resolution (H. Con. Res. 687) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. HODGES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THAT EMBARRASSING OIL GLUT

Mr. STEVENS. Mr. President, the Christian Science Monitor last Thursday contained a column by Mr. Ralph Rechel which discussed the apparent surplus of oil on the west coast. This is a problem that has concerned me since it became obvious that the refining capacity on the west coast would not be sufficient to process all of the oil that the Alaska pipeline was capable of providing. The situation is one which should concern everyone in the Nation. The inability of Alaskan producers to obtain full price for their oil threatens to decrease domestic production. Cumbersome transportation systems that we have been forced to rely upon are stretching our domestic tanker fleet to its limits, are environmentally dangerous and waste energy.

I am gratified to see that the House Subcommittee on Special Investigations chaired by Congressman RUNNELS intends to hold hearings in August in San Francisco to explore the options concerning the distribution of Alaskan oil.

It is no surprise to the Senate, I am sure, that I prefer an exchange arrangement whereby Alaskan oil would be sold to east coast refiners and shipped to Japan and Middle East oil would be sold to Japan and shipped to east coast refiners. The result of this exchange would be enormous savings in tanker cost and full production of our domestic reserves. The merits of an exchange are obvious and I hope it will be fully explored in the House hearings.

Mr. Rechel's article explains some of the background of our current situation and I recommend it to the Senate and ask unanimous consent that it be printed in the RECORD at this time.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Aug. 10, 1978]

THAT EMBARRASSING OIL GLUT

(By Ralph E. Rechel)

A Pacific Coast oil surplus of unforeseen size now embarrasses the Department of Energy. This is one result of the first large-scale federal intervention in the production and distribution of crude oil—Congress's authorization of the Alaska pipeline and related shipping facilities. Since it seems certain that public rather than private policy will continue to dominate some or many of the big decisions in oil and energy, what can we learn from this experience?

First, the timing was full of "historical accidents." These are among the unknowable risks in long-gestation, large-scale public works projects. They are not the responsibility of the new Energy Department now struggling to straighten things up.

The development and transportation of Alaska's Prudhoe Bay oil was taken out of the hands of private industry about 1970 by the newly strong environmental interest groups—"Keep Alaska an untouched wilderness." Their efforts resulted in taking the issue out of corporate board rooms into congressional committee rooms. And into years of delay while the pipeline's effect on tundra and reindeer were studied by specialists, argued by single-issue advocates, and voted on by people with no business or technical background and no responsibility for sound enterprise.

If it had not been for the events during President Nixon's effort to control refined products prices during 1972–74 (which caused the famous gasoline "crisis" of early 1974) congressional approval of the pipeline would have been delayed several more years. This crisis did clarify our absolute dependence on energy imported from not necessarily friendly suppliers. From the balance of payments standpoint, further delay would have been bad. From the standpoint of need for major rearrangements of crude oil distribution within the lower 48 states, and the resolution of the State of California's problems, more delay would have been a good thing.

The independent stance taken by the consciously sovereign State of California. This delayed location and technical design of the major West Coast receiving port. Construction is hoped to being shortly. It is undeniable that the final resolution of this hassle was an environmental improvement in one of the state's most sensitive areas, the Los Angeles air basin. Furthermore California's uniquely high air quality control standards act to maximize the refining attractions of light, low sulfur crude oils which must be imported. Thus, while there is a surplus of 550,000 barrels per day of the heavier, more chemical-laden crude from Alaska, West Coast oil refiners are importing 700,000 or more barrels per day of easy-to-refine oil from Indonesia and elsewhere. Otherwise the industry will have to make large-scale refinery investments to accommodate state regulations, the cost of which will be passed to consumers.

California's attachment to an unused natural gas pipeline between the Los Angeles area and Midland, Texas, delayed firm plans for conversion of this line to a crude oil carrier. This conversion, which would take a short length of time and be low in cost compared to a new pipeline, would relieve the need for several hundred thousand barrels per day to go through the Panama Canal in costly small tankers and with the threat of doubled tolls.

While it now looks like this line will become available for conversion to oil, its operation is many months in the future. It will deliver Alaskan crude oil into the network of pipelines extending north and east from Texas-Louisiana producing areas to inland refineries. While it is uncomfortable, even if not illegal, to deny a sovereign state the right to define its own environment, the health of the national economy is at stake.

The energy market forecasts of five to fifteen years ago—the factual basis for decisions on the size of the Alaska pipeline and its investment soundness—which turned out rather poorly. The high prices for crude oil since 1974 have increased U.S. and foreign production faster than was forecast, and such users as electric utilities have shifted to other sources such as hydropower more quickly than anticipated. This is a typical "learning curve" experience and clearly a case where government and industry can do better next time. Part of the problem is that too few alternatives were considered, particularly those relating to changes in state regulations and federal incentives.

The confirmed ability of the big international oil companies to evade real cooperation with governments and to continue in many but not all cases to operate in the company's best interets rather than that of the public. The lack of harmony between these truly independent industrial giants and federal and state governments is due to an excess of political grandstanding and discrediting of corporate motives, plus justifiable fears of deception, on the government side. The companies have a natural resistance to being dictated to by people who don't really know much about their business, especially when the dictates are unprofitable.

A very clear need is for a large measure of quiet, very high-level diplomatic leadership on the part of both industry and government which should work to defuse and sensibly compromise the big dollar issues. These should be kept outside of legislative arenas in most cases, as a lions versus Christians attitude prevails on the part of many legislators. This attitude will only cause more Alaskan oil embarrassments.

SOLICITATIONS THROUGH THE MAILS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar Order No. 999.

The bill (S. 2543) to amend title 39 of the United States Code to provide better enforcement procedures for prevent-

ing fraudulent solicitations through the mails, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3005(a) of title 39, United States Code, is amended—

(1) by inserting "including the mailing of matter which is nonmailable under section 3001(d) of this title," after "false representations,"; and

(2) by adding at the end thereof the following: "For purposes of the preceding sentence, the mailing of matter which is nonmailable under such section 3001(d) by any person shall constitute prima facie evidence that such person is engaged in conducting a scheme or device for obtaining money or property through the mail by false representations.".

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-1077), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of S. 2543 is to improve the enforcement procedures available to the Postal Service to prevent postal patrons from being victimized by a form of misrepresentation involving solicitation for goods or services in the guise of invoices, bills, or statements of accounts due.

BACKGROUND AND HISTORY

For some years, confidence men have been operating a variety of schemes which have in common the use of the U.S. mails to distribute false billings for goods and services. While individual citizens sometimes are the targets of such schemes, business concerns are the principal recipient of these phony invoices. The U.S. Postal Service Inspection Service recently estimated the loss by businesses to the operators of such schemes at $25 million annually. Businesses—even those which exercise sufficient bookkeeping care so as to be reasonably certain they have not been bilked—have complained of the annoyance and expense associated with what they see as a great proliferation of such phony billings in recent years.

The variations of these schemes are many and ever-changing. Four currently popular varieties include:

Solicitations for contributions for nonexistent minority or charitable causes.

Solicitations for payments of bills for advertisements or listings in imaginary or useless "business", "labor", or "ethnic" directories or publications.

Solicitations for listing in phony international business directories

Demands for payment of previously mailed invoices for office supplies never ordered, and often never supplied.

Such schemes are not new. They have been operating for at least 30 years and gave rise 10 years ago to the enactment of provisions now codified in 39 U.S.C. 3001(d), which provided:

(d) Matter otherwise legally acceptable in the mails which—

(1) is in the form of, and reasonably could be interpreted or construed as, a bill invoice, or statement of account due; but

(2) constitutes, in fact, a solicitation for the order by the addressee of goods or services, or both;

is nonmailable matter, shall not be carried or delivered by mail, and shall be disposed of as the Postal Service directs, unless such matter bears on its face, in conspicuous and legible type in contrast by typography, layout, or color with other printing on its face, in accordance with regulations which the Postal Service shall prescribe—

(A) the following notice: "This is a solicitation of goods or services, or both, and not a bill, invoice, or statement of accounts due. You are under no obligation to make any payments on account of this offer unless you accept this offer", or

(B) "in lieu thereof, a notice to the same effect in words which the Postal Service may prescribe."

The vast bulk of these promotions, if they carried a warning at all, have used the notice provided for under subparagraph (A), rather than the alternative notice prescribed by Postal Regulations, which is in two parts, one in 30-point type and the second in 18-point type. Consequently, the Postal Service, effective December 8, 1978, utilized its authority under the statute to require that the previously permissive notice stipulated in the statute must appear, if used, in 30-point type.

At present, any solicitation for goods or services in the guise of a bill, invoice, or statement of account due, must bear a conspicuous notification to the recipient intended to warn in effect, that "this is not a bill."

The newly revised Postal Regulations, however, do not and cannot address the need to strengthen the administrative remedies available in the event of noncompliance. Nor would the simple outlawing of any such phony invoices address the situation, because of the disadvantageous burden of the proof and the fact that there is no way to uncover them prior to their mailing.

Recently, these schemes have been complicated by a variation involving boiler-room type telephone solicitations in advance of the mailed invoice. Testimony before the Subcommittee on Energy, Nuclear Proliferation, and Federal Services indicates these schemes are most common in the Los Angeles area. Since July of 1975, the Postal Inspector Service has been conducting investigations of more than 500 such schemes. It has arrested about 60 people for violating the mail fraud statutes.

The committee believes that vigorous investigation and, where warranted, criminal prosecution, are the best remedies to the situation pertaining—along with cautionary bookkeeping practices by recipients of such solicitations.

However, because criminal cases require a level of proof sometimes difficult to obtain, and because many of these schemes originate outside the United States, the committee believes the amendments to title 39, United States Code, made by S. 2543, are needed to improve the civil remedies in a way that will deny the operators of these schemes the fruits of their labors.

INDEPENDENT SAFETY BOARD ACT OF 1974 TO AUTHORIZE ADDITIONAL APPROPRIATIONS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be discharged from further consideration of H.R. 12106, the Independent Safety Board authorization, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

H.R. 12106, an act to amend the Independent Safety Board Act of 1974 to authorize additional appropriations.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 1653

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. CANNON I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) for Mr. CANNON proposes an unprinted amendment numbered 1653.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause of the House bill H.R. 12106 and insert the following:

That this Act may be cited as the "Independent Safety Board Act Amendment of 1978".

SEC. 2. Section 309 of the Independent Safety Board Act of 1974 (49 U.S.C. 1907) is amended by adding at the end thereof the following: "There are authorized to be appropriated for the purposes of this Act not to exceed $16,420,000 for the fiscal year ending September 30, 1979, and $17,650,000 for the fiscal year ending September 30, 1980, such sums to remain available until expended.".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time and, as amended, was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR THE CONSIDERATION OF S. 2539

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on the pending bill, H.R. 12050, the tuition tax credit bill, the Senate then proceed to the consideration of Calendar Order No. 585, S. 2539, the higher education bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL ORDER

Mr. ROBERT C. BYRD. Mr. President, are there any orders for the recognition of Senators on tomorrow?

The PRESIDING OFFICER. The Chair advises that there are none.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, I ask unanimous consent that after the two leaders under the standing order tomorrow are recognized, the distinguished senior Senator from Virginia (Mr. HARRY F. BYRD, JR.) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETING TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the session of the Senate on Tuesday, August 15, 1978, to hold a hearing on the nomination of John McGarry as a member on the Federal Election Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATUS OF APPROPRIATION BILLS

Mr. ROBERT C. BYRD. Mr. President, earlier today the Senate passed and sent to conference the District of Columbia appropriations bill for fiscal year 1979. This is the 14th appropriations bill which the Senate has passed since June 1; the 18th which it has passed this calendar year.

Of these 18 bills, 8 are supplemental measures; 7 of the 8 have become public law.

I wish to thank the distinguished chairman of the Appropriations Committee, Mr. MAGNUSON, Mr. YOUNG, the ranking minority member, and all members of the committee for this fine record. The Congressional Budget Act of 1974 set forth, in section 300, a timetable for the enactment of appropriations bills: The seventh day after Labor Day. That deadline is about a month ahead of us; but most of the action which is required to meet that deadline has been completed.

Of the 13 fiscal year 1979 appropriations bills which must be enacted to meet the budget deadline, 1—the transportation bill—has already become law. I want to commend Senator BAYH, chairman of the Transportation Subcommittee. for such timely action on this bill. Nine other measures have passed the Senate and are in conference. Of the remaining three bills, one—foreign operations—has not yet passed the House and this is not available for Senate action. The defense appropriations bill only recently passed the House and is already being marked up in the Senate committee. Finally, the bill making appropriations for the Departments of Labor and HEW has been marked up by the subcommittee, but is awaiting required action on some very pertinent authorizing legislation.

The members of the Appropriations Committee from both sides of the aisle have devoted much time to hearings and to markups. Subcommittee chairmen and the ranking minority members, have brought their bills to the floor and provided excellent guidance as the Senate debated and in some cases amended the committee's recommendations. The process has worked smoothly and efficiently. I think that the members of the committee and its distinguished chairman, Mr. MAGNUSON, deserve a vote of thanks.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will come in tomorrow morning at 9:30. After the two leaders have been recognized under the standing order, the Senator from Virginia (Mr. HARRY F. BYRD, JR.) will be recognized for not to exceed 15 minutes, following which the Senate will resume its consideration of calendar order No. 989, the Tuition Tax Credit bill.

A vote will occur on the amendment by Mr. PACKWOOD at 1 o'clock p.m. However, prior to the hour of 1 o'clock p.m., it is possible that that amendment may be set aside temporarily by unanimous consent and other amendments taken up, and rollcall votes may occur thereon.

Additionally, it is very possible that other measures or conference reports could come up before 1 o'clock p.m. on which rollcall votes could occur.

Following the vote at 1 p.m., it is hoped that Mr. HOLLINGS will then be able to call up his amendment. It is also hoped that that amendment may be disposed of one way or the other on tomorrow, and that final action on that bill can occur tomorrow.

I think it is only fair and reasonable to say that every expectation should be had that the Senate will complete action on this bill tomorrow. Tomorrow will be the third day. It is a controversial bill and an important bill, but I think 3 days are enough on this bill, and so it would be my desire, if it requires going until midnight tomorrow night to finish this bill, that we make every effort to do so.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 9:30 tomorrow morning.

The motion was agreed to; and at 7:54 p.m., the Senate recessed until tomorrow, Tuesday, August 15, 1978, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate, August 14, 1978:

THE JUDICIARY

Richard S. Arnold, of Arkansas, to be U.S. district judge for the eastern and western districts of Arkansas, vice Terry L. Shell, deceased.

IN THE COAST GUARD

The following officers of the U.S. Coast Guard for promotion to the grade of lieutenant (junior grade):

Gregory L. Oxley	Collin S. Campbell
Donald R. Goldstein	Paul C. Redwine
Thomas P. Johnson	Thero Mitchell
Thomas H. Briggs	Charles H. Denmark, Jr.
Victor A. Loher	
James A. Dale	Jimmie G. Weibley
John O. Skidmore	

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force, in the grades indicated, under the provisions of section 8284, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated, and with dates of rank to be determined by the Secretary of the Air Force.

MEDICAL CORPS

To be lieutenant colonel

England, Robert L., [redacted].

To be major

Cloyd, Dale E., [redacted].
Koenigsberg, Edward J., [redacted].

DENTAL CORPS

To be first lieutenant

May, David L., [redacted].
Seek, Brian J., [redacted].
Wood, Leighton W., [redacted].

The following persons for appointment as Reserve of the Air Force, in grades indicated, under the provisions of section 593, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated.

MEDICAL CORPS

To be lieutenant colonel

Carson, James G., [redacted].
Cooper, Warren E., [redacted].
Hays, James M., [redacted].
Heimburger, Steven L., [redacted].
Johnson, Thomas A., [redacted].
Kovacs, Tibor V., [redacted].
Lord, John D., [redacted].
Marks, Alan N., [redacted].
Millett, David P., [redacted].
Mills, Harry B., [redacted].
O'Neil, Howard W., [redacted].
Portnoff, Clifton L., [redacted].
Posey, William C., [redacted].
Rettek, Seymour, [redacted].
Smith, Daniel R., [redacted].
Tripp, Walter M., [redacted].

DENTAL CORPS

To be lieutenant colonel

Edwards, Jack, [redacted].
Ryan, Doran E., [redacted].

The following person for appointment as Reserve of the Air Force, in the grade indicated, under the provisions of section 593, title 10, United States Code:

LINE OF THE AIR FORCE

To be lieutenant colonel

Latham, Donald R., [redacted].

The following person for appointment as Reserve of the Air Force (ANGUS), in the grade indicated, under the provisions of sections 593 and 8351, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated:

MEDICAL CORPS

To be lieutenant colonel

Wells, William M., [redacted].

The following officer for appointment as Reserve of the Air Force (ANGUS), in the grade indicated, under the provisions of sections 593, 8351, and 8392, title 10, United States Code:

LINE OF THE AIR FORCE

To be colonel

Tunge, Harry A., [redacted].

The following officers for promotion in the Air Force Reserve, under the provisions of sections 8376 and 593, title 10, United States Code:

LINE OF THE AIR FORCE

Major to lieutenant colonel

Kadar, Richard J., xxx-xx-xxxx.
Stillwell, Charles E., xxx-xx-xxxx.
Ward, Clarence E., xxx-xx-xxxx.
Yovanovich, Raymond S., xxx-xx-xxxx.
Zoller, Michael D., xxx-xx-xxxx.

MEDICAL CORPS

Cobb, James R., xxx-xx-xxxx.
Hafner, Peter A., xxx-xx-xxxx.
Hagen, William M., xxx-xx-xxxx.
Hand, Stanley I., Jr., xxx-xx-xxxx.
Hardison, Cary D., xxx-xx-xxxx.
Honaker, Richard E., xxx-xx-xxxx.
Lindley, Ancil L., III, xxx-xx-xxxx.
Mays, Garrett M., xxx-xx-xxxx.
Merwin, Ronnie R., xxx-xx-xxxx.
Perezfigaredo, Rafael A., xxx-xx-xxxx.
Ringler, Harold L., Jr., xxx-xx-xxxx.
Wallace, Edward R., xxx-xx-xxxx.

NURSE CORPS

Borsellega, Johanna E., xxx-xx-xxxx.

The following officer for reappointment to the active list of the Regular Air Force, in the grade indicated, under the provisions of sections 1210 and 1211, title 10, United States Code:

LINE OF THE AIR FORCE

To be major

Album, Hyman H., xxx-xx-xxxx.

IN THE ARMY

The following-named officers for promotion in the Reserve of the Army of the United States, under the provisions of title 10, U.S.C., sections 3370 and 3383:

ARMY PROMOTION LIST

To be colonel

Abraham, Jack B., xxx-xx-xxxx.
Anderson, William T., xxx-xx-xxxx.
Bailey, Malcolm K., xxx-xx-xxxx.
Baker, Phillip S., xxx-xx-xxxx.
Black, Robert W., xxx-xx-xxxx.
Bryant, James C., xxx-xx-xxxx.
Chamberlain, Ray W., xxx-xx-xxxx.
Cosetti, Joseph L., xxx-xx-xxxx.
Crain, Harold A., xxx-xx-xxxx.
Curry, James A., xxx-xx-xxxx.
Dailey, Millard G., xxx-xx-xxxx.
Dell'Olio, Mauro, xxx-xx-xxxx.
Demin, Robert W., xxx-xx-xxxx.
Ellis, James R., xxx-xx-xxxx.
Ernst, Adolph H., xxx-xx-xxxx.
Evans, Harold D., xxx-xx-xxxx.
Fader, Wesley B., xxx-xx-xxxx.
Glueck, Gerald A., xxx-xx-xxxx.
Harth, George P., xxx-xx-xxxx.
Hernandez, Arturo, xxx-xx-xxxx.
Herner, Harlan C., xxx-xx-xxxx.
Hines, Ollie C., xxx-xx-xxxx.
Holland, John F., xxx-xx-xxxx.
Holmberg, Charles A., xxx-xx-xxxx.
Irvine, Charles N., xxx-xx-xxxx.
Johnson, Edward M., xxx-xx-xxxx.
Laskoe, Robert, xxx-xx-xxxx.
Lawson, Charles J., xxx-xx-xxxx.
Miller, Donal, xxx-xx-xxxx.
Miller, Edward M., xxx-xx-xxxx.
Menees, John R., xxx-xx-xxxx.
Mitchell, John S., xxx-xx-xxxx.
Moore, Ira J., xxx-xx-xxxx.
Nelms, Jimmie L., xxx-xx-xxxx.
Palus, Edward M., xxx-xx-xxxx.
Rockwell, Leo R., xxx-xx-xxxx.
Ryan, Joseph T., xxx-xx-xxxx.
Sarbanes, Anthony S., xxx-xx-xxxx.
Schulz, Michael A., Jr., xxx-xx-xxxx.
Schuster, Joseph L., xxx-xx-xxxx.
Skeens, James K., xxx-xx-xxxx.
Stakem, James F., Jr., xxx-xx-xxxx.
Sy, Robert P., xxx-xx-xxxx.
Tillman, Robert J., xxx-xx-xxxx.
Wahlgren, Harold E., xxx-xx-xxxx.
Yamashiro, Isao, xxx-xx-xxxx.

CHAPLAIN

To be colonel

Carter, John E., xxx-xx-xxxx.

ARMY NURSE CORPS

To be colonel

Gillespie, Joyce, xxx-xx-xxxx.

MEDICAL CORPS

To be colonel

Anthony, Courtney L., xxx-xx-xxxx.
Bailey, Richard H., xxx-xx-xxxx.
McNabney, Warren K., xxx-xx-xxxx.
O'Brien, William H., xxx-xx-xxxx.
Simich, Robert L., xxx-xx-xxxx.

The following-named officers for promotion in the Reserve of the Army of the United States, under the provisions of title 10, U.S.C., sections 3367 and 3383:

ARMY PROMOTION LIST

To be lieutenant colonel

Albracht, Robert A., xxx-xx-xxxx.
Armstrong, Donald G., xxx-xx-xxxx.
Aono, Raymond T., xxx-xx-xxxx.
Baggett, William T., xxx-xx-xxxx.
Bailey, Francis C., xxx-xx-xxxx.
Baldwin, John A., xxx-xx-xxxx.
Beal, Wesley A., xxx-xx-xxxx.

To be lieutenant colonel

Slife, Leo N., xxx-xx-xxxx.

The following-named officers for appointment in the Army of the United States, under the provisions of title 10, U.S.C., section 3494:

MEDICAL CORPS

To be lieutenant colonel

Bush, Robert A., xxx-xx-xxxx.
Park, Jinsoo, xxx-xx-xxxx.

The following-named Army National Guard officers for appointment in the Reserve of the Army of the United States, under provisions of title 10, U.S.C., section 3385:

ARMY PROMOTION LIST

To be colonel

Alexander, Glen D., xxx-xx-xxxx.
Camara, Norman F., xxx-xx-xxxx.
Cannon, Ralph D., xxx-xx-xxxx.
Collins, Robert D., xxx-xx-xxxx.
Colwell, Daniel G., xxx-xx-xxxx.
Dehlinger, Robert J., xxx-xx-xxxx.
Dezarn, Robert L., xxx-xx-xxxx.
Fletcher, Boyce E., xxx-xx-xxxx.
Fuller, Frank B., Jr., xxx-xx-xxxx.
Harris, David A., xxx-xx-xxxx.
Hart, Eugene P., xxx-xx-xxxx.
Hernandez-Marrero, A., xxx-xx-xxxx.
Holbrook, Francis J., xxx-xx-xxxx.
Jointer, William B., xxx-xx-xxxx.
Juarbe-Perez, William, xxx-xx-xxxx.
Koett, Karl E., xxx-xx-xxxx.
Leach, Jimmie M., xxx-xx-xxxx.
Liepert, Gerald C., xxx-xx-xxxx.
Merolla, Amedeo C., xxx-xx-xxxx.
Puzio, Thaddeus A., xxx-xx-xxxx.
Roby, Mabry T., xxx-xx-xxxx.
Stuart, Theodore E., xxx-xx-xxxx.
Tidler, John W., xxx-xx-xxxx.
Tyler, James E., xxx-xx-xxxx.
White, James E., xxx-xx-xxxx.
Yslas, Mucio, Jr., xxx-xx-xxxx.

MEDICAL CORPS

To be colonel

Cudmore, John W., xxx-xx-xxxx.

MEDICAL SERVICE CORPS

To be colonel

Newman, Harrell G., xxx-xx-xxxx.

ARMY PROMOTION LIST

To be lieutenant colonel

Andrew, Michael A., xxx-xx-xxxx.
Baker, Thomas B., xxx-xx-xxxx.
Berger, Baruch M., xxx-xx-xxxx.
Blade, Gene W., xxx-xx-xxxx.
Brunelle, Donald R., xxx-xx-xxxx.
Campbell, Rupert C., xxx-xx-xxxx.
Isham, Virgil B., xxx-xx-xxxx.
Jolly, Zeb V., xxx-xx-xxxx.
Joyner, William W., xxx-xx-xxxx.
Kilpatrick, Robert G., xxx-xx-xxxx.
Koester, Harold L. E., xxx-xx-xxxx.
Madewell, Richard J., xxx-xx-xxxx.
Case, John O., xxx-xx-xxxx.
Cook, Echol E., xxx-xx-xxxx.
Dupont, George B., xxx-xx-xxxx.
Dupree, Gale G., xxx-xx-xxxx.
Erikson, Darrel L., xxx-xx-xxxx.
Evans, Billy R., xxx-xx-xxxx.
Farmer, Maurice D., xxx-xx-xxxx.
Fidler, Philip R., xxx-xx-xxxx.
Filegar, John Q., xxx-xx-xxxx.
Gallagher, Thomas J., xxx-xx-xxxx.
Geyer, Garfield C., xxx-xx-xxxx.
Gibson, Dudley C., xxx-xx-xxxx.
Gill, Edward L., xxx-xx-xxxx.
Gonzalez, Agustin, xxx-xx-xxxx.
Greenhaw, Robert L., xxx-xx-xxxx.
Griffith, James W., xxx-xx-xxxx.
Hinman, Donald C., xxx-xx-xxxx.
Holland, Francis A., xxx-xx-xxxx.
Hoppes, Ronald A., xxx-xx-xxxx.
Manassero, Michael J., xxx-xx-xxxx.
Milhoan, Kenneth B., xxx-xx-xxxx.
Neuberger, Harold C., xxx-xx-xxxx.
Norman, Duane M., xxx-xx-xxxx.
Ohlhaver, Jon H., xxx-xx-xxxx.
Oliphant, L. D., xxx-xx-xxxx.
Pecoraro, Angelo, xxx-xx-xxxx.
Quinlan, Thomas F. J., xxx-xx-xxxx.
Reich, Douglas R., xxx-xx-xxxx.
Robertson, Wayman D., xxx-xx-xxxx.
Rude, Virgil A., xxx-xx-xxxx.
Smith, Thompson C., xxx-xx-xxxx.
Stockton, James E., xxx-xx-xxxx.
Thompson, Ray L. xxx-xx-xxxx.
Walsh, Mark C., xxx-xx-xxxx.
Ward, Vivian B., xxx-xx-xxxx.
Whitworth, Robert D., xxx-xx-xxxx.
Williams, Louis R., xxx-xx-xxxx.
Zenner, Gary L., xxx-xx-xxxx.

CHAPLAIN

To be lieutenant colonel

Blais, Robert L., xxx-xx-xxxx.

ARMY NURSE CORPS

To be lieutenant colonel

Founds, Carole A., xxx-xx-xxxx.

DENTAL CORPS

To be lieutenant colonel

Antario, Joseph P., xxx-xx-xxxx.
Kaufman, Donald, xxx-xx-xxxx.

MEDICAL CORPS

To be lieutenant colonel

Allen, Lawrence L., xxx-xx-xxxx.
Blossman, Robert C., xxx-xx-xxxx.
Brown, Luther E., xxx-xx-xxxx.
Chestnut, Graham H., xxx-xx-xxxx.
Cierebiej, Albert, xxx-xx-xxxx.
Drennen, Robert V. E., xxx-xx-xxxx.
Ellis, Donald S., xxx-xx-xxxx.
Flynn, James P.G., xxx-xx-xxxx.
Gladue, Joseph R., xxx-xx-xxxx.
Hickerson, James S., xxx-xx-xxxx.
Howard, Leonard R., xxx-xx-xxxx.
King, Merrill J., Jr., xxx-xx-xxxx.
Koss, George W., xxx-xx-xxxx.
Lehotzhy, Helen, xxx-xx-xxxx.
Marquez, Ramon L., xxx-xx-xxxx.
Miller, Leslie L., xxx-xx-xxxx.
Mitchell, Andrew C., xxx-xx-xxxx.
Orapallo, Anthony J., xxx-xx-xxxx.
Padilla-Ramirez, Herman, xxx-xx-xxxx.
Peterson, Carl R., xxx-xx-xxxx.
Pierron, George J., xxx-xx-xxxx.
Simpson, Marion G., xxx-xx-xxxx.
Zahony, Ivan, xxx-xx-xxxx.

MEDICAL SERVICE CORPS

To be lieutenant colonel

Gross, Don A., xxx-xx-xxxx.

IN THE NAVY

The following-named (Naval Reserve Officers Training Corps candidates) to be permanent ensigns in the line or staff corps of the Navy, subject to the qualifications therefor as provided by law:

Michael W. DaBose	Todd W. Rahmes
Joseph L. Ilk	Michael Watts
Karl G. Fremd	Jean M. Wolk

The following-named Navy enlisted scientific education programs candidates to be permanent ensigns in the line or staff corps

of the Navy, subject to the qualifications therefor as provided by law:

Jerry K. Adcock	David P. Shareno
Bradley W. Gale	*Robert D. Suttle
Vernon D. Reed	Paul A. Willis

The following-named (Ex-U.S. Navy officers) to be appointed temporary commanders in the Medical Corps in the Reserve of the U.S. Navy, subject to the qualifications therefor as provided by law:

*Frederick W. Courington
*Scott L. Walker

The following-named (Ex-Air Force Reserve officer) to be appointed a temporary commander in the Medical Corps in the Reserve of the U.S. Navy, subject to the qualifications therefor as provided by law:

*Aaron S. Wolkoff

*Appointment sent out Ad Interim (During the recess of the Senate). Senate recessed on 30 June 1978—10 July 1978).

HOUSE OF REPRESENTATIVES—*Monday, August 14, 1978*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Your faith should not stand in the wisdom of men, but in the power of God.—I Corinthians 2: 5.

Eternal God, our Father, who art above all and in all, without whom life loses its meaning but with whom life gains power for abundant living, we come to Thee seeking light upon our way, love for our way, and life along our way. Give to us Thy Spirit that with wisdom, strength, and patience we may move in the direction of a better nation and a better world.

Bless the Members of this House of Representatives as they work this day. May they cultivate the spirit of unity and so work together that we may sustain our pledge of "one nation, under Thee, with liberty and justice for all."

In the spirit of the Lord of life we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House its approval thereof.

Is there objection to the approval of the Journal?

Mr. STANGELAND. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

The question is on the approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. STANGELAND. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 321, nays 14, answered "present" 1, not voting 96, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate has passed without amendment joint resolutions of the House of the following titles:

H.J. Res. 628. Joint Resolution to provide for the designation of a week as "National Lupus Week";

H.J. Res. 946. Joint resolution to designate October 7, 1978, as "National Guard Day"; and

H.J. Res. 963. Joint resolution designating July 18, 1979, as "National P.O.W.-M.I.A. Recognition Day."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is

requested, a bill of the House of the following title:

H.R. 11579. An act to designate the Veterans' Administration center located at 1901 South First Street, Temple, Tex., as the "Olin E. Teague Veterans' Center."

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3816) entitled "An act to amend the Federal Trade Commission Act to expedite the enforcement of Federal Trade Commission cease and desist orders and compulsory process orders; to increase the independence of the Federal Trade Commission in legislative, budgetary, and personnel matters; and for other purposes," disagreed to by the House; agrees to a further conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. CANNON, Mr. FORD, Mr. DURKIN, Mr. SCHMITT, and Mr. DANFORTH to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 153. An act for the relief of Dr. Timothy Kam-Hung Chung;

S. 399. An act for the relief of Dr. Manuel Javier Mariano and his wife, Lilia Zapanta Mariano;

S. 1680. An act for the relief of Roland L. Outlaw and his wife Carolyn H. Outlaw of Lee County, S.C.;

S. 2547. An act for the relief of Soo Yung Kim;

S. 2977. An act for the relief of Renuka Pavla;

S. 3001. An act for the relief of Kirthi Chandher; and

S. 3384. An act to require foreign persons who acquire, transfer, or hold interests in United States agricultural land to report such transactions and holdings to the Secretary of Agriculture, and to direct the Secretary to assess and report the effects of such transactions and holdings.

TRIBUTE TO THE LATE JAMES GRANT BOLLING

(Mr. LONG of Louisiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LONG of Louisiana. Mr. Speaker, and my colleagues in the House of Representatives, I think as most Members know, Jim Bolling died yesterday.

Our esteemed DICK BOLLING lost a faithful and intelligent wife. My wife Cathy and I lost a close personal friend, as did many here in this institution. The House of Representatives and the Nation lost a Member of Congress without portfolio, who was an extremely able and dedicated public servant. Humanity lost a human being of exceptional intelligence, with great political courage, who never hesitated to be an outspoken advocate for her point of view.

She could not tolerate sham. She could not tolerate fraud. Yet she was a person with the capacity for an unlimited amount of kindness, of love, and of compassion. Jim Bolling was truly an outstanding human being and we shall all miss her.

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I yield to the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Speaker, I would say to my distinguished friend, I share his remarks.

I remember when Jim Bolling came to Washington about 1961. She had worked very hard in the campaign in 1960 and she came to Washington to work in the new administration. I have known her since then. She was a very able, dedicated human being, and highly capable in her work.

She was quite compassionate about the people who worked for her and with her and the people with whom she was associated. She made a very substantial contribution to the well-being of this House and this Congress.

Mr. ANDERSON of Illinois. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I yield to the gentleman from Illinois.

Mr. ANDERSON of Illinois. Mr. Speaker, I am among those who had not heard of the passing of Mrs. Bolling until the gentleman made the announcement here in the well just a moment ago.

But I certainly would not, as one who knew her, who had enjoyed the hospitality of the Bollings on numerous occasions and admired her, would not want this occasion to pass without expressing my condolences to the surviving members of her family and her husband.

It has been my very great pleasure to serve on the Committee on Rules with the gentleman from Missouri, (Mr. BOLLING) for almost a decade and a half. Having thus worked together with him on the business of that committee, I feel a special measure of respect for his contributions to the work of this body. I also feel an extra measure of sadness that he has suffered the loss of his wife who shared his endeavors.

Mr. BROWN of Ohio. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Speaker, I also would like to join in expressing my sympathy to DICK BOLLING and to the other members of the family, both his and hers.

We get a lot of criticism sometimes if members of the family are deeply involved politically with us, and yet this is a clear example of how the capacity of two people, each in an individual way, can be heightened by the work that the one does with the other in the political arena.

Mrs. Bolling worked in DICK BOLLING's office and she shared his political interests and concerns. I rather imagine that, from time to time, they had some philosophic and ideologic arguments about where the country ought to be headed and I rather imagine that Jim won her share of the arguments because she was an extremely bright person and a very capable part of a highly competent team. Congressman BOLLING has our sympathies for losing what is clearly, if not his better half, certainly one-half of a very fine team in the Nation's service.

Mrs. HECKLER. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I yield to the gentlewoman from Massachusetts

Mrs. HECKLER. Mr. Speaker, I also would like to join in expressing my sense of loss and sense of sadness at the tragic news of the death of Jim Bolling. I feel very strongly, having spoken to countless women across the country today about the legislation we have on the House floor, the extension of the equal rights amendment. I express for all of those women the thought that they expressed to me; their sorrow that we have lost one of our greatest advocates particularly on a day when she would be so interested in seeing our cause survive. So as with her husband, her presence was felt beyond her husband's office and beyond her husband's sphere. As much as I respect my distinguished colleague from Missouri, the Honorable DICK BOLLING, her husband, I respect Jim Bolling as well for her influence on America and I express to her family the loss that many women across America feel at this sad time.

Mr. SCHEUER. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I yield to the gentleman from New York.

Mr. SCHEUER. Mr. Speaker, my wife Emily and I have enjoyed Jim Bolling's friendship since she first came to Washington predating my congressional career and we have rarely if ever had the opportunity to know a woman of such monumental talents, energies, and concerns.

Jim Bolling was an astute politician par excellence. She had a heart that related to the entire world around her. Her concern and involvement with causes of all kinds were marvelous to behald. Along with very sophisticated, astute political talents she had a woman's heart as big as her body. She was capable of extending rich friendship and warm sympathy. To have known her friendship and her encouragement over the years, and to have enjoyed her marvelous repartee, her wit, her sense of humor, her insights, was to have known a superlative human being and I along with many people who have treasured her friendship will miss her deeply.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I am happy to yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, for some 30 years Jim Bolling has been my friend. Vibrant and alive, her ever alert and questing mind reached out to interests so broad and varied that few could keep up with her.

Bereft of her parents at an early age, Jim developed a precocious interest in political life and the life of her Nation. She gave generously of her time, of her talents, and of her substance to those causes in which she believed.

Her life with our colleague, DICK BOLLING, was in many ways a fulfillment of her life's interests.

I know that our friend DICK feels a deep loss, and one that will leave a void in his life forever.

Words are shallow and inadequate vessels to convey the fullness of our feelings at a time like this. May it be of some comfort to DICK to know that there are others among us who, to some degree, share his shattering sense of loss, who under-

stand and feel with him the greatness of the companionship which he shared with this splendid woman, and who in the long future will rejoice with him in the legacy of memory and inspiration that her life has left.

Mr. MEEDS. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I will be happy to yield to the distinguished gentleman from Washington.

Mr. MEEDS. Mr. Speaker, I would like to join with the gentleman in the well and the others who have spoken in expressing my sympathy and the sympathy of my wife Mary upon the passing of Jim Bolling.

Not only was Jim Bolling the wife of one of our esteemed colleagues, but she was a close personal friend of both my wife Mary and myself. She was a blilliant person. Often people misinterpreted her caustic approach, but it really was a total inability to suffer inanity. She was too busy constructing to be deterred by negativism.

Every minute of her waking life was spent in thinking and in trying to help people. She started a career at the age of 15 as a political scientist, entering the University of Chicago, the youngest person to have done that. She ran the Young Democrats for Harry Truman in 1948. She was on the staff of Larry O'Brien in the Kennedy campaign and was President Kennedy's only female appointment as congressional liaison to the head of the Department of Health, Education, and Welfare.

She was an author, a photographer, a film producer, and cook, a marvelous person who found time in all that busy life to be a strong helpmate to our friend and colleague, DICK BOLLING. Their marriage was a partnership for creativity.

And so, Mr. Speaker, we grieve today with DICK BOLLING, grieve with him for his deep personal loss; but we also grieve for the loss to society of a person who, in her own right, made a difference.

I thank the gentleman for yielding.

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I yield to the gentleman from Pennsylvania.

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Louisiana (Mr. LONG) in expressing the sense of personal grief that I feel at the loss of Jim Bolling. Her death came so suddenly, which was good for her, but which makes it harder for all of us and especially our friend DICK.

Mr. Speaker, the union of the Bollings was not just a marriage. It was a partnership of love and hard work together. I consider DICK BOLLING one of the ablest Members I have ever served with, and I think part of the reason for that is the partnership he had with Jim.

Mr. Speaker, I know that no words can assuage this loss for DICK, but I want him to know that there are others who share his pain and grief. Jim Bolling was able not only to help DICK, but through her abundant energy and spirit, she gave counsel to many other Members of Congress.

Mr. Speaker, I think all of the Members of this House will feel deeply her absence and greatly miss Jim Bolling.

I thank the gentleman for yielding.

Mr. OBEY. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I am happy to yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Speaker, I would also like to join the gentleman in the well and others in expressing my personal sense of shock and loss at the passing of Jim Bolling.

She was the toughest woman I have ever met; and she had an absolutely fierce integrity. I think she saw through phoniness more clearly than any human being I have ever met. She was an extremely shrewd judge of people.

Mr. Speaker, I think Jim Bolling and DICK BOLLING were the most effective man-and-woman team I have seen in politics in my years in Congress.

I enjoyed playing poker with her more than with any other woman I have ever known. I must say that no woman was admired more by my wife than Jim Bolling.

Mrs. SPELLMAN. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I will be happy to yield to the gentlewoman from Maryland.

Mrs. SPELLMAN. I thank the gentleman for yielding.

I have listened to the comments that have been made about Jim Bolling. There is so much that could be added and so very little that I could express as eloquently as has been expressed.

My colleague, the gentleman from Wisconsin (Mr. OBEY) a moment ago said, "She was the toughest woman I have ever known," and I might add and also the gentlest. I have an invitation in my file at the moment inviting me to a shower that is being given for a member of the Congressman's staff. How like Jim it was to have thought about everyone and everything. She was tough where toughness was needed and so gentle in her dealings with her fellow beings. She was so thoughtful and the most gracious of hostesses.

If I had to use one word to describe Jim it would be "real."

I know that everyone who ever knew her is going to miss her, and we all express to DICK our condolences. We are aware that he must feel a loss that is greater than most because she was his partner in every aspect of his life at work, at home, in thought, and in deed. We share with him this very sad day.

Mr. WIRTH. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I am happy to yield to the gentleman from Colorado.

Mr. WIRTH. I thank the gentleman for yielding.

When we first come to the House, as younger Members we inevitably look to senior Members for guidance and direction. I certainly have gotten that guidance in a broad and deep fashion from DICK BOLLING. My wife, Wren, and I have also gotten that from DICK's wife, Jim, who has been the coach and mentor for us as people, just as DICK has been in the ways of the House.

We want to extend to DICK our great feeling of tremendous loss for a very dear and wonderful friend. I hope that in the future, our lives will grow in wisdom, so that we can be as helpful to others as Jim was to us.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I am happy to yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

I, too, wish to join with the gentleman from Colorado (Mr. WIRTH) and the other Members who have presented their remarks on the loss of our good friend Jim Bolling. I just want to reiterate what the gentleman from Colorado (Mr. WIRTH) has just stated, because Jim Bolling did make the transition—and DICK BOLLING also—from private citizen or former State representative to a Member of Congress a lot easier one for myself, my wife, and my children. For that I will always remember her.

Mr. LONG of Louisiana. I thank the gentleman.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. LONG of Louisiana. I am happy to yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank my colleague for yielding.

I do not think I ever met Mrs. Bolling, but hearing this morning what people have said, I can imagine what a terrible loss it must be. I do know our colleague, DICK BOLLING, however, and anything that hurts him is felt by all of us, because there is certainly no one in this House more respected and admired and for whom we have more affection, and it is to his hurt and sorrow now that I address myself.

Mr. LONG of Louisiana. I thank the gentlewoman.

Mr. FLOOD. Mr. Speaker, "Blessed are they that mourn: for they shall be comforted." These words of consolation and assurance, ancient yet ever-new, come again to our minds and hearts as we mourn the passing of Jim Grant Bolling, beloved wife of our friend and colleague in this House, Congressman RICHARD BOLLING. Both Mrs. Flood and I have been privileged to share the friendship of Mrs. Bolling throughout many years. The memory of her life and character remains as a benediction touching the shadows of grief with the light of remembered kindness and grace. To her husband and to all the members of her family and her many friends, we extend our deepest sympathy, mindful of the poet Longfellow's words,

Sail forth into the sea of life,
O gentle, loving, trusting wife,
And safe from all adversity
Upon the bosom of that sea
Thy comings and thy goings be!
For gentleness and love and trust
Prevail o'er angry wave and gust;
And in the wreck of noble lives
Something immortal still survives.

● Mr. MAHON. I have been pleased to listen to the beautiful and meaningful

words which have been spoken today about our late friend, Jim Bolling, and I wish to place in the RECORD an added tribute to her memory.

Jim Bolling was a rare individual. She was thoughtful, charming, and strong—a woman of great stature and ability. She was my friend, and I shall not forget that, just a few days ago, she came by my office and asked that I inscribe a book for her.

I join my colleagues in honoring her memory and in expressing sympathy to DICK BOLLING who has sustained an irreparable loss.●

GENERAL LEAVE

Mr. LONG of Louisiana. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the passing of Jim Bolling, wife of the Honorable RICHARD BOLLING of Missouri.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana.

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 12928, PUBLIC WORKS FOR WATER AND POWER DEVELOPMENT AND ENERGY RESEARCH APPROPRIATIONS

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 12928) making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERSONAL STATEMENT

(Mr. STAGGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STAGGERS. Mr. Speaker, I would like to share with the Members of the House something that happened to me. Last week I voted twice on different issues, and after I had voted, the pair clerk came to me and said that I was not recorded. I do not know whether it is a matter of the machine or whether it was a matter of my card or what, and I do not know whether it has happened to any other Members of the House or not, but I would urge them to check from here on to see whether they are recorded on the Board, as I am going to do.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 6669, CLIMATE PROGRAM ACT OF 1977

Mr. BROWN of California. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 6669) to establish a national climate program, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL EXPLANATION

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, at this moment President Carter and Secretary of Agriculture Bob Bergland are within a short distance of my district where the President is making a major address to the annual convention of the Missouri Farmers Association.

I was not able to accompany the President because today's schedule calls for vote on the rule on the equal rights amendment and necessarily includes amending the rule to provide a vote by the House for two-thirds requirement on final passage. Because I need to be here to protect my position in the event the rule would be taken up before 4 p.m. I have to be here in the House and cannot participate in the meeting in Columbia with the President.

HARRIS SURVEY SHOWS AMERICAN PEOPLE SUPPORT TAX RELIEF

(Mr. JONES of Oklahoma asked and was given permission to address the House and to revise and extend his remarks.)

Mr. JONES of Oklahoma. Mr. Speaker, I call attention of the House to some material I will put in the extensions of remarks today that deals with the tax bill the House of Representatives passed last week. We said then it was a good bill. I think the wisdom of that judgment is borne out in a recent Harris survey printed in today's Washington Post which shows that 75 percent of the American people support this level of tax cuts and 66 percent of the American people support relief in capital gains taxes.

Mr. Speaker, I will also submit a column in the Washington Star by former Senator Eugene McCarthy, whose liberal credentials are unassailable and whose thesis is that capital gains tax relief is the absolute best way in which to infuse new life, new capital and new jobs into the American economy.

PERSONAL EXPLANATION

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, in my absence from Washington for official business in the Fourth District of Arizona part of last Thursday, August 10, 1978, and Friday, August 11, 1978, I missed several recorded votes. I would like to go on record as to how I would have voted had I been here as follows:

On rollcall No. 681, an amendment to H.R. 13511 in the nature of a substitute that sought to extend four tax provisions due to expire at the end of the year; "no".

On rollcall No. 683, an amendment to H.R. 13511 that sought to increase the size of the total individual tax reduction by $2 billion, and to provide for a graduated alternative minimum tax on capital gains; "no";

On rollcall No. 684, a motion to recommit H.R. 13511 to the Committee on Ways and Means with instructions to report it back forthwith containing an amendment to provide an across-the-board cut in individual income taxes, averaging 33 percent phased in over 3 years; "yes";

On rollcall No. 685, final passage of H.R. 13511, to amend the Internal Revenue Code of 1954 to reduce income taxes; "yes";

On rollcall No. 686, approval of the Journal of Thursday, August 10, 1978; "yes";

On rollcall No. 687, approval of the rule under which H.R. 11280, to reform the civil service laws, is to be considered; "yes";

On rollcall No. 688, to resolve into the Committee of the Whole for consideration of H.R. 11280; "yes";

On rollcall No. 689, a motion to table a motion to reconsider the previous vote; "yes";

On rollcall No. 690, passage of H.R. 13007, to amend the Consumer Credit Protection Act to establish rights, remedies, and responsibilities for all participants in the utilization of electronic funds transfer services; "yes."

WORLD COUNCIL OF CHURCHES AND TERRORISM

(Mr. DORNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous material.)

Mr. DORNAN. Mr. Speaker, yesterday I again had the opportunity to walk among the ruins of the Roman Forum in Rome. As you know, on Saturday I had the honor of attending the funeral of one of the world's great men of peace, the beloved Pope Paul. In wandering through those ruins of the Great Roman Empire on Sunday it was easy as always to wonder what is to become of the Great Republic of the United States of America. Are there signs that we as a people have run our course? Perhaps, a few, and I saw one in a weekend news paper. Christians sending money to pagan murderers and terrorists.

The first editorial that came to my attention in reading the "Daily American" the Rome newspaper for Americans overseas, is a living nightmare for those who are concerned about the survival of our Judeo-Christian culture. The editorial tells of terrorism being supported by the World Council of Churches through an $85,500 grant to the so-called African "Patriotic Front", the terrorists and murders under Robert Mugabe and Joshua Nkomo, to support them in their operations against the nation of Rhodesia/Zimbabwe.

I think all Christians had better pay close attention to any group that in the name of Christianity sends money to the murderers of missionaries and their children. What is this madness when the Council of Churches is funding atheistic powers to kill innocent civilians who serve Jesus Christ.

Terrorism is one of the very things that Pope Paul agonized and grieved over throughout the last years of his life. It appears every corner of our confused humanity. even every religion, has its traitors who are seduced by the Marxist cruelty of "any means to an end."

Mr. Speaker, the article from the Daily American, the Rome edition of August 12, 1978 follows: Read and weep.

SUPPORTING TERRORISM

The World Council of Churches has accepted a very heavy responsibility, both for its collective conscience and for its stewardship of charitable funds, by deciding to contribute 45,000 pounds ($85,000) to the Patriotic Front terrorists operating against Rhodesia.

It is showing less than Christian honesty and forthrightness when it states that the money will be used for 'social programs.' Even if this were the case, no Christian organization should give support of any kind to political groups waging a campaign of indiscriminate terror against innocent civilians—especially when they are armed and backed by atheist totalitarian states.

The amount is not large, but it would be enough to buy quite an assortment of arms and explosives, which could be among those used to massacre Christian missionaries. Or it could pay for the abduction and indoctrination of quite a few African children, or to provide comforts for Cuban weapons instructors.

It is not only the actual amount that matters—which in this case is carefully adjusted so as not to provoke charges of extravagance—but the fact that a solid token of moral support is given.

RESIGNATION AND APPOINTMENT AS CONFEREE ON H.R. 11445, AMENDING SMALL BUSINESS ACT OF 1958

The SPEAKER laid before the House the following resignation as a conferee:

COMMITTEE ON SMALL BUSINESS,
Washington, D.C. August 14, 1978.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Due to my service on the Committee on Banking, Currency and Housing and the anticipated legislative matters to be considered by that committee in September, I believe it would be very difficult for me to serve as a conferee on H.R. 11445 as the conference committee on that bill is scheduled to meet in September.

Accordingly, I hereby respectfully submit my resignation as a conferee on H.R. 11445, an Act to amend the Small Business Act and the Small Business Investment Act of 1958.

Sincerely,

J. WILLIAM STANTON,
Member of Congress.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

The SPEAKER. The Chair appoints the gentleman from Kentucky (Mr. CARTER) to fill the vacancy, and the Senate will be notified of the action of the House.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair wishes to make a statement.

The floor proceedings of this House are now broadcast by radio beyond the boundaries of this Chamber. More people than ever before may now hear the debate on important matters of legislation. The Chair wishes to remind Members of their continuing obligation to maintain decorum and preserve the dignity of the proceedings of this body. While the freedom of speech in debate should never be denied or abridged, this freedom does not mean license to ignore these fundamental rules and practices of the House. The Chair and any Member appointed to occupy the Chair will take the initiative to preserve order and decorum.

FOREIGN AID APPROPRIATIONS, 1979

Mr. LONG of Maryland. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 12931) making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Maryland (Mr. LONG).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 12931, with Mr. KAZEN in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Friday, August 4, 1978, the Clerk had read through line 9, on page 14.

Are there any amendments?

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK: On page 14, line 7:

Strike "$95,000,000" and insert in lieu thereof "$93,700,000."

On page 14, line 9, strike the period, and insert the following: ": *Provided further*, That none of the funds appropriated or otherwise made available in this paragraph shall be obligated or expended for assistance to or in the Central African Empire."

Mr. ASHBROOK. Mr. Chairman, my amendment is designed to cut off aid under the Peace Corps programs to the Central African Empire.

Perhaps the amendment should be titled "The Man Who Would Be Emperor." This would pay tribute to Jean-Bedel Bokassa, a would-be Napoleon who recently crowned himself Emperor.

As you will recall, last December Bokassa held an elaborate coronation ceremony modeled after Napoleon's coronation in 1804. The cost of the extravaganza was $25 to $30 million in a nation where the average income is only $155 a year. I am sure Bokassa's subjects would have preferred a little less ceremony and a little more food for themselves and their children.

The waste of dollars in this impoverished country has continued. Emperor Bokassa recently squandered another $1 million on a personal villa in Switzerland.

I cannot justify using our tax dollars in the Central African Empire when the ruler of that country is throwing away millions of dollars on lavish personal items. This is simply wasted money, money that could be used to provide tax relief for our own citizens.

I would also mention the poor human rights record of the Bokassa regime. There have been widespread rights violations, while political opponents have been sent to jail or death.

According to the December 19, 1977, issue of Time magazine:

During his twelve years as dictator, Bokassa has established a reputation for megalomania and incompetence that rivals that of Uganda's Idi Amin Dada.

And that is a hard act to follow.

My amendment would save the taxpayers $1.3 million. I urge its adoption.

Mr. McHUGH. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, as the members of the committee will recall, this amendment was offered to the authorization bill and was rejected at that time by a vote of 228 to 169.

I think the committee properly rejected the amendment, because it flies in the face of what the essential purpose of the Peace Corps has always been. We certainly understand the motivation of the gentleman from Ohio (Mr. ASHBROOK) in offering the amendment. We cannot relate to, and indeed we can certainly condemn, the extraordinary behavior of the so-called emperor of the Central African Empire.

The point is, however, that the Peace Corps program should not be judged by the emperor's behavior. This is a people-to-people program. It is in no way supportive of the emperor and his high jinks in that country. The Peace Corps volunteers are out in the villages. They are working on programs which are essential and very helpful to the people who are oppressed by the emperor to whom the gentleman from Ohio (Mr. ASHBROOK) has referred.

I think it is on the merits of the Peace Corps program itself and what it does in that country that this amendment has to be judged, not on the behavior of the emperor, the individual who leads the government in that country. Of course, that is why the amendment was rather soundly defeated when it was offered previously. Where the Peace Corps is concerned, Congress has always treated this program on its merits and felt that it should not be subject to political considerations relative to the particular government in question.

Mr. Chairman, in a letter all Members of the House have received from the Peace Corps Directors who have served throughout the program's history, reference is made to a statement made by one of the supporters of the program in 1961:

The Peace Corps is not an instrument of foreign policy, because to make it one would deprive it of its contribution to foreign policy.

*

I think that is a very sound principle and one that should guide us during consideration of this amendment.

Mr. Chairman, I also have a list of the kinds of things that the Peace Corps volunteers are doing in the Central African Empire. They include small-scale, food-production programs geared toward individuals at the village level; health and village improvement projects to decrease the incidence of disease and provide villagers with the capacity of improving the quality of life by their own actions; educational programs to provide classroom contact with young minds, trained teachers to contribute to curriculum development, water projects to provide clean water supplies for villagers and lead to other community projects.

I think that this list demonstrates clearly that the Peace Corps is doing constructive work and should not be judged upon the activities of the so-called emperor; but, rather, based upon what the Peace Corps is doing for the people of the Central African Empire.

On that basis, Mr. Chairman, I certainly hope the Committee will reject this ill-advised amendment.

Mr. WINN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment of the gentleman from Ohio. This is the same amendment which the gentleman from Florida offered on April 25 to the Peace Corps authorization bill for fiscal year 1979. At that time, this House firmly, and I think wisely, rejected the amendment to cut funds for these Peace Corps projects in the Central African Empire, by a vote of 169 to 228.

I can sympathize with the point the gentleman is trying to make. He does not want to use U.S. tax dollars to support dictators, in this case the self-styled Emperor Bokassa I. I doubt that any of us disagree with that underlying aim. But, the point is that Peace Corps programs do not provide cash or commodities to the Emperor, his family, or retainers. Peace Corps fields some 65 individual American volunteers who live and work at the grass-roots level providing very basic, self-help assistance to the people, not the Emperor, of one of the poorest countries in the world.

Peace Corps volunteers are helping the villagers of the Central African Empire to develop local inland fisheries to improve their access to needed protein in their diets. Throughout the country they are working on rural health, education, and helping to install and maintain small-bore wells at the village level to make adequate potable water available.

These activities are not being done for the Emperor or as an expression of support for or approval of the Emperor. These direct, people-to-people Peace Corps projects are a voluntary expression of the traditional American spirit of humanitarian concern for our fellow men. When the people of a village see a volunteer working hard daily, side-by-side with them, on a village water system or a fish pond, those villagers are not saying this volunteer admires or supports the Emperor. They are probably thinking that now they will have clean water and more food on the table. I doubt that they are as inclined to read highly subtle political overtones into these direct and practical Peace Corps activities as some of us whose vocation is politics.

I am opposed to the gentleman's amendment because its underlying effect would be to politicize Peace Corps programs, to treat them like conventional, official AID government-to-government loans and grants. Proponents of this amendment have in the past referred to that provision of the Peace Corps Act which makes the Secretary of State, under the President's direction, responsible for seeing that the general direction of the Peace Corps is basically in line with the broad fundamental goals of American foreign policy. This is supposedly the statutory justification for the gentleman's amendment and its attendant politicization of the Peace Corps. Anything associated in any way with the category of "foreign policy" the proponents of this amendment consider to be primarily and inherently political. That is unfortunate. The House has always observed the difference between the essentially humanitarian, voluntary, people-to-people Peace Corps programs and conventional, government-to-government AID programs which are routinely used as instruments by which the U.S. Government seeks to directly influence the policies of other governments.

In closing, I would like to quote from a cable dated April 6, 1978, in which Secretary Vance reminded all U.S. diplomatic and consular missions of this distinction and its effects on the relations between the State Department and the Peace Corps:

Peace Corps Volunteers are not U.S. Government officials.

* * * * *

The essential role of the Peace Corps is to build links between the U.S. and the peoples of developing countries at the grassroots level, to provide practical and humanitarian assistance on a voluntary basis, and to demonstrate through the personal commitment of the Volunteers the interest and involvement of American citizens in the welfare of individuals in developing countries distinct and separate from the official relations and policies of governments. . . .

* * * * *

Such a role for the Peace Corps represents an intrinsic and important element of the broad foreign policy goals of the U.S. even though to be effective it must remain substantially separate from the formal day-to-day conduct and concerns of foreign policy because of its unique people-to-people character.

As former Secretary Rusk wrote to Chiefs of U.S. Missions: "To make the Peace Corps an instrument of foreign policy would be to rob it of its contribution to foreign policy."

* * * * *

By developing friendship, cooperation, assistanace and humanitarian associations between Peace Corps Volunteers and individual citizens of their host countries, the Peace Corps contributes significantly to that building of international understanding and sympathy between peoples which is an integral long-term objective of American foreign policy.

As I noted before, the House wisely rejected this amendment during the debate on the authorization bill. I urge the House to remain consistent and defeat it again today during our consideration of this appropriations bill.

Mr. BONKER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the gentleman who just spoke in the well and I both serve on the Subcommittee on International Development. We have been considering legislation to reorganize the Peace Corps, essentially to take the Peace Corps out of ACTION and make it an independent foundation. Throughout our hearings, one recurring theme has been the overall independence of the Peace Corps—apart from the United States foreign policy.

The gentleman from Kansas has made his points very well. The Peace Corps is an expression of American values and good will apart from the State Department, apart from our foreign policy. If we were to drag the Peace Corps into the overall consideration of foreign policy, as to whether or not we should be supporting various regimes throughout the world, then we have lost the purpose and the overall objective of the Peace Corps.

I would also point out that adoption of this amendment would not adversely affect the present government in the Central African Empire. It, in effect, would hurt the oppressed more than the oppressor. We have got to get our perspective on the Peace Corps and its overall commitment to other people throughout the world. It is not a government-to-government program; it is not a commitment to support of a particular government; it is basically a people-to-people program. If these people are being oppressed by dictators, we should not penalize them because of that fact. We should continue to help them.

Mr. Chairman, the final point I want to make is that the Central African Empire is not going to be in power forever. If we were to remove the Peace Corps or any semblance of a U.S. presence in that country, we have lost our opportunity to relate to those people, not only on a people-to-people basis, but as a reflection of our values. The Peace Corps gives us an opportunity to transcend our foreign pclicy objectives by relating to people in the country who may well be its future leaders. Almost every African leader on that continent today has been trained by Western missionaries; the impact of missionaries on that continent cannot be overestimated.

I think the Peace Corps has an independent and objective good will impact among the people in a given country by having a presence there, by having young Americans and older Americans working in that country. We are able to develop the rapport that may influence movements and leaders in the future in the Central African Empire.

So, I think it would be hasty and perhaps counterproductive if we were to act favorably on the gentleman's amendment. It was rejected back in April, and I think the House ought to reject it once again.

Mr. YOUNG of Florida. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, the gentleman from New York (Mr. McHUGH) is absolutely correct. This is an amendment which is similar to the one offered by this gentleman to the authorizing bill.

I would like to say to the gentleman from New York that a great number of our colleagues, after that vote was finalized, expressed some confusion because while the amendment was directed to the Central African Empire, for some reason, whether it was in the shuffle of papers or just what the reason was, a great many of our colleagues thought this amendment was intended to cut off all Peace Corps activities in all of Central Africa.

I would like to say to the chairman and our colleagues, that is not the case. This amendment does not go to all of Central Africa. It goes to one very small little country, whose name is: the Central African Empire.

So hopefully that confusion that existed the first time this amendment was considered will not exist today.

Mr. Chairman, several of our colleagues in their comments have talked about how the Peace Corps was not to be used as an instrument of our foreign policy, that it should not be involved politically. Mr. Chairman, I think the problem with these statements is simply this. That is not what the law says. That may be what the Members want it to be. That may be what the officials of the Peace Corps want us to believe. But, Mr. Chairman, that is not what the Congress said when they wrote the Peace Corps Act. When the Congress wrote the Peace Corps Act, in section 4, paragraph 3, the law says, and this is not merely somebody's opinion, this is what the law says:

(3) Under the direction of the President, the Secretary of State shall be responsible for the continuous supervision and general direction of the programs authorized by this Act, to the end that such programs are effectively integrated both at home and abroad and the foreign policy of the United States is best served thereby.

So I submit, Mr. Chairman, that those of our colleagues who believe the Peace Corps should not be part of our foreign policy are certainly entitled to believe that, but that is not what the law says. I invite anyone who would like to read it to come by the desk. The copy is here for anyone who would like to read what the law says.

Mr. Chairman, in their 1978 publication, Freedom House rated the Central African Empire among the worst violators of political rights and civil liberties. In fact, the Empire's status of freedom was listed as "not free".
